Better Data. Better Decisions. Better Schools.

Introduction

Educational Effectiveness Survey, Student SEL Edition

While there is no single solution for all schools, research on effective schools identified common characteristics of high-performing schools known as the 9 Characteristics. Successful schools engaged in improvement activities focus on these characteristics of “organizational and educator capacity” to create and improve the system(s) that ultimately drive performance outcomes. Understanding the perceptions of your student population is essential to inform changes for improvement.

Student voice is an integral part of compiling an accurate view of these school improvement constructs. In both stand-alone reporting and through common questions between staff, students, and parents, the EES Student survey brings this voice to the table. Beyond the value for school staff to learn from student perspectives, CEE can make the EES Student data available to student leadership through the interactive tools. This allows students to take ownership of the school culture, efforts to improve this culture, and the ability to monitor growth over time.

9 Characteristics of High-Performing Schools

9 Characteristics Summary

South Whidbey High School

The Characteristics, "Curriculum, Instruction, and Assessment", "Communication and Collaboration", and "Focused Professional Development", are professional activities conducted amongst the adult school community and are rarely viewed by students. Thus questions regarding those Characteristics are not a part of the survey and do not appear in this report.

Educational Effectiveness Survey™

Diversity, Equity and Inclusion Module

South Whidbey High School

Academics

Curriculum is rigorous, challenging and culturally relevant. It represents high expectations for all students, requiring critical thinking and problem solving. It is well supported to ensure all students have opportunity to achieve success at a high academic level. Content is asset-based and has pro-social representation from various racial, gender, and other marginalized subgroups.

Instructional practices use an equity lens and effectively build on the interests, strengths and home cultures of the school's students and families. Culturally relevant pedagogy is infused into the content of literature, class projects, assignments, assessments events, field trips, ethnic studies courses, connections to families and communities, interventions and other resources.

Rigorous academic preparation is accompanied by high levels of knowledge and skills, capitalizing on and connecting to students of all backgrounds. All students have access to rigorous courses and supports to ensure success for all.

Belongingness

South Whidbey High School

A safe, welcoming school environment that embraces the diversity of race, ethnicity and religion, gender and sexual orientations among students and staff members distinguishes the school. Effective strategies for managing diversity are robust and functioning effectively.

Clear and effective policies, systems, structures and procedures supporting equity are in place and equitably enacted, such as democratic decision-making and non-exclusionary approaches to discipline. The school has an active and successful plan to help students learn positive social behaviors. There is evidence that the school has reduced instances of bullying, harassment and discrimination.

Students feel they have a voice and are beginning to take responsible ownership of their learning. They take an active role in co-creating an anti-bias culture and dismantling racism. They learn resilience and empathy while feeling a strong sense of belonging. Diverse representation of students, parents and community members are key participants and collaborators in school decision-making and shaping the culture.

Commitment to Dismantling Racism and Oppression

South Whidbey High School

Learning opportunities involve a varied and high quality curriculum (including social-emotional development) with substantial enrichment experiences. There is particular attention on reducing disparities in learning (racial, gender, etc.) created by tracking and ability grouping. There is intentional planning regarding managing structural and cultural shifts as well as changes at the systemic level.

Academic placement is not predictable by race, gender or socio-economic levels; ability grouping is limited and used strategically to avoid tracking defined as intentional segregation based upon current performance, race or other criteria. High levels of inclusion in the most rigorous courses exists for low SES students, students with disability and students of color. Access and support exists for those wishing to be in the most rigorous courses and opportunities.

Community engagement and partnerships are an active representation of equity concerns and the valuing of diversity in the community. The school participates in community projects and draws on diverse community assets. Parents and community groups are engaged in courageous conversations about race, class, expectations, and the role of education in the community. Plans are co-created and action items are monitored for implementation and effectiveness.

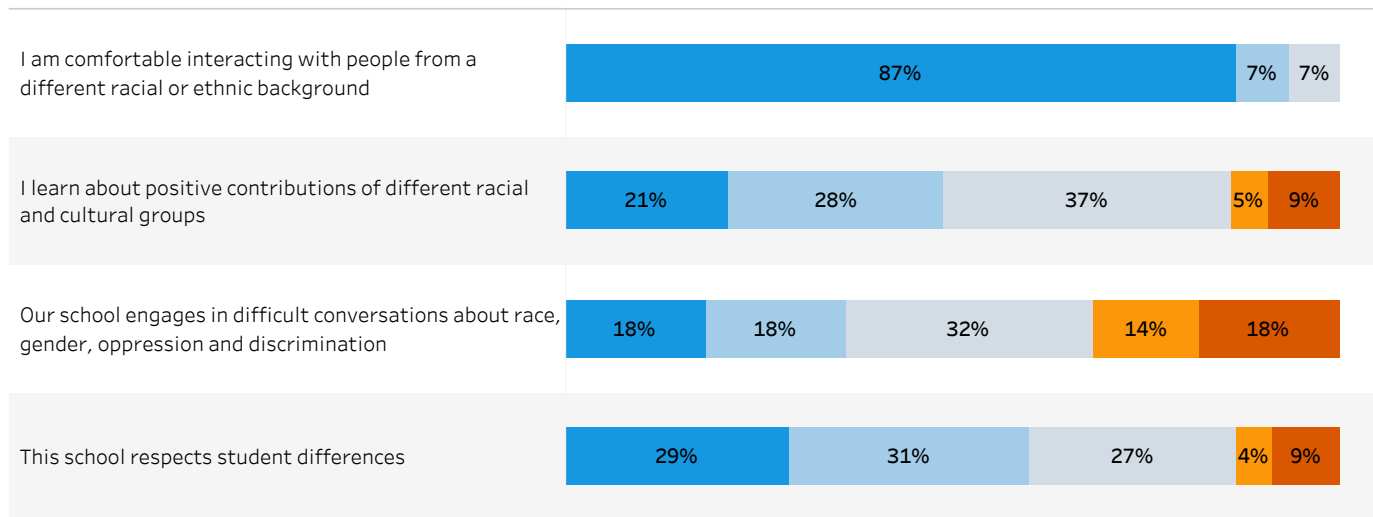

Diversity

South Whidbey High School

Self-awareness is encouraged as all members of the community are supported in knowing their personal equity journey and being aware of their own cultural history. There is strategic planning and actions taken regarding personal growth/development of all school and community stakeholders.

Cultural proficiency of all stakeholders is developed and monitored. There is an appreciation of different cultures and connections to families of different backgrounds. Appreciation of differences are modeled by leaders, teachers, and students who embrace difficult conversations about race, gender, economics, oppression and discrimination with a clear understanding of their own biases. The curriculum supports the development of cultural proficiency through exploration of the contributions of different racial and cultural groups to history and society as well as addressing bigotry and racism. Multiple, positive cross-cultural contacts between students, staff and community members are facilitated in and out of school.

Leaders build trust by demonstrating congruence and ownership of the collective vision for equity, active interventions designed to emphasize equity and, holding the school community accountable to its commitments. Leaders create partnerships that facilitate bridges across differences. Difference is dealt with effectively using multiple perspectives/approaches in terms of how power and resources are distributed; how decisions are made and implemented; and, how conflict is resolved.
