Music	4 credits	Music History and Theory, Choir, Band, Individual Music Lessons
Total Credits	33 credits	

Definition of Credits

In general, one (1) credit at The Saint Constantine School is equivalent to a full year's instruction in a given high school course of study. The Great Books courses in 9th through 12th grade earn a student two (2) credits per year of instruction.

Graduation Requirements

In order to receive a TSCS diploma, candidates must successfully complete the course requirements and earn a minimum of 16 High School credits at TSCS, of which 4 credits must be completed during senior year. Students must maintain a grade point average of 2.0 or above. Exceptions to the credit requirement will be made in the 2016-2019 school years for students joining the school in its first three years of operation. Exceptions may also be made for students transferring into TSCS in their junior year or later.

Graduation and Degree Plan

All students at The Saint Constantine School participate in a common course of study towards a TSCS Diploma. The course of study at TSCS exceeds the standards for a Texas Distinguished Diploma. All students participate in art, music, and nature studies as a part of their normal school day, thus increasing their college desirability and preparedness without adding more extracurricular requirements to your family's schedule.

Prerequisites

Some courses, including some dual-enrollment courses, require students to have the appropriate prerequisite courses before a student can enroll in the course (Calculus requires a student to have been successful in Precalculus, for example). Students must take the prerequisite courses at TSCS, or demonstrate that the equivalent courses have been successfully completed elsewhere before enrolling in the class.
