EdisonLearning Group, Inc.

September – 2021-22

EDISONLEARNING ECOURSES™
LICENSE AGREEMENT

Customer Name: (the “Customer”)	Hampton Township School District Hampton High School; Hampton Online Academy
Customer Address:	4591 School Drive Allison Park PA 15101
Customer Contact For Notices:	Sharon Smith, M. Ed / Special Education/Transition Coordinator Josh Cable / Assistant Principal of Hampton High School & Hampton Online Academy
Customer Billing Address:	4591 School Drive Allison Park PA 15101

1. Definitions.

a. “Agreement” means this Agreement together with all Exhibits and other attachments hereto, including the Product Schedule attached hereto as Exhibit A (the “Product Schedule”) and the End User License Agreement attached hereto as Exhibit B (the “EULA”), each of which is incorporated herein and made a part hereof by reference.

b. “Authorized User” means authorized employees, agents and students of Customer who are authorized in writing by Customer to use the EdisonLearning Products solely for educational purposes and otherwise solely in connection with Customer's business.

c. “EdisonLearning Products” means certain software, web services and other educational content, as well as associated materials, including textbooks, pamphlets, presentations, syllabi, curricula, documentation, workbooks, and other written, oral, audio-visual, electronic or printed materials, and accompanying support services, to which Authorized Users have access under this Agreement, as set forth in the Product Schedule. The EdisonLearning Products licensed hereby may include access to online educational content from certain third-parties.

d. “User Data” means any personally identifiable data concerning Authorized Users that is made available to EdisonLearning by Customer or an Authorized User, including user profile information and student academic and performance data, and any other information protected by the Family Educational Rights and Privacy Act, as amended from time to time (“FERPA”), together with any regulations thereunder, and any similar laws.

e. “Work Product” mean all materials, software, tools, data, inventions, works of authorship and other innovations of any kind that EdisonLearning, or personnel working for or through EdisonLearning, may make, conceive, generate, develop, fix in a tangible medium or reduce to practice, alone or jointly with others, pursuant to or as a result of this Agreement, whether or not eligible for patent, copyright, trademark, trade secret or other legal protection, including but not limited to any improvements or modifications to EdisonLearning Products.

2. License and Services.

a. License of EdisonLearning Products. Subject to the terms and conditions of this Agreement and to Customer’s strict compliance with the terms hereof, EdisonLearning grants to Customer a limited, non-exclusive, non-transferable, non-sublicensable (except as expressly permitted herein) license (which shall be revocable pursuant to the terms of this Agreement) during the Term (as hereinafter defined) to access and use, solely by and through its Authorized Users and within Customer’s enterprise only, the EdisonLearning Products described in the Product Schedule, and the content and

information provided by such EdisonLearning Products, solely for Customer's internal business purposes in accordance with this Agreement. **ACCESS TO AND USE OF ANY THIRD PARTY CONTENT INCLUDED IN THE EDISONLEARNING PRODUCTS IS SUBJECT TO ANY APPLICABLE TERMS OF ACCESS AND/OR USE IMPOSED BY THE APPLICABLE THIRD PARTY.**

b. Authorized Users. The license in Section 2(a) includes the ability during the Term for Customer to designate Authorized Users who may access the EdisonLearning Products in accordance with this Agreement and solely for educational purposes. Each Authorized User must agree to the EULA to access an applicable EdisonLearning Product. Customer hereby accepts and agrees to the EULA with respect to each Authorized User. Customer shall not permit any person or entity other than Authorized Users to access or use any EdisonLearning Products and shall not permit any Authorized User to access or use EdisonLearning Products unless such Authorized User has agreed to the EULA. Customer shall instruct its Authorized Users to safeguard username and password information relating to the EdisonLearning Products, and shall notify EdisonLearning immediately if such login or password information has been compromised. Customer is responsible for all activities conducted under the accounts of its Authorized Users and for its Authorized Users' compliance with the EULA.

c. General Usage Restrictions. Customer agrees not to use, or permit any Authorized User to use, the EdisonLearning Products for any purpose beyond the scope of the license granted in Section 2(a). Without limiting the foregoing, except as expressly otherwise agreed in writing between the Parties, Customer shall not: (i) copy or duplicate the EdisonLearning Products; (ii) decompile, disassemble, reverse engineer or otherwise attempt to obtain or perceive the source code from which the EdisonLearning Products are compiled or interpreted; (iii) modify the EdisonLearning Products or create any derivative product of the EdisonLearning Products, provided that the foregoing shall not be construed to prohibit Customer from configuring an EdisonLearning Product to the extent permitted by the EdisonLearning Products' standard user interface; (iv) sublicense, assign, sell, lease or otherwise transfer or convey, or pledge as security or otherwise encumber, Customer's rights under this Agreement; (v) resell, sublicense, lease, time-share or otherwise make the EdisonLearning Products available to any third party other than Authorized Users who are bound by a EULA for use strictly in accordance with this Agreement; (vi) use EdisonLearning Products for third-party training, commercial time-sharing, or application service provider or service bureau use; (vii) use EdisonLearning Products to send or store viruses, worms, time bombs, Trojan horses or other harmful or malicious code, files, scripts, agents or programs; (viii) use EdisonLearning Products to send or store infringing or unlawful material; (ix) access the EdisonLearning Products for the purpose of building a competitive product or service or copying their features, content or user interface, including by screen scraping; (x) access the EdisonLearning Products using any automated program, electronic agent or bot; (xi) use the EdisonLearning Products, or permit them to be used by any person or entity, for purposes of product evaluation, benchmarking or other comparative analysis intended for publication. Customer shall not, and shall not permit any other person or entity to, obscure, remove or alter any of the trademarks, trade names, logos, patent or copyright notices or markings of the EdisonLearning Products, nor shall Customer add, or permit any other person or entity to add, any other notices or markings to the EdisonLearning Products or any portion thereof. Customer shall not use the EdisonLearning Products in violation of any of EdisonLearning's obligations to any third party, provided that EdisonLearning has notified Customer of such obligations as of the effective date of the Product Schedule. Customer shall ensure that its use of the EdisonLearning Products complies with all applicable laws, statutes, regulations or rules promulgated by governing authorities having jurisdiction over the Parties or the EdisonLearning Products.

d. Codes of Conduct/Acceptable Use Policies. Customer is responsible for ensuring that Authorized Users comply with applicable technology codes of conduct and acceptable use policies of Customer and applicable governmental authorities. In addition, as a condition to being granted access to EdisonLearning Products, Authorized Users are expected to agree to and comply with EdisonLearning's applicable technology Codes of Conduct and Acceptable Use Policies as in effect from time to time. EdisonLearning reserves the right to deny Authorized Users access to EdisonLearning Products for failure to agree to such Codes of Conduct or Acceptable Use Policies or based on failure to comply with such Codes of Conduct or Acceptable Use Policies in its sole discretion.

e. Services. EdisonLearning will provide implementation, training, support and other services in connection with the EdisonLearning Products only as expressly set forth in the Product Schedule.

f. Online Access. IN THE EVENT OF ANY INTERRUPTION IN OR FAILURE OF ACCESS TO THE EDISONLEARNING PRODUCTS, CUSTOMER'S SOLE AND EXCLUSIVE REMEDY, AND EDISONLEARNING'S SOLE AND EXCLUSIVE LIABILITY THEREFOR, SHALL BE FOR EDISONLEARNING TO USE COMMERCIALY REASONABLE EFFORTS TO RESUME ACCESS TO THE EDISONLEARNING PRODUCTS AS PROMPTLY AS REASONABLY PRACTICABLE, AND EDISONLEARNING SHALL NOT HAVE ANY LIABILITY WHATSOEVER IN CONNECTION WITH THIS AGREEMENT FOR ANY MONEY DAMAGES RESULTING FROM ANY SUCH INTERRUPTION OR FAILURE OF ACCESS.

3. Term/Renewal. The initial term of this Agreement (“Initial Term”) shall commence on the date of Customer’s signature to this Agreement (the “Effective Date”) and end on the date immediately preceding the anniversary of the Effective Date, unless earlier terminated in accordance with the terms and conditions set forth herein. Subject to termination as provided herein, the term of this Agreement shall automatically, and without the necessity of further action on the part of either Party, renew for successive additional one (1) year terms (each a “Renewal Term” and together with the Initial Term, the “Term”) unless either Party provides written notice of its intent not to renew to the other Party not less than 30 days prior to the end of the then-current Initial Term or Renewal Term, as applicable.

4. Fees and Expenses.

a. Fees. In consideration for EdisonLearning’s performance under this Agreement, during the Initial Term, Customer shall pay EdisonLearning the fees for the EdisonLearning Products set forth in Product Schedule (the “Fees”) in accordance with, and subject to, the terms set forth in this Agreement. During any Renewal Term, Customer shall pay EdisonLearning Fees for EdisonLearning Products at EdisonLearning’s then-prevailing rates. For clarity, EdisonLearning reserves the right to increase or otherwise change its Fees from time to time in its sole discretion. From and after the date any such increase or change is to take effect, the Fees payable by Customer hereunder shall be, and Customer shall pay Fees hereunder, as so increased or changed.

b. Payment of Fees. Unless otherwise set forth in the Product Schedule, Fees shall be due and payable, and Customer shall pay all Fees and other amounts payable to EdisonLearning under this Agreement, no later than 30 days after the date of an invoice from EdisonLearning therefor. All payments to EdisonLearning under this Agreement shall be made in U.S. Dollars, without deduction or setoff, and free and clear of, and without reduction for, any withholding taxes, unless such deduction or withholding is required by applicable law. If Customer is required to deduct or withhold, Customer will promptly notify EdisonLearning of the requirement, pay the required amount to the relevant governmental authority, provide EdisonLearning with an official receipt or certified copy or other documentation acceptable to EdisonLearning evidencing payment, and pay to EdisonLearning, in addition to the payment to which EdisonLearning is otherwise entitled under this Agreement, such additional amount as is necessary to ensure that the net amount actually received by EdisonLearning equals the full amount EdisonLearning would have received had no such deduction or withholding been required. Payments shall be sent to the address indicated on the invoice.

c. Late Payments. If any amounts payable to EdisonLearning hereunder are not paid when due, such unpaid amounts shall bear interest, and Customer shall pay interest on such unpaid amounts, at a rate equal to the lesser of (a) 2% per month or (b) the maximum amount allowed by law until such amounts paid in full. In addition to its other remedies hereunder and at law, EdisonLearning shall have the right to suspend its performance under this Agreement (including, but not limited to, suspending Authorized User access to the EdisonLearning Products) for late or nonpayment of Fees or other amounts payable to it under this Agreement. Customer shall, on demand by EdisonLearning, reimburse EdisonLearning for all attorneys’ fees and costs and other expenses incurred by EdisonLearning in connection with its efforts to collect any unpaid amounts payable to EdisonLearning hereunder.

d. Taxes. The Fees hereunder do not include any sales, use, excise, import or export, value-added or similar tax or interest, or any costs associated with the collection or withholding thereof, or any government permit fees, license fees or customs or similar fees levied on the delivery of any software or equipment or the performance of services.

e. Expenses. Except as provided in this Agreement or the Product Schedule, each Party will be responsible for its own expenses incurred in rendering performance under this Agreement, including, without limitation, the cost of facilities, work space, computers and computer time, development tools and platforms, utilities management, personnel and supplies.

f. Purchase Orders. Customer agrees that if its internal procedures require that a purchase order be issued as a prerequisite to payment of any amounts due to EdisonLearning, it will timely issue such purchase order and inform EdisonLearning of the number and amount thereof. Customer agrees that the absence of a purchase order, other ordering document or administrative procedure may not be raised as a defense to avoid or impair the performance of any of Customer's obligations hereunder, including payment of amounts owed to EdisonLearning. EdisonLearning shall not be bound by any pre-printed terms additional to or different from those in this Agreement that may appear subsequently in Customer’s form documents, purchase orders, quotations, acknowledgments, invoices or other communications, and any proposal for such additional or different terms is hereby objected to and rejected.

5. Confidentiality.

a. Confidential Information. By virtue of this Agreement, a Party (the “Receiving Party”) may have access to information that is confidential or proprietary (“Confidential Information”) to the other Party (the “Disclosing Party”). For purposes of this Agreement, “Confidential Information” means information, ideas, materials or other subject matter of a Party, whether disclosed orally, in writing or otherwise, that is provided under circumstances reasonably indicating that it is confidential or proprietary. Confidential Information of EdisonLearning shall include, without limitation, the pricing and other non-public terms and conditions of this Agreement, and all technical information or data, product ideas, methodologies, calculation algorithms and analytical routines, and all software code that may be provided or disclosed to Customer or an Authorized User.

b. Restrictions on Use. The Receiving Party shall not use Confidential Information of the Disclosing Party for any purpose other than in furtherance of this Agreement and the activities described herein. The Receiving Party shall not disclose Confidential Information of the Disclosing Party to any third parties other than those employees, contractors or agents who have a legitimate need to know such Confidential Information (“Representatives”). Each Party agrees that its Representatives shall be bound to retain the confidentiality of Confidential Information under provisions (including provisions relating to nonuse and nondisclosure) no less restrictive than those required for Confidential Information hereunder (in the case of Representatives that are not employees of the Receiving Party, such agreement shall be in a writing signed by such Representatives). Each Party shall be responsible for any disclosure of Confidential Information, or any other breach of this Agreement, by any of its Representatives. The Receiving Party shall maintain Confidential Information of the Disclosing Party with at least the same degree of care it uses to protect its own proprietary information of a similar nature or sensitivity, but no less than reasonable care under the circumstances. Each Party shall advise the other Party in writing of any misappropriation or misuse of Confidential Information of the other Party of which the notifying Party becomes aware.

c. Exclusions. This Agreement imposes no obligation upon a Receiving Party with respect to the Confidential Information that the Receiving Party can show: (a) was already in the Receiving Party’s possession at the time it was acquired from the Disclosing Party; (b) is or becomes part of public knowledge other than as a result of any action or inaction of the Receiving Party or its Representatives; (c) is lawfully obtained by the Receiving Party from a third party without a duty of confidentiality; or (d) is independently developed by the Receiving Party without use of or reference to the Disclosing Party’s Confidential Information. In addition, nothing in this Article 5 shall prevent the Receiving Party from disclosing the Confidential Information of the Disclosing Party to the extent required by a judicial order or other legal obligation, provided that, in such event, the Receiving Party shall promptly notify the Disclosing Party to allow intervention (and shall cooperate with the Disclosing Party) to contest or minimize the scope of the disclosure (including application for a protective order). Further, each Party may disclose Confidential Information embodied in the terms and conditions of this Agreement: (i) as required by the applicable securities and other laws, including, without limitation, requirements to file a copy of this Agreement (redacted to the extent reasonably permitted by applicable law) or to disclose information regarding the provisions hereof or performance hereunder to applicable regulatory authorities; (ii) in confidence, to legal counsel; (iii) in confidence, to accountants, banks, and financing sources and their advisors; and (iv) in connection with the enforcement of this Agreement or any rights hereunder.

d. Return of Materials. Upon termination of this Agreement, each Party (as Receiving Party) will immediately return to the Disclosing Party all Confidential Information of the Disclosing Party embodied in tangible (including electronic) form or, at the Disclosing Party’s discretion, destroy all such Confidential Information and certify in writing to the Disclosing Party that all such Confidential Information has been destroyed.

