

Translate on Remind

Remind has the option to automatically translate your messages in a number of languages to fit your preferences. No matter what language the message is sent, you will receive it in the language preference you set in your settings.

To change your language settings, log into your account on a computer, click on your name in the top right corner and then click on Account Settings.

Then click on Profile.

Scroll down and then click on Language preferences.

Preferred language

Messages you receive will be translated to your preferred language. [Learn more.](#)
