Rebecca Balke, P.E.

Paul Burgess, P.E., LEP

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR § 312" and 12.13.2. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (Phase I ESA) was completed for the property located at 125 Columbus Boulevard in New Britain, Connecticut for the City of New Britain. The City of New Britain intends to demolish the building and make the land available for redevelopment.

The purpose of the Phase I ESA is to identify areas of concern (AOCs) that have resulted from current or historical uses of a site. AOCs are defined in the Connecticut Department of Energy and Environmental Protection (CT DEEP) Site Characterization Guidance Document as locations or areas at a site where hazardous waste and/or hazardous substances (including, but not limited to, petroleum products) have been or may have been used, stored, treated, handled, disposed, spilled, and/or released to the environment. This definition of an AOC is generally consistent with the definition of a recognized environmental condition (REC) contained in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-13). The SCGD and ASTM E1527-13 were followed in completing this Phase I ESA.

The Phase I ESA scope of work included records reviews, site reconnaissance, and interviews. The scope did not include a hazardous building material survey; however, information was included where available from past studies.

1.2 Site Description

The site is located at approximately 41° 41' 02.10" north latitude and 72° 46' 39.62" west longitude in downtown New Britain and is shown on Figure 1-1. It is found on the Assessor's Map C8A Lot 10. A schematic site plan is provided in Figure 1-2. The property consists of one structure on approximately 2.26 acres of land. The 69,800-square-foot brick/masonry structure is three stories in addition to a basement, and is surrounded by asphalt parking lots and paved sidewalks. The property is owned by the City of New Britain and was used as the City's Police Station from 1967 to 2011. The building is currently unoccupied; however, it is still used for police training exercises.

The building basement contains a former pistol range, spent ammunition storage room, transformer vault, two elevator machine rooms, generator room, boiler room, mechanical equipment room, and evidence storage rooms/areas. The first floor of the building was mainly used for prison/holding cells, offices, and records storage. The second floor was mainly used for squad rooms, classrooms, locker rooms, offices, and interrogation rooms. The third floor was mainly used for courtrooms, judge and attorney offices, and court records storage. The property contains two underground storage tanks (USTs): one 5000-gallon heating oil tank is located to the southwest of the building and one 1,000-gallon diesel UST is located to the east of the building (refer to Figure 1-1).

DRAFT

Basement floor drains lead to a sewage ejector pump that discharges to the City wastewater system, and building perimeter drains lead to a sump that discharges to the City stormwater system.

To the north, the site is bordered by Columbus Blvd and the location of the new CTfastrak station. To the east, it is bordered by Columbus Blvd and a shopping center and associated parking. To the southeast, it is bordered by a CVS Pharmacy and parking lot. To the south, it is bordered by Herald Square and a vacant vegetated lot known as "Parcel 9". To the west, it is bordered by a hotel and attached restaurant. The Harry Truman Overpass section of Route 71 is located above the western portion of the Site property.

1.3 Site History

City Assessor's records indicate that the Site property was purchased by the City of New Britain on December 8, 1964. Assessor's data also indicate that the existing building was constructed in 1967. Prior to this, historical Sanborn Maps from 1884 through 1954 indicate the Site and surrounding land were used by the Stanley Rule and Level Co., a division of Stanley Works, for the manufacture of numerous tools and hardware including planes, mitre boxes, rulers, hand drills, hammers, and wood and iron levels. An internet search of the Stanley Rule and Level Co., revealed that Henry Stanley launched the company in New Britain in 1878. The Sanborn Maps also indicate that the area where the current Site at 125 Columbus Blvd is located was used specifically for carpenter shops; coal bins; box making and shipping; storage of case goods, box lumber, and castings; paint storage; and "mill construction rooms" for tumbling, tempering, iron planing, japanning, pickling and plating. Refer to Appendix A for a copy of City Assessor's records and Appendix B for historical Sanborn Maps.

Historical aerial photographs show the Stanley Rule and Level Co. buildings present and relatively unchanged from 1934 to 1965. The next available aerial photograph is from 1970, which shows the existing former police station building. Historical topographical maps show no buildings present in 1966, so it is inferred that the Stanley building were demolished in this year. Environmental Data Resources, Inc. (EDR) provided City Directory information back to 1970, which identifies the property as the Police Station and related services (superior court, small claims court, public safety telecom, detective bureau, etc.). Refer to Appendix C for historical aerial photographs and Appendix D for City Directory information.

The Site was used as the City's police station from 1967 through 2011, when a new station was constructed on Chestnut Street. At the former police station (the site subject to this Phase I), the three main floors of the building were used for office space, courtrooms, holding cells, etc. The basement level contained a pistol range, arsenal and ammunition storage, evidence storage, boiler room, generator room, transformer vault, two elevator machine rooms, and other associated mechanic rooms. The Site is currently unoccupied although it is still used at times for police training exercises.

DRAFT

1.4 Summary of Previous Reports

In October 2001 HYGENIX, Inc. of Stamford, CT completed an Asbestos Inspection Report on the New Britain Police Station for the City of New Britain, City Hall Commission. The report provided findings from HYGENIX's asbestos survey conducted on October 4 and 5, 2001 of the property at 125 Columbus Blvd. Findings included a list of building materials suspected to contain asbestos, material condition, location, and approximate quantity of suspect material. Identified asbestos containing materials (ACM) or potential ACM included thermal insulation, plaster, flooring tiles and mastic, carpet glue, transite, window glazing and caulking, roofing and flashing material, and wall glue.

In December 2001, HRP Associates of Plainville, CT completed a Phase I Environmental Assessment Report on the New Britain Police Station at 125 Columbus Blvd for the City Engineer. This report summarized a May 20, 1999 letter report from HRP regarding the removal of the original 2,000-gallon diesel UST in April 1999. During its removal, a petroleum sheen was noted on the groundwater in the excavation and elevated levels of volatile organic compounds (VOCs) were detected on field screening equipment. A total of 48.7 tons of contaminated soil was removed and disposed of off-site in August 1999. Soil samples from the bottom of the UST grave contained total petroleum hydrocarbons (TPH) at concentrations ranging from 644 to 4,259 parts per million (ppm), exceeding the Residential Direct Exposure Criteria, Industrial/Commercial Direct Exposure Criteria, and/or the GB Pollutant Mobility Criteria. Three groundwater monitoring wells were installed and sampled four times between January and October 2000 for TPH and VOCs. Contaminants were not detected above the applicable state criteria. Halogenated VOCs were detected at low levels ranging from not detected to 60 parts per billion (ppb). A Phase I was recommended to investigate the source of the halogenated VOCs.

