

Automotive Technician

Learn entry-level skills in the service and maintenance of today's advanced automobile systems guided by the nationally recognized Automotive Service Excellence (ASE) standards. Develop skills in diagnosis and repair of brakes, suspension systems, steering, engine performance, and transmission systems based on the National Automotive Technicians Education Foundation (NATEF).

What will you learn?

Students will learn diagnosis of malfunctions and repair of engines, fuel, electricity/electronics, cooling, brake systems, drive trains, and suspension systems. The program is outfitted with an industry-standard workshop, with NATEF standard tools and equipment, and provide the students with an opportunity to become nationally certified.

What can you be certified in?

Brakes, Engine Repair, Suspension/Steering, Engine Performance, Electrical/Electronic Systems, Manual Transmission, Maintenance/Light Repair.

What careers are available?

- Automotive Service Technician
- Aircraft Mechanic
- Marine Technician Specialist
- Fleet Manager
- Transportation & Systems Inspector

Year One

- *Brakes (1 Credit)
- *Engine Repair (1 Credit)
- *Suspension/Steering (1 Credit)

Year Two

- *Engine Performance (1 Credit)
- *Electrical/Electronic Systems (1 Credit)
- *Automotive HVAC (0.5 Credit)
- *Transmissions (0.5 Credit)

Articulation Agreements

- *Community College of Baltimore County
- *Ohio Technical Institute
- *Nashville Auto-Diesel College (NADAC)
- *Montgomery College
- *Penn College
- *Advanced Technical Institute (ATI)
