

## VACCINATION STATUS

We have begun random testing of unvaccinated students. In order to identify those students who will not require testing, we are asking that vaccinated students provide proof of vaccination by clicking

--> [Instructions to Upload Proof of Vaccine](#) <--

As we continue to monitor and mitigate the transmission of the COVID-19 virus, having this information is beneficial to all. For example, if a vaccinated student is exposed to a positive case, and they are asymptomatic, they do not have to be quarantined.

## RANDOM TESTING

Beginning this week, 10% of our students that are unvaccinated will be randomly selected to be tested using a rapid test. Each testing window will take 2 weeks. Students and parents/guardians will be notified in advance if the student has been selected. Testing will take place before school, during lunch, and after school.

Students or parents/guardians must provide consent to test via Primary.Health in order to be tested at SBHS. If a student or a parent/guardian does not provide consent, a test result from a medical physician will be required. If you have any questions, please contact Nate Mendoza at [nmendoza@sbunified.org](mailto:nmendoza@sbunified.org).

## PROVIDING CONSENT FOR TESTING

All students, regardless of vaccination status, should register in Primary.health and provide consent for COVID testing.

Why?

1. If the student is unvaccinated and is selected for random testing, they can receive a test at school.
2. If a student is vaccinated and is symptomatic or a close contact to a positive person, they can receive a test at school.

Please see the following steps for help completing the COVID testing registration/consent process on Primary.health:
