## **CAPITAL IMPROVEMENT PROGRAM 2015-2016 THROUGH 2019-2020**

Revised April 16, 2015

# PREFACE

## Capital Improvement Program

### **Article XI**

**Mayor to Initiate the Capital Projects Budget Process.** The Mayor shall initiate the development of a Capital Projects Budget in the same manner, subject to the same powers and in accordance with the same time-frame as the general fund budget as contained in Article X, in the City's Charter.

**Annual Capital Projects Program Estimates.** It shall be the duty of the officers of the several departments, including the Department of Education, to submit annually to the Mayor or designee and the Board of Finance and Taxation, a recommended capital projects or improvement program which shall include the proposed method of financing each individual capital project or improvement and shall be based on estimates of the costs of such projects as submitted by each department, office or agency annually in the same manner as the annual estimates prepared for the Proposed Budget, pursuant to 10-3(a).

**Submission of Capital Projects Budget Estimate.** The officers of the several departments of the City shall, not later than the second Friday in January of each year (unless such day occurs before the tenth day of January in which event the date shall be not later than the third Friday in January), simultaneously transmit to the Mayor or designee and the Board of Finance and Taxation in detail the six (6) year Capital Projects Budget. Said officers shall submit the estimates required by this section using the forms, system, and/or methods prescribed by the Mayor or designee.

## **ACKNOWLEDGEMENTS**

### **MAYOR**

Erin E. Stewart

### **COMMON COUNCIL**

Ald. Suzanne Bielinski - Mayor Pro-Tempore  
Ald. Tonilynn Collins - Majority Leader  
Ald. Wilfredo Pabon - Minority Leader  
Ald. Eva Magnuszewski – Assistant Majority Leader  
Ald. Adam Platosz – Assistant Majority Leader  
Ald. Jamie Giantonio – Assistant Minority Leader  
Ald. Shirley Black  
Ald. Carlo Carlozzi Jr.  
Ald. David DeFronzo  
Ald. Donald Naples  
Ald. Daniel Salerno  
Ald. Louis Salvio  
Ald. Emmanuel Sanchez  
Ald. Robert Smedley  
Ald. Michael Trueworthy

### **BOARD OF FINANCE AND TAXATION**

Mary Marrocco, Chairwoman  
Mark DeGrandis, Vice Chairman & Bonding Sub-Committee  
Robert Kusiak, Bonding Sub-Committee  
Maritta Daddio  
Peter Denuzze  
Bruno Lukas  
Josephine Moreno

## **INTRODUCTION**

A Capital Improvement Program (CIP) is a plan that describes all of the capital projects that a city proposes to undertake during a six-year period. Capital projects that have a cost of \$10,000 or more, a life expectancy of five (5) years or more, or impact a major capital facility, are included in the CIP. New Britain doesnot include capital equipment in its CIP. Many capital projects span several years and have a planning/pre-construction phase, plus a construction phase.

**PUBLIC WORKS  
DEPARTMENT**

**City of New Britain  
Capital Improvement Program  
Budget Request**

<b>Project Title:</b> Allen Street Road Reconstruction Phase I (Farmington Ave to Oak Street)	<b>Activity/Department:</b> Public Works
---	--

**Description / Purpose / Justification**

**Justification:** The Public Works Department is charged with administering the City's Streetscape and Street Rehabilitation Projects. Funding for this specific project will go towards Phase I of the Allen Street Road Reconstruction project which consists of approximately 3,200 feet of full depth road reconstruction to provide proper drainage and an effective pavement structure. Streetscape enhancements will be added and deteriorated sidewalks, curbing and driveway aprons and sidewalk ramps will be replaced to meet current standards and . The existing traffic signal at the Allen/McKlintock intersection will be removed as part of this project.

*Figures shown below are tentative. Vendor selection process requires further discussion. \**

**Expenditure Schedule**

**Project Title:** Broad Street Reconstruction  
(Phase 2)

**Activity/Department:** Public Works

**Description / Purpose / Justification**

**Justification:** This project involves the design and reconstruction of approximately 2200 feet of Broad Street, from Horace Street westerly to and including and its intersection with Burritt Street, with a full depth pavement structure and uniform cross slope. This is the final Phase of reconstruction of Broad Street. This very vibrant commercial area is in desperate need of new paving, curbing, sidewalks and pedestrian ramps. In addition, the existing old and undersized storm sewer will be upgraded and replaced. The out-dated Broad Street at Burritt Street traffic signal will be replaced and the area, including Pulaski Park at the western end of the project, will be further enhanced with various streetscape improvements.

**Project Title:** Sidewalk and H/C Ramp Improvement Program

**Activity/Department:** Public Works

**Description / Purpose / Justification**

**Justification:** The Public Works Department is charged with administering the City's Annual Sidewalk Improvement Program. Under this program Public Works goal is to improve pedestrian facilities located within the City's right-of-way and improve public safety. Sidewalk issues are significant, such as tripping hazards, and can result in claims against the City. This annual program addresses the repair of cracked and/or deteriorated sidewalks, sidewalks with tree-root damage, sidewalks sunken by unstable subsurface conditions, and the upgrade of non-compliant pedestrian ramps. The program has been very successful in recent years and Public Works is continuing to refine and improve the program.

