

Muncie Community Schools

Software Access Guide for Parents

A guide to help parents create PowerSchool and Schoology accounts.

Why?

As a parent, being involved in your child's education is paramount. With classrooms using 1:1 devices, this poses new challenges, but also provides great opportunities for staying informed about your child's education.

PowerSchool is the Student Information System (SIS) used by Muncie Community Schools. This is the software used to take attendance daily and generate report cards, transcripts, and other important data for the school corporation. As a parent, you can log in to PowerSchool and check your child's current grades, attendance, teacher comments, and account balances. You can also have grade updates emailed to you on a regular basis!

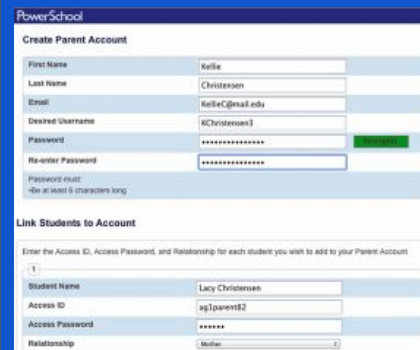

Schoology is the Learning Management System (LMS) used by Muncie Community Schools. Teachers use Schoology to deliver information and instruction to students digitally. Students may turn in digital work, take assessments, or view digital resources for class. As a parent, you can see when assignments are due, look at your student's submissions, see classroom announcements, and look at student results for tests and quizzes. Schoology lets you go into the classroom digitally.

PowerSchool

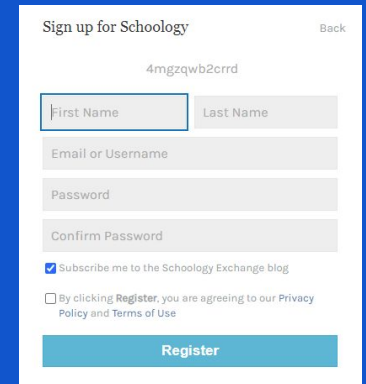

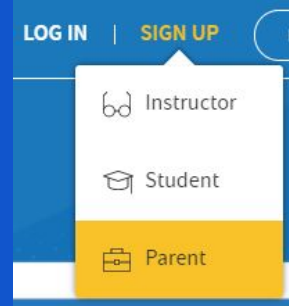

- Student Information Systems (SIS)
- Attendance
- Report cards
- Transcripts
- Account Balance
- Registration
- Most student information
- Parent contact info
- Talks with other software pieces
