

THE FUTURE OF WORK **Educator Maker in Residence**

A year-long fellowship program for professional educators to collaborate, build skills, share tools and inspire a maker mindset.

DO YOUR STUDENTS ASK...

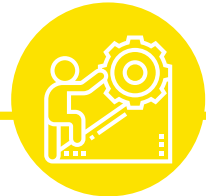

- "Why do I need to know this?"
- "When will I ever use this?"
- "How will this help me in the future?"

CHALLENGE YOUR STUDENTS

Students have traditionally been trained as consumers of information.

By changing the way we approach learning we can challenge our students to apply their knowledge with creative confidence and self-agency to solve the challenges the world is facing.

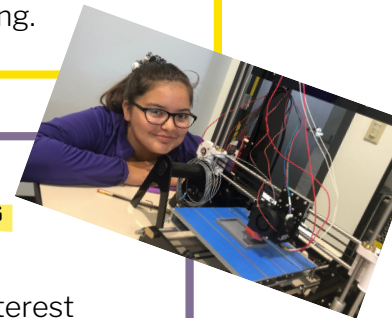

PROJECT BASED LEARNING

Using projects and information directly from our local workforce can create a shift toward learning as a maker, creator, and producer that supports students to amplify the skills of the future.

BENEFITS OF JOINING

- \$2,500 Stipend
- Explore a topic of your interest
- Maker Mindset training
- Membership to the Madjax Design Lab, lending library of technological resources, and funds to expand shared resources to enhance your project

RESPONSIBILITIES

- Year long commitment
- Active collaborations with other educators, workforce partners and students to develop relevant, workforce-centered project based learning opportunities
- Apply your skills and curiosity to lead community-based workshops and a classroom-based capstone project
- Mentor a student apprentice