**Project Title:** Chesley Park Install Artificial Turf on Football and 2 Softball Fields

**Activity/Department:** Public Works

**Justification:** Continue to improve the usefulness of one of the football field and 2 softball fields at Chesley Park by upgrading the playing surfaces. These upgrades include removal of existing turf and topsoil, improve and upgrade the existing drainage system, relocate the on-field utilities, install new goal posts, make changes to the irrigation system. Install stone base and artificial turf playing surface. Install team benches, bleachers, fencing and garbage receptacles. This will better serve the needs of youth football, softball and soccer, adult leagues and City sponsored softball and kickball leagues. Includes construction to conform to all applicable federal, state and local handicap accessible applications.

City Wide Facilities Repair Improvement Bond						

**City of New Britain  
Capital Improvement Program  
Budget Request**

**Project Title:** Fire House Improvements

**Activity/Department:** Public Works

**Description / Purpose / Justification**

**Justification:** The New Britain Fire Department has outdated and aging facilities. The City has not invested nearly any resources in fire department facilities infrastructure for decades. The neglect continues to have a negative impact on a safe and effective work environment for firefighters and officers. It also is difficult to provide superior service to the public without adequate, modern facilities. Lastly, such deteriorating facilities cost a disproportionate share of the annual budget. It is money that must be spent to keep the aging buildings and equipment operational, but it is spending money not investing money. This assessment will evaluate and determine the adequacy of current facilities with recommendations for renovation of existing facilities and construction of new stations. This includes all aspects of the fire department and emergency management. The assessment will include an analysis of station locations on effective response and neighborhood service levels.

*Figures shown below are tentative. Vendor selection process requires further discussion.\**

<b>Project Title:</b> Replace Elam St Low Service Tank (Priority)	<b>Activity/Department:</b> Water Department
--	--

**Description / Purpose / Justification**

**Justification:** This tank is one of two storage tanks located in the NBWD's low pressure zone. The tank was constructed in 1956 by National Gunite Corporation and is an AWWA type II tank. The tank has a sag in the dome and is 125 feet in diameter. As a result of an inspection performed by Natgun and Geolnsight, it was determined that the tank needs to be replaced. Also included will be replacement of three 20" diameter, inoperable valves that are over 100 years old, installation of generators in two pumping stations, refurbishment of water mains at the tank site and associated instrumentation and control.

<b>Project Title:</b> Fire Station 4 Renovation (@ Corbin & Rte 72)	<b>Activity/Department:</b> Fire Department
---	---

**Description / Purpose / Justification**

**Justification:** The 2-bay, Station 4 was built in the 1940's and has most of the original building components. The station houses one of the Fire Department's 6 engine companies. It continues to deteriorate requiring increasing operational dollars to maintain. It is also very energy inefficient. Most importantly, it does not meet the needs of a modern FD / EMS facility. It does not have current safety and health features important for the safety of firefighters' at work. It also cannot fit new fire apparatus into the fire station since the station's overhead doors are an inadequate size. As part of the renovation, a third larger apparatus bay will be added to accommodate a new, larger fire pumper. The other existing bays will be slightly modified and can be used to house an ambulance and/or support vehicles. The original building will be completely renovated with new mechanicals, windows, roof, updated living quarters, energy efficiency components, code updates, geothermal heating/cooling and /solar photovoltaic panels.

*Figures shown below are tentative. Vendor selection process requires further discussion.\**

<b>Project Title:</b> Fire Station 1 - New Building (Corner of Lasalle St. and Beaver St.)	<b>Activity/Department:</b> Fire Department
---	---

**Description / Purpose / Justification**

**Justification:** The 5-bay, Station 1, also known as Fire Headquarters, was built in 1968 and has most of the original building components. The station houses one of the Fire Department's 6 engine companies and 1 of two ladder companies. The City-wide Shift Commander also works out of this location. It continues to deteriorate requiring increasing operational dollars to maintain. It is also very energy inefficient. Most importantly, it does not meet the needs of a modern FD / EMS facility. It does not have current safety and health features important for the safety of firefighters' at work. It also cannot fit new fire apparatus into the fire station since the station's overhead doors are an inadequate size. The building was also built over an active stream and it has pumps which run constantly to prevent the basement from flooding, even during dry weather. The new station, possibly built opposite the current station, will be a well-built state of the art public safety building incorporating energy efficiency components, geothermal heating/cooling and /solar photovoltaic panels. This "public safety station" will incorporate all elements of a modern fire / EMS station as well as EMS facilities for community paramedicine and a police substation. It should also house a community meeting room for public functions.