6. Proprietary Rights.

a. Ownership of EdisonLearning Products. EdisonLearning and its licensors shall be deemed to own and hold all right, title and interest in and to EdisonLearning Products and in all proprietary rights, including without limitation copyrights, trademark rights, patent rights, trade secret rights, and any other intellectual or industrial property rights throughout the world, with respect to the EdisonLearning Products, any improvements thereto and all copies or portions thereof, whether or not incorporated into or used in connection with any other products, including software materials. Customer acknowledges that EdisonLearning Products are licensed and not sold under this Agreement, and that EdisonLearning hereby reserves and retains all rights not expressly granted in this Agreement.

b. Ownership of Work Product. Customer agrees that all Work Product, in whatever form or medium, shall be the property of EdisonLearning. To the extent that Customer is determined to have retained any rights in any Work Product, Customer agrees to and hereby irrevocably grants, assigns and conveys to EdisonLearning all of its right, title and interest, if any, in the Work Product and any inventions, copyrights, patents, trademarks, trade secrets, rights of priority, moral rights and other intellectual property rights relating to such Work Product. Customer acknowledges that EdisonLearning shall have the sole right to license the Work Product or any portion thereof, and/or incorporate the Work Product or any portion thereof

into products or services, for use by other licensees or customers of EdisonLearning. Customer agrees to promptly take any action that EdisonLearning reasonably requests to confirm, accomplish or perfect the allocation of ownership in this Section 6(b) or to otherwise protect EdisonLearning's interest in the Work Product.

c. User Data. User Data provided to EdisonLearning by Customer (as opposed to being collected by EdisonLearning from interaction with Authorized Users) shall be considered the Confidential Information of Customer in accordance with Article 5, and EdisonLearning shall not, without the written permission of Customer, use such User Data for any purpose other than to make the EdisonLearning Products available in accordance with this Agreement. EdisonLearning will not use any User Data collected by EdisonLearning from interaction with Authorized Users (including User Data collected or generated by EdisonLearning Products) for any purpose other than to make the EdisonLearning Products available in accordance with this Agreement, except that Edison Learning may use, display and distribute such User Data for other purposes in accordance with any permission or consent obtained from the applicable Authorized User, including such permission provided in a EULA. Notwithstanding the foregoing, EdisonLearning reserves the right to use, display and distribute User Data for any business purpose, provided that such use or disclosure shall only be in a form that does not personally identify specific individual end users (permitted business uses may include computing and disclosing statistics or analyses relating to the EdisonLearning Products, including performance or usage metrics). EdisonLearning's rights to use and disclose User Data shall at all times be subject to any restrictions imposed by applicable laws and regulations, including FERPA and other privacy laws and regulations.

d. Suggestions. Customer grants EdisonLearning a royalty-free, fully paid-up, non-exclusive, perpetual, irrevocable, worldwide, transferable, sub-licensable license to copy, modify, distribute and otherwise use any suggestions, enhancement requests, recommendations or other feedback provided by Customer or its Authorized Users relating to the EdisonLearning Products or their operation.

e. Reservation of Rights. Except as otherwise expressly provided herein, nothing in this Agreement shall be deemed to grant, directly or by implication, estoppel or otherwise, any right or license with respect to any technology or other intellectual property rights, and each Party retains all right, title and interest in and to their respective technologies and other intellectual property rights.

7. Warranties and Disclaimers.

a. Customer Warranties. Customer hereby represents and warrants to EdisonLearning that (a) it has all rights, licenses, consents and releases necessary to provide and use all content, materials or data that it provides to EdisonLearning hereunder ("Customer Content"), and (b) Customer Content will not infringe or misappropriate any U.S. patent, copyright, trade secret or proprietary right of a third party.

b. EdisonLearning Warranties. EdisonLearning hereby warrants to Customer that during the Term the EdisonLearning Products (excluding any Customer Content and third party content) will not infringe or misappropriate any U.S. patent, copyright, trade secret or proprietary right of a third party. Notwithstanding anything to the contrary herein, EdisonLearning will have no liability or responsibility for breach of warranty under this Section 7(b) to the extent the alleged infringement or misappropriation arises from or involves (A) the use of the EdisonLearning Products in a manner not specified in relevant documentation, (ii) use of other than a then-current release of the EdisonLearning Products, (iii) the combination of EdisonLearning Products with other programs, software, hardware or materials not provided by EdisonLearning, or (iv) any software, content, hardware or other materials included in the EdisonLearning Products that are provided by or obtained from third parties. **NOTWITHSTANDING SECTION 8(b) BELOW, IN THE EVENT OF A BREACH OF THE WARRANTY SET FORTH IN THIS SECTION 7(b), EDISONLEARNING'S SOLE AND EXCLUSIVE OBLIGATION, AND CUSTOMER'S SOLE AND EXCLUSIVE REMEDY, SHALL BE FOR EDISONLEARNING, AT ITS OPTION, TO USE COMMERCIALY REASONABLE EFFORTS TO MODIFY, CORRECT OR REPLACE, THE EDISONLEARNING PRODUCTS WITH CONFORMING OR NON-INFRINGEMENT ITEMS (OR TO PROCURE FOR CUSTOMER THE RIGHT TO USE THE ALLEGEDLY INFRINGING PART OF EDISONLEARNING PRODUCTS), OR IF THE FOREGOING OPTIONS ARE NOT REASONABLY PRACTICABLE, TO TERMINATE THIS AGREEMENT AND REFUND CUSTOMER ALL PREPAID FEES FOR THE REMAINDER OF THE TERM AFTER THE DATE OF TERMINATION.**

c. Mutual Representations and Warranties. Each Party hereby represents and warrants to each other that (a) it will comply with all applicable laws and regulations, including FERPA and other privacy laws and regulations, with respect to the collection, protection and disclosure of User Data in its possession or control; and (b) it shall comply with all other applicable laws in its performance hereunder.

d. Disclaimers. EXCEPT FOR THE WARRANTIES EXPRESSLY SET FORTH IN THIS ARTICLE 7, THE EDISONLEARNING PRODUCTS ARE PROVIDED TO CUSTOMER “AS IS”, WITH ALL FAULTS AND DEFECTS AND WITHOUT REPRESENTATIONS OR WARRANTIES OF ANY KIND. TO THE MAXIMUM EXTENT PERMITTED UNDER APPLICABLE LAW, EDISONLEARNING, ON ITS OWN BEHALF AND ON BEHALF OF ITS AFFILIATES AND ITS AND ITS AFFILIATES’ RESPECTIVE LICENSORS AND SERVICE PROVIDERS, EXPRESSLY DISCLAIMS ALL OTHER REPRESENTATIONS AND WARRANTIES, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, WITH RESPECT TO THE EDISONLEARNING PRODUCTS, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT, AND WARRANTIES THAT MAY ARISE OUT OF COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OR TRADE PRACTICE. WITHOUT LIMITATION TO THE FOREGOING, EDISONLEARNING PROVIDES NO WARRANTY OR UNDERTAKING, AND MAKES NO REPRESENTATION OF ANY KIND THAT THE EDISONLEARNING PRODUCTS WILL OPERATE WITHOUT INTERRUPTION OR BE ERROR FREE. Neither Party will make any representations or create any warranties, express or implied, concerning the other Party’s products or services, other than those stated in their respective marketing materials therefor.

8. Indemnification and Limitation of Liability.

a. Customer shall indemnify, defend and hold harmless EdisonLearning and its affiliates and EdisonLearning’s and its affiliates’ respective personnel, officers and directors from and against any third party claims, demands or causes of action, and related losses, costs, expenses (including reasonable attorneys’ fees and court costs), settlements and damages incurred, to the extent arising out of or in connection with (i) Customer’s breach of its representations, warranties and covenants under this Agreement, (ii) any dispute with an Authorized User with respect to the EdisonLearning Products or Customer’s own products, services or performance, (iii) any modifications or customization of EdisonLearning Products by any person other than EdisonLearning, (iv) a breach of the EULA by an Authorized User, or (v) any other acts or omissions of Customer or its Representatives.

b. Subject to the limitations set forth herein, EdisonLearning shall indemnify, defend and hold harmless Customer and its affiliates and Customer’s and its affiliates’ personnel, officers and directors from and against any third party claims, demands or causes of action, and related losses, costs, expenses (including reasonable attorneys’ fees and court costs), settlements and damages incurred to the extent arising out of or in connection with EdisonLearning’s breach of its representations, warranties and covenants under this Agreement.

c. A Party seeking to be indemnified under this Article 8 (an “Indemnified Party”) will promptly notify the other Party (the “Indemnifying Party”) in writing upon the assertion of any claim that is or may be covered by the indemnities in this Agreement; provided, that an Indemnifying Party will not be relieved of its indemnity obligations for the Indemnified Party’s failure to notify unless it can demonstrate that it was substantially prejudiced by such failure. The Indemnifying Party shall have the authority to assume the sole defense through its own counsel of any matter for which it acknowledges its indemnification obligations hereunder and to compromise or settle any suits so far as such suits may be compromised or settled without prejudice to any rights or interests of the Indemnified Party. Customer will not settle any claim against EdisonLearning unless such settlement completely and forever releases EdisonLearning with respect thereto or unless EdisonLearning provides its prior written consent to such settlement. The Indemnified Party shall cooperate with the Indemnifying Party in such defense in all reasonable respects at the Indemnifying Party’s expense, provided that the Indemnified Party may also be represented by and actively participate through its own counsel in any suit or proceeding being controlled by the Indemnified Party at the Indemnified Party’s expense.

d. TO THE MAXIMUM EXTENT PERMITTED BY LAW, IN NO EVENT WILL EDISONLEARNING OR ITS AFFILIATES, OR ANY OF ITS OR THEIR RESPECTIVE LICENSORS OR SERVICE PROVIDERS, BE LIABLE TO CUSTOMER OR ANY THIRD PARTY FOR ANY USE, INTERRUPTION, DELAY OR INABILITY TO USE THE EDISONLEARNING PRODUCTS, LOST REVENUES, PROFITS OR ANTICIPATED SAVINGS, DELAYS, INTERRUPTION OR LOSS OF SERVICES, BUSINESS OR GOODWILL, LOSS OR CORRUPTION OF DATA, LOSS RESULTING FROM SYSTEM OR SYSTEM SERVICE FAILURE, MALFUNCTION OR SHUTDOWN, FAILURE TO ACCURATELY TRANSFER, READ OR TRANSMIT INFORMATION, FAILURE TO UPDATE OR PROVIDE CORRECT INFORMATION, SYSTEM INCOMPATIBILITY OR PROVISION OF INCORRECT COMPATIBILITY INFORMATION OR BREACHES IN SYSTEM SECURITY, OR FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, SPECIAL OR PUNITIVE DAMAGES, WHETHER ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT, BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, REGARDLESS OF WHETHER SUCH DAMAGES WERE FORESEEABLE AND WHETHER OR NOT EDISONLEARNING WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

e. IN NO EVENT SHALL THE TOTAL COLLECTIVE LIABILITY OF EDISONLEARNING AND ITS AFFILIATES, INCLUDING ANY OF ITS OR THEIR RESPECTIVE LICENSORS' AND SERVICE PROVIDERS', UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ITS SUBJECT MATTER, UNDER ANY LEGAL OR EQUITABLE THEORY, INCLUDING BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY AND OTHERWISE, EXCEED THE AMOUNT PAID BY CUSTOMER TO EDISONLEARNING PURSUANT TO THIS AGREEMENT IN THE SIX (6)-MONTH PERIOD IMMEDIATELY PRIOR TO THE EVENT, ACT OR OMISSION GIVING RISE TO SUCH LIABILITY. CUSTOMER ACKNOWLEDGES THAT THE PRICING OF THE EDISONLEARNING PRODUCTS AND OTHER TERMS AND CONDITIONS OF THIS AGREEMENT REFLECT THE ALLOCATION OF RISK SET FORTH IN THIS AGREEMENT AND THAT EDISONLEARNING WOULD NOT ENTER INTO THIS AGREEMENT WITHOUT THESE LIMITATIONS ON ITS LIABILITY.

