

Enrollment/Retention 8th Grade Timeline

Revised 04-14-2016

Right Student ... Right Program ... Right Reasons
Enrollment > Retention > Graduation

04-14-2014: We recapped the RT through the dinner which was very successful. We worked through the summer drips including the orientation/testing and the first 10 days. We discussed in depth that this years first 10 days must kickoff the Career Tree in each CTE program and in academics the lessons created to help students understand both careers and lifestyles - laying the groundwork for each student to work through the Career Tree research in each CTE program. We also reviewed the early steps in the ET and must further review the ET at our first meeting of next school year.

03-15-2016: We discussed the enrollment number and we are up 15.3% over last year with in district students. 111 last year through June and 128 this year as of March 14th. We reviewed the Career Tree and determined that it is not being adopted and used to the best of our organization. Jack will lead the enhanced deployment of the trees with the focused and regular use of the trees in both CTE and academic classrooms. We recapped the ET and are prepared to starting making plan tweaks at the April meeting. We also recapped some of the RT and reviewed in depth the Dinner event. We will recap the RT and start planning the summer drips, first 10 days, and then calibrate the ET start of the school year at our April meeting.

02-11-2016: We discussed the branding construct and dialogued about the following steps. Our goal is to approve the construct by March 15th so I can share the update with staff. We also discussed our applications and we are at 135 verses 85 last year for in district towns. We are down significantly for out of district towns, but due to the changes in the law - that is to be expected as they cannot come. We also discussed the RT Dinner and surrounding drips to ensure that we are planning effectively. We discussed the dinner (90 minutes, dinner first, split groups off after dinner (students team building and parents dessert and answering questions - presenting needed info as needed)). The team will create the tactical level plan and George will send to me 1 week prior to our March 15th meeting. I will present to staff and make the case to be a part of this important evening. Staff do not have to come - as it is an optional event according to their contract. We will conclude the discussion on March 15th and Mark will adjust the presentation if needed.