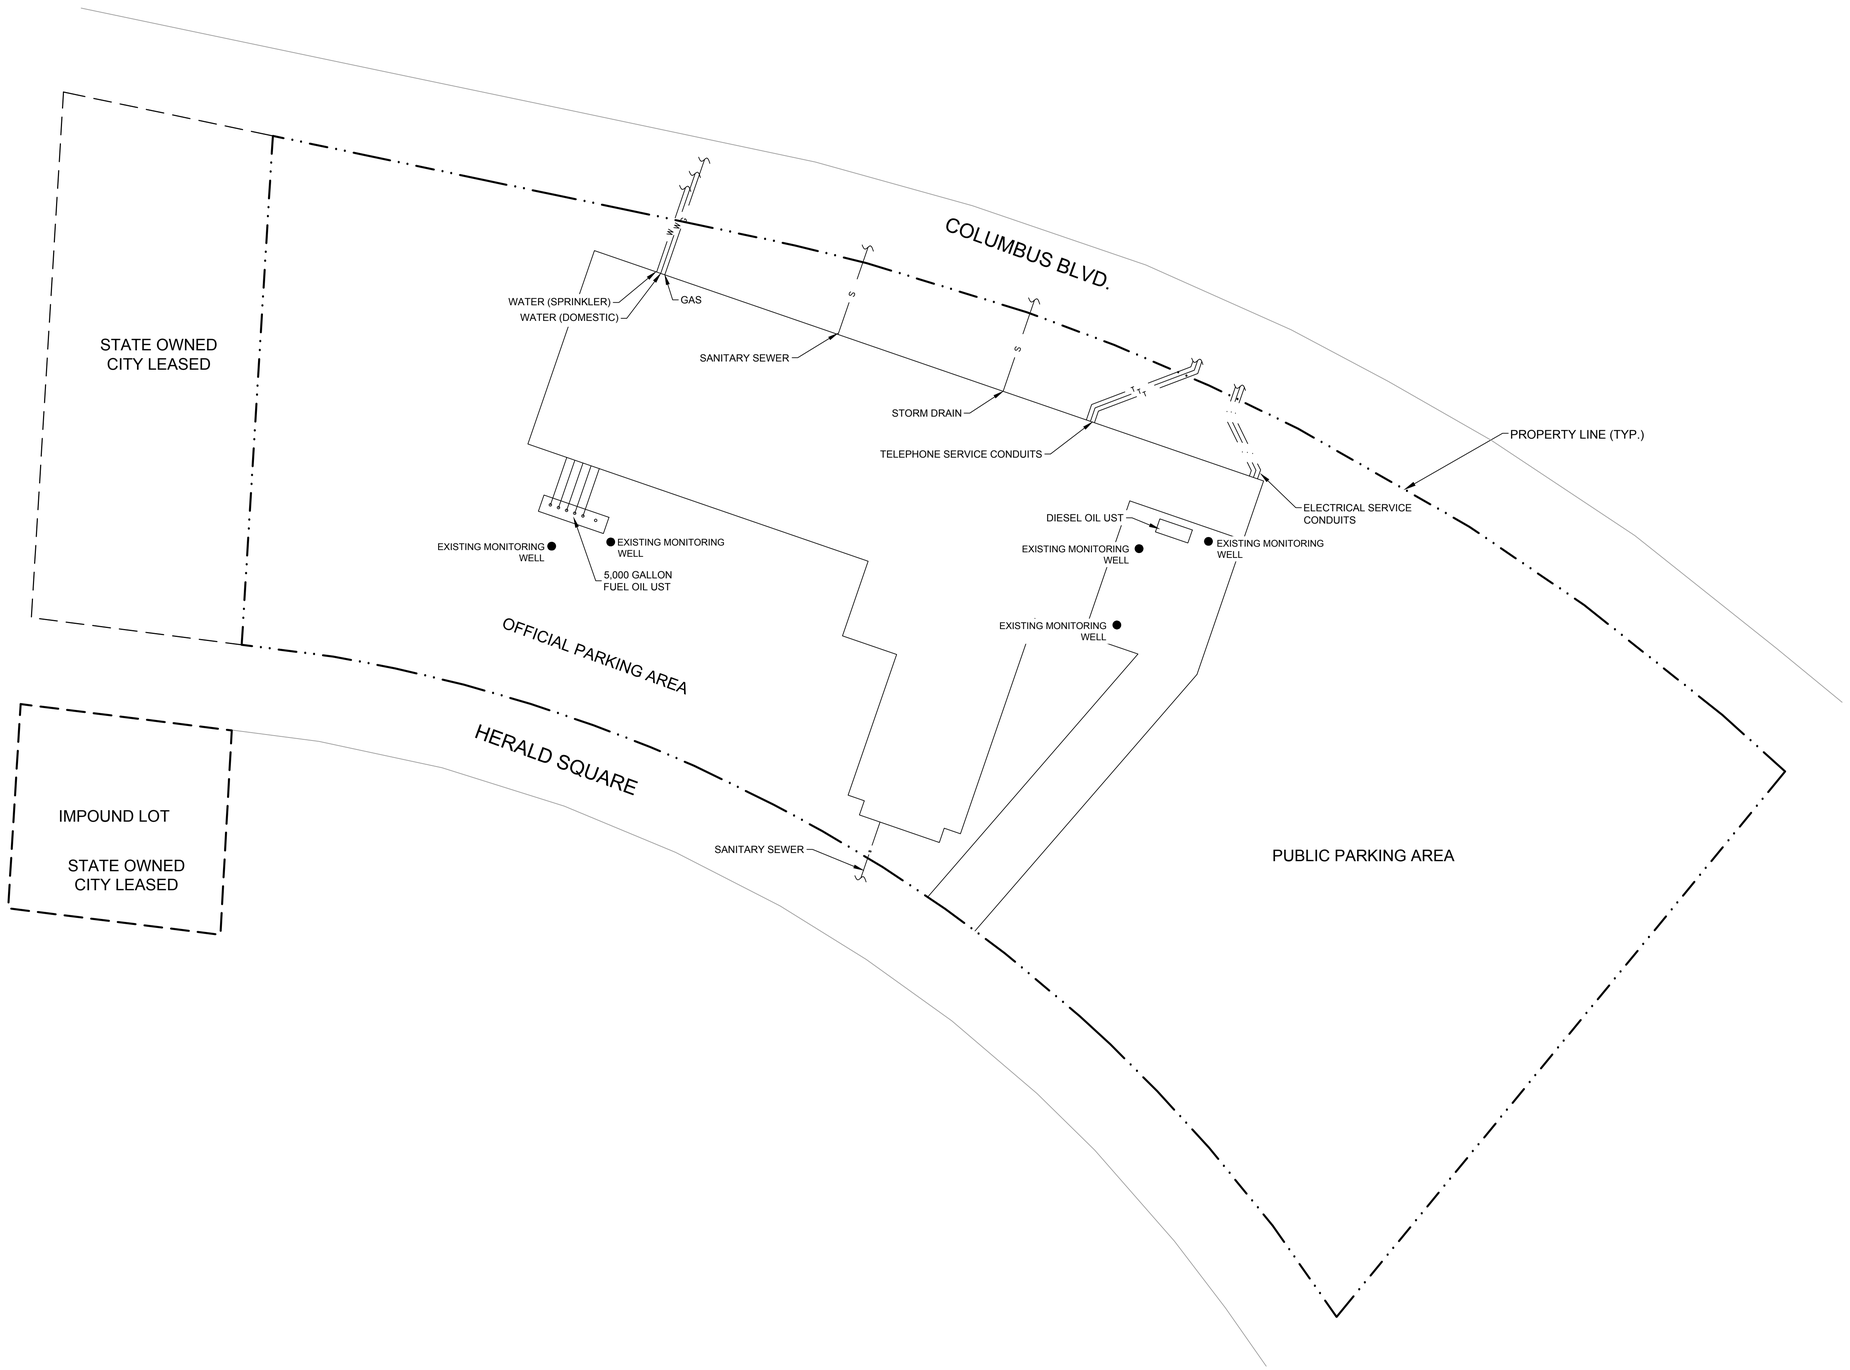

The 2001 Phase I report identified several containers of cleaners, degreasers, paint, oil, and other materials stored on site during the time of the inspection. In addition, petroleum staining was noted on the concrete floor of the generator room and used oil from the generator was indicated to have been stored on-site until it was taken to the City Yard and added to the waste oil tank. Two drums of unknown content were also present next to the trash dumpster during the inspection. The Phase I report recommended a lead abatement and closure program when the pistol range is to be closed; an Asbestos Containing Building Materials Survey of the entire building; proper characterization and disposal of the contents of the two drums by the dumpster; and a subsurface investigation of the property including the area of the original heating oil tank for which no post-removal soil evaluation was conducted.

Also in December 2001, HRP Associates completed a Receptor Survey for the New Britain Police Station which summarized potential human and environmental receptors in the vicinity of 125 Columbus Blvd in New Britain, CT, with a focus on public and private water supply sources. Results of this survey indicated that the downtown area has been supplied with municipal water since 1850. Also, the New Britain Health Department, USGS, and CT DEP had no records of any water supply wells in the study area.

In January 2013, CEI provided a letter to the City that provided an estimate for remediation for known environmental conditions at the Former Police Station. CEI was assisted by HRP Associates in preparing the estimate and the letter summarized the purpose, activities and

assumptions used in preparing the estimate. In addition to remediating the ACM as identified in the 2001 HYGENIX report, the letter included the potential remediation of PCB-containing materials (building caulk and window glazing material), miscellaneous hazardous materials (fluorescent lights, refrigerants, oils, and chemicals), and soil around the two USTs. The presence of PCB-containing materials was not confirmed in this letter.

2.0 Environmental Setting

2.1 Land Use

The land use surrounding the Site is generally commercial and the zoning at the property and surrounding properties is Central Business District (CBD). CBD zoning allows for mixed commercial and residential uses. To the north, the site is bordered by Columbus Blvd and the location of the new CTfastrak busway station. To the east, it is bordered by Columbus Blvd and a Price Rite shopping center and associated parking. To the southeast, it is bordered by a CVS Pharmacy and parking lot. To the south, it is bordered by Herald Square and a vacant vegetated lot known as "Parcel 9". To the west, it is bordered by a LaQuinta Hotel and associated parking and an attached Chinese restaurant. The Harry Truman Overpass section of Route 71 runs above the western portion of the Site. The City of New Britain intends to demolish the building and make the land available for redevelopment.

2.2 Topography

The Site property is mainly flat and based on USGS topographic mapping, the elevation is approximately 175 feet above mean sea level. Refer to Appendix E for historical topographical maps.

2.3 Site Geology

Based on the USGS Surficial Materials Map of Connecticut, loose till, generally less than 10 to 15 feet underlies the entire property. Based on the Connecticut Geological and Natural History Survey Bedrock Geology of the New Britain Quadrangle, 1990, bedrock below the property is Hampden Basalt, a dark-gray, orange- to brown-weathering basalt. When buildings were demolished during the City's Urban Renewal in the late 1960s, most of the building materials were used as fill throughout the downtown area of New Britain. This is expected to be the case for the Site property as well.

2.4 Groundwater

Based on the CT DEEP's map titled "Water Quality Classifications", groundwater below and near the Site property is classified as GB. The GB classification indicates groundwater within a historically highly urbanized area or an area of intense industrial activity, and areas where public water supply service is available. Such groundwater may not be suitable for direct human consumption without treatment due to waste discharges, spills or leaks of chemicals, or land use impacts. Class GB designated uses are industrial process water and cooling waters and baseflow for hydraulically-connected water bodies. The direction of groundwater flow below the Site property is anticipated to be northeast, based on groundwater flow direction reported in a 2008 Phase II/III ESA report prepared for 1 Bosco Drive, New Britain,

DRAFT

Connecticut, located 0.17 mile south of the Site.

2.5 Surface Water

There are no surface water bodies or wetland areas on the Site. The nearest surface water body is Willow Brook located approximately 1 mile south of the Site property. Webster Brook is located approximately 1.25 miles east of the Site property. Willow Brook and Webster Brook are both classified by the CT DEEP as Class A Surface Waters. Class A designated uses include habitat for fish and other aquatic life and wildlife; potential drinking water supplies; recreation; navigation; and water supply for industry and agriculture.

2.6 Water Supply

Potable water is supplied to the Site by the City of New Britain Water Department. The City has eight water supply sources including surface and groundwater sources. All City sources are located greater than one mile from the Site. According to the New Britain Water Department, there are no known public or private wells in the Site vicinity.

There are no Non-Transient Non-Community Water Systems or Transient Non- Community Water Systems in New Britain, according to the CT Department of Public Health website.

DRAFT

3.0 Records Review

A regulatory database report was prepared by Environmental Data Resources, Inc., (EDR) and used as a screening tool to identify sites with potential or existing environmental liabilities. Specified government databases were searched in accordance with EPA's Standards and Practices for All Appropriate Inquiries (40 CFR 312) and the ASTM 1527-13. The EDR search included the required federal, state, and local databases, discussed in more detail below.

The subject property was identified in the EDR report as a site with known potential or existing environmental liabilities. In addition, numerous surrounding sites were identified in the EDR Report as having regulated environmental activities or conditions. Sites within 1/8 of a mile and upgradient sites within 1/2 of a mile were reviewed in more detail to determine if there was any potential to impact the subject property. More detailed information regarding the location and status of these sites is provided in Appendix F which contains the EDR Radius Map Report. (The complete EDR search report is included as Appendix B through G.) A title search was not performed under this scope, however, the presence of liens and ELURs were identified as part of the EDR search. The EDR database identifies CERCLA Liens and liens placed by the CTDEEP Cost Recovery Program.

Several sites are identified as generators of hazardous waste or storage facilities for underground storage tanks (USTs); however, the EDR Report indicates that either no violations have been reported for these sites or the project has been closed. This information indicates that it is unlikely that any environmental conditions at these sites have impacted the subject property.

3.1 Standard Environmental Records

A search of available standard environmental records was conducted by EDR. Table 3-1 lists the databases that were searched for the target property at 125 Columbus Boulevard (the Site) as well as adjoining and surrounding properties based on required minimum search distances. A database in **Bold** contained the Site and a database in *Italics* contained one or more surrounding properties.

3.1.1 Site Summary

The Site was identified in only one of these databases, CT UST. State records regarding four USTs were obtained. Table 3-2 provides information on each of these tanks.

Table 3-2 UST Information for 125 Columbus Blvd				
Tank ID	Contents	Capacity (gallons)	Date Installed	Date Removed
A1	Heating Oil	5,000	April 1, 1967	December 22, 1998
A1R	Heating Oil	5,000	November 1, 1990	in use
B1	Diesel	2,000	April 1, 1967	May 1, 1999
B1R1	Diesel	1,000	March 1, 1999	in use

The U.S. EPA issued a Compliance Order and Settlement Agreement to the New Britain Police Department on December 9, 1998 for failure to remove the diesel tank system (Tank B1) by its life expectancy date. The Police Department was fined $300. The tank was subsequently removed in May 1999.

During the excavation of Tank B1, soil contamination above the CT DEEP Remediation Standard Regulation (RSRs) was detected below the tank. According to a CT DEEP Spill Report dated June 14, 1999, the contaminated soil was removed and the Spill case was closed. The two current tanks are coated, cathodically-protected steel and contain spill buckets.

On January 3, 2007, the CT Storage Tank Enforcement Unit conducted an inspection of the two USTs. The inspector noted that there were no system tightness test data available, no cathodic protection test data available, and the diesel tank's (B1R1) spill bucket was full of water. There was no contamination noticed. Violations were issued under state regulations for general operating requirements and release detection. In September and October 2007, both USTs were tested for tank system tightness and cathodic protection. The fill risers for both tanks did not meet cathodic protection criteria.

The CT Storage Tank and PCB Enforcement Unit conducted inspections of the two USTs on September 21, 2009 and April 4, 2013. No violations were noted during these inspections.

Although hazardous waste is currently stored onsite (see Section 4), no hazardous waste manifest records were identified in the EDR or CT DEEP databases.

3.1.2 Surrounding Properties Summary

This section summarizes surrounding properties identified in the environmental records databases. These are listed by databases searched.

RCRA CORRACTS:
The Federal RCRA CORRACTS facilities list is a list of handlers with RCRA Corrective Action Activity. There is one property on this list, Stanley Hardware, located approximately 0.8 mile to the west of the Site at 480 Myrtle Street. This property was operated as a hardware manufacturing company and was a LQG of hazardous waste. In September 1992, the facility was assigned a medium corrective action priority following an inspection. The Stanley Hardware property is also listed in the State Hazardous Waste Sites records (CT SHWS). The property is of equal or higher elevation than the Site property. The property is located greater than 1/8 mile and is not upgradient of the Site. This property has also been remediated and is currently used as an office building.

RCRA Generators:
The RCRA databases includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. LQGs generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. SQGs generate between 100 kg and 1,000 kg of hazardous waste per month. CESQGs generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list revealed that there is 1 RCRA-LQG property, CVS Pharmacy, within approximately 0.25 miles of the Site. This property is located just southeast of the Site at 177 Columbus Blvd. A review of the RCRA-SQG list revealed that there are 2 RCRA-SQG properties within approximately 0.25 miles of the Site. These are Firestone located 0.15 mile southwest of the Site at 55 Chestnut Street and the Former Papa's Sales & Service located 0.17 mile to the south at 1 Bosco Drive. A review of the RCRA-CESQG list revealed that there is 1 RCRA-CESQG property, Jiffy Lube, within approximately 0.25 miles of the Site. This property is located 0.23 mile to the northeast at 265 E. Main Street.

Only one (CVS) of these four properties is located within close proximity (1/8 mile), and only one (Firestone) is upgradient of the Site. All four of these properties are of lower elevation

than the Site property. Presence on the RCRA Generators lists does not indicate an environmental condition that could impact the Site property.

CT SDADB:
A review of the State Site Discovery and Assessment Database (CT SDADB) revealed that there are 11 properties within 0.5 mile of the Site on this list. Five of these properties are upgradient of the Site and only one of these is within 1/8 mile of the Site. Table 3-3 lists these five surrounding properties; however, presence on the CT SDADB list does not necessarily indicate an environmental condition that could impact the Site property.

Table 3-3: Upgradient Surrounding Properties on CT SDADB List

Property	Address	Direction/ Distance	Elevation Equal or Higher than Site
Camera Shop of New Britain	47-65 Main St	SW 0.232 mi.	yes
New Britain Co #7701	40 Court St	W 0.305 mi.	yes
Lawrence Johnson, Inc.	88 Prospect St	SW 0.415 mi.	yes
New England Fur Company, Inc.	282 Arch St	SW 0.467 mi.	yes
Herald Publishing Co.	1 Herald Sq	W 0.120 mi.	no

CT LUST:
There are 9 properties on the CT LUST list within 0.5 mile of the Site. None of them are within 1/8 mile of the Site, but five of them are upgradient. These properties and the status of their LUST cases are provided in Table 3-4.

Table 3-4: Upgradient Surrounding Properties on CT LUST List

Property	Address	Direction/ Distance	LUST Case Status
Urban Renewal Team	7-15 Franklin Sq	SSW 0.241 mi.	Completed 1999
American Savings	178 Main St	WSW 0.247 mi.	Investigation 1998
SNET	40 Court St	W 0.305 mi.	Completed 1996
Town & Country	165 Arch St	SW 0.362 mi.	Completed 1989

Investigation/cleanup of these sites has been performed.

CT UST:
There are nine properties on the CT UST list within 0.25 mile of the Site. Three of the nine are within 1/8 mile of the Site, and five of the nine are upgradient. These properties and the status of their USTs are provided in Table 3-5. Presence on the CT UST list does not necessarily indicate an environmental condition that could impact the Site property, and the status for all removed/abandoned tanks listed in Table 3-5 is listed as "permanently closed."

Table 3-5: Surrounding Properties on CT UST List

Property	Address	Direction/ Distance	UST Status
Main Street	Near 267 Main St	W 0.233 mi.	1 tank removed
Trinity United Methodist Church	69 Main St	SW 0.239 mi.	1 tank removed, 1 tank in use

Table 3-5: Surrounding Properties on CT UST List			
Property	Address	Direction/ Distance	UST Status
South Church	90 Main St	SW 0.242 mi.	1 tank abandoned in ground
CVS/Pharmacy # 0294	177 Columbus Blvd	SE 0.084 mi.	1 tank removed, 1 tank in use
US Postal Service	135 Chestnut St	SSE 0.095 mi.	1 tank removed, 1 tank in use
Herald Publishing Co.	1 Herald Sq	W 0.120 mi.	1 tank filled with inert material, 1 tank in use
Firestone Store # 7057	55 Chestnut St	SW 0.152 mi.	1 tank removed

CT VCP:
There are 3 properties on the CT VCP list within 0.5 mile of the Site, and 2 properties on the CT Brownfields list within 0.5 mile of the Site. Only one of these properties is within 1/8 mile of the Site and only one is located upgradient of the Site. The Burritt House is located 0.308 mile from the Site at 67 West Main Street, upgradient of the Site. Columbus Plaza is located 0.099 mile from the Site at 140 Columbus Blvd. Columbus Plaza is downgradient and at a lower elevation than the Site Property.

3.2 Regulatory Agency File and Records Review

A review of regulatory files or alternative records (onsite records, local government records, interviews with regulatory officials) was performed for the subject property and any adjoining properties identified on one or more standard environmental record source to help determine if an AOC exists at the property in connection with the listing. File reviews were conducted at the New Britain Fire Marshal's office, Assessor's Office, Building Department, and Department of Municipal Development. There was no additional information on the Site property or regarding the former or current USTs, or other potential AOCs available in these records.

A review of specific CT DEEP files was conducted. The following property owners and businesses were included in the CT DEEP file search:

- City of New Britain Police Department - 125 Columbus Boulevard

Site-specific file information (including, but not limited to, orders, environmental reports, site analytical data, permits, application forms, and other correspondence) was requested regarding the current/former owners and businesses listed above.

UST and Spill information was located in CT DEEP files, as discussed in Section 3.1.1.

HRP Associates provided copies of its 2001 Phase I Environmental Assessment Report and 2001 Receptor Survey. Findings from both reports were summarized in Section 1.4.

3.3 Additional Environmental Records

A search of additional environmental records was conducted by EDR. Table 3-6 through Table 3-8 list the additional databases searched for the Site as well as adjoining and surrounding properties based on required minimum search distances. Databases in **Bold** contained the Site and databases in *Italics* contained one or more adjoining or surrounding properties.

3.3.1 Site Summary

The Site was identified on four (4) of these additional databases, CT SPILLS, CT NPDES, ICIS, and FINDS.

CT SPILLS:
On June 14, 1999, the state was notified of soil contamination due to the UST failure as discussed in Section 3.1.1 above. On April 9, 2007, one gallon of gasoline was spilled on the parking lot of the property due to a leaking vehicle. Absorbent sand was placed over the spill.

On December 6, 2007, one pint of gasoline was spilled on a paved area of the property due to an overfill. Absorbent sand was placed over the spill. On March 16, 2008, one gallon of antifreeze was spilled on the property due to a container failure. Absorbent sand was placed over the spill. On June 20, 2008, one gallon of antifreeze was spilled on the property due to a motor vehicle accident. Absorbent sand was placed over the spill. On February 26, 2009, a spill of motor vehicle fluids was reported on the property due to a motor vehicle accident. Absorbent sand was placed over the spill; however the quantity released was listed as 0 gallons. On January 7, 2011, a mercury spill was reported inside the building due to a container failure; however the quantity released was listed as 0 gallons. On March 7, 2011, a release of a white powder was reported due to letter that was opened containing less than 1 ounce of a white powder. The status for all cases is listed as closed.

CT NPDES:
A National Pollutant Discharge Elimination System (NPDES) general permit has been issued for groundwater remediation wastewater being discharged to surface water. The discharge is from dewatering of an excavation for a new building northeast of the intersection of Main Street and Chestnut Street. The permit was issued December 2, 2010 and expires March 29, 2015.

ICIS:
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program across most of EPA's programs. The Site is on this list due two RCRA field citations in 1999 pertaining to one of the USTs. This appears to be related to a USEPA Compliance Order FY99UST-094 (Inspection date December 9, 1998), for failure to remove diesel UST by life expectancy date. This UST was ultimately removed on March 1, 1990.

FINDS:
The Federal Facility Index System/Facility Registry System (FINDS) is a central inventory of facilities monitored or regulated by the EPA, with cross-references to the program office databases that have additional programmatic information about the facility. The Site is on the FINDS list for the same reason it is listed on the ICIS list.

3.3.2 Surrounding Properties Summary

This section summarizes surrounding properties identified in the additional environmental records and other ascertainable records databases. These are listed by databases searched.

US BROWNFIELDS:
A review of the US BROWNFIELDS list revealed that there are 3 US BROWNFIELDS properties within approximately 0.5 miles of the Site. None of these properties are located within 1/8 mile of the Site and only one is upgradient of the Site. Sandelli Florist II is located 0.232 mile west of the Site at 2 Bank Street and has been remediated and is currently used as a market and office space.

