

CCPS Before & After School Child Care Screen Time Guidelines

In accordance with the American Academy of Pediatrics recommendation, our center limits screen time (computer and television etc.) to 30 minutes per week. Our students are encouraged to participate in daily physical activity to promote health and well-being. Television, computers, or other media devices are used in our center only when directly related to facilitate learning experiences. We feel young children learn best with hands-on activities using all of their senses throughout their day. We hope you will partner with us by reducing screen time at home, if you would like information on screen time reduction resources, we would be happy to provide them.
