

JOB DESCRIPTION

San Diego County Office of Education

SOLUTION CONSULTANT, HUMAN CAPITAL MANAGEMENT APPLICATION AND SYSTEMS DEVELOPMENT

Purpose Statement:

Under administrative direction, the Solution Consultant, Human Capital Management (HCM) Application and Systems Development is responsible for providing consultant/expert level hands-on techno/functional application leadership in managing, designing, configuring, testing, and administering various components of a large scale complex PeopleSoft environment/platform supporting critical business functions utilized across the San Diego County Office of Education (SDCOE), school districts, and charter schools in the County.

Diversity Statement

Because each person is born with inherent worth and dignity, and because equitable access and opportunity are essential to a just, educated society, SDCOE employee commitments include being respectful of differences and diverse perspectives, and being accountable for ones actions and the resulting impact.

Representative Duties:

This position description is intended to describe the general nature and level of work being performed by the employee assigned to the position. This description is not an exhaustive list of all duties, responsibilities, knowledge, skills, abilities, and working conditions associated with the position. Incumbents may be required to perform any combination of these duties.

Essential Functions:

- Leads functional consultant level solutioning and projects for Enterprise Resources Planning (ERP) applications and responsible for the design, project development, and delivery of various PeopleSoft application modules, including configuration, reports, queries, interfaces, conversions, and implementation of large complex custom solutions.
- Provides process and leadership to project management, develop policies, procedures and standards based on IT best practice and ensures conformance with departmental and enterprise objectives.
- Proposes, leads and implements scalable, sustainable and cost-effective solutions and projects meeting internal and external customers' objectives.
- Analyzes problems/needs, researches possible solutions and implementations using existing functionality; implements, tests and presents solutions and recommends customizations if necessary.

- Documents detailed techno/functional and design specifications and adheres to ERP methodology or standards.
- Responsible for the business/system requirements, design, configuration, security, and delivery of various PeopleSoft application development components, including reports, interfaces, conversions, and implementation of custom solutions.
- Conducts workshop or sessions to gather information for functional and system requirements.
- Identifies and documents business processes using process models (swim-lane, activity diagrams) including “as-is” (current state) and “to-be” (future state).
- Performs FIT-GAP analysis to develop options for gaining process efficiencies or converting to delivered functionality.
- Develops prototype material for user to demonstrate associated functionality and designs prior to delivery and full system testing.
- Manages the use of automated scripts for configuration items and migrating through for testing, environment syncs, and/or project release for go-live deployment.
- Creates and updates documentation for items like functional specifications, operating procedures, configuration, testing scripts, test data sets, test materials, training etc.
- Provides training or overview of technology and changes.
- Designs, plans, tests and implements solutions which meet functional and technical specifications of a large PeopleSoft HR application. Responsible for defects and fix changes through testing cycles and environments.
- Conducts research by reviewing application functionality and utilizing Oracle's resources, PeopleBooks and PeopleSoft Technical forums.
- Troubleshoots operational and application issues.
- Provides guidance and specialized functional knowledge to internal and external contacts.
- Effectively communicates well-reasoned software solution expectations to internal customers, team members and other stakeholders.
- Collaborates and consults on functional solutions and configuration items for testing, environment syncs, and/or project release for go-live deployment.

Other Functions:

- Perform other related duties as assigned for the purpose of ensuring the efficient and effective functioning of the work unit.

KNOWLEDGE AND ABILITIES:

KNOWLEDGE OF:

Techno/Functional Application expertise in PeopleSoft HCM, including the application level, tools level, client interface and integration broker, application infrastructure and HCM architecture;

Principles and practices of enterprise business system functionality, structure, operations, implementation, analysis and design, build, test, and deployment;

California Payroll and associated regulatory laws;

Preparing process flow diagrams;

Conducting fit gap sessions with business users;

Peoplesoft functional business and system requirements for determining techno/functional specifications;

Presentations using PowerPoint;

Conducting fit gap sessions with business users;

Designing and configuring PeopleSoft HCM software to solve business needs;

Best practices utilization;

Business cases development;

Test planning and test scripts;

Functional Training and system usages;

Processes and practices in implementing system testing and troubleshooting;

Processes and practices in developing technical systems documentation, including documenting and detailing functional and specifications across HCM;

Project management for ERP projects such as planning, scoping, process/requirements definition, design, development, testing, project tracking, project reporting, risk assessment tracking, conflict resolution tracking, documentation, and lessons learned;

Project management methodologies, including both waterfall and Agile;

Working knowledge of SQL for Time and Labor and Absence Management modules;

Working knowledge of core tables and system processes for Payroll, Time and Labor, and Absence Management modules;

Functional understanding of SQR, App engine, People code, Component Interface, and Fluid development;

Security practices and procedures;

Understanding of Web Services and File Integration;

Standards and methodology for ERP lifecycle development;

Reusable component inventory and knowledge management;

Specific PeopleSoft software and tools such as:

- PeopleSoft HCM 9.2
- Security Design and Build
- Templates and Rule Programs
- Application Engine components for Time Administration
- Creating T&L and Absence Management rules
- Use of SQL objects to create rules and override rules
- SQL Rules Migration
- Rules Application Library
- Time Administration and Integration
- Workgroups and Taskgroups
- Building Calendars
- Rules engine Debugging
- PeopleSoft Query Manager
- Process Scheduler
- SQR
- Tree Manager
- Workflow
- Microsoft Office Suite

ABILITY TO:

Analytically and logically evaluate information, issues, and problems to generate a range of alternative solutions and courses of action with benefits, costs, and risks associated with each;
