Sir or Ms,

This is a Freedom of Information public records request under ILCS § 132 "Public records". I need copies of records indicating any and all testing done on water in systems and/or fixtures either used or possibly used for human consumption inside or on the grounds of the public schools in your system. This would include routine scheduled testing and/or one-time testing in the last 5 years by your personnel or under your direction.

I do not need all records of all tests just enough to establish:

- If any such testing was done.
- If it's a continuing program
- When and where the samples were drawn
- Any results that are indicative of a level over the action level of or allowable limit for lead in water systems of .015 mg/L or that you consider problematic (you may use a lower level).
- Any corrective action that was taken.
- Any established program for future testing for lead.

Also, any records indicating that you flush such systems after periods of inactivity to remove accumulated lead.

RECEIVED

SEP 28 2021

BCSD HUMAN RESOURCES

I am aware that the water coming into the schools is tested prior to arrival and am not interested in those tests - just tests run on samples collected inside the school or on school grounds.

I do not wish to create an undue burden for your staff. I intend for the response to this to be of reasonable length. If your anticipated response will be over about 50 pages please contact me at watchncgov@gmail.com. Also, use that address for any questions or a response.

In the interest of expedience, I hereby approve any reproduction expense up to \$20.

Thank you!

Sincerely,

A handwritten signature in black ink, appearing to read "G. H. Wissmiller", written in a cursive style.

George H. Wissmiller