RCRA NonGen/NLR:
The RCRA NonGen/NLR database includes selective information on sites which may generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource

Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. A review of the RCRA NonGen / NLR list revealed that there are 4 RCRA NonGen/NLR properties within approximately 0.25 miles of the Site. Two properties are located within 1/8 mile of the Site and one of these (The Herald Publishing Co.) is upgradient to the Site. Presence on the RCRA NonGen list does not indicate an environmental condition that could impact the Site property.

Manifests:
A Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility. A review of the CT MANIFEST list revealed that there are 23 CT MANIFEST properties within approximately 0.25 miles of the Site. A review of the RI MANIFEST list revealed that there is one RI MANIFEST property within approximately 0.25 miles of the Site. A review of the NY MANIFEST list revealed that there are 3 NY MANIFEST properties within approximately 0.25 miles of the Site. Of all of these properties, only three are located within 1/8 mile of the Site and one of these (The Herald Publishing Co.) is upgradient to the Site. Presence on the MANIFESTs lists does not indicate an environmental condition that could impact the Site property.

CT CPCS:
The CT CPCS list is a list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). A review of the CT CPCS list revealed that there are 7 CT CPCS properties within approximately 0.5 miles of the Site. None of these properties are located within 1/8 mile of the Site property, but five are located upgradient of the Site. All five properties are listed in Table 3-3 and included on the CT CPCS list due to their past LUSTs issues.

CT SEH:
The Significant Environmental Hazard (SEH) Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed. A review of the CT SEH list revealed that there is one CT SEH property within approximately 0.5 miles of the Site. This property is Brothers Dry Cleaners located 0.488 mile northeast of the Site at 234 North Street. This property is not within 1/8 mile of the Site, nor is it upgradient.

3.4 Vapor Encroachment Condition

Vapor intrusion at the site has been assessed in accordance with ASTM guidance E2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, June 14, 2010. A vapor screening assessment was conducted to evaluate the potential of volatile vapors to encroach upon or otherwise reach the subsurface of the site, called a vapor encroachment condition.

Sites within specified search distances are identified if there is known or suspected

contamination with volatile or semivolatile hazardous substances or petroleum products. The search distance for non-petroleum hydrocarbons (chlorinated volatile organics) is 1,760 feet (one third mile), while the search distance for petroleum hydrocarbons is 528 feet (one tenth mile). Based on identified sites within the above described search distances, ASTM defines the term Critical Distance, as the distance vapor may migrate through the soil in the unsaturated zone from the nearest edge of contaminated soil or groundwater to the subject site. The Critical Distance for non-petroleum hydrocarbons (chlorinated volatile organics) is 100 feet, while the Critical Distance for petroleum hydrocarbons is 30 feet.[1] If the site under evaluation is within these established Critical Distance, they are evaluated by the environmental professional to determine if a potential vapor encroachment condition exists.

The following sites with potential sources of volatile vapors were identified based on findings from the EDR's Vapor Encroachment Condition Report (see Appendix G), which incorporates the findings from the federal and state file and database reviews and review of Sanborn Maps:

- The Herald Publishing Co. at 1 Herald Square; approximately 636 feet west and upgradient[2] of the subject site. This property is identified as an AIRS, RCRA NonGen/NLR, SQG, NPDES, SDADB, NY MANIFEST site. The publishing company was a small quantity generator of ignitable hazardous wastes. This property is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. This property is upgradient; however, it is at an elevation that is 2 feet lower than the Site property. There are no known or reported releases to groundwater at the property that would result in a vapor encroachment concern at the subject site.

- Firestone Tire & Service Center at 55 Chestnut Street; approximately 803 feet southwest and upgradient of the subject site. This property is identified as a CT UST, RCRA-SQG, FINDS, RI MANIFEST, CT MANIFEST, CT SPILLS, and historical auto/gas station site. This site is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. This property is upgradient; however, it is at an elevation that is 2 feet lower than the Site property. Firestone was a SQG of hazardous waste, including waste combustible liquid and spent partswasher fluid. In 2004, one gallon of antifreeze was released to the ground surface and reported to CT DEEP. The area was sanded and the material removed. The case status is closed. There are no other known or reported releases to groundwater at the property that would result in a vapor encroachment concern at the subject site.

- Sandelli Florist II at 2 Bank Street; approximately 1227 feet west and upgradient of the subject site. This property is identified as a US BROWNFIELDS and FINDS site. This site is located within the 1,760 feet vapor screening distance for non-petroleum

[1] If petroleum product is present on groundwater, the Critical Distance is increased to 100 feet.

[2] Based on groundwater flow direction reported in a 2008 Phase II/III ESA report prepared for 1 Bosco Drive, New Britain, Connecticut, located just across Badolato Drive, 0.09 mile northeast of the Site.

DRAFT

products, but outside the 528 feet screening distance for petroleum products. The City of New Britain obtained an EPA Brownfields Assessment Grant and completed a Phase I ESA on the property due to suspected pesticide contamination. Information provided by the City Department of Municipal Development indicates that upon completion of a Phase II ESA, an asbestos abatement was conducted on the onsite greenhouses. The Urban Oaks Organic Farm has since leased the property and has been in operation for over ten years. This property was not listed on any federal or state database regarding any release. There are no known or reported releases to groundwater at the property that would result in a vapor encroachment concern at the subject site.

- Camera Shop of New Britain at 47-65 Main Street; approximately 1227 feet southwest and upgradient of the subject site. This property is identified as a CT PROPERTY and SDADB site and is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. In 1991, the property entered the state Property Transfer Program when a Form I was filed. A Form I is used when no release of hazardous waste has occurred on the parcel and this property was not listed on any federal or state database regarding any release. Therefore, no contaminated groundwater plume would be present that would result in a vapor encroachment concern at the subject site. The case status was deemed complete and approved by DEEP and verified by an LEP in 1991.

- Corp Custom Car Graphics at 121 Main Street; approximately 1260 feet west/southwest and upgradient of the subject site. This property is identified as a historical auto/gas station site and is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. This property was not listed on any federal or state database regarding any release at the former auto station. It is unlikely that a contaminated gasoline groundwater plume would migrate 1200 feet at a concentration that would result in a vapor encroachment concern at the subject site.

- Urban Renewal Team at 7-15 Franklin Square; approximately 1270 feet south/southwest and upgradient of the subject site. This property is identified as a LUST, SPILLS, and CPCS site and is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. In 1999, failure of a 2000-gallon UST containing #2 fuel oil was reported to the CT DEEP. Records indicate the tank was subsequently removed along with contaminated soil, and that there was no free product present. The case is listed as "completed." It is unlikely that a contaminated fuel oil groundwater plume would migrate 1200 feet at a concentration that would result in a vapor encroachment concern at the subject site.

DRAFT

- American Savings at 178 Main Street; approximately 1303 feet west/southwest and upgradient of the subject site. This property is identified as a LUST, SPILLS, and CPCS site and is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. In 1998, failure of a UST containing less than 2,100 gallons of commercial heating fuel was reported to the CT DEEP. No other information regarding the case was available; however, it is unlikely that a contaminated heating fuel groundwater plume would migrate 1300 feet at a concentration that would result in a vapor encroachment concern at the subject site.

- SNET/New Britain Co. at 40 Court Street; approximately 1610 feet west and upgradient of the subject site. As SNET, this property is identified as a LUST, CT MANIFEST, and CPCS site. As New Britain Co., this property is identified as a CT SDADB, CT UST, and CT PROPERTY site. The property is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. In 1987, the facility notified CT DEEP of the removal of three USTs including a 10,000-gallon kerosene UST, and 6,000-gallon and 8,000-gallon #2 fuel oil USTs. In 1996 a 275-gallon gasoline UST was removed. The status for each of these LUST cases is listed as "completed." In 1998, the property entered the state Property Transfer Program. The case status was deemed complete and approved by DEEP and verified by an LEP also in 1998. It is unlikely that a contaminated groundwater plume would migrate 1600 feet at a concentration that would result in a vapor encroachment concern at the subject site.

- The Burritt House at 67 West Main Street; approximately 1625 feet west and upgradient of the subject site. This site is identified as a VCP and SPILLS site and is located within the 1,760 feet vapor screening distance for non-petroleum products, but outside the 528 feet screening distance for petroleum products. In 2005, failure of a full but abandoned 4,000-gallon UST containing fuel oil was reported to the CT DEEP. The property entered the voluntary remediation and the status of the case is now closed. It is unlikely that a fuel oil groundwater plume would migrate 1600 feet at a concentration that would result in a vapor encroachment concern at the subject site.

Past releases at the site associated with the diesel UST as described in Section 3.1.1 and historical uses of the site by Stanley Rule may also present a potential vapor intrusion pathway on the site. There has been very limited groundwater monitoring on the site to evaluate whether it is contaminated. This should be included in Phase II investigations.

DRAFT

4.0 Site Reconnaissance

The objective of the site reconnaissance (recon) is to visually and/or physically observe the property and any structures located on the Site property to obtain information indicating the likelihood of identifying AOCs in connection with the Site.

4.1 Recon Personnel

Paul Burgess, P.E., LEP, Rebecca Balke, P.E., and Jessica Cajigas of Comprehensive Environmental Inc. (CEI), inspected the property on December 1, 2014. Recon personnel were accompanied by Kenneth Malinowski, Acting Director of the New Britain Department of Municipal Development and Dennis Pellegrino, Manager, New Britain Property Management Department (property owner representatives). Ms. Cajigas further inspected the property on January 23, 2015 accompanied by Mr. Malinowski. Sebastian Amenta, P.E., of CEI also visited the property on February 4, 2015 to inspect the Transformer Vault, which was inaccessible during initial site visits. Mr. Amenta was accompanied by a representative of Connecticut Light & Power (CL&P). Photographs are included in Appendix H.

4.2 Site Description and Observations

The Site property consists of one structure on approximately 2.26 acres of land. The 69,800-square-foot brick/masonry structure is three stories in addition to a basement, and is surrounded by asphalt parking lots and pavement for sidewalks. The building is the former New Britain Police Station and courthouse, but is currently unoccupied. There were no areas of stained soil or pavement around the building. No pits, ponds, lagoons, odors or stressed vegetation were observed.

4.2.1 Site Drainage

There are three catch basins located on the property in the parking lot along Herald Square. There are another four catch basins located in the parking lot between the Former Police Station and CVS Pharmacy. One additional drain was observed in the loading dock area to the southwest of the building. This drain discharges to a sump in the basement level of the building which is then discharged to the City stormwater system. Four drains discharge runoff from the Harry Truman Overpass onto the western portion of the Site. Site runoff drains to the south toward Herald Square. Runoff not captured in the three onsite catch basins travels to the southeast and is captured in catch basins near the intersection of Herald Square and Chestnut Street.

