

2021-2022 ImPACT Concussion baseline training

This year STA **WILL NOT** be offering onsite ImPACT (Concussion) baseline testing due to lack of space and computer access. We will be having student athletes complete this testing at home. The following are the instructions needed to complete the ImPACT test on a personal computer.

To perform this test on a personal computer:

All you need is a computer, reliable internet access, and a mouse. You must have a mouse to complete the test. It is important to use a mouse. If you do not use a mouse the test will come back invalid.

Here are the steps needed to access the test:

1. Enter www.impacttestonline.com/schools into your browser (preferably google chrome)
2. Enter Code: **874084c995**
3. Saint Thomas Academy should appear on the screen. Click Launch test.
4. Read all instructions prior to the test. It will collect background demographics.
5. Complete **all** test sections
6. Once the test is completed send a separate email to Cole Hartwigsen (chartwigsen@cadets.com) stating that it has been completed and the information/results will be updated and recorded.
