Dear 'Iolani School Parents/Guardians,

Recent statistics reported by the U.S. Department of Health and Human Services Centers for Disease Control and Prevention (CDC) and the State of Hawaii - Department of Education Athletic Health Care Trainers noted a significant increase in the number of reported concussions and emergency visits by persons nineteen years old or younger. With the growing concern for the safety of our students in the State, on July 3rd, 2012, Governor Neil Abercrombie signed into law ACT 197 (12) RELATING TO CONCUSSIONS, requiring the Department of Education (DOE) and the Hawaii High School Athletic Association (HHSAA) to develop a concussion educational program for students and student athletes who are fourteen to eighteen years old.

To conform to ACT 197 (12), an amendment has been made to 'Iolani School's current Concussion and Awareness Education Program (CAEP) to educate students, parents, coaches, faculty, staff, and administrators at both the Upper and Lower Schools. Each student and parent will be required to complete the following as part of 'Iolani School's CAEP:

- View concussion education material for students and parents. The links are located under Concussion Education.

- Acknowledge that you and the student have been educated on the signs and symptoms of a concussion and what to do if someone demonstrates any of those signs or symptoms.

And

- Update Concussion Awareness Education Program signature yearly on child's Magnus Student Health Tracker.

If the student participates in extracurricular activities outside of ‘Iolani please share this concussion information with their coaching staff, instructors, leaders, mentors, and chaperones, as well as with family members and friends. The more people we can educate about the dangers and signs and symptoms of a concussion, the more beneficial it will be in ensuring the safety of our children to return to school and sports related activities.