4.2.2 Site and Surrounding Uses

The site is currently unoccupied but is still used for police exercises at times. The surrounding properties are currently used mainly for commercial and retail purposes. To the north, the site is bordered by Columbus Blvd and the location of the new CTfastrak busway station. To the east, it is bordered by Columbus Blvd and a Price Rite shopping center and

associated parking. To the southeast, it is bordered by a CVS Pharmacy and parking lot. To the south, it is bordered by Herald Square and a vacant vegetated lot known as "Parcel 9". To the west, it is bordered by a LaQuinta Hotel and associated parking and an attached Chinese restaurant. The Harry Truman Overpass section of Route 71 runs above the western portion of the Site.

A small lot across Herald Square and under the Harry Truman Overpass is used by the New Britain Police Department as an impound lot.

4.2.3 Pavement, Roads and Utilities

The Site building is surrounded to the west, southwest and southeast by parking lots for the building.

The Site property is bordered to the north and northeast by Columbus Boulevard and to the southwest by Herald Square. The Harry Truman Overpass is located above the northwest portion of the property and covers the Impound Lot. Chestnut Street, located to the south east of the site, connects Columbus Blvd and Herald Square.

Sanitary sewer service is provided by the New Britain Department of Public Works Sewer Division and potable water is provided by the New Britain Water Department. Building plans for construction of the Police Department indicate it has always been connected to municipal water and sewer service. An onsite boiler fueled by the heating oil UST provides heat for the building. Electricity is supplied by Connecticut Light & Power and a backup generator is located in the basement level of the building.

4.3 Structure Inspection

The existing building basement contains a former pistol range, transformer vault, two elevator machine rooms, boiler room, mechanical equipment room, and evidence storage rooms/areas. The first, second and third floors of the building contain mostly office space. The first floor of the building was mainly used for prison/holding cells, offices, and records storage. The second floor was mainly used for squad rooms, classrooms, locker rooms, offices, and interrogation rooms. The third floor was mainly used for courtrooms, judge and attorney offices, and court records storage. There were no areas of stained concrete or flooring observed inside the building.

4.3.1 Transformer Vault

The Transformer Vault is located in the northeast corner of the basement and is accessed from the loading dock area. The equipment in the Transformer Vault is owned and maintained by CL&P. The original transformer was replaced with a non-PCB transformer several years ago. The CL&P technician onsite did not know the exact date the replacement occurred. A construction joint and conduit holes in the floor indicate the location of the older transformer. The floor appears to be in good condition and there was no evidence of spills, leaks, or staining. CL&P will remove the transformer and associated equipment when the power is shutoff.

DRAFT

4.3.2 Former Pistol Range

The Former Pistol Range is located in the basement level of the building. This range was used for target practice and contains a bullet trap and washdown trench drain. The concrete trench drain is 202 inches long, 13 inches deep, and 12 inches wide. The end sump below the outlet pipe is 15 inches long and 15 inches deep. The trench discharges to a sump located in an adjacent room to the southeast which then discharges to the sanitary sewer. According to City representatives, this trench drench was added during construction and was not part of the original building plans; therefore, building plumbing plans do not show the drain, sump, and associated piping. There was no standing water observed within the trench drain during the site visit. The grate was removed and the concrete drain and sump were observed to be in good condition.

The bullet trap contains six trays located at its base that are approximately three feet wide by three feet deep by three inches high. The trays are accessible from the backside of the bullet trap and each tray still contained bullet fragments. The bullet fragments were formed into a cake layer, indicating exposure to moisture, possibly associated with washdown of the traps. There was only limited visibility of the floor below the trays and their condition could not be adequately determined.

Owner representatives explained that spent ammunition was collected and given to a scrap metal dealer; however, during the site visit, one 55-gallon container of spent bullets/casings was observed on the back side of the bullet trap at the southern end of the former pistol range. The container is half full of bullets and bullet fragments and is labeled "hazardous waste, spent lead". The accumulation start date on the drum is May 9, 1994. Also in this area was a small box which contained spent practice grenades (percussion and smoke). There were no areas of stained or damaged concrete observed in this area and the floor was in good condition.

4.3.3 Elevator Machine Rooms

There are two elevators in the building and two Elevator Machine Rooms located in the basement. On Elevator Machine Room is located within the Traffic Maintenance Shop and the other is located next to the Boiler Room. These rooms contain the motors and the hydraulic oil used to operate the elevators. The motors are located within shallow trays providing some containment and appeared to be well maintained. There is a small quantity of oil located within the trays for both motors; however, there are no signs of staining or leaking outside of the containment trays or on the floor of the rooms. In the Elevator Machine Room next to the Boiler Room, there was a small container being used to catch any leaks or drips. This container was less than half full of oil. The floors appeared in good condition and there were no areas of stained or damaged concrete observed in either area.

4.3.4 Boiler Room

The Boiler Room is located in the southwest corner of the basement. The boiler is still present and is served by the heating oil UST located outside the building. Floor drains were present for boiler condensate. These drains discharge to a sump in the Mechanical Equipment Room which then discharges to the City's sanitary sewer system.

4.3.5 Sumps

There are three sumps located in the basement level of the building. Two are sewage ejectors which discharge to the sanitary sewer system. One of these is located in the Security Vault and was used for the washdown trench drain in the Former Pistol Range, which is located just to the northwest. This sump is 4 feet deep and 18 inches in diameter, and had 17 inches of liquid at the bottom. The second is located in the Mechanical Equipment Room and is for boiler room floors drains for condensate and for the building domestic sewerage. This sump is 8 feet deep and 3 feet in diameter, and had 2 feet of liquid at the bottom. The third sump is a stormwater ejector located in the Traffic Maintenance Shop. This sump collects perimeter drainage, including that from the drain located in the loading dock area, and discharges it to the stormwater system. This sump is 8 feet deep and 3 feet in diameter, and had 17 inches of liquid at the bottom. All three sumps appeared in good condition.

4.3.6 Main "Garage" Area

The Main "Garage" Area is located in the central portion of the basement level. Owner representatives stated that no maintenance was conducted in this area and that is was only used for vehicle and evidence storage. This area is currently being used for storage of office- and vehicle-related supplies and furniture. There were two floor drains observed in this area. One drain is located on the western half of the area and is 42 inches deep. The second drain is located on the eastern half of the area and is 56 inches deep. Due to the depths of these drains it appears that they discharge to the stormwater ejector located in the Traffic Maintenance Shop. The drains appeared to be in good condition, although one of the covers was cracked, and there were no signs of staining, discoloration, or oily sheens observed.

4.3.7 Generator Room

The Generator Room is located in the basement. The generator is still present and is served by the diesel UST located outside the building. Several boxes of Geiger counters were stored in this room. No other materials were observed stored here and no evidence of spills or staining was observed on the concrete floor at the time of the site visit; however, the 2001 HRP Phase I report identified used oil storage and petroleum staining present in the generator room.

4.3.8 Ammo Storage/Arsenal Rooms

A Former Ammo Storage Room and Former Arsenal Room were located in the basement. The owner representatives stated that only unused ammunition was stored in the Ammo Storage room, and clean weapons were stored in the Arsenal. The two rooms were completely empty, clean, and in good repair during the site visit.

4.3.9 Laboratory/Dark Rooms

A former laboratory and dark room were located on the first floor above basement level. The sinks discharge to the sanitary sewer. While a hazardous building materials survey was not included in this Phase I ESA, the potential presence of mercury in these rooms should be investigated. State records indicated that on January 7, 2011, a mercury spill was reported inside the building due to a container failure; however the quantity released was listed as 0

gallons. There were no signs of staining or discoloration observed, nor any odors detected during the site visit.

4.4 Underground Storage Tanks

There are two USTs currently onsite. One is a 5,000-gallon heating oil UST located below the parking lot, just to the southwest of the building. The other is a 1,000-gallon diesel UST located at the base of the loading dock ramp to the southeast of the building. Available records indicate that the heating oil tank was installed in November 1990 and the diesel tank was installed in March 1999. Both USTs are coated, cathodically-protected steel, contain spill buckets, and have monitoring wells located around them. Records also indicate that each of these tanks replaced previously existing tanks in neighboring locations. One 5,000-gallon heating oil UST was installed April 1967 and removed December 22, 1998, and one 2,000-gallon gasoline UST was also installed April 1967 and removed in 1999. Section 3.1.1 and Table 3-2 provided information on each of these tanks.

4.5 Monitoring Wells

There are five monitoring wells located on the Site property. All five are associated with the two USTs located on the property. Two monitoring wells are located in the vicinity of the 5,000-gallon heating oil UST located southwest of the building. These wells are 10 feet, 5 inches and 11 feet, 3 inches in depth. Groundwater was not detected in either of these wells. The other three monitoring wells are located in the loading dock area to the southeast of the building in the vicinity of the 1,000-gallon diesel UST. The total depths of these wells are 10 feet, 6 inches; 12 feet; and 13 feet, 2 inches. Water was observed in all three wells at depths between 8 feet, 1 inch and 8 feet, 9 inches. Further investigation is needed to determine if this is groundwater or accumulated water in the well.

4.6 Impound Lot

Across Herald Square and under the Harry Truman Overpass is a small lot used by the New Britain Police Department as an impound lot. This property is approximately 15,000 square feet and is owned by the State of Connecticut. The impound lot contains 51 cars, 22 motorcycles/ATVs, and assorted lawnmowers, car parts, and tires. There are two storm drains located within the impound lot. The ground surface is dirt and gravel. Most of the vehicles present have been in accidents and several areas of surface staining were visible. The area is completely fenced in and is locked shut. Access can only be made by Police Department personnel.

4.7 Historic Chemical/Industrial Operations

Historical Sanborn Maps from 1884 through 1954 indicate the Site and surrounding land were used by the Stanley Rule and Level Co., a division of Stanley Works, for the manufacture of numerous tools and hardware including planes, mitre boxes, rulers, hand drills, hammers, and

wood and iron levels. The Sanborn Maps also indicate that the area where the current Site at 125 Columbus Blvd is located was used specifically for carpenter shops; coal bins; box making and shipping; storage of case goods, box lumber, and castings; paint storage; and "mill construction rooms" for tumbling, tempering, iron planing, japanning, pickling and plating.

4.8 Limiting Conditions

There were no limiting conditions noted during the site visits to the Former Police Station.