9. Expiration/Termination. This Agreement is effective until expiration or termination of the Term. Without prejudice to any other rights or remedies EdisonLearning may have at law or in equity, EdisonLearning may immediately terminate this Agreement or any EULA (or any Authorized User's access to EdisonLearning Products) if Customer or any of its Authorized Users fails to comply with any term or condition of this Agreement or a EULA or is otherwise deemed by EdisonLearning to be misusing any EdisonLearning Products. Upon expiration or termination of this Agreement, the rights and license granted under this Agreement (and all EULA's) shall immediately cease, and (i) Customer and its Authorized Users shall immediately cease all use of EdisonLearning Products; (ii) Customer will cease all use of EdisonLearning's Confidential Information; and (iii) Customer will return within five (5) business days to EdisonLearning or, at EdisonLearning's option, destroy (including, without limitation, deletion from its computer storage or any other media) all copies of the EdisonLearning Products and EdisonLearning's Confidential Information then in Customer's possession or control. If any EULA is terminated independently of this Agreement, the rights and license granted under the EULA shall immediately cease and the applicable Authorized User shall immediately cease all use of EdisonLearning Products. Customer shall be liable for any unlicensed or unauthorized use of EdisonLearning Products by any Authorized User.

10. General.

a. Entire Agreement. This Agreement, together with its Exhibits and other attachments (if any), including the Product Schedule and the EULA, constitute the entire agreement between the Parties concerning the subject matter hereof and thereof, and supersede all prior or contemporaneous oral or written communications, proposals, conditions, representations and warranties.

b. Binding Effect. This Agreement is binding on and shall inure to the benefit of the Parties and their respective successors and permitted assigns.

c. No Third Party Beneficiary Rights. No third party, whether a constituent of Customer or otherwise, may enforce or rely upon any obligation of, or the exercise of or failure to exercise any right of, Customer or EdisonLearning in this Agreement. This Agreement is not intended to create any rights of a third party beneficiary.

d. Modification. This Agreement may not be altered, amended, changed or modified except by an agreement in writing approved with all the formalities of this initial Agreement and executed by a properly authorized representative of EdisonLearning and a properly authorized representative of Customer.

e. Severability. Should any term or provision of this Agreement be finally determined by a court of competent jurisdiction to be void, invalid, unenforceable or contrary to law or equity, the offending term or provision shall be construed (i) to have been modified and limited (or if strictly necessary, deleted) only to the extent required to conform to the requirements of law and (ii) to give effect to the intent of the Parties (including with respect to the economic effect of the Agreement), and the remainder of this Agreement (or, as the case may be, the application of such provisions to other circumstances) shall not be affected thereby but rather shall be enforced to the greatest extent permitted by law.

f. No Waiver. No waivers under this Agreement will be effective unless expressly set forth in writing and signed by a duly authorized representative of the Party against whom enforcement thereof is sought. The failure of either Party to insist upon strict performance of any provision of this Agreement, or to exercise any right provided for herein, shall not be deemed to be a waiver of such provision or right with respect to subsequent claims (unless expressly so stated in a valid amendment or waiver), and no waiver of any provision or right shall affect the right of the waiving Party to enforce any other provision or right herein.

g. Assignment. No right or obligation of Customer under this Agreement may be assigned, delegated or otherwise transferred, whether by agreement, operation of law or otherwise, without the express prior written consent of EdisonLearning, and any attempt to assign, delegate or otherwise transfer any of Customer's rights or obligations hereunder without such consent shall be void *ab initio*. EdisonLearning may assign, delegate or transfer its rights and obligations hereunder to another party without prior written notice to or consent of Customer. Following any such assignment or transfer, EdisonLearning shall provide notice to Customer.

h. Governing Law and Venue. This Agreement shall for all purposes be governed by and interpreted in accordance with the laws of the State of New Jersey without reference to its conflicts of law provisions. Any dispute regarding this Agreement shall be subject to the exclusive jurisdiction of the federal and state courts in and for Hudson County, New Jersey, and the parties hereby irrevocably agree to submit to the personal and exclusive jurisdiction and venue of such courts. This Agreement shall not be governed by the United Nations Convention on Contracts for the International Sale of Goods, the application of which is hereby expressly excluded.

i. Equitable Relief. The Parties agree that any breach or threatened breach of this Agreement by Customer or any Authorized User would cause EdisonLearning irreparable injury for which no adequate remedy at law exists. Accordingly, the Parties agree that, in addition to any other remedies available to it at law or in equity, EdisonLearning shall be entitled to injunctive or other equitable relief, without the necessity of posting a bond or proving irreparable harm, in the event any breach or threatened breach of this Agreement by Customer or any Authorized User.

j. Remedies Cumulative. Except as otherwise provided in this Agreement (including in Sections 2(e) and 7(b)), the rights and remedies provided in this Agreement and all other rights and remedies available to either Party at law or in equity are, to the extent permitted by law, cumulative and not exclusive of any other right or remedy now or hereafter available at law or in equity. If any legal action is brought to enforce any obligations hereunder, the prevailing Party shall be entitled to receive its legal fees, court costs and other collection expenses, in addition to any other relief it may receive.

k. Notices. Any notice or communication permitted or required hereunder shall be in writing and shall be delivered in person or by courier, or mailed by certified or registered mail, postage prepaid, return receipt requested, and addressed as set forth in the Preamble to this Agreement or to such other address as shall be given in accordance with this Section 10(k), and shall be effective upon receipt.

l. Force Majeure. Neither Party will be responsible for any failure to fulfill its obligations due to causes beyond its reasonable control, including acts or omissions of government or military authority, acts of God, natural disasters, fires, floods, materials shortages, transportation delays, labor disturbances, riots, wars, terrorist acts, the inability to obtain any export or import license or other approval or authorization of any government authority, malfunction of portions of the Internet or another third party network, governmental regulations promulgated after the Effective Date, communication line failures, power failures, equipment failures, failure of third parties to provide goods or services or other acts or omissions of third parties including hackers and crackers.

m. Export Control. Customer shall not export or allow the export or re-export the EdisonLearning Products, any components thereof or any Confidential Information of EdisonLearning without the express, prior, written consent of EdisonLearning and except in compliance with all export laws and regulations of the U.S. Department of Commerce and all other U.S. agencies and authorities, including the Export Administration Regulations of the U.S. Department of Commerce Bureau of Export Administration (as contained in 15 C.F.R. Parts 730-772), and, if applicable, relevant foreign laws and regulations.

n. Headings and Construction. The headings in this Agreement are inserted for convenience only and are not intended to describe, interpret, define, or limit the scope, extent or intent of this Agreement or any provision hereof. In this Agreement, unless the context otherwise requires, words in the singular form shall include the plural form and vice versa, and words denoting any gender shall include all genders and words denoting natural persons shall include corporations and partnerships and vice versa. The words "herein" and "hereunder" and words of similar import shall be deemed to mean this Agreement as a whole, unless the context clearly otherwise requires. Whenever the words "include," "includes" or "including" are used in this Agreement, they shall be deemed to be followed by the words "without limitation." This Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted. The Product Schedule and EULA shall be construed with, and as an integral part of, this Agreement to the same extent as if they were set forth verbatim herein.

o. Relationship of Parties. EdisonLearning and Customer are independent contracting parties. Nothing in this Agreement shall be construed as creating a partnership, joint venture, or employer-employee relationship between EdisonLearning and Customer.

p. Counterparts. This Agreement may be executed in one or more counterparts (including those delivered by facsimile or other electronic means), each of which shall for all purposes be deemed to be an original and all of which shall constitute the same instrument. Signatures delivered by facsimile, pdf e-mail or other electronic means shall have the same force and effect as original signatures.

q. Survival. In addition to the other provisions of this Agreement that by their terms survive the termination or expiration of this Agreement, Articles 4-10 and all limitations of liability, limitations of remedies and disclaimers of warranties shall survive the termination or expiration of this Agreement.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their duly authorized representatives.

Exhibit A
PRODUCT SCHEDULE

I. eSchoolware Description

eSchoolware Description	<p>The key components of the eSchoolware system are:</p> <ul style="list-style-type: none">○ System Portal: The portal is the user dashboard that centralizes all vital tools for students, teachers, parents and administrators, allowing them access to everything they need from one homepage.○ Information Management System: A web-based information system designed for the administration of enrollment, courses, content, students and instructors in online and hybrid environments.○ Content Delivery Systems: Course Player – is an interactive content delivery system that is used for the majority of our high school eCourses™. The Course Player requires that students interact with content and assessments in a personalized forced progression of learning objects. Mastery settings require that a student has succeeded with the objectives of a lesson before the next lesson is unlocked. Students are provided with additional learning objects when needed. MyDay is a content delivery system designed as the result of targeted research with middle school students. As with Course Player, students are provided with a personalized forced progression of learning objects through their daily task lists. Mastery settings are available at an institution and student level to require that students have demonstrated success with the objectives of each lesson before moving on to the next lesson. Students are assessed regularly through a variety of games and traditional summative assessments. Traditional View is a basic user interface that allows students to guide themselves through lesson content and assignments. Any eCourse™ can be delivered in this view. A performance alert system is available to indicate when academic interventions are needed based on lesson and cumulative assessments.
-------------------------	--

II. Educational Content Description

<p>Content Description</p>	<p>EdisonLearning offers a wide selection of proprietary EdisonLearning eCourses® which can be utilized as regular courses during the regular academic year, as summer school courses, as credit recovery courses, and as supplemental courses. EdisonLearning may also make third party content available to Customer and Customer’s Customers from time to time. EdisonLearning’s content offerings from time to time (standard and premium) are set forth in its then-current eCourse catalog(s). <i>EdisonLearning reserves the right to add, alter and remove content from its offerings and to amend its catalogs at any time, from time to time, in its sole discretion.</i></p> <p>Standard EdisonLearning eCourses® include:</p> <ul style="list-style-type: none"> • Multi-media engagement: Lessons are introduced and reinforced accommodating multiple learning styles. Highlights include videos, podcasts, interactive activities, complimentary printable textbooks, messaging, digital notebooks, forums, blogs and more. • Individualized learning: Instruction can be adapted to each student’s needs and interests. • Modular design: Lessons contain only one or two objectives, to keep students focused and allow for individualized learning. • Accountability: A unique daily assessment and tracking system allows immediate intervention when students fall below school-defined mastery levels. • Standards alignment: Content is aligned to national and state standards. <p>Third party content is provided “as is” and is subject to any applicable terms of use imposed by the applicable third party in connection with access to and use of such content. <i>EdisonLearning does not guarantee the availability of any particular third-party content and reserves the right to add, alter and remove third party content at any time, from time to time, its offerings from time to time in its discretion.</i></p> <p>See the Fee Schedule below for content pricing (pricing for Premium Content is separate from and in addition to Standard Content pricing).</p>
<p>Responsibilities of Customer</p>	<p><i>Enrollment and Retention.</i> Customer is responsible for all student enrollment and retention activities..</p> <p><i>Instructional Services:</i> Customer is responsible for coverage of instructional services for any eCourse for which Instructional Services are not purchased from EdisonLearning.</p> <p><i>Advisement Services:</i> Customer is responsible for the coverage of advisement services not purchased from EdisonLearning for any student.</p> <p><i>Exceptional Education Services:</i> Customer is responsible for providing all exceptional education services to its students and for ensuring that all accommodations are being met as determined by each student’s IEP or 504 plan and determining if eCourses are Least Restrictive Environment for students with special needs. In addition, Reseller and Reseller’s Customers are responsible for determining if eCourses are Least Restrictive Environment for students with special needs.</p>

10	<p><u>-Site License Access</u> – Provides Access to the Entire Standard eCourse Repository for up-to: <u>(10) Students – 2nd & 3rd Semester; (1/2 Year Access);</u> *Includes Virtual Instructor-Support</p> <p>*Includes Advisor-Support</p>	10SLVLIA29	\$4,150.00 ea.
	<i>*PBL, OwnIt!, Pointful CPE and Any Other Premium eCourse Content Not-Included...</i>		
TOTAL:			\$20,750.00

Fee Schedule

Site License (School)

Site licenses allow a set number of students in a single building full-time access to the standard eCourse catalog. Licenses are transferable and premium courses are not included. All licenses listed below are content-only.

Virtual Instructors

A cohort of highly qualified teachers, administrators, and student support personnel who provide asynchronous and synchronous instruction, guidance, and support. Teaching services includes grading and tutoring

Virtual Advisors

Mentors and coaches who confers with the student to devise a personalized curriculum that incorporates their personal and academic goals.

Exhibit B

END USER LICENSE AGREEMENT

This End User License Agreement (“License Agreement”) is a legal License Agreement between EdisonLearning, Inc., a Delaware corporation (“EdisonLearning”), and you (an individual and, if applicable, the entity on whose behalf you are acting, either of which is referred to herein as “Licensee”), the subject matter of which concerns the use of computer software, content, and any applicable updates or upgrades thereto, as well as any associated media and printed or electronic (retrievable via computer networks such as the Internet or otherwise) materials (collectively referred to herein as “EdisonLearning Products”).

EDISONLEARNING PROVIDES THE EDISONLEARNING PRODUCTS SOLELY ON THE TERMS AND CONDITIONS SET FORTH IN THIS LICENSE AGREEMENT AND ON THE CONDITION THAT LICENSEE ACCEPTS AND COMPLIES WITH THEM. **BY ACCESSING, INSTALLING, USING OR CONTINUING TO USE THE EDISONLEARNING PRODUCTS (“LICENSEE’S ACCEPTANCE”), LICENSEE AGREES TO BE BOUND BY THE TERMS AND CONDITIONS OF THIS LICENSE AGREEMENT.**

IF LICENSEE DOES NOT AGREE TO THE TERMS AND CONDITIONS OF THIS LICENSE AGREEMENT, EDISONLEARNING WILL NOT AND DOES NOT LICENSE THE EDISONLEARNING PRODUCTS TO LICENSEE AND LICENSEE MUST NOT INSTALL (AND IF ALREADY INSTALLED, LICENSEE MUST DE-INSTALL), ACCESS, OR OTHERWISE USE, OR CONTINUE TO USE, THE EDISONLEARNING PRODUCTS.

