

Our 3 Big Rocks:

Communication

The Breathitt County School District has developed a clear and consistent communication plan. The plan will be transparent and will represent a strategic and intentional communication process for internal and external communications for Breathitt County Schools and the community.

ABRI/PBIS

The Breathitt County School District recognizes the role of effective instruction and classroom management that formulates the universal level of PBIS and RTI in the school and classroom. Our partnership with ABRI supports the creation of an infrastructure that works toward sustainability and capacity building. The goal is both to increase capacity in the district and to evaluate academic and social outcomes for ALL of our students.

Curriculum

The Breathitt County School district will support curriculum that is aligned to the Kentucky Core Academic Standards and that is designed to foster education, collaboration and creativity while meeting the needs of our learning community.
