

# GET VACCINATED!

## 5-11 YEAR OLDS ARE NOW ELIGIBLE FOR COVID-19 VACCINE

The FDA and CDC have authorized and recommended the Pfizer COVID-19 vaccine for children ages 5-11. The opportunity for your children to get their vaccine and protect themselves from COVID-19 is here!

### Ways to Get Your Child Vaxxed

- Contact your Health Care Provider or Pediatrician's office
- Attend a Mobile Clinic or Vaccine Hub in your local area or school community
- Go to [MyTurn.ca.gov](https://MyTurn.ca.gov) to register for an appointment
- See [acoe.org/vaccines](https://acoe.org/vaccines) for information on vaccine opportunities near you

### IMPORTANT

Currently, Pfizer is the only vaccine authorized for use in 5-11 year-olds\*

\*Dose for children will be different than for adults

\*2 doses are required three weeks apart for full vaccination

## THREE REASONS TO GET YOUR CHILD VACCINATED!

COVID-19 Vaccines are effective at preventing illness and protecting against the most serious impacts of the virus.

COVID-19 Vaccines may protect others, including vulnerable teachers and family members, from COVID-19.

COVID-19 Vaccine is now mandated by State of CA; students will need to be vaccinated to attend school once vaccines receive full FDA approval.

*Parental consent is required for this age group, and any person under 12 who receives this vaccine must be accompanied by a parent or guardian. Parents or guardians as well as the students receiving the vaccine will need to bring identification with a birthdate to the site.*
