# Who is Coach Josh?

I grew up in Yazoo City, MS. and I have a BA degree in Architectural Engineering Technology from, the University of Southern Mississippi. I was reading about Fred Rogers and decided to look into teaching. My mother, who is a retired teacher from the Yazoo City Public School System, often brought her work home... emotionally. I never fully understood this until my wife and I adopted our 3 girls in 2018. As I began the process of teaching I have come home with the same heartfelt concerns for these students who may be having a hard time. I hope to be a teacher that will see the potential of every student I teach and help cultivate and nurture their growth so they can become who they are meant to be; a smart, capable student that can and will achieve their potential, respect themselves, others and their environment.
