

User Classifications and Rental Fee Schedule

The rental fees charged for the use of District facilities will be based on the following user classifications and rental fee schedule:

User / Activity Classifications

- **Classification I** applies to school-support organizations as defined in GKD(LOCAL). The District will be reimbursed for any paid staff time incurred by the District as a result of a school-support organization's use of a school facility.

Classification I also applies to regular meetings being held in a school facility, on school days when classes are not in session, by the following nonschool organizations:

- Crime watch groups,
- Homeowners' associations,
- Neighborhood associations,
- Nonprofit community organizations, and
- Governmental agencies.

Activities other than regular meetings by these nonschool organizations may result in a rental fee at the Classification II or III rate.

- **Classification II** applies to non-revenue generating activities by nonschool organizations as defined in GKD(LOCAL).

Nonschool organizations whose non-revenue generating activities are of a direct benefit to the school, students, staff, and/or school parents will receive a 25-percent reduction on the rental fee of a school facility.

- **Classification III** applies to all for-profit organizations and for revenue generating activities by nonschool organizations.

Nonschool organizations whose revenue generating activities are of a direct benefit to the school, students, staff, and/or school parents may receive a 15-percent reduction on the rental fee of a school facility.

"School day" is defined as a day when the school is open for student classes. School day could apply to Saturday or summer school classes.

"Nonschool day" is defined as a day when student classes are not held, regardless of whether staff is present. Typically nonschool days are weekends, holidays, District vacation periods, and summer break.
