

ULTRASOUND JOB SHADOW FORM

Job shadowing is not required and is an optional component of the application process. To receive the additional 2 points, a prospective student must have observed in an ultrasound imaging department a minimum of eight hours. Shadowing a sonographer gives the prospective student a better understanding of the sonography profession and what will be required of him/her in the clinical rotation during school and after completion of the program.

To the facility accommodating the prospective student: MNTC DMS program would like to offer sincere gratitude for allowing a prospective student to shadow at your facility. We appreciate any comments or feedback.
