(REGULATION)

VENDING MACHINES

District practices and procedures will be established to maintain compliance with the United States Department of Agriculture (USDA) regulations regarding the use and placement of vending machines.

On elementary campuses, vending machines that serve carbonated beverages and snack items may only be operated in the teachers' lounge.

On secondary campuses, vending machines shall be placed so as not to interfere with instructional or food services programs. Vending machines that serve carbonated beverages and snack items may not be operated in cafeterias during lunch periods or thirty minutes before or after lunch periods. In order to ensure compliance with USDA regulations, any vending machines serving carbonated beverages or snack items should not be located in the vicinity of the cafeteria unless placed adjacent to the cafeteria in a location that meets the regulatory standards.

Receipts from vending machines shall be deposited in the school activity fund account and accounted for in accordance with Board Policy CFD (LOCAL).