DRAFT

5.0 Interviews

Requested information included knowledge or documentation regarding the following:

- any past local, state, or federal environmental inspections or audits of the site;
- any environmental correspondence, orders, violations, liens or institutional controls regarding the property;
- any past or ongoing releases of hazardous substances or petroleum products;
- any site-specific plans or reports (spill control and countermeasure plan, emergency response plan, hydrogeological condition report, geotechnical studies, risk assessments, etc.)
- any environmental permits/registrations (solid waste, hazardous waste, wastewater, NPDES, underground injection control, AST/UST, etc.)
- or any other relevant information that would suggest the potential presence of an AOC.

Ken Malinowski and Denis Pelegrino, property owner representatives, were interviewed. Mr. Malinowski is the Acting Director of the New Britain Department of Municipal Development and Mr. Pelegrino is the Manager of the New Britain Property Management Department. They indicated to their knowledge there have been no environmental orders, cleanup liens or activity and land use limitations filed or recorded for the Site. They were generally aware of the various spills reported to CT DEEP. Mr. Malinowski provided a copy of state UST records indicating the installation and removal of previous tanks and the installation and condition of the existing tanks, the 2001 HYGENIX, Inc., Asbestos Inspection Report and provided other specific site details as discussed in this report.

DRAFT

6.0 Preliminary Conceptual Site Model

Conceptual site modeling is an iterative approach to site characterization based on the scientific method of inquiry. A Conceptual Site Model (CSM) is a representation of an environmental system that is used as a tool for understanding and for explaining to others the basis and rationale for the site investigation and the conclusions drawn. A CSM is used to identify AOCs; to determine if a release to the environment has occurred; and describes, explains, and provides an understanding of the nature and distribution of contaminants to evaluate potential risks to human health and the environment.

6.1 Areas of Concern

As explained in Section 2, AOCs are locations where hazardous waste and/or hazardous substances have been or may have been used, stored, treated, handled, disposed, spilled, and/or released to the environment. An AOC may refer to a single known or potential release point, or it may be a group of individual release points. Based on the findings provided in this Phase I ESA report, a number of AOCs were identified and are summarized as follows. Figures 6-1 and 6-2 at the end of the section depict the interior and exterior AOCs, respectively.

6.1.1 AOC 1 – Former Pistol Range

The Former Pistol Range is located in the basement level and contains a bullet trap and washdown drain. Spent ammunition was collected from the bullet trap trays and trench drain and given to a scrap metal dealer. The Former Pistol Range is considered an AOC due to the potential release of lead and other metals to the environment. Specific potential release points should be tested for the presence of chemicals of concern (COCs). COCs for this AOC include lead. Specific potential release points include the following:

6.1.1.1 Soil Beneath Washdown Drain

A trench drain is located across the pistol range near the bullet trap. The range floor would be swept and then washed down. Wash water and some bullets or casings would be captured in this drain. Wash water would continue to drain below floor level to a sump located in an adjacent room. Bullets and casings would then be removed and placed in containers. It is not known how often the floors were washed down or the bullets/casing removed. There was no standing water observed within the trench drain during the site visit. The grate was removed and the concrete drain and sump were observed to be in good condition.

6.1.1.2 Soil Beneath Bullet Trap/Waste Storage Container

The bullet trap is located at the southern end of the pistol range room and was used to deflect the bullets into collection trays at the base of the trap. It is not known how often the bullets were removed and placed into containers. The trays currently contain spent bullets and bullet fragments. The bullet fragments were formed into a cake layer, indicating exposure to moisture, possibly associated with washdown of the traps. The condition of the floor below

DRAFT

the trays was not visible for inspection and requires further investigation. The floor in the area of the storage container was in good condition. No evidence of moisture or degradation.

6.1.2 AOC 2 – Underground Storage Tanks

There are two USTs currently onsite. Both of these USTs are coated, cathodically-protected steel, contain spill buckets, and have monitoring wells located around them. Records indicate that each of these tanks replaced previously existing tanks of the same materials, in the same general locations. These USTs are considered part of an AOC due to the potential release of petroleum hydrocarbons to the environment. Specific potential release points should be tested for COCs including Extractable Total Petroleum Hydrocarbons (ETPH), VOCs and PAHs. Specific potential release points include the following:

6.1.2.1 Diesel Fuel UST and Associated Piping

A 1,000-gallon diesel UST is located at the base of the loading dock ramp to the southeast of the building. Available records indicate that the diesel tank was installed in March 1999. A former 2,000-gallon gasoline UST located in this area was installed April 1967 and removed in 1999. The depth of the UST is not known.

6.1.2.2 Heating Oil UST and Associated Piping

A 5,000-gallon heating oil UST is located below the parking lot, just to the southwest of the building. This UST fuels the onsite boiler which provides heat for the building. Available records indicate that the heating oil tank was installed in November 1990. A former 5,000-gallon heating oil UST located in this area was installed April 1967 and removed December 22, 1998. The depth of the UST is not known.

6.1.3 AOC 3 – Transformer Vault

The Transformer Vault is located in the northeast corner of the basement. The Transformer Vault is owned by Connecticut Light & Power. This vault is considered an AOC due to the potential release of petroleum hydrocarbons and PCBs to the environment. The soils within the vicinity of the transformer should be tested for COCs including ETPH and PCBs.

6.1.4 AOC 4 – Sumps/Drains

There are three sumps and three floor drains located in the basement level of the building. Two of the sumps are sewage ejectors which discharge to the sanitary sewer system. One of these is located in the Security Vault and was used for the washdown drain in the Former Pistol Range. The second is located in the Mechanical Equipment Room and is for building domestic sewerage, and also collects water from the boiler condensate floor drain. The third sump is a stormwater ejector located in the Traffic Maintenance Shop. This stormwater ejector sump collects perimeter drainage, including that from the drain located in the loading dock area, and drainage from the Main "Garage" Area floor drains and discharges it to the stormwater system. These sumps and drains are considered part of an AOC; COCs include ETPH, PAHs, and metals. The sumps and drains were inspected and appear to be in good condition. No evidence of leaks was observed. Subgrade piping cannot be inspected.

6.1.5 AOC 5 – Generator Room

The Generator Room is located in the northeast corner of the basement. This room is considered an AOC due to the potential release of VOCs, PAHs, PCBs, petroleum hydrocarbons, and metals to the environment from used oil storage as noted in a 2001 Phase I report. The soil beneath the concrete floor should be tested for the presence for COCs including VOCs, PAHs, PCBs, ETPH and metals (arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, copper, nickel, and zinc).

6.1.6 AOC 6 – Historic Use (Manufacturing)

Prior to being used as the City's police station from 1967 to 2011, the Site was used as a manufacturing facility by the Stanley Rule and Level Co. for the manufacture of numerous tools and hardware including planes, mitre boxes, rulers, hand drills, hammers, and wood and iron levels. Historic Sanborn Maps from 1895 and 1901 illustrate the northeast portion of the facility was used for pickling and plating, and the 1909 Map indicates the same area used for nickel plating, a coal bin, and steel storage. This area pertains to the central portion of the current Site property, along the northern boundary with Columbus Blvd. The historic use of the Site is considered an AOC due to the potential release of chemicals associated with plating and other manufacturing operations to the environment. Machining equipment would likely have used hydraulic oil. A paint storage area room existed onsite and other chemical storage is likely. Potential release points should be tested for COCs including VOCs, PAHs, PCBs, metals (arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, copper, nickel, and zinc) and cyanide.

6.1.7 AOC 7 – Urban Fill

This lot is located within the area of the City redeveloped in the late 1960s as part of the City's Urban Renewal project. When buildings were demolished under this project, most of the materials were used as fill throughout the downtown area of New Britain. This is expected to be the case for the Site as well.

The Urban Fill is considered an AOC due to the potential presence of petroleum hydrocarbons, PAHs, and metals associated with the fill. COCs include ETPH, PAHs, PCBs, and metals including arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, copper, nickel, and zinc.

6.1.8 AOC 8 – Of f-site Sources

There were several off-site releases of contaminants identified in Section 3.0 that could potentially impact the groundwater quality at the site. COCs include VOCs, PAHs, ETPH and metals (arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, copper, nickel, and zinc) and PCBs.

6.1.9 AOC 9 – Impound Lot

An approximately 15,000-square-foot lot located across Herald Square and under the Harry Truman Overpass is used by the New Britain Police Department as an impound lot. The impound lot contains 51 cars, 22 motorcycles/ATVs, and assorted lawnmowers, car parts, and

tires. There are two storm drains located within the impound lot. The ground surface is dirt and gravel. Most of the vehicles present have been in accidents and several areas of surface staining were visible. This area is considered an AOC due to the potential release of VOCs, PAHs, petroleum hydrocarbons, and metals to the environment from stored vehicles. The soil beneath the lot should be tested for the presence for COCs including VOCs, PAHs, ETPH and metals (arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, copper, nickel, and zinc).

6.2 Recommendations

Table 6-1 summarizes the AOCs for the Former Police Station at 125 Columbus Blvd.

