

CHILDCARE IMMUNIZATION INFO FOR PARENTS

South Carolina Childcare Immunization Requirements 2021–2022

Childcare includes nursery or preschool programs (4K and younger) or any licensed childcare center. Children enrolled in childcare must be up to date on the following shots based on their age.

- Hepatitis A (born 1/1/2019 and after)
- Hepatitis B
- DTaP (whooping cough, tetanus)
- Polio
- Pneumococcal (pneumonia)
- Haemophilus influenzae Type b (Hib)
- MMR (measles, mumps, rubella)
- Varicella (chickenpox)

Infectious diseases such as measles, chicken pox, and whooping cough can spread quickly among babies and children who haven't had their shots. That's why it's so important to vaccinate all children. Vaccines are proven to be safe and effective.

Children who are fully vaccinated by age 2 are protected against 14 harmful diseases.

Follow these steps to make sure your child is up to date.

1. **Schedule** regular checkups as recommended by your child's healthcare provider.
2. **Ask** your child's healthcare provider about the vaccines your child needs.
3. **Obtain** a new South Carolina Certificate of Immunization every time your child has a shot.
4. **Give** a copy of the new South Carolina Certificate of Immunization to your childcare provider.

New Requirement for 2020

All children born on or after January 1, 2019, will need two hepatitis A shots for childcare attendance. Hepatitis A vaccine is given starting at age 12 months, followed by a second shot six months later. Talk to your child's healthcare provider at your child's next visit.

You can also get your child's vaccines at South Carolina Department of Health and Environmental Control health departments. For an appointment, call 855-472-3432.
