

# Community Service Project

A community Service Project is anything that you do which makes your community a better place or betters the lives of the people in your community. It can be a church-related service, a project that you do for 4-H, a service you do through a club, peer tutoring, etc. It cannot be something considered as a family obligation (such as baby sitting a younger sibling or spending time with an invalid grandmother.) Nor can it be labeled as doing a favor for a friend or neighbor. The project must be totally volunteer-not something for which you are compensated in any way.

The person who verifies your participation must be a supervising adult who is not related to you.
