

# KIS CURRICULUM BOOKLET FOR PARENTS

MORE  
**KIS**  
THAN ACADEMICS

### **Mission**

At KIS, we nurture international mindedness within our multilingual school community by providing an inquiry-based curriculum focused on the development of the whole child as a caring, open-minded, lifelong learner.

### **Vision**

We are a diverse community which aspires to:

- Learn enthusiastically.
- Inquire creatively and critically.
- Follow our passions.

### **Objectives**

We accomplish our Vision by:

- Being an IB World School offering an international curriculum.
- Welcoming and celebrating a multicultural community where each individual is valued and honoured.
- Using English as the principal language of instruction while other languages are taught and promoted.
- Providing excellent English language support for every student in order to participate fully in all aspects of school life.
- Recruiting, training and retaining well-qualified faculty and staff who are dedicated, caring, and experienced professionals helping each student achieve their potential.
- Providing essential Information and Communication Technology (ICT) skills suitable for the learning process at each grade level.
- Being self-sustainable, fiscally honest, transparent, responsible and accountable to each KIS stakeholder.
- Ensuring we provide learning experiences that encourage our students to exemplify the Learner Profile.

## What is the International Baccalaureate?

It is a non-profit educational and non-governmental (NGO) organization that was established in 1968 in Geneva, Switzerland. The IBO offers four programmes of international education for students aged 3 – 19 years:

**The Primary Years Programme (PYP) for 3–11 year olds.**

**The Middle Years Programme (MYP) for 12–15 year olds.**

**The Diploma Programme (DP) for 16–19 year olds.**

**The Career-related Programme (CP), also for 16–19 year olds.**

## What are these “Learner Profiles” that produce internationally-minded students?

**Inquirer** - We nurture our curiosity, developing skills for inquiry and research. We know how to learn independently and with others. We learn with enthusiasm and sustain our love of learning throughout life.

**Knowledgeable** - We develop and use conceptual understanding, exploring knowledge across a range of disciplines. We engage with issues and ideas that have local and global significance.

**Thinker** - We use critical and creative thinking skills to analyze and take responsible action on complex problems. We exercise initiative in making reasoned, ethical decisions.

**Communicator** - We express ourselves confidently and creatively in more than one language and in many ways. We collaborate effectively, listening carefully to the perspectives of other individuals and groups.

**Principled** - We act with integrity and honesty, with a strong sense of fairness and justice, and with respect for the dignity and rights of people everywhere. We take responsibility for our actions and their consequences.

**Open-minded** - We critically appreciate our own cultures and personal histories, as well as the values and traditions of others. We seek and evaluate a range of points of view, and we are willing to grow from the experience.

**Caring** - We show empathy, compassion and respect. We have a commitment to service, and we act to make a positive difference in the lives of others and in the world around us.

**Risk-taker** - We approach uncertainty with forethought and determination; we work independently and cooperatively to explore new ideas and innovative strategies. We are resourceful and resilient in the face of challenges and change.

**Balanced** - We understand the importance of balance in different aspects of our lives – intellectual, physical and emotional – to achieve well-being for ourselves and others. We recognize our interdependence with other people and with the world in which we live.

**Reflective** - We thoughtfully **consider the** world and our own ideas and experience. We work to understand our strengths and weaknesses in order to support our learning and personal development.

## International Mindedness at KIS

In our KIS community, we strive towards international mindedness. We exhibit international mindedness by understanding, appreciating and accepting the world around us. We inquire into and are knowledgeable about different cultures. We are open-minded to different beliefs and values. We are caring and principled. We want to know what needs to be done to make our world a better place for every living thing, while reflecting on and communicating the needs of others. We are balanced in our respect and celebration of the differences that make up our world. We willingly take risks when action or leadership is needed in our global community.

## What is learning at KIS?

KIS is an authorized Primary Years Programme (PYP) school, authorized in April, 2011. KIS is committed to structured inquiry as the vehicle for learning. Six transdisciplinary themes provide the framework for the exploration and construction of knowledge. Teachers and students are guided by these transdisciplinary themes — as they design Units of Inquiry for exploration and study. Through this process, students develop an understanding of important concepts, acquire

essential skills and knowledge, develop particular attitudes and learn to take socially responsible action.

We believe in the holistic development of children, tapping their potential curiosity and innate talents to bring out well balanced confident individuals, and lifelong independent learners.

We strive to develop global citizens who respect cultures, who open-mindedly nurture the diversity found around them, and who endeavour to lead by example.

We develop attitudes that make our learners caring and empathetic towards those less privileged and enable them to realise that they have the power to make a change.

We respect each child's individuality and uniqueness and are committed to enrich and widen their horizons.

## What does “transdisciplinary” mean?

The word ‘transdisciplinary’ refers to connections that transcend individual disciplines. Transdisciplinary study involves the links or interconnections across disciplines. It is a reflection of the reality in which we live. A transdisciplinary concept may reach across disciplines such as Mathematics, Science, English and Social Studies, and link them all together; by definition, such a concept is not confined to one subject. For example, the concept of ‘change’ may feature in Mathematics, Science, English, and Geography. The Primary Years Programme reflects a transdisciplinary approach to teaching and learning, thus promoting understanding of the real world.

## Knowledge

What do we want students to know about?