NOTWITHSTANDING ANYTHING TO THE CONTRARY IN THIS LICENSE AGREEMENT OR LICENSEE’S ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS LICENSE AGREEMENT, NO LICENSE IS GRANTED (WHETHER EXPRESSLY, BY IMPLICATION OR OTHERWISE) UNDER THIS LICENSE AGREEMENT, AND THIS LICENSE AGREEMENT EXPRESSLY EXCLUDES ANY RIGHT, CONCERNING ANY SOFTWARE THAT LICENSEE DID NOT ACQUIRE LAWFULLY OR THAT IS NOT A LEGITIMATE, AUTHORIZED COPY OF THE EDISONLEARNING PRODUCTS.

1. Grant of License. Subject to the terms and conditions of this License Agreement and Licensee’s strict compliance therewith, and to EdisonLearning’s receipt of any applicable license, enrollment or other fee (a “Fee”) for access to the EdisonLearning Products (including from the Customer (as hereinafter defined)), EdisonLearning hereby grants to Licensee and Licensee hereby accepts a personal, non-transferable, non-sublicensable, non-exclusive, limited, single user license (which shall be revocable pursuant to the terms of this License Agreement) to access and use EdisonLearning Products, and the content and information provided by such products, for Licensee’s own personal use, and not for further distribution or resale. Licensee is not allowed to share its user account for EdisonLearning Products or to otherwise disclose its username or password information to third parties. Licensee is responsible for all activities conducted under its user account and shall notify EdisonLearning immediately if its login or password information has been compromised. EdisonLearning reserves the right to suspend or terminate, in its sole discretion, the license granted hereunder for non-payment of applicable Fees (including Fees payable by the Customer), or for inappropriate or illegal use of EdisonLearning Products, or for noncompliance with applicable laws or EdisonLearning policies, including, without limitation, any codes of conduct or acceptable use policies.

2. Limitations and Restrictions.

(a) Licensee may only use the EdisonLearning products as expressly permitted in Section 1 hereof and may not under any circumstances: (i) copy, alter, adapt, modify, translate, or create derivative works of the EdisonLearning Products or any portion thereof; (ii) access the EdisonLearning Products for the purpose of building a competitive product or service or copying their features, content or user interface, including by screen scraping; (iii) access the EdisonLearning Products using any automated program, electronic agent or bot; (iv) reverse engineer, decompile, disassemble, or attempt to derive the source code of the EdisonLearning Products or any portion thereof, unless and only to the extent any of the foregoing is expressly permitted by applicable law and may not be restricted thereunder; (v) separate the EdisonLearning Products into component parts for transfer to or use by a third party or combine the EdisonLearning Products or any part thereof with, or incorporate the EdisonLearning Products or any part thereof in, any other programs; (vi) rent, lease, lend, sell, sublicense, assign, distribute, publish, transfer or otherwise make available the EdisonLearning Products, or any features or functionality thereof, to any third party for any reason or in any way; (vii) remove, delete alter or obscure any trademarks or any copyright, trademark, patent or

other intellectual property or proprietary rights notices; (viii) use EdisonLearning Products to send or store viruses, worms, time bombs, Trojan horses or other harmful or malicious code, files, scripts, agents or programs; (ix) use EdisonLearning Products to send or store infringing or unlawful material; or (x) otherwise use the EdisonLearning Products except as expressly permitted herein.

(b) Licensee agrees to comply with applicable technology codes of conduct and acceptable use policies of Customer and applicable governmental authorities. In addition, as a condition to being granted access to EdisonLearning Products, Licensee agrees to comply with EdisonLearning's applicable technology codes of conduct and acceptable use policies as in effect from time to time. EdisonLearning reserves the right to deny or terminate Licensee's access to EdisonLearning products for failure to agree to or comply with EdisonLearning's applicable technology codes of conduct and acceptable use policies.

3. Reservation of Rights. EdisonLearning does not grant and Licensee does not obtain any implied licenses under this License Agreement. EdisonLearning reserves all rights, title and interests of any kind that are not expressly granted to Licensee in this License Agreement. EdisonLearning reserves the right at any time, in its discretion, for any reason and without prior notice, to change, suspend or discontinue any aspect of the EdisonLearning Products.

4. Intellectual Property Rights. EdisonLearning retains title to and all ownership interests in all proprietary rights, including without limitation copyrights, trademark rights, patent rights, trade secret rights, and any other intellectual or industrial property rights throughout the world ("IPR"), with respect to the EdisonLearning Products, their content and functionality and all copies or portions thereof, whether or not incorporated into or used in connection with any other products, including without limitation software or documentation materials. Licensee acknowledges that the EdisonLearning Products are licensed and not sold under this License Agreement, that nothing in this License Agreement shall constitute or be construed to constitute a sale of the EdisonLearning Products or any portion or copy thereof and that no title to or ownership interest in any rights, including without limitation IPR, with respect to the EdisonLearning Products or any components thereof is transferred to Licensee.

5. Feedback. Licensee grants EdisonLearning a royalty-free, fully paid-up, non-exclusive, perpetual, irrevocable, worldwide, transferable, sub-licensable license to copy, modify, distribute and otherwise use any suggestions, enhancement requests, recommendations or other feedback provided by Licensee relating to the EdisonLearning Products or their operation.

6. Data and Privacy. Information submitted or entered by Licensee into the EdisonLearning Products or otherwise collected or generated by operation of the EdisonLearning Products ("User Data") will be used in accordance with applicable law and any privacy policy presented in the applicable EdisonLearning Product. EdisonLearning reserves the right to use, display and distribute User Data in connection with EdisonLearning's business and providing the EdisonLearning Products or other services to third parties, provided that such use or disclosure shall only be in anonymous, aggregate or de-identified form that does not personally identify individual users. Such use may include computing and disclosing statistics or analyses relating to the EdisonLearning Products, including performance or usage metrics. While EdisonLearning uses commercially reasonable practices to ensure that User Data is used and disclosed in accordance with EdisonLearning privacy practices, EdisonLearning cannot warrant or guarantee that User Data will always remain secure due to transmission errors, outside events, third party hacking or other causes. EdisonLearning will comply with all privacy laws and make any legally required disclosures regarding breaches of the security, confidentiality, or integrity of personal User Data consistent with its ability to determine the scope of a breach and its obligations to law enforcement.

7. Dual-Media. Licensee may receive the EdisonLearning Products in more than one medium. Regardless of the type or size of medium Licensee receives, Licensee may use, subject to the terms and conditions of this License Agreement, only one medium that is appropriate for a single user. Licensee may not loan, rent, lease, or otherwise transfer the other medium to another user.

8. Warranty. EdisonLearning warrants to the Licensee that the EdisonLearning Products, when installed, configured, used and maintained in accordance with EdisonLearning's then-current published installation, configuration, use and maintenance specifications, will, in its unaltered form, conform substantially to EdisonLearning's then-current published functional specifications for such EdisonLearning Products. EdisonLearning does not warrant that the EdisonLearning Products will meet Licensee's requirements, that the EdisonLearning Products will operate in combinations selected for use by Licensee or that use of the EdisonLearning Products will be uninterrupted. Because not all errors in EdisonLearning Products can or need be corrected, EdisonLearning does not warrant that the EdisonLearning Products are error-free or that all EdisonLearning Products' errors will be corrected. **EXCEPT FOR THE LIMITED WARRANTIES EXPRESSLY SET FORTH IN THIS SECTION 8, THE EDISONLEARNING PRODUCTS ARE PROVIDED TO LICENSEE "AS IS", WITH ALL FAULTS AND DEFECTS AND WITHOUT REPRESENTATIONS OR WARRANTIES OF ANY KIND. TO THE MAXIMUM EXTENT PERMITTED UNDER APPLICABLE LAW, EDISONLEARNING, ON ITS OWN BEHALF AND ON BEHALF OF ITS AFFILIATES**

AND ITS AND ITS AFFILIATES' RESPECTIVE LICENSORS AND SERVICE PROVIDERS, EXPRESSLY DISCLAIMS ALL OTHER REPRESENTATIONS AND WARRANTIES, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, WITH RESPECT TO THE EDISONLEARNING PRODUCTS, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT, AND WARRANTIES THAT MAY ARISE OUT OF COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OR TRADE PRACTICE. WITHOUT LIMITATION TO THE FOREGOING, EDISONLEARNING PROVIDES NO WARRANTY OR UNDERTAKING, AND MAKES NO REPRESENTATION OF ANY KIND THAT THE EDISONLEARNING PRODUCTS WILL OPERATE WITHOUT INTERRUPTION OR BE ERROR FREE. Some jurisdictions prohibit the exclusion of implied warranties or limitations on how long an implied warranty may last, so the above limitations may not apply fully to Licensee. If implied warranties may not be disclaimed under applicable law, then ANY IMPLIED WARRANTIES ARE LIMITED IN DURATION TO THE WARRANTY PERIOD. Licensee's sole and exclusive remedy for a breach of warranty shall be, at EdisonLearning's option and in its sole discretion, replacement or repair of the EdisonLearning Products or return thereof for a refund of the applicable Fee, if any.

9. LIMITATIONS OF LIABILITY. TO THE MAXIMUM EXTENT PERMITTED BY LAW, IN NO EVENT WILL EDISONLEARNING OR ITS AFFILIATES, OR ANY OF ITS OR THEIR RESPECTIVE LICENSORS OR SERVICE PROVIDERS, BE LIABLE TO LICENSEE OR ANY THIRD PARTY FOR ANY USE, INTERRUPTION, DELAY OR INABILITY TO USE THE EDISONLEARNING PRODUCTS, LOST REVENUES, PROFITS OR ANTICIPATED SAVINGS, DELAYS, INTERRUPTION OR LOSS OF SERVICES, BUSINESS OR GOODWILL, LOSS OR CORRUPTION OF DATA, LOSS RESULTING FROM SYSTEM OR SYSTEM SERVICE FAILURE, MALFUNCTION OR SHUTDOWN, FAILURE TO ACCURATELY TRANSFER, READ OR TRANSMIT INFORMATION, FAILURE TO UPDATE OR PROVIDE CORRECT INFORMATION, SYSTEM INCOMPATIBILITY OR PROVISION OF INCORRECT COMPATIBILITY INFORMATION OR BREACHES IN SYSTEM SECURITY, OR FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, SPECIAL OR PUNITIVE DAMAGES, WHETHER ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT, BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, REGARDLESS OF WHETHER SUCH DAMAGES WERE FORESEEABLE AND WHETHER OR NOT EDISONLEARNING WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL THE TOTAL COLLECTIVE LIABILITY OF EDISONLEARNING AND ITS AFFILIATES, INCLUDING ANY OF ITS OR THEIR RESPECTIVE LICENSORS' AND SERVICE PROVIDERS', UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ITS SUBJECT MATTER, UNDER ANY LEGAL OR EQUITABLE THEORY, INCLUDING BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY AND OTHERWISE, EXCEED THE TOTAL AMOUNT PAID BY THE LICENSEE TO EDISONLEARNING PURSUANT TO THIS AGREEMENT DURING THE SIX (6)-MONTH PERIOD IMMEDIATELY PRIOR TO THE EVENT, ACT OR OMISSION GIVING RISE TO SUCH LIABILITY. THE LICENSEE ACKNOWLEDGES THAT THE PRICING OF THE EDISONLEARNING PRODUCTS AND OTHER TERMS AND CONDITIONS OF THIS AGREEMENT REFLECT THE ALLOCATION OF RISK SET FORTH IN THIS AGREEMENT AND THAT EDISONLEARNING WOULD NOT ENTER INTO THIS AGREEMENT WITHOUT THESE LIMITATIONS ON ITS LIABILITY. THE LIMITATIONS SET FORTH IN THIS SECTION 9 SHALL APPLY EVEN IF THE LICENSEE'S REMEDIES UNDER THIS AGREEMENT FAIL OF THEIR ESSENTIAL PURPOSE.

10. Termination. This License Agreement, and Licensee's right to use the EdisonLearning Products, will terminate immediately on the earlier to occur of: (a) the expiration or earlier termination of that certain License Agreement between EdisonLearning and its licensee (the "Customer") pursuant to which Licensee is being granted the license hereunder; or (b) Licensee ceasing to be authorized by Customer to use the EdisonLearning Products for any or no reason. Without prejudice to any other rights or remedies EdisonLearning may have at law or in equity, EdisonLearning may immediately terminate this License Agreement and Licensee's access to EdisonLearning Products if Licensee fails to comply with any term or condition of this License Agreement. Upon termination of this License Agreement, Licensee shall immediately discontinue the use of the EdisonLearning Products and at EdisonLearning's option, return to EdisonLearning and/or certify destruction of the EdisonLearning Products and any related materials provided to Licensee by EdisonLearning, and all full or partial copies thereof (whether in tangible or intangible form), in Licensee's possession or control. Licensee may also terminate this License Agreement at any time by providing written notice to EdisonLearning and certifying destruction of the EdisonLearning Products and all full or partial copies thereof (whether in tangible or intangible form) in Licensee's possession or control. Sections 8, 9, 10 and 11 of this License Agreement shall survive any termination of this License Agreement and shall remain in full force and effect.

11. General. With Licensee's Acceptance, Licensee agrees to be bound by the terms and conditions set forth in this License Agreement and Licensee acknowledges that it has read and understands this License Agreement. Licensee further agrees that this License Agreement is the complete and exclusive statement of the understanding between EdisonLearning and Licensee which supersedes any proposal or prior License Agreement, oral or written, and any other communication between

EdisonLearning and Licensee relating to the subject matter of this License Agreement. This License Agreement may not be modified except in a writing duly signed by an authorized representative of EdisonLearning and Licensee. If any provision of this License Agreement is held to be unenforceable for any reason, the remaining provisions hereof shall be unaffected and shall remain in full force and effect. This License Agreement shall be governed by and construed in accordance with the laws of the United States and the State of Florida as such laws are applied to contracts between Florida residents entered into and to be performed entirely within the State of Florida. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this License Agreement. Licensee hereby submits to the sole and exclusive jurisdiction of, and waives any venue objections against, the United States District Court for the District of Florida and the applicable Florida state courts in regard to all disputes and litigation arising under or relating to this License Agreement. Licensee's rights and obligations under this License Agreement shall not be assignable, delegable, sub-licensable or otherwise transferable, whether voluntarily or involuntarily, by operation of law or otherwise, without EdisonLearning's prior written approval. EdisonLearning may freely assign this License Agreement and/or its rights and obligations hereunder. The failure of EdisonLearning to insist upon strict performance of any provision of this License Agreement, or to exercise any right provided for herein, shall not be deemed to be a waiver of such provision or right with respect to subsequent claims (unless expressly so stated in a writing signed by a duly authorized representative of EdisonLearning). The headings in this License Agreement are for reference only and do not affect the interpretation of this Agreement.

