teacher sitting right next to me. I felt free to make mistakes while I was practicing. Mrs. Maine gave great feedback. Overall it was pretty fun.

468	boring and tedious	4/1/2020 8:38 PM
469	This style of learning is one that I've never experienced before. I've never taken an online class but I'm definitely considering taking another one next year. I think the key thing that helps taking online classes is to be self driven and motivated. At times I would fall behind the "scheduled due date" of some assignments but I'd always catch up. Sometimes it's hard taking one online class with the rest being "normal" classes but I think I adapted to it pretty well. With this whole virus pandemic, it works out perfect for me because I already know what it's like to take an online course. Overall it was a great new learning experience that I will continue to take next school year!	4/1/2020 12:39 PM

491	My online learning experience was a good journey. Although in the beginning it was very rocky with not gettiing textbooks in a timely manner and commuter issues. Through the course, I really feel that I could have done a lot better. In the beginning of November into January I struggling with health conditions connected to my Kidney issues, and I wasn't able to work as efficiently as I wish I could have. But I really wish that I could have felt more opened to my teacher to explain why I wasn't turning assignments on time and why I was behind. But in the long run I look forward to taking more courses on AccelerateU.	2/19/2020 12:51 PM

1017	lousy	12/19/2017 10:20 AM
1018	It forces you to be independent and self-sufficient, which I found freeing. It's nice to adhere to my own schedule of studying, rather than the main one set out for you in a school setting.
