

Ms. Dunn and Ms. Amber's Rainbows

Welcome to our page!

Despite the obstacles we encountered at the beginning of the year dealing with Hurricane Ida's shenanigans, our rainbows have proven that resilience is their strongest strength. We have been in full gear the last four weeks. The rainbows are currently writing numerals 0 to 12. They enjoy segmenting and blending sounds to prepare them to read independently. They have also learned to write the sounds 'a', 'd', 'm', 'c', 't', and 'o'. They have been exposed to hands-on activities in math using manipulatives to solve math problems. They are very vocal in science . They have created anchor charts and critiqued their peers' work during walk-throughs. Mrs. Amber and I are anxious to see their work when they build a dig out for the class shelter model as we discuss engineer's challenges. Naptime has been eliminated in order to have more instructional time to implement MClass and Montessori works. Our rainbows have fun, but their least favorite activity is to pair-share during discussions. This is most definitely our biggest challenge. However, we are looking forward to the experiences to come.

Thank you for visiting us!

Hello,

My name is Terrilyn Dunn. I have been teaching for six years after I retired from my first career. My mom encouraged me to start teaching being a retired educator herself. I am glad she did. I am now carrying on her legacy in her memory. This is my second year at Hammond Westside Montessori School. I enjoy all primary grades, but Kindergarten is my most favorite. I am excited about this school year. I truly believe my class is a gift from God as He knows what I need in my life. As stated earlier, we had boulders rolled toward us the beginning of the year, but these Rainbows are not allowing anything to stop them. Thank you for entrusting your child to Hammond Westside Montessori School where I can be a part of their foundation.