This is the significant, relevant content that we wish the students to explore and know about, taking into consideration their prior experience and understanding. Knowledge is both transdisciplinary and disciplinary, represented by traditional subject areas. Six transdisciplinary units of inquiry Languages Social Studies Mathematics Science and technology Arts Personal, social and health education Physical Education

### Six Transdisciplinary Themes:

<b>Who We Are</b>	An inquiry into the nature of the self; beliefs and values; personal, physical, mental, social and spiritual health; human relationships including families, friends, communities, and cultures; rights and responsibilities; what it means to be human.
<b>Where We Are in Place and Time</b>	An inquiry into orientation in place and time; personal histories; homes and journeys; the discoveries, explorations and migrations of humankind; the relationships between and the interconnectedness of individuals and civilizations, from local and global perspectives.
<b>How We Express Ourselves</b>	An inquiry into the ways in which we discover and express ideas, feelings, nature, culture, beliefs and values; the ways in which we reflect on, extend and enjoy our creativity; our appreciation of the aesthetic.
<b>How We Organize Ourselves</b>	An inquiry into the interconnectedness of human-made systems and communities; the structure and function of organizations; societal decision-making; economic activities and their impact on humankind and the environment.
<b>How the World Works</b>	An inquiry into the natural world and its laws; the interaction between the natural world (physical and biological) and human societies; how humans use their understanding of scientific principles; the impact of scientific and technological advances on society and on the environment.
<b>Sharing the Planet</b>	An inquiry into rights and responsibilities in the struggle to share finite resources with other people and with other living things; communities and the relationships within and between them; access to equal opportunities; peace and conflict resolution.

## Concepts

These are the eight fundamental concepts expressed as key questions, to propel the process of inquiry.

**Form:** What is it like?

**Function :** How does it work?

**Causation :** Why is it like it is?

**Change:** How is it changing?

**Connection :** How is it connected to other things?

**Perspective :** What are the points of view?

**Responsibility:** What is our responsibility?

## Approaches to Learning Skills

There are five sets of ATL skills acquired in the process of structured inquiry. These are:

**Thinking Communication Social Research Self-Management**

## Action

The programme encourages the students to reflect, to make informed choices and to take positive action that will help their peers, and the community. Students demonstrate a deeper sense of learning, by applying their knowledge to service and positive action.

## PYP Exhibition – What is it all about?

The exhibition is a culminating experience which reflects all the major features of the PYP. It offers the students the opportunity to explore knowledge conceptually, which is significant and relevant, to reflect on and apply their learning, to choose appropriate courses of action and to display attitudes.

The PYP student is required to engage in a collaborative, trans disciplinary inquiry process that involves identifying, investigating and offering solutions to real life issues or problems.

The PYP exhibition has a number of key purposes:

- To provide students with an opportunity to demonstrate independence and responsibility for their own learning.
- To provide the students with an opportunity to explore multiple perspectives.
- Application and Reflection of learning through the PYP programme.
- To demonstrate how one can take action as a result of his/her learning.
- To unite the teachers, parents and other members of the school community in a collaborative experience that incorporates the essential elements of the PYP.
- To celebrate the transition from primary to middle school.

## Home-School Communication

### Responsibilities

Good communication between the school and parents is absolutely necessary to facilitate the partnership of parents and teachers working in harmony to achieve the best education for each child. Therefore, the school has put into place a number of procedures and events to foster this communication. Parents are encouraged to maintain open lines of communication with their child's teachers in order to be well-informed regarding their child's progress.

The language of instruction is English and all school documentation is sent out in this language with Russian translation. Parents should make sure that they understand all our correspondence. In case they do not grasp everything in a notice, they should contact the school as soon as possible. We want to make sure that communication between school and parents is good. Most often we use email as a medium to contact parents, which is why it is extremely important that parents provide us with current email addresses.

### Written Communication with School

KIS recognizes the need for clear communication channels between parents and the school.

We particularly support the opportunity for parents and teachers to communicate directly via email. E-mail addresses of teachers will be e-mailed to families separately at the beginning of the school year.

Please note the following parental guidelines in the use of any e-mail communication with the school:

- E-mails can be used to inform the teachers of something that happened at home or ask questions that require only a brief answer.
- If there are issues that require a discussion or a longer explanation, it will be better to arrange an appointment with the teacher.
- The nature of some teacher schedules may result in some emails only being answered the next day but we will try to answer all emails within 24 hours.
- Any urgent issues that need to be dealt with the same day need to be communicated via the registrars.
- Any communication by e-mail between home and school should always be cordial and respectful.

### Meetings with Teachers

Good communication between parents and school is essential in providing quality education for all students. It is highly encouraged that all staff members contact parents and have good communication with them. The school schedules two Three - way conference sessions, a Student-led conference and the Back to school evening in August. It is imperative that if a student is having problems, the teacher consults with the Elementary Leadership team and contacts the parents as soon as possible for a scheduled meeting.

### Procedure for Parental Concerns

KIS recognizes the need for the home and the school to address concerns effectively and provides them with a procedure for constructive discussion. The steps below are to be followed strictly.

**Step One:** The parents should confer with the subject or homeroom teacher.

**Step Two:** The parents have the right to confer with the relevant Programme Coordinator if, after seeing the teacher, they require further discussion.

**Step Three:** If, after seeing the relevant Coordinator, the matter is not resolved and the parents require further discussion, an appointment may be set with the Principal. The parents may reasonably expect a response within two working days.

**Step Four:** If the parents feel the issue is not addressed, they may bring the matter to the Head of the School whose decision is final. Once again an appointment must be made through the school Registrar. The Head of School will respond within two (2) working days.

### Weekly Newsletter

The school newsletter is sent home via email once a week. It is intended to provide a variety of information about school activities and events. It is important that parents take the time to read the newsletter, as this is a primary source of communication about the whole school community.