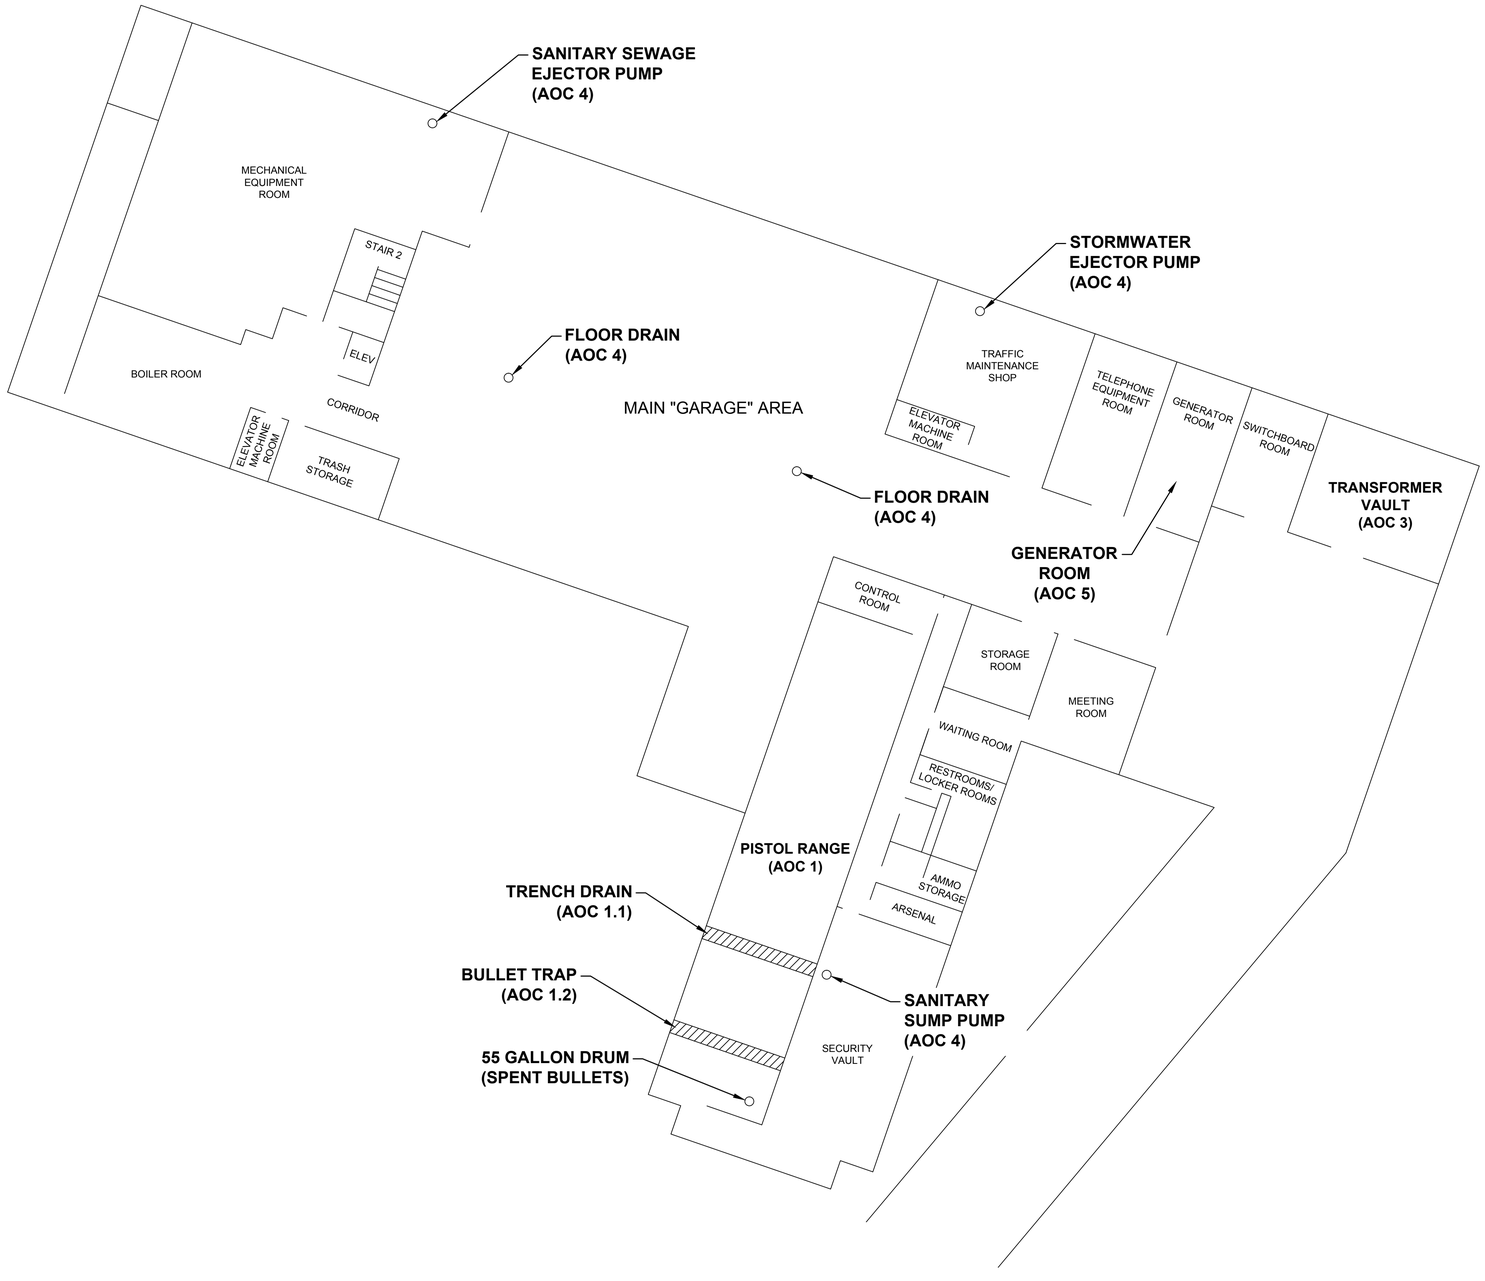

Table 6-1 AOC Summary

AOC	Potential Release Mechanisms	Migration Pathways	Chemicals of Concern	Potential Impacted Media
AOC 1.1 – Washdown Drain – Former Pistol Range	Direct Discharge, Leaks	Soil infiltration via cracks in concrete floor/trench drain	Lead	Soil Groundwater
AOC 1.2 – Bullet Trap – Former Pistol Range	Bullet Degradation	Soil infiltration via cracks in concrete floor	Lead	Soil Groundwater
AOC 2 – USTs	Overfills, Piping leak, Tank leak	Soil infiltration	VOCs, PAHs, ETPH, Metals	Soil Groundwater
AOC 3 – Transformer Vault	Spills, Direct Discharge, Leaks	Soil infiltration via cracks in concrete floor	ETPH, PCBs	Soil Groundwater
AOC 4 – Sumps/Drains	Spills, Direct Discharge, Leaks	Soil infiltration via cracks in sumps, concrete floor, floor drains	VOCs, PAHs, ETPH, Metals	Soil Groundwater
AOC 5 – Generator Room	Spills, Direct Discharge, Leaks	Soil infiltration via cracks in concrete floor	VOCs, PAHs, ETPH, Metals, PCBs	Soil Groundwater
AOC 6 – Historic Use (Manufacturing)	Spills, Direct Discharge, Leaks	Soil infiltration (Soil was likely disturbed/moved during Police Station Construction)	VOCs, PAHs, ETPH, Metals, PCBs, Cyanide	Soil Groundwater

Table 6-1 AOC Summary				
AOC	**Potential Release Mechanisms**	**Migration Pathways**	**Chemicals of Concern**	**Potential Impacted Media**
AOC 7 – Urban Fill	Fill Placement, ash, coal fragments	Deposition/Soil Infiltration	VOCs, ETPH, PAHs, Metals, PCBs	Soil Groundwater
AOC 8 – Offsite Sources	Spills	Soil Infiltration	VOCs, ETPH, PAHs, Metals, PCBs	Groundwater
AOC 9 – Impound Lot	Spills, Direct Discharge, Leaks	Soil Infiltration	VOCs, PAHs, ETPH, Metals	Soil Groundwater

Because the City of New Britain intends to sell the Site for redevelopment, it is recommended that a Phase II/III ESA be designed to further investigate the identified AOCs. A Phase II ESA will refine the Site CSM to help determine whether or not a release to the environment has occurred, and if so, a Phase III will describe the nature, extent, and degree of a release to the environment.

7.0 Data Gaps

No significant data gaps were identified for this Phase I ESA.

DRAFT

8.0 Limitations

This Phase I ESA was conducted and prepared on behalf of and for the exclusive use of the City of New Britain, their lenders, and counsel. No other entity may rely upon the results of the Phase I ESA or contents of this report for any reason or purpose whatsoever.

The purpose of this Phase I ESA is to evaluate whether hazardous substances or petroleum products may be present at the Site. The opinion that is provided is based on the information described in this report. Future investigations or information that was not available to CEI may result in modification of the findings of this report.

In preparing this report, CEI relied on information provided by the EDR report and by local officials and information and representations made available to CEI at the time of the report. To the extent that such information is incomplete or inaccurate, CEI is not responsible.

CEI performed this Phase I ESA in accordance with generally accepted practices of engineers and/or scientists providing similar services at the same time, in the same locale, and under like circumstances. No other warranty, expressed or implied, is made as to the professional opinions included by CEI in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Comprehensive Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
STANLEY HARDWARE	*480 MYRTLE STREET*	*W 1/2 - 1 (0.840 mi.)*	*85*	*239*

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CVS PHARMACY 0294	177 COLUMBUS BLVD	SE 0 - 1/8 (0.084 mi.)	B10	24

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SHWS list, as provided by EDR, and dated 04/23/2010 has revealed that there is 1 CT SHWS site within approximately 1 mile of the target property.

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/22/2014 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/10/2014 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 01/30/2014 has revealed that there are 7 CT CPCS sites within approximately 0.5 miles of the target property.

CT SEH: The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

A review of the CT SEH list, as provided by EDR, and dated 05/31/2014 has revealed that there is 1 CT SEH site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within

approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NEW BRITAIN GAS LIGHT CO	COLUMBUS BLVD	SSE 1/4 - 1/2 (0.296 mi.)	62	178

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 3 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

FINDS:

Registry ID: 110010639078

Environmental Interest/Information System
Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single

NEW BRITAIN POLICE DEPARTMENT (Continued) **1006729950**

agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

CVS PHARMACY 0294 (Continued) **1014388310**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	12/17/2007
Site name:	HERALD PUBLISHING CO THE
Classification:	Not a generator, verified

HERALD PUBLISHING CO THE (Continued) **1000881049**

Date form received by agency: 06/11/1986
Site name: HERALD PUBLISHING CO THE
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

PAPAS SALES & SERVICES (Continued) **1000157703**

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110039535839

Environmental Interest/Information System
US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Registry ID: 110030369385

Environmental Interest/Information System
Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

GW Comments:	Based on the results of three separate GW elevation gauging events, the horizontal GW flow direction is generally toward the east-northeast. However, there is a strong northerly component of GW flow direction in the northern portion of the site.
Location Desc:	7/13/05 HRP completed a subsurface investigation which indicated elevated concentrations of PCE in a shallow soil sample collected from the former location of a 275 gal. AST. WO tank.
NOV Comments:	Not reported

Property Transfer Forms:	Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form (ECAF)(DEP-PERD-PTP-200).

SEH:

Date Notified:	07/29/2005
Type Of Hazard:	Polluted groundwater beneath an occupied building could affect indoor air quality.
Response:	DEP directed the property owner to determine the extent of the problem and provide a plan of action.
Actions:	Proposed plan to vent area and take additional samples of soil gas has been implemented.

WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES

STANLEY HARDWARE (Continued) **1000881056**

WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

STANLEY HARDWARE (Continued) **1000881056**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

STANLEY HARDWARE (Continued) **1000881056**

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F010
Waste name: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F011
Waste name: SPENT CYANIDE SOLUTIONS FROM SALT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

Corrective Action Summary:
Event date: 08/03/1992
Event: RFA Completed, Assessment was a PA-Plus.

