

Congenital cytomegalovirus (CMV) is the most common viral infection, and the leading cause of non-genetic hearing loss, that infants are born with in the United States.

Every pregnant woman is at risk of acquiring CMV.

And 91% of women **DON'T** know about it.

CMV is common, serious and preventable.

1 out of 3 pregnant women who become infected with CMV during pregnancy will pass the virus through to their unborn child

1 child is permanently disabled every hour

1 in 200 children are born with congenital CMV each year

5 Simple Tips to Help Prevent CMV

Avoid contact
with saliva when
kissing a child

Do not put a
pacifier in
your mouth

Do not share
food, utensils,
drinks or straws

Do not
share a
toothbrush

Wash your hands
after changing
a diaper