12. U.S. Government Restricted Rights. If Licensee is an agency or instrumentality of the United States Government, the EdisonLearning Products and related data, materials and documentation are "commercial computer software" and "commercial computer software documentation" provided with RESTRICTED RIGHTS, and pursuant to FAR 12.212 or DFARS 227.7202, and their successors, as applicable, use, reproduction and disclosure of the EdisonLearning Products and related data, materials and documentation are governed by the terms of this License Agreement.

13. Export Law Assurances. Licensee will not use or otherwise export or re-export the EdisonLearning Products except as authorized by United States laws and regulations, including without limitation those of the U.S. Department of Commerce, and, as applicable, the laws and regulations of other jurisdictions.

Should you have any questions concerning this License Agreement, or if you desire to contact EdisonLearning for any reason, please contact the EdisonLearning division serving your jurisdiction, or write: EdisonLearning, Inc. at One East Broward Blvd., Suite 1111, Ft. Lauderdale, FL 33301.

Hampton Township School District
For Board Information
Executive Summary
Topic: High School Program of Studies

Purpose of the Summary

- New Information
 Consideration for Action Item
 Board Request

General Overview

Attached is an overview of the major changes made to the *High School Program of Studies*. These changes include new courses, removal of courses, updated course titles, and updated course descriptions.

Added Course

p. 85—Add Engineering with Friends to improve inclusive programming for students

Course Removals

- p. 66—Removed CHS Latin IV due to program changes
p. 84—Removed Construction Technology due to a history of low enrollment

Course Changes

- p. 58—Updated AP Environmental Science course description
p. 71—Added honors weighting to Introduction to Managerial Accounting

Other Changes and Updates

- p. 9—Added engineering as a science credit to satisfy the physics elective
p. 10—Added “All students must have a scheduled lunch period.”
p.15—Added language regarding Beattie application process and remove SOAR information
p. 17—Removed “Summer School and Non-Hampton Courses” and add “Alternative Instruction Methods” Section
p. 44-45—Added Career clusters with traditional math pathways
p. 53—Amended the 9th grade science course sequence to add Biology 1 so that all 9th graders take a Biology course
p. 75—Added Secondary Transition, which was called “Resource,” as a credit bearing course for students enrolled in our special education program

Recommendation

It is recommended that the Board of School Directors approves the *High School Program of Studies* with the changes.

Submitted by: Dr. Marguerite Imbarlina
Dr. Jackie Removcik

HAMPTON HIGH SCHOOL

PROGRAM OF STUDIES

~~2021-2022~~

2022-2023

Dear Students:

The Hampton High School faculty and administrators are excited to offer you a Program of Studies that will help you build a strong educational foundation to prepare you for your future endeavors. The Program of Studies includes information on graduation requirements, procedures for scheduling, and descriptions of the course offerings. Therefore, it is important that you and your parents carefully review the Program of Studies, and then ask members of the professional staff for help and guidance.

Students and parents should select courses based on appropriate academic progression, higher-educational goals, and career aspirations. When planning an educational pathway, students and parents should review course prerequisites to prepare for advanced-level courses.

You should select your courses with great care and with the awareness that all requests for schedule changes must adhere to a strict set of guidelines outlined in the Program of Studies.

Best wishes to you in planning your future path and on the exciting journey ahead of you.

Sincerely,

Marguerite Imbarlina, Ed.D.
Principal

Foreword

Now is the time for you to consider all of your academic possibilities, whether you will advance to a college-level program, career-oriented technical school, military program, or conclude your formal education at the end of twelfth grade by entering directly into the workforce. Planning your high school program of studies carefully is an important part of reaching academic goals and identifying opportunities.

This **PROGRAM OF STUDIES** booklet is designed to help you make choices! As you choose courses for next year, keep in mind **YOUR** career and educational plans.

Be certain that your course selections help you reach **YOUR** goals.

This booklet offers the following information:

1. Graduation requirements
2. Policies related to High School scheduling
3. Descriptions of specific departmental courses
4. Descriptions of elective courses

The inclusion of a course description in this booklet does not guarantee the course will be available next year. Courses will be scheduled on the basis of student interest and the most effective utilization of teachers. Therefore, you should have alternative course selections in mind in case one of your choices is cancelled because of low enrollment. **It is important that you list alternatives** on your scheduling form to ensure a schedule that is good for you! Please note that in some cases scheduling conflicts may occur, and course substitutions will need to be made.

Your decisions about course selections are important because of their long-range effect on your future.

Your decisions are also important to the overall picture of the High School program for next year and its cost implications regarding textbooks, supplies, and staffing.

Because of these important factors, course changes will be prohibited after June 10, 2021 unless warranted by exceptional circumstances.

Decisions reached by you and your parents regarding your course selections will be considered a firm commitment to the school.

**Scheduling Timeline
2021-2022**

Students Grades 10-12

Dates	Activity
Week of January 25 Week of January 24 th	The Program of Studies is available to all students and parents. Teachers begin discussing course offerings with students during class time.
February 8—12 February 7-11	HHS Core teachers recommend students for courses.
Grade 9: Tuesday, February 2 15 Grade 10: Wednesday, February 3 16 Grade 11: Thursday, February 4 17	HHS Counselors meet with students in their social studies class to review scheduling and answer questions.
February 8—18 February 14-23	Students finalize their course selections with parents in Infinite Campus and click the “Print Request Summary” report. Parents and students must sign the report.
Grade 11: Tuesday, February 16 23 Grade 10: Wednesday, February 17 24 Grade 9: Thursday, February 18 25	Counselors collect signed student “Request Summary” reports and review schedules.
Up until April 15	Students can submit schedule change requests. After this date, there is no guarantee the student’s schedule change request will be granted.
April 18—June 10	Students with schedule change requests must submit documentation to the Schedule Change Committee. The committee will review the request and space availability. Students will be notified in late July of the acceptance or denial of their request.

Students in Grade 9

Wednesday, February 2 nd 6:00-7:30PM	8 th grade parents and students attend evening transition event at the high school to review scheduling.
Wednesday, February 9 th	HHS counselors review scheduling procedures with 8 th graders at HMS.
February 10-15	Students finalize their course selections with parents in Infinite Campus and click the “Print Request Summary” report.
Wednesday, February 16 th	Parents and students must sign the report. Counselors collect signed student “Request Summary” reports and review schedules.

HAMPTON HIGH SCHOOL
 COURSE PLANNING WORKSHEET
~~-2020-2021~~ 2022-2023 School Year

The minimum number of credits required for graduation is 25.

Minimum Requirements for High School Graduation

<i>Courses</i>	<i>Credits</i>
English	4.0
Social Studies	4.0
Math	4.0
Science	3.0
Arts & Humanities	2.0
Academic Seminar	0.5
Wellness I	1.0
Wellness II	0.5
Physical Education	0.5
Electives	5.5
TOTAL	25.0
Along with course credits, the following items are graduation requirements:	
<ul style="list-style-type: none"> • Completion of Act 158 Requirements • 20 Hours of Community Services for All Students • Job Shadow <ul style="list-style-type: none"> Class of 2023—A 5 Hour Job Shadow in 11th Grade (5 hours total) Class of 2024—A 5 Hour Job Shadow in 10th <u>and</u> 11th Grade (10 hours total) Class of 2025 and Beyond—A 5 Hour Job Shadow in 9th, 10th, <u>and</u> 11th Grade (15 hours total) 	

The following middle school courses will receive a transfer credit onto the high school transcript: Algebra I-Essentials, Algebra I-Honors, Geometry-Honors, and all world language level 1 courses. However, these grades will not be calculated into the students' Q.P.A.

On a case-by-case basis, students attending A.W. Beattie may utilize credits earned through their A.W. Beattie program to satisfy graduation requirements that cannot be met based on scheduling constraints. Students may apply for this consideration through their school counselor. All decisions regarding the assignment of credit will be determined by the building principal.

English: All students must complete **one course** in each of the following categories:

English 9	English 10	English 11	English 12
English 9	English 10	English 11	English 12
Academic English 9	Academic English 10	Academic English 11	Academic English 12
Honors English 9	Honors English 10	English 11 - Honors	English 12 - Honors
		AP English 11	AP English 12

Social Studies: All students must complete a **minimum of one course** in each of the following categories:

Geography	World History	American History	Economics	American Government
World Geography Honors World Geography	World History Honors World History AP World History	United States History AP US History CHS United States 1865-Present	Fundamentals of Economics (.5) Economics (.5) AP Economics	American Government (.5) AP American Government

Science: All students must complete a **minimum of three science credits**. Credits must include a course in biology, chemistry, and physics or engineering.

Biology	Chemistry	Physics or Engineering	Science Electives
Biology I Academic Biology I Honors Biology I	Applied Chemistry (.5 Credit) Chemistry I Honors Chemistry I	Conceptual Physics (.5 Credit) Physics I AP Physics I Robotics I (.5 Credit) Robotics II (.5 Credit) Engineering Design I (.5 Credit) Select A.W. Beattie Programs	AP Environmental Science Ecological Exploration (.5) Humans and the Environment (.5) Honors Biology II AP Biology Honors Chemistry II AP Chemistry AP Physics II Physical Anthropology Honors Human Anatomy Horticulture Engineering Design I (.5 Credit) Engineering Design II (.5 Credit) Select A.W. Beattie Programs

Mathematics: All students must complete a **minimum of four credits with one credit** in each of the following categories:

Algebra I	Geometry	Algebra II	Electives
Algebra I Honors Algebra I	Geometry Honors Geometry	Algebra II Honors Algebra II	Algebra Essentials Applied Mathematics (.5 Credit) Algebra II/Trigonometry AP Statistics Pre-Calculus Honors Pre-Calculus CHS Calculus (Business) AP Calculus AB AP Calculus BC CHS Introduction to Matrices and Linear Algebra CHS Discrete Mathematics CHS Basic Applied Statistics Problem Solving (.5 Credit) SAT Prep: Mathematics (.5 Credit) Personal Finance (.5 Credit)

Academic Seminar:

All students must complete Academic Seminar **or** AP Seminar. Students considering attending an A.W. Beattie program who are unable should to satisfy this requirement as a freshman because of scheduling limitations should work with their counselor to develop an alternative plan to meet this requirement.

Arts and Humanities:

The arts and humanities focus on how people process and document the human experience through literature, art, music, history, and language. The following courses fall into the Arts and Humanities category: all world language courses, all art courses, all music courses, Film Studies, Creative Writing, Broadcast Journalism, Mass Media Journalism, Photojournalism, Graphic Design courses, Design Studio, Psychology, AP Psychology, Sociology, The Civil War, World War II History, Contemporary World Issues, Video Production, Advanced Video Production, all Architectural Design courses, Child Development I and II, and Interior Design. **Additionally, the following A.W. Beattie courses count as a humanities course: Advertising Design and Early Childhood Education.**

Community Service Graduation Requirement:

All students are required to complete 20 hours of community service and a written review of that service. The number of required service hours is listed in the graduation requirements table. Forms for documenting the community service project are available on the high school section of the district website under “Parents” tab. The required community service

may be completed either during the school year or during the summer vacation immediately preceding the school year. The community service requirement is the responsibility of the student and is completed as part of core social studies courses. **With the exception of donating blood, community service cannot be fulfilled during school hours.** Community Service documentation is to be turned into the student’s social studies teacher by the end of the third nine weeks.

Examples and Nonexamples of Community Service

ACCEPTED	NOT ACCEPTED
Helping food banks	Work done for family members
Service trips established by your church	Work done with “for-profit” organizations without pay
Service performed for elderly or incapacitated individuals	Work done at student’s place of employment “without pay”

Job Shadow Graduation Requirement:

Job shadowing is a career exploration activity. Students gain exposure to careers that they are interested in pursuing by working with business volunteers. For a short period of time, up to several days, students spend the work day as a shadow to a competent worker. By visiting a workplace, investigating a career field and industry, and experiencing a typical day on the job, students can determine if the career and industry fits their interests and career aspirations (PA Department of Education: PA Career Standards; Electronic Toolkit).

- Each year, up to 10 hours of a job shadow is an excused absence from school pending parent permission and proper documentation from the career contact.
- Prior to completing a job shadow, students must secure parent permission for the placement and person the student will shadow utilizing the District Career Exploration Permission Form.
- After the job shadow experience, students must complete a reflection to help them navigate post-secondary education and career goals.
- Students must submit their Career Exploration Permission Form, Career Exploration Verification Form, and Career Exploration Reflection Form by the following end of the last day in the following quarters:
 - Juniors -- End of second quarter
 - Sophomores -- End of third quarter
 - Freshmen -- End of fourth quarter

Keystone Exams: The PA Department of Education requires students to demonstrate proficiency in end-of-course exams in Algebra I, Biology, and Literature (English 10). Students who do not score proficient on any of the exams will work with their counselor and administration to create an individualized graduation plan based on the implementation of Act 158 beginning with the class of 2023.

Keystone Academic Support Program: The Keystone Academic Support Program supports students while they are enrolled in the Keystone tested course through co-teaching, benchmark assessment analysis, and small group tutoring. In this program, students will prepare to take the Keystone Exams.