Event date: 09/01/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Facility Has Received Notices of Violations:
Regulation violated: FR - 262.34(a)(2)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2014

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2014

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2014

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/10/2014
Date Data Arrived at EDR: 07/02/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: Inventory of Hazardous Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/23/2010
Date Data Arrived at EDR: 04/23/2010
Date Made Active in Reports: 05/25/2010

State and tribal institutional control / engineering control registries

ENG CONTROLS: Engineering Controls Listing

An Engineered Control is a permanent physical structure designed to safely isolate pollutants which would otherwise not comply with the self-implementing remedial options allowed in the Connecticut Remediation Standard Regulations (RSRs). The ECGD includes a description of what is eligible to be considered as an Engineered Control under section 22a-133k-2(f)(2) of the RSRs, a description of the information necessary for the preparation of complete and approvable applications, a step-by-step outline of the review and approval process, and supplemental resources provided in the appendices.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Care Facilities
Source: Department of Public Health
Telephone: 860-509-8045

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Soils
Source: Department of Environmental Protection
Telephone: 860-871-4047

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

FMR NEW BRITAIN POLICE STATION
125 COLUMBUS BLVD
NEW BRITAIN, CT 06051

TARGET PROPERTY COORDINATES

Latitude (North):	41.6673 - 41° 40’ 2.28’’
Longitude (West):	72.7774 - 72° 46’ 38.64’’
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	685036.7
UTM Y (Meters):	4615011.5
Elevation:	168 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	41072-F7 NEW BRITAIN, CT
Most Recent Revision:	1992

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

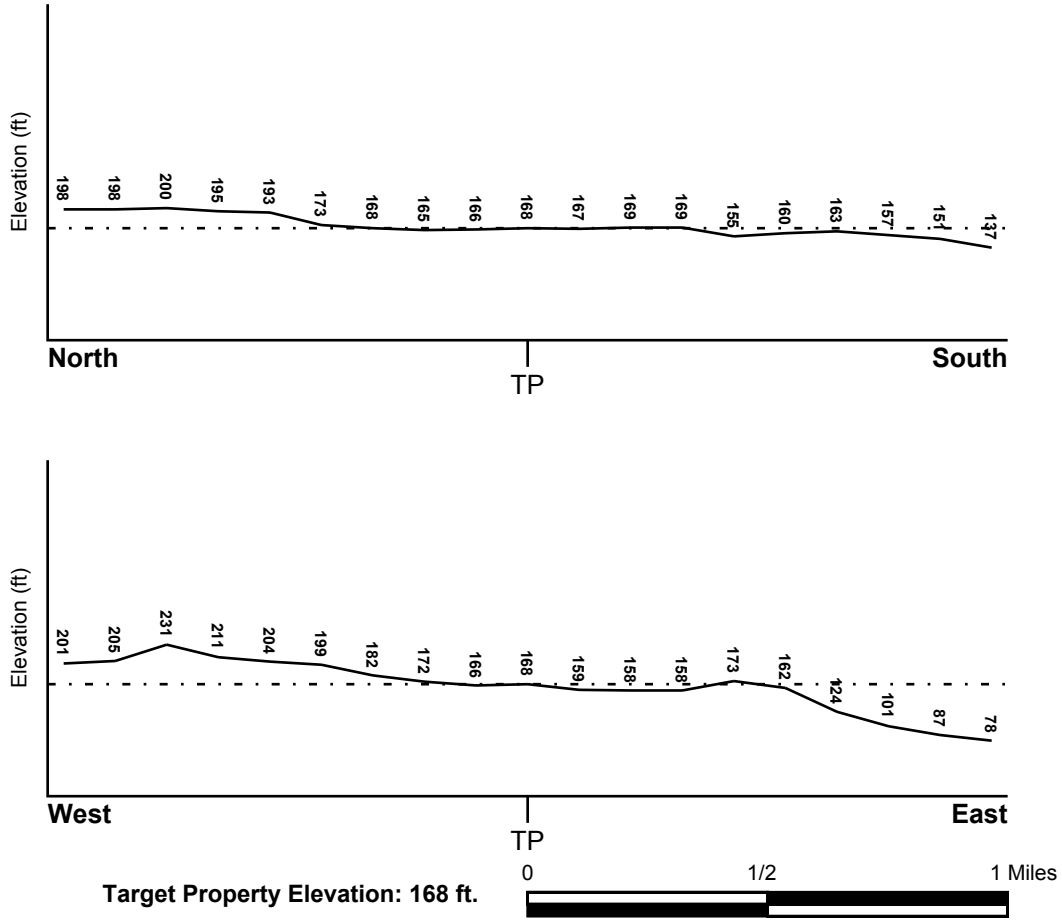

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 168 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
HARTFORD, CT	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 09003C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NEW BRITAIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	material	Not reported	Not reported	Max: 141 Min: 0.07	Max: Min:

Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 4.5
2	5 inches	21 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
3	21 inches	79 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Soils
Source: Department of Environmental Protection
Telephone: 860-871-4047

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Connecticut Leachate and Wastewater Discharge Sites
Source: Department of Environmental Protection
The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut
Source: EPA
Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

Community and Non-Community Water System Wells
Source: Department of Public Health, Water Supplies Section
Telephone: 860-509-7333
Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Urban land
Soil Surface Texture:	material
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status:	Unknown
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	material	Not reported	Not reported	Max: 141 Min: 0.07	Max: Min:

Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 4.5
2	5 inches	21 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
3	21 inches	79 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

EXECUTIVE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Environmental Interest/Information System:

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	12/17/2007
Site name:	HERALD PUBLISHING CO THE
Classification:	Not a generator, verified
Date form received by agency:	06/11/1986
Site name:	HERALD PUBLISHING CO THE
Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Used oil transporter: No

Historical Generators:

Date form received by agency: 12/17/2007
Site name: HERALD PUBLISHING CO THE
Classification: Not a generator, verified

Date form received by agency: 06/11/1986
Site name: HERALD PUBLISHING CO THE
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013
Number of Days to Update: 3
Last EDR Contact :09/30/2014
Source: EPA
Telephone: 202-564-6023

RMP: Risk Management Plans
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2014
Number of Days to Update: 86
Last EDR Contact :10/27/2014
Source: Environmental Protection Agency
Telephone: 202-564-8600

AIRS: Permitted Air Sources Listing
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of permitted air sources in Connecticut.

Date of Government Version: 05/15/2012
Number of Days to Update: 16
Last EDR Contact :10/27/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3026

AST: Marine Terminals and Tank Information
Standard Environmental Record Source: State and tribal registered storage tank lists
Search Distance: Property

A listing of bulk petroleum facilities that receive petroleum by a vessel.

Date of Government Version: 07/01/2014
Number of Days to Update: 1
Last EDR Contact :10/03/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3233

AUL: ELUR Sites
Standard Environmental Record Source: State and tribal institutional control / engineering control registries

Search Distance: Property

Environmental Land Use Restriction sites.

Date of Government Version: 10/03/2014
Number of Days to Update: 14
Last EDR Contact :11/06/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3912

BROWNFIELDS: Brownfields Inventory

Standard Environmental Record Source: State and tribal Brownfields sites
Search Distance: 0.333 Mile

CBRA has identified over 200 brownfield sites eligible for redevelopment. In most cases these are prime properties for commercial or industrial use. CBRA's grants, assistance and financing lower the financial risks and eliminate the legal, regulatory and environmental risks of redevelopment.

Date of Government Version: 09/24/2014
Number of Days to Update: 5
Last EDR Contact :09/22/2014
Source: Connecticut Brownfields Redevelopment Authority
Telephone: 860-258-7833

BROWNFIELDS 2: Brownfields Inventory

Standard Environmental Record Source: State and tribal Brownfields sites
A brownfield site is generally defined as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant or contaminantâ¿?"

Date of Government Version: 11/30/2004
Number of Days to Update: 13
Last EDR Contact :09/26/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3705

CDL: Clandestine Drug Lab Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of clandestine drug lab locations included in the Spills database.

Date of Government Version: 07/30/2014
Number of Days to Update: 36
Last EDR Contact :10/06/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3361

CPCS: Contaminated or Potentially Contaminated Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

Date of Government Version: 01/30/2014
Number of Days to Update: 20
Last EDR Contact :11/07/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3766

CT MANIFEST: Hazardous Waste Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Number of Days to Update: 45
Last EDR Contact :11/17/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3375

CT PROPERTY: Property Transfer Filings

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of sites that meet the definition of a hazardous waste establishment. They can be generators, dry cleaners, furniture strippers, etc. These sites have been sold to another owner.

Date of Government Version: 10/03/2014
Number of Days to Update: 14
Last EDR Contact :11/06/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3705

DRYCLEANERS: Drycleaner Facilities

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

A listing of drycleaner facility locations.

Date of Government Version: 07/18/2008
Number of Days to Update: 19
Last EDR Contact :09/15/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3026

ENFORCEMENT: Enforcement Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

The types of enforcement actions included are administrative consent orders, final unilateral orders and final dispositions of civil cases through the Attorney General's Office.

Date of Government Version: 07/21/2014
Number of Days to Update: 48
Last EDR Contact :10/20/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3265

ENG CONTROLS: Engineering Controls Listing

Standard Environmental Record Source: State and tribal institutional control / engineering control registries

Search Distance: 0.333 Mile

An Engineered Control is a permanent physical structure designed to safely isolate pollutants which would otherwise not comply with the self-implementing remedial options allowed in the Connecticut Remediation Standard Regulations (RSRs). The ECGD includes a description of what is eligible to be considered as an Engineered Control under section 22a-133k-2(f)(2) of the RSRs, a description of the information necessary for the preparation of complete and approvable applications, a step-by-step outline of the review and approval process, and supplemental resources provided in the appendices.

Date of Government Version: 03/05/2013
Number of Days to Update: 43
Last EDR Contact :11/07/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3000

LIENS: Environmental Liens Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of environmental liens placed by the Cost Recovery Program.

Date of Government Version: 05/20/2014
Number of Days to Update: 11
Last EDR Contact :11/17/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3120

LUST: Leaking Underground Storage Tank List

Standard Environmental Record Source: State and tribal leaking storage tank lists
Search Distance: 0.333 Mile

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 09/09/2014
Number of Days to Update: 11
Last EDR Contact :07/07/2014
Source: Department of Energy & Environmental Protection
Telephone: 860-424-3376

LWDS: Connecticut Leachate and Wastewater Discharge Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

Date of Government Version: 07/17/2009
Number of Days to Update: 9
Last EDR Contact :10/15/2014

SEH: List of Significant Environmental Hazards Report to DEEP

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

SHWS: Inventory of Hazardous Disposal Sites

Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 0.333 Mile

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
