

## WHAT IS CTP?

---

CTP (Comprehensive Testing Program) is an achievement assessment produced by ERB—a not-for-profit member organization that has provided student assessment services for over 90 years.

CTP is a summative assessment of learning achievement. Its purpose is to identify the academic strengths and weaknesses of both individual students and groups of students. This enables schools to make informed decisions about their curriculum to better serve their students.

## SUBTESTS AND CONTENT STRANDS

---

CTP is comprised of individual subtests to assess different subject areas. The subtests your student takes will vary depending on your student's current grade and the needs of your school.

The questions on each CTP subtest are further classified into “content strands or domains” that identify the specific skill each question is designed to measure.

## WHAT DOES THIS REPORT TELL YOU?

---

The Primary Grade Parent Report describes your student's CTP performance on different subtests and content strands.

- Your child's performance on the test is classified as Exceeding Expectations, Meeting Expectations, or Developing.