Scheduling Policies

Minimum Schedule

Hampton High School has a nine-period day. All students, except seniors, must register for at least seven full-credit courses or the equivalent thereof (two semester courses equal one full-credit course). Seniors must schedule at least 6.5 credits.

Scheduled activities, such as Newspaper or Yearbook, do not circumvent the minimum schedule requirements listed above.

All students must have a scheduled lunch period.

Course Selection/Course Waiver

At Hampton High School, we work diligently to create opportunities for our students, and we encourage students to challenge themselves in order to be prepared for the future. In making course selections, students should refer to the list of suggested criteria for course recommendation, and they should seriously consider the teacher-provided course recommendations. All

core subject teachers will provide the students with a course recommendation. It is the prerogative of the student and parent to choose a course that is more rigorous than the teacher-recommended course. We realize that students' current grades and/or performance may underestimate their true abilities. Consequently, if a student was not recommended for a higher-level course, and the parents believe that their child is capable of being successful in such a course, then parents may request that their child be admitted to the higher-level course by completing a Course Waiver form. Parents and students should understand that if they select a more rigorous course, scheduling and staffing limitations may prohibit a later change to a different course. It is also important to understand that course selection data are used by the school district to determine class resource purchasing and to make specific staffing decisions. Course selection changes are strictly limited, and the information in the "Dropping/Changing Courses" section of this book should be reviewed prior to any request to do so. The Course Waiver Form may not be used to circumvent prerequisite courses or specific graduation requirements.

Schedule Change Priority

There are various reasons for schedule changes at the beginning of each semester. Some are more critical than others; therefore, the following priority list has been developed concerning permissible changes. The counselors will address changes in this order:

- A. Students with **NO** schedule will be hand-scheduled
- B. Computer errors
- C. Failures/repeated courses
- D. Balancing for uneven course distribution (not all electives are offered both semesters)
- E. Adding a class to meet post-secondary requirements
- F. Adding classes not requiring schedule revision
- G. Counselor prerogative with regard to Academic misplacement

Record of Schedule Change

All course/schedule changes **must** be processed by the School Counselors. Teachers **MAY NOT** admit or withdraw students from classes without receipt of the Record of Schedule Change Form. Teachers must sign the form. Students must return the forms to the counselors.

Dropping/Changing Courses

Students should select their courses with great care and with the awareness that all schedule changes must adhere to the following guidelines:

- After April 15, ~~2021~~ **2022**, all schedule change requests for the upcoming school year must be submitted to the Schedule Change Committee by June 10, **2022**. They will be reviewed on a space available basis. In late July, students will receive a written acceptance or denial of their request.
- New courses may only be added in the first two (2) weeks of the semester in which they begin (10 school days).
- During the school year, the Schedule Change Committee can be asked to review schedule change requests based on medically related circumstances. The Committee may recommend to the high school principal a schedule change that best supports the individual needs of the student.
- Students carrying 7 credits may not drop a course at any time unless they enroll in another course, limiting this option to the first two weeks of the semester. Students carrying 7.5 + credits may apply to the Schedule Change Committee to withdraw from one course. Withdrawal is not guaranteed.
- Withdrawal during the first thirty (30) school days of a year-long course results in a "W" grade on the transcript. Withdrawal after the first thirty (30) school days of a year-long course results in a failing grade of "WF" on the transcript (this includes transferring from a Hampton High School course to an online course).
- Withdrawal during the first ten (10) school days of a semester course results in a "W" grade on the transcript. Withdrawal after ten (10) school days in a semester course results in a "WF" on the transcript.
- If a student transfers from a course as a result of "academic misplacement" and enrolls in a different level of a **similar** course, this is considered an "academic adjustment" rather than a withdrawal (ie., moving from Honors Biology I to Academic Biology I).
 - Students cannot academically adjust to a course in which they previously earned credit.
 - Student's earned grade at the time of an academic adjustment will transfer to the new course.
 - Academic adjustments may be requested by a student, parent, or teacher, and must be arranged through the counselor and approved by the principal, teacher, and the Schedule Change Committee.

- Academic adjustments after the first thirty (30) school days will only be considered ~~when a student is earning a D or F in the course. Additionally, an adjustment can only be made when there is~~ if an open seat in a section **is available** and the student is willing to make up the missed work for the new course.
- If a student is adding an AP or Honors class that has summer work, the student is responsible for the summer work with a due date determined by the teacher.

Dropping Courses for Schedule Balance

Computer scheduling may occasionally produce a student schedule with eight classes in one semester (no study halls) and two or more study halls in the other semester. If a student feels this class distribution is unmanageable, he or she should see his or her counselor for schedule adjustments. The counselor will attempt, where feasible, to move classes from one semester to another to achieve a more equitable balance. If movement is not possible, the student will be permitted to drop an elective subject to allow room for a study hall. These adjustments must be requested by the student at the beginning of the school year to better ensure retaining the original course selections.

Withdrawing from A.W. Beattie Career Center

If it should be necessary to withdraw from Beattie Career Center, the procedures below must be followed:

- A. Arrange a conference with your Beattie instructor and the Beattie counselor. Beattie will then notify Hampton of the pending withdrawal.
- B. Student must next see his or her assigned counselor at Hampton.
- C. A drop form will be issued to the withdrawing student by his or her Hampton counselor. Parents **MUST** sign this drop form.
- D. This drop form will be returned to Beattie Career Center, confirming home/school acknowledgement.
- E. Withdrawing student must return to Beattie Career Center to return any textbooks and to pick up personal property.

Withdrawal from Beattie Career Center may occur at the following times:

- A. During the first ten days of the school year.
- B. At the end of the first semester.

Those withdrawing from Beattie Career Center during the first ten days of school may encounter difficulty rescheduling courses at Hampton High School. Students will be responsible for all required make-up work when entering these classes. Students receiving an “F” (failure) for the first year at Beattie Career Center will not be accepted for a second year.

Schedule Changes for Preferred Teacher

When registering for a course not taken previously, it will NOT be possible to change a schedule because a student has a specific teacher preference.

Repeating a Course

For reason of failure, grade improvement, and/or review of fundamentals, a student may desire to repeat a course taken previously. Repeat courses will be scheduled with a different teacher when possible. Credits in a repeated course will not be used in the accumulation of credits for graduation.

Advanced Coursework

Summer Work

Many Honors and AP courses require the completion of summer assignments. Summer assignments are accessible online via <https://sites.google.com/ht-sd.org/hhs-summer-work/home> or through the course teachers. Failure to complete assigned summer work may result in a student beginning a course with a failing grade. Additionally, failure to complete the work does not entitle the student to drop the course without following the procedures in this handbook.

Honors Course Offerings

Honors-level courses have extended content and additional workload, which set them apart from regular high school courses in the same subject. These courses have established prerequisites for admission and require teacher recommendation or approval from the building principal. Hampton High School offers the following Honors courses in the grade levels noted in parentheses:

H-English (9,10,11,12)	H-Biology I (9 or 10)	H-Wind Ensemble (10,11,12)
H-World Geography (9)	H-Biology II (10, 11, 12)	H-Symphony Orchestra (10, 11, 12)
H-World History (10)	H-Chemistry I (10,11,12)	H-Concert Choir (9-12)
H-Geometry (9-12)	H-Chemistry II (11 or 12)	
H-Algebra II (9-12)	H-Anatomy & Physiology (12)	
H-Pre-Calculus (9-10)	H-Cybersecurity and the Law (10, 11,12)	
H-Applied Comp Science (11-12)	H-Managerial Accounting (10, 11, 12)	

Advanced Placement Program

The Advanced Placement (AP) program gives strong academic students the opportunity to pursue college-level studies while still in high school. Students may receive Advanced Placement and/or college credit for successful completion of course work based upon their score on an Advanced Placement exam administered in May. Beginning with the 2019 school year, it is anticipated that registration and payment for AP exams will be due to the College Board as early as October with no refund. Hampton High School offers the following AP courses in grade levels noted in parentheses:

AP Biology (11-12)	AP Calculus AB (10-12)	AP Calculus BC (11-12)
AP Chemistry (12)	AP Computer Science A (10-12)	AP Economics (12)
AP English Language and Composition (11)	AP English Literature and Composition (12)	AP Environmental Science (11-12)
AP European History (10-12)	AP Government & Politics (12)	AP Physics 1 (11-12)
AP Psychology (10-12)	AP Statistics (9-12)	AP Physics 2 (12)
AP Seminar (10-12)	AP Research (11-12)	AP United States History (11)
AP World History: Modern (10)	AP Studio Art (11-12)	AP Computer Science Principles (10-12)
AP Art History (11-12)		

Advanced Placement courses are, by design, very demanding college-level courses. For those wishing to accept the challenge, they will be better prepared for the rigor of college courses.

The culmination of the course is the opportunity to take an AP exam where the score is used by many colleges to determine whether college credit for this course may be granted (each college determines its own criteria for granting credit). Studies have shown that students who diligently apply themselves, with the expectation of taking a comprehensive exam at the end of the course, tend to do better in the course and later in college.

The AP classes will be taught in a manner designed to prepare a student to take the AP exam. It is strongly recommended that students taking AP classes do so with the expectation of taking the annual course exam in May.

Any reasons for taking an AP course and not planning to take the exam should be discussed with the AP course teacher or School Counselor before registering for the class.

AP Capstone Program

AP Capstone is a new program designed by the College Board to equip students with the independent research, collaborative teamwork, and communication skills necessary for college. The program is built on the foundation of two new AP course offerings: AP Seminar and AP Research. AP Seminar is the first course in the program, and after successful completion of the course and AP exam, students may take AP Research. AP Capstone is designed to complement and enhance the in-depth discipline-specific study provided through AP courses. It cultivates curious, independent, and collaborative scholars, and prepares them to make logical and evidence-based decisions. The curriculum offers three options for students to pursue. *AP Capstone Diploma:* Students who earn scores of 3 or higher in both of the AP Capstone courses and on four additional AP Exams of their choosing will receive the AP Capstone Diploma.

AP Seminar and Research Certificate: Students who earn scores of 3 or higher in both of the AP Capstone courses but not on the four additional AP Exams will receive the AP Seminar and Research Certificate.

Additionally, students may take AP Seminar or AP Seminar and AP Research as electives without pursuing the AP Capstone Diploma or AP Seminar and Research Certificate.

College in High School Courses

In addition to honors-level and AP-level courses, students have the opportunity to choose courses that, upon successful completion, may earn them college credit. Students who choose to enroll in CHS courses are making the commitment to take a college-level course within the school day and pay for the credits earned. Students do not have to leave school to take these classes. Additionally, students may elect to take these courses without earning college credit. Those courses that offer the CHS option have this information included in the course descriptions. Students should be aware that if they earn the college credit, their college transcript will list the grade they earned based on the college's grading system. For example, if a student earns a 90% A from Hampton in a course offered through the University of Pittsburgh, their Pitt grade will be an A- (3.75).

Hampton Course	University Association	Credits Received	Requirements to Receive Credit	Current Student Cost
CHS Basic Applied Statistics	University of Pittsburgh	4	C or Higher Final Grade, Tests, and a Final from Pitt	\$300
CHS Calculus (Business)	University of Pittsburgh	4	C or Higher Final Grade, 3 Tests, and a Final from Pitt	\$300
CHS Introduction to Matrices and Linear Algebra	University of Pittsburgh	4	C or Higher Final Grade, Tests, and a Final from Pitt. The final course grade cannot exceed the final exam grade by more than one letter grade.	\$300
CHS Discrete Mathematics	Duquesne University	3	C or Higher Final Grade, and Duquesne approved exams	\$314
CHS United States 1865-Present	Duquesne University	3	C or Higher Final Grade	\$314
CHS German 4	University of Pittsburgh	3	C or Higher Final Grade, 3 Tests, and a Final from Pitt	\$225
CHS German 5	University of Pittsburgh	3	C or Higher Final Grade, 3 Tests, and a Final from Pitt	\$225
CHS Latin 4	University of Pittsburgh	3	C or Higher Final Grade, 3 Tests, and a Final from Pitt	\$225
CHS Latin 5	University of Pittsburgh	3	C or Higher Final Grade, 3 Tests, and a Final from Pitt	\$225
CHS Spanish 4	University of Pittsburgh	3	C or Higher Final Grade, Unit Tests, and a Final from Pitt	\$225
CHS Spanish 5	University of Pittsburgh	3	C or Higher Final Grade, Unit Tests, and a Final from Pitt	\$225
CHS French 4	Duquesne University	3	C or Higher Final Grade	\$314
CHS French 5	Duquesne University	3	C or Higher Final Grade	\$314
CHS Mandarin IV	Washington & Jefferson College	4	C or Higher Final Grade	\$350
CHS Mandarin V	Washington & Jefferson College	4	C or Higher Final Grade	\$350
Programs at A.W. Beattie Technical School	Various articulation agreements with institutions of higher learning. Contact Kim Zylinski at Beattie for more information (412-847-1912)	3-22	Completion of a Program and an advanced score on the National Occupational Competency Testing Institute Exam (NOCTI)	Varies

A.W. Beattie Career Center

A.W. Beattie Career Center offers students an opportunity to prepare for their chosen career field through advanced career and college preparation during their 10th, 11th, and 12th grade years. **After students complete an application, they must be formally accepted by A.W. Beattie to attend a program.** Applications to attend A.W. Beattie Career Center should be made during the second semester of 9th, 10th, or 11th grade and will be carefully reviewed. Additional information concerning A. W. Beattie Career Center is available in the School Counseling Office.

~~Students attending A. W. Beattie Career Center are enrolled in the afternoon session and spend the morning at Hampton High School.~~ Three credits are awarded each year to students successfully completing career coursework. A. W. Beattie Career Center credits and grades are included in the QPA and class rank.

All A. W. Beattie Career Center Programs offer advanced college credit upon successful completion. Potential college credits range from three to twenty-two credits. Please speak with a Beattie counselor for more information.

