

Frequently asked questions about the Middle Years Programme

What is the Middle Years Programme?

The Middle Years Programme (MYP) is a curriculum framework designed for learners aged 11–16 by the International Baccalaureate (IB). The MYP is a five-year programme, which can be implemented in a partnership between schools or in abbreviated two-, three- or four-year formats.

In an MYP classroom, you'll notice that the students are at the centre of learning. They are drawing connections between all subject areas, learning is explicitly linked to the world around them, participation in a foreign language is required, and a variety of formal and informal assessments are used to inform teaching and learning. MYP learning experiences infuse global points of view wherever possible in order to promote understanding of other cultures, an awareness of the human condition and an understanding that there is a commonality of human experience.

The MYP curriculum framework comprises eight subject groups, providing a broad and balanced education for early adolescents. Students take the core courses of language and literature, individuals and societies, mathematics, sciences, physical and health education, language acquisition, arts, and design. A unique feature of the programme is that it extends the traditional curriculum to include immersion in four themes— approaches to teaching and approaches to learning, global contexts and concepts. Students also complete a personal project, which is an independent piece of work that may be an essay, an artistic production or another form of expression.

What are the advantages of an IB education?

- IB World Schools (the only schools authorized to offer IB programmes) are subject to a strict accreditation process monitored by the IB, ensuring that schools provide a high-quality education.
- IB teaching methods and curriculums are research-based and draw from the best educational practices from systems around the world.
- IB teachers are required to participate in many professional development opportunities to continually promote their awareness of current educational practices and new thinking.
- IB programmes are recognized internationally and ease the educational transition of mobile students so that their education is not adversely affected if their families relocate.