*Figures shown below are tentative. Vendor selection process requires further discussion.\**

**Expenditure Schedule**

Cost Elements	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	TOTAL
Design / Engineering				200,000		200,000
Site Costs				1,500,000		1,500,000
Construction / Building Improv.				7,500,000		7,500,000
Furniture / Equipment				250,000		250,000
Other				50,000		50,000
Contingency				500,000		500,000
<b>Total</b>	-	-	-	10,000,000	-	\$10,000,000

<b>Project Title:</b> Facilities Repair / Upgrade (At all city Fire Stations and Emergency Management Buildings)	<b>Activity/Department:</b> Fire Department
--	---

**Description / Purpose / Justification**

**Justification:** This funding will continue the upgrade of Fire Department stations and facilities until all stations can be renovated or rebuilt with new buildings. The City did fund \$ 375,000 in 2014 for this purpose. This funding is providing some repairs and upgrades but is only buying time until major renovations or new fire stations can be completed. This additional funding is needed to continue needed upgrades.

*Figures shown below are tentative. Vendor selection process requires further discussion.\**

<b>Project Title:</b> Fire Station 2 - New Building (Corner of South Main & South Whiting St.)	<b>Activity/Department:</b> Fire Department
---	---

**Justification:** The 4-bay, Station 2 was built in 1968 and has most of the original building components. The station houses one of the Fire Department's 6 engine companies and 1 of two ladder companies. It continues to deteriorate requiring increasing operational dollars to maintain. It is also very energy inefficient. Most importantly, it does not meet the needs of a modern FD / EMS facility. It does not have current safety and health features important for the safety of firefighters' at work. It also cannot fit new fire apparatus into the fire station since the station's overhead doors are an inadequate size. The new station, possibly built across South Whiting St. will be a well-built state of the art public safety building incorporating energy efficiency components, geothermal heating/cooling and /solar photovoltaic panels. This "public safety station" will incorporate all elements of a modern fire / EMS station as well as EMS facilities for community paramedicine and a police substation. It should also house a community meeting room for public functions.

**Project Title:** Training Tower for FD/EMS/PD  
(Adjacent to Station 5 @ Stanley St. and  
Smalley St.)

**Activity/Department:** Fire Department

**Description / Purpose / Justification**

**Justification:** This long proposed training facility is primarily for fire personnel but is for all public safety personnel. New Britain is the only large municipality not to have a dedicated training building within its City limits. Firefighters need a local facility in order to train on a daily basis. While out-of-town training facilities are available for specialized training, basic routine training needs to be conducted locally since firefighters train while on-duty. The location for the training facility is at Station 5 on Stanley St. It is centrally located and can be used by personnel from across the City. While it has been and is intended to serve the NBFD personnel it will also benefit two other groups. The first group is the other public safety agencies of New Britain, namely police and EMS. This facility will allow the police to conduct SWAT and other tactical training activities. Since the FD operates daily with the NBEMS, combined training on extrication, patient removal from upper stories of a building and EMS mock-ups can be accomplished together at this facility. The second group is New Britain's neighboring fire departments, including but not limited to Berlin, Southington, Plainville, Farmington and Newington. Such cooperative training opportunities will increase regional operational capability. The total cost includes necessary site improvements including fire hydrants & parking lots.

<b>Project Title:</b> Fleet Facility Upgrade (Adjacent to Station 5 @ Stanley St. and Smalley St.)	<b>Activity/Department:</b> Fire Department
--	---

**Description / Purpose / Justification**

**Justification:** The Fleet and Facilities Division (Mechanics/Maintenance Division) was built as part of the Fire Station 5 complex on Stanley Street in 1983. The building and equipment are 32 years old. Current Ladder 2 and the new Ladder 1 cannot fit in the building to be repaired. Both cannot be effectively serviced due to building size limitations. The original in-ground lift cylinders have been repaired but never completely replaced. They leak hydraulic fluid and need replacement. This project expands the rear of the building and replaces all underground lift cylinder equipment. Since the concrete floor needs to be jackhammered out, the entire concrete floor will be replaced and the incorrect drainage pitch corrected. The internal configuration will be reconfigured into a modern efficient fleet repair and maintenance shop. Project cost includes building and equipment costs.

<b>Project Title:</b> Fire Station 8 - New Building (Opposite Hospital for Special Care)	<b>Activity/Department:</b> Fire Department
---	---

**Description / Purpose / Justification**

**Justification:** The 1-bay, Station 8 was built in 1953 and has most of the original building components. The station houses one of the Fire Department's 6 engine companies. It continues to deteriorate requiring increasing operational dollars to maintain. It is also very energy inefficient. Most importantly, it does not meet the needs of a modern FD / EMS facility. It does not have current safety and health features important for the safety of firefighters' at work. It also cannot fit new fire apparatus into the fire station since the station's overhead doors are an inadequate size and the apparatus bay is too short for a modern truck. The new station, possibly built at the corner of Corbin Avenue and Governor Street, will be a well-built state of the art public safety building incorporating energy efficiency components, geothermal heating/cooling and /solar photovoltaic panels. This "public safety station" will incorporate all elements of a modern fire station as well as EMS facilities for community paramedicine and a police substation. It should also house a community meeting room for public functions.