A.W. Beattie Career Center Programs are approved Programs of Study (POS) providing for seamless transition to post-secondary education through rigorous content aligned with challenging academic and relevant career context in a non-duplicative progression of courses aligned to post-secondary education.

~~SOAR is a Pennsylvania program that allows CTE students to earn free college credits. Students earn free credits with a qualifying score from the NOCTI Senior year assessment and confirmation that they have completed the entire CTE program of study. To obtain these free credits, students must submit the proper paperwork to the college, as outlined below. This paperwork requires CTE administrative signatures for submittal.~~

~~To determine the free credits offered for Pennsylvania Career and Technical Educational Programs of Study (POS) visit the website <http://www.collegetransfer.net/>. After selecting your Program of Study and your high school graduation year, you can view all of the colleges offering free credits for your particular CTE program. Additionally, A.W. Beattie Career Center maintains many college credits articulation agreements with two and four year post secondary institutions. Please visit the Beattie website www.beattietech.com for additional information.~~

A number of A. W. Beattie's programs require uniforms and equipment. The student and parents assume this cost. Therefore, students should obtain accurate cost information before enrolling for a course. Transportation is provided by the School District.

Dual Enrollment

Dual enrollment, referred to as "concurrent enrollment" in the School Code, is an effort by the Commonwealth to encourage a broader range of students to experience post-secondary coursework and its increased academic rigor, while still in the supportive environment of their local high school. The intent is to increase the number of students who go on to post-secondary education and to decrease the need for remedial coursework at post-secondary institutions. It is a locally administered program that allows a secondary student to concurrently enroll in post-secondary courses. Students who are interested in taking courses at the Community College of Allegheny County (CCAC) or another accredited community college should consult with their school counselor for information on programs and costs.

Independent Study

Independent Study is viewed as ~~"enrichment"~~ of **enriching** one's academic program and is only considered an option to regular scheduling under unusual circumstances. The following must be met for an independent study program.

- A. The course must be pre-approved by the Principal, a sponsoring Hampton High School teacher, and the student's School Counselor for course goals, learning objectives, activities, and means of evaluation.
- B. A Hampton High School teacher must make a commitment to sponsoring the student's independent study; however, teachers are not required to sponsor an independent study.

Since Independent Study is not a School Board approved course in the regular Hampton High School curriculum, the credit and grade for this special course will not be calculated in the student's cumulative Quality Point Average or Class Ranking. The course and the student's grade will be displayed on the student's transcript.

Calculating Course Grades

Grading System

The grading system at Hampton High School is listed below. Final percentages earned are **not** rounded; final percentages are truncated, which is illustrated in the chart below.

Percentage	Credit Earned	Letter Grade	Weighted Quality Points		
			Regular Course	Honors Course	Advanced Placement Approved College in High School
90%-100%	Yes	A	4.0	4.5	5.0
80%-89.999%	Yes	B	3.0	3.5	4.0
70%-79.999%	Yes	C	2.0	2.5	3.0
60%-69.999%	Yes	D	1.0	1.0	1.0
59.999% and below	No	F	0	0	0
Withdrawal Medical	No	WM	N/A	N/A	N/A
Withdrawal	No	W	N/A	N/A	N/A
Withdrawal Failing	No	WF	0	0	0
Pass--60%-100%	Yes	P	N/A	N/A	N/A
Fail--59.999% and below	No	F	N/A	N/A	N/A

Pass/Fail Grades

Students in their junior or senior year may take one credit pass/fail using the guidelines listed below:

- Students may take one credit as pass/fail per year
- Courses needed to fulfill graduation requirements cannot be taken pass/fail
- Courses taken pass/fail do count as credit and will be listed on the student's transcript
- Courses taken pass/fail do not factor into a student's QPA
- Students must complete pass/fail documentation with their school counselor
- For year-long courses, documentation must be submitted before the first day of the second quarter; for semester-long courses, documentation must be submitted within the first 20 school days
- Once a student declares a course pass/fail, he or she cannot change the course grading
- The same withdrawal rules apply to a pass/fail course as a regular course
- Students taking a CHS course for college credit and pass/fail will still earn a percentage and letter grade for their college transcript according to the university's grading matrix

Incomplete Grades

NO incompletes will be given.

Grades for Repeating Courses (During Regular School Year)

Receiving a passing or improved grade for a course repeated at Hampton during the regular school year does not replace the previous grade. **Both** course grades, course titles, and respective dates will be shown on the student's transcript. Both courses will be used in Q.P.A. computation and class ranking. Although two credits may be earned for the same course (example: Algebra I = D, Algebra I = B), a different math course must be taken and passed to complete graduation requirements. The same will be done for any other specific departmental graduation requirement.

Transferring Grades Following a Course Replacement

Following a schedule change, when one course replaces another in the same subject area, grades earned to date in the former course will transfer to the new course and will be displayed on the student's ensuing report card as having been earned in the new course. The present teacher may use his or her discretion in determining the weighting of these grades in the overall

final average. If a student changes from an AP or Honors course to a non-weighted course, NO weighted quality points will transfer.

Summer School and Non-Hampton Courses

~~Courses taken outside the regular Hampton High School curriculum for graduation credits must be pre-approved by the high school principal. Additionally, grades earned for courses taken outside the regular Hampton High School curriculum (this includes Hampton Online Academy courses) will be included in the quality point calculation at an un-weighted value and will affect the class ranking of the student taking the course. Courses taken for enrichment and not for graduation credits will be shown on the student's official transcript, but the course grade will not be included in the quality point calculation and subsequent class ranking of the student taking the course. An improved grade in a repeated course taken outside the regular school curriculum will be displayed on the student's official transcript, but will not replace the previous grade nor be used to calculate the Q.P.A. earned at Hampton.~~

Alternative Instruction Methods

Students enrolled at Hampton High School must attempt 27.5 credits within the high school's program of studies. These courses will be taught by Hampton High School teachers (7 credits, at minimum, in grades 9-11 and 6.5 credits, at minimum, in grade 12). Students competing for Summa Cum Laude honorific graduation notation must attempt 28 credits within the high school's program of studies with Hampton High School teachers (7 credits each year).

HS Acceleration Courses

Students who wish to accelerate in the areas of math, science, and world language may take a course from an institution that is approved by the high school principal. The acceleration course will not count as one of the required HHS 25 graduation credits or one of the required 28 credits for HHS honorific notation upon graduation (Summa Cum Laude, etc.). **Acceleration courses may not supplant a Keystone tested course (Biology 1, English 10, or Algebra I).** Acceleration courses and grades may be listed on a student's transcript; however, the course will not be factored into the student's GPA. Parents are responsible for paying for acceleration courses.

HS Enrichment Courses

Students who wish to take a course outside of Hampton High School that is not a graduation requirement may do so. This means that the enrichment course will not count as one of the required HHS 25 graduation credits or one of the required 28 credits for HHS honorific notation upon graduation (Summa Cum Laude, etc.). Enrichment courses and grades may be listed on a student's transcript; however, the course will not be factored into the student's GPA. Parents are responsible for paying for enrichment courses and materials.

Replacement Course

Students may supplant up to 0.5 of a credit for physical education by taking a course from an institution that is approved by the high school principal. The course title, letter grade earned, and credit will appear on the student's transcript, and the grade will factor into the student's GPA as an unweighted grade. Parents are responsible for the cost of a replacement physical education course.

Early Graduation Planning

Students who wish to graduate early may do so by working with the high school principal and school counselor to develop a plan. Courses to satisfy early graduation will need to be completed at an institution that is approved by the high school principal. Additionally, a student wishing to pursue this opportunity will need to have completed an early graduation plan with their counselor. Additionally, all state and high school graduation requirements beyond coursework must be met prior to the student's senior year (community service, job shadows, and Keystone Exams).

Awarding Partial Credit for Full-Credit Courses

Students may enroll in a full-credit course and receive a half credit based upon time enrolled in the course and approval from the building principal. These circumstances may include:

- A. Students transferring to Hampton for the second semester who may be enrolled in full-year courses and receive half-credit for the second half of the course.
- B. Special circumstances to fulfill graduation requirements.
- C. Withdrawing from Beattie Career Center.

~~The above exceptions require adjustments in the computer file to ensure receipt of proper credit and valuation.~~

Integration of Records from Other Schools

When a student transfers from another high school, his/her grades will appear on the Hampton High School transcript exactly as they appeared on the original transcript. Transferring students will only receive weighted quality points for courses that are also comparable and weighted at Hampton. For the purpose of weighted and non-weighted cumulative grade point averages, the original school's letter grades, not percentages, will be averaged with grades earned at Hampton. Only letter grades of A, B, C, D, and F (no plus/minus or pass/fail) will be calculated. The original transcript will be retained. Credits earned from the former school will be credited toward the student's graduation requirement.

Recognition of Student Achievement

Calculating Quality Point Average (QPA)

Final grades are used when calculating the year-end quality-point average. Full-year courses receive 1.0 credit; semester courses receive 0.5 credit. The cumulative quality point average is determined by dividing the total cumulative quality points by the total credits attempted.

$$\frac{\text{Total Quality Points Earned}}{\text{Total Credits Attempted}} = \text{Weighted QPA}$$

Class Rank

Class rank is not published. Cumulative class ranks will be computed at the end of the eleventh and twelfth grades. Only students who have completed the Junior and/or Senior year and have received final grades in all courses will be included in the total class number. Cumulative ranks will be calculated only from final grades. The cumulative quality-point average will be determined by the year-end quality-point average formula described in the section above.

Recognition of Graduate Achievement

During the commencement ceremony, students in the senior class will be recognized for their academic achievements based on the table below using the QPA calculation listed above. The QPA requirements will be reviewed annually as courses offered at the high school change.

Minimum QPA Requirement	Recognition	Additional Criteria
4.40	Summa Cum Laude	<ul style="list-style-type: none">• A minimum of 28 credits earned through courses offered at Hampton High School with a letter grade• No withdrawals• Transfer students must attend Hampton High School for a minimum of two (2) full years and earn a minimum of fifteen (15) credits in order to qualify for the recognition of Summa Cum Laude. All Hampton earned credits along with all credits earned from the student's former school district will be used to determine the student's cumulative quality point average.• Letter grades must be available for at least 28 credits in order for students to be eligible for the recognition of Summa Cum Laude
4.20	Magna Cum Laude	<ul style="list-style-type: none">• A minimum of 27.5 credits earned
4.00	Cum Laude	<ul style="list-style-type: none">• A minimum of 27.5 credits earned
Top-ranked 10%	Senior Scholars	<ul style="list-style-type: none">• QPA based upon a senior's cumulative QPA from three years and three grading periods of the senior year• Any senior who entered Hampton High School after the beginning of their junior year, whose cumulative Quality Point Average is equal to or better than the lowest quality point average in the top-ranked 10

		percent of seniors, will be added to the list of Senior Scholars
--	--	--

National Honor Society

National Honor Society membership is available to juniors and seniors who meet the standards for qualification. The initial criterion for selection into the Hampton High School Delta Chapter of the National Honor Society is **SCHOLARSHIP**. Students are invited to apply for NHS membership based on a qualifying quality-point average after the completion of their sophomore year. Students must attain a cumulative quality-point average of 3.75 or greater to be invited to apply for membership. Juniors who are being considered are judged on Grades 9 and 10, while seniors are judged on Grades 9, 10, and 11.

Beyond **SCHOLARSHIP**, students being considered for membership must also demonstrate outstanding **LEADERSHIP** and **SERVICE** in their school and community, as well as outstanding **CHARACTER**. Prospective members will have the opportunity to submit documentation attesting to their **SCHOLARSHIP, LEADERSHIP, SERVICE, AND CHARACTER** to an anonymous five-member faculty council who will review this documentation in cooperation with the National Honor Society advisor. Students who are selected for membership are expected to maintain the high standards of **SCHOLARSHIP, LEADERSHIP, SERVICE, AND CHARACTER** throughout the remainder of their high school career or risk dismissal from the National Honor Society. Membership in the Hampton High School Delta Chapter of the National Honor Society is not a right, but a privilege bestowed upon students who meet the high standards for membership as determined by the faculty council. The advisor will provide written information and details regarding membership to students who meet the **SCHOLARSHIP** criteria in late September.

Support Programs

The high school provides various support programs in order to meet the academic, social, and emotional needs of students.

Academic Support Program: An academic support program is available for students in math, English, and biology. Students who are not proficient on the Keystone Exams are required to participate in these structured tutorials in order to enhance their skills in Algebra, Biology, or Literature. Students receive this support during study halls, non-academic classes, or through a web-based tutorial. The high school also provides after-school tutoring labs in English, math, and science for students who require additional support in these academic areas.

Student Assistance Program: The Student Assistance (SAP) and Child Study programs are available at the high school to address the academic, social, and emotional needs of students. A team of trained counselors and administrators, along with a liaison from an outside agency, meet weekly (SAP) and monthly (Child Study) to discuss those students who may require additional services.

Special Education Services: The Hampton Township School District provides a free appropriate public education (FAPE) to students with disabilities in accordance with federal (IDEA) and state (Chapter 14 of the Pennsylvania School Code) regulations. In order for a student to be eligible for special education services, he/she must meet the eligibility criteria of having a disability as defined by the Pennsylvania Department of Education and be in need of specially designed instruction. Students with disabilities who qualify for special education are serviced through the learning support, emotional support or life skills program based on their individual needs. The student’s program is established via an Individualized Education Plan (IEP) that is determined by members of the IEP team, including the parents and child, if appropriate. An evaluation by a certified school psychologist is required to determine if the child qualifies for special education services. Students with disabilities who qualify under the Americans with Disabilities Act (ADA) and Chapter 15 of the Pennsylvania School Code will receive related services and accommodations that are needed to allow for equal opportunity to participate in the school program. The goal of Chapter 15/504 is to provide these services to protected handicapped students, without discrimination. Students must meet the requirements that include being school age with a physical or mental disability that substantially limits or prohibits participation in or access to an aspect of the school program.

Enrichment Opportunities: Hampton Township School District promotes enrichment or acceleration for those high-end learners identified as gifted, as well as, those students who have demonstrated interest, motivation, and strength in a particular area. Hampton students do not have to be identified as Gifted to take advantage of opportunities such as differentiation, enrichment or acceleration. However, they must demonstrate a need for such services. In Pennsylvania, the

provision of services to identified gifted students is governed by Chapter 16 of the Pennsylvania School Code: Gifted Education.

Parents should contact their child's school counselor to get more information on how to access any of the aforementioned services for their children.

College and Career Resources

Students have access to a variety of resources in the library and counseling office, including college catalogs, scholarship information when available, and reference books regarding career and college opportunities.

Naviance

Students are also given individualized access to Naviance, an extensive web-based college research and planning tool for students, parents, and school counselors. The website helps to guide individual students through the entire college planning, application, and decision process. Students can search for scholarships, explore careers, take interest inventories, and investigate their learning style. Students will also be able to review academic and admission data for colleges across the United States. Through the Family Connection section of Naviance, the counseling department will be able to share information with parents and their students about upcoming meetings and events, local scholarship opportunities, summer classes and events, and other Web resources for college and career information.

Early in the school year, students without Naviance login information will be guided through the counseling office in establishing an account on the computer. Because the program is web-based, it can be accessed from school or home by students and/or parents.

The website address is <http://connection.naviance.com/hamptonhs>

Career and Course Planning – Career Clusters

Self-assessment is critical to the scheduling and post-secondary process. You will be able to make appropriate scheduling choices by using this knowledge. The following tips will assist you in completing your self-assessment with post-secondary goals in mind:

1. Recognize your academic strengths and weaknesses.
2. Analyze your interests and values. Keep in mind talents, skills, interests, and hobbies.
3. Understand your academic pathway – know your past courses and identify where you'll be going.
4. Establish a goal. Well-established and articulated objectives will allow you to design a plan that will assist you in reaching your post-secondary goals.

In summary, knowing about yourself, your interests and abilities, and formulating goals is important to conduct an effective exploration of post-secondary options. Thus, you are more likely to find a good match between yourself and the post-secondary option that you choose. Utilize the career clusters on the following pages as a post-secondary planning resource.

National Collegiate Athletic Association (NCAA)

Prospective student-athletes are able to access information needed to understand the Division I and Division II eligibility requirements via the NCAA Eligibility Center. You should access the NCAA Eligibility Center home page at <http://www.ncaa.org/> for all information regarding student-athletes.

General information on the website includes:

1. How to register as a student-athlete, timelines during high school
2. Core course listings for the high school
3. NCAA Guide for the College-Bound Student Athlete
4. Division I and Division II Eligibility Requirements
5. Frequently asked questions

All prospective student-athletes MUST register on-line at the Eligibility Center website for Division I or II. You will be instructed from there as to the process to have your transcripts sent from the high school. You should register during your sophomore (10th grade) year.

The NCAA has adopted new policies that all prospective student-athletes who are planning to attend either a Division I or Division II school must supply SAT and ACT scores to the eligibility center directly from the testing agencies. You must use the code “9999” when making the request with the agencies. You can do so when you take the test (typically in your junior year), or request the scores be sent later (for a fee to the testing agency). If you direct the ACT or SAT to send the NCAA your scores every time you take a test, the NCAA will choose the best scores from each test subject to create your sum score. The NCAA can only accept official test scores from ACT or SAT, they cannot use scores that you provide.

What are the Academic Eligibility Requirements?

The following requirements must be met in order for a student to be able to practice, play, and receive a scholarship at an NCAA Division I or II college or university.

Division I:

You must graduate from high school and meet ALL the following requirements:

1. Complete 16 NCAA core courses:
 - 4 years of English
 - 3 years of math (Algebra I or higher)
 - 2 years of natural/physical science (including one year of lab science if your high school offers it)
 - 2 years of social science
 - 1 additional year of English, math, or natural/physical science
 - 4 additional years of English, math, natural/physical science, social science, foreign language, comparative religion or philosophy
2. Complete 10 (ten) core courses, including 7 (seven) in English, math or natural/physical science, before the start of your seventh semester (ie before the start of senior year). Once you begin your seventh semester, you may not repeat or replace any of those 10 (ten) courses for GPA improvement.
3. Earn at least a 2.3 GPA in your core courses.
4. Earn an SAT combined score or ACT sum score that matches your core-course GPA on the Division I sliding scale for students. (See the Division I Full Qualifier Sliding Scale on the website.)

Division II:

1. Complete 16 core courses.
2. Earn at a least a 2.200 GPA in your high school core courses.
3. Earn the SAT or ACT score that matches your core-course GPA (minimum of 2.200 on the Division II competition sliding scale (see the website).

Core Courses for Division II: To play sports at a Division II school, you must complete these NCAA core courses:

- 3 years of English
- 2 years of math (Algebra I or higher)
- 2 years of natural or physical science (including one year of lab science if your high school offers it)
- 3 additional years of English, math or natural or physical science
- 2 years of social science
- 4 additional years of English, math, natural or physical science, social science, foreign language, comparative religion or philosophy

The simple formula to meet the 16 core-course requirement is to take 4 English classes, 4 math classes, 4 science classes, and 4 social studies classes, or one of each core class per year.

It is the responsibility of the parent and student to make sure that they are scheduling appropriate courses in high school that meet NCAA eligibility requirements. Not all high school courses count as NCAA Core Courses. Visit eligibilitycenter.org for a full list of the high school’s core courses.

The NCAA may deny a course as a “core course” at any time. As new courses are added to the Program of Studies, the course names and scope & sequence are submitted to the NCAA Eligibility Center to be evaluated for approval. As of

December ~~2019~~ 2021, the following courses have been denied as “NCAA- approved core courses” based on certain NCAA guidelines. These courses DO NOT qualify as NCAA core courses and, therefore, CANNOT BE USED for NCAA initial-eligibility certification.

(courses at Hampton High School not recognized by the NCAA as meeting core requirements):

English 9
English 10
English 11
English 12

Biology I

[^] Not NCAA Approved

No student may enroll in two (2) year-long English classes concurrently. Students are required to complete one grade level specific English course per year. These year-long courses are identified with the grade level descriptor in the course titles. Any student who fails to complete the requirements of English 9, 10, 11 or 12 on any level must enroll in an accredited ~~summer school or the evening~~ program at CCAC to complete the work required for credit in this class **and to schedule the next level of English.**

ENGLISH No. 1710

Full Year

Credit 1.0

Grades 9, 10, 11, and 12

Prerequisite: Teacher recommendation

This full-year English course focuses on the continued development of word recognition skills, vocabulary development, reading comprehension and interpretation skills, written language skills, and fluency. Aligned with the PA Alternate Academic Standards for Reading and Writing, instruction is differentiated based on student needs. The essential literacy skills that students are likely to encounter in and out of the school are covered in this course.

ENGLISH 9 No. 0179

Full Year

Credit 1.0

Grade 9

Prerequisites: Teacher Recommendation

English 9 is a full-year reading supported English course that focuses on the continued development of reading, writing, vocabulary, listening, and speaking skills using a variety of approaches. Through units devoted to the active reading of short stories, novels, and drama, the students participate in activities and discussions in order to comprehend and analyze both fiction and non-fiction literature. The students also learn to communicate through written expression by composing multi-paragraph compositions and an acceptable MLA-based research project.

ACADEMIC ENGLISH 9 (Blocked with World Geography) No. 109B

Full Year

Credit 1.0

Grade 9

Prerequisite: English 8 course; students taking Academic English 9 blocked with World Geography must take the two courses concurrently

Academic English 9 is a full-year course that challenges the student to expand, refine, and explore the areas of literature, grammar, writing, speaking, and listening. Through units devoted to the active reading of poetry, short stories, novels, nonfiction, and drama, the student thinks and participates in discussions about himself/herself and the society in which he/she lives. Students will learn the basic components of research and begin a sequential vocabulary program that emphasizes the development and refinement of traditional English skills. All 9th grade academic students are required to complete an acceptable MLA-based research project. Students taking Academic English 9 blocked with World Geography will have an opportunity to make connections between their English and social studies courses. For each thematic unit of study, students will complete one project-based assessment to demonstrate their mastery of both Academic English 9 and World Geography. The course will culminate in a project that allows students to apply these skills to address a real-world problem.

HONORS ENGLISH 9 No. 0149

Full Year

Credit 1.0

Grade 9

Prerequisite: Academic English 8 or English 8 – Honors; Students taking Honors English 9 blocked with Honors World Geography must take the two courses concurrently

Honors English 9 is an accelerated survey of literature, grammar, composition, and vocabulary study. Emphasis is placed on word choice (authors' styles and students' styles), and mature writing and thinking. This course is for excellent readers who are independent, self-reliant, and highly motivated. An inquiry-based research project is the culminating activity. Summer reading and writing are required of all who enroll in this honors course.

ENGLISH 10 No. 0170

Full Year

Credit 1.0

Grade 10

Prerequisite: Teacher Recommendation

English 10 is a full-year reading supported English course that focuses on the continued exploration of reading, writing, vocabulary, and MLA-based research using various approaches. Students read and study a variety of literature including novels, short stories, poetry, non-fiction, and drama. Students express their ideas about literature by writing in various modes. Effective interpersonal communication in a variety of situations is emphasized as well as integrating appropriate technology into the curriculum of this course. All 10th grade Communications students are required to complete an acceptable MLA-based research project. This is a Pennsylvania State Keystone test course.

ACADEMIC ENGLISH 10 No. 0110

Full Year

Credit 1.0

Grade 10

Prerequisite: English 9 course

Academic English 10 is a year-long course that is designed to challenge and expand students' reading, writing, and researching skills through a variety of composition, grammar, oral communication, literature, and research units. Students study a variety of literature including non-fiction, short fiction, the novel, drama, Shakespeare, and poetry. Students will write several descriptive and expository compositions. In addition, all 10th grade academic students complete an acceptable MLA-based research project. Students will build effective vocabulary through the analysis of literature. Through this course, academic tenth graders will gain the necessary skills to improve literary analysis, written and oral communication skills, and technology skills. This is a Pennsylvania State Keystone test course.

HONORS ENGLISH 10 No. 0140

Full Year

Credit 1.0

Grade 10

Prerequisite: Academic English 9 or Honors English 9

Honors English 10 is the second in the sequence of accelerated courses in English. The course is designed to offer students an understanding of literary genres. Students learn to read critically and closely as they apply elements of analysis to novels, short stories, drama, poetry, and nonfiction. Study in vocabulary and grammar is promoted, and precision in writing and speaking is stressed. Students develop and polish composition skills by writing in various modes. Students will also complete a fully-documented research paper using an MLA format. Technology will be incorporated throughout this course to further assist with meeting these goals. Students enrolled in Honors English 10 must possess exceptional motivation to meet the rigor and challenge of the course. Summer reading and writing is a requirement of all who take this class. This is a Pennsylvania State Keystone test course.

ENGLISH 11 No. 0171

Full Year

Credit 1.0

Grade 11

Prerequisite: Teacher Recommendation

English 11 is a full-year course that focuses on the continued development of reading, writing, listening, speaking, and technology skills. Students read and study diverse literary genres from the 20th century in America, demonstrating their knowledge through persuasive, informative, reflective, and creative forms of writing. In addition, all 11th grade Communications students are required to complete an acceptable MLA-based research project.

ACADEMIC ENGLISH 11 No. 0111

Full Year

Credit 1.0

Grade 11

Prerequisite: English 10

Academic English 11 is a full-year course that critically examines and analyzes poetry, short stories, novels, and non-fiction essays from different periods of American literature. This course also requires students to utilize their refined writing skills in order to compose a series of analytical compositions as well as an MLA-based research project. This course also develops vocabulary, grammar, and technology skills. Students are expected to participate actively in the class and are evaluated through compositions, quizzes, exams and projects.

HONORS ENGLISH 11 No. 0141

Full Year

Credit 1.0

Grade 11

Prerequisite: Academic English 10 or Honors English 10

Criteria for recommendation: A final grade of C or higher in Honors English 10 or a final grade of A in Academic English 10

Honors English 11 is an accelerated study of American literature with an emphasis on the analysis of literature through critical reading and writing. The course exposes the student to each American literary period through various works of literature. In addition, the intensive writing program that accompanies this course will require students to complete many compositions, both created outside of class and during timed in-class sessions, along with an acceptable MLA-based research project. Students will also utilize a collegiate vocabulary program throughout the course. This course will prepare students for AP or Honors English in their senior year. This course is for excellent readers who are independent, self-reliant, and highly motivated. Summer reading and writing assignments are required for this course.

AP ENGLISH LANGUAGE AND COMPOSITION No. 0151

Full Year

Credit 1.0

Grade 11

Prerequisite: Academic English 10 or Honors English 10

AP English Language and Composition is a year-long course for motivated juniors interested in earning college credit while in high school. The course requires nonfiction readings that are selected to give students opportunities to identify and explain an author's use of rhetorical strategies and techniques. Students will learn to evaluate primary and secondary sources in order to incorporate them into original compositions utilizing Modern Language Association guidelines. Students will write expository, analytical, and argumentative papers in response to a variety of fiction, non-fiction, poetry, and images-as-text. Students will utilize American literature and other texts to analyze the techniques of writing. A summer assignment is also required of this course. Students who take this course are expected to take the AP exam in May.

ENGLISH 12 No. 0172

Full Year

Credit 1.0

Grade 12

Prerequisites: Teacher Recommendation

English 12 is a full-year course that focuses on the continued exploration and analysis of reading, writing, vocabulary, and MLA-based research. Students build on the skills learned in their previous English courses, which include the study of the novel, short stories, poetry, nonfiction, vocabulary, and drama. In addition, students continue the process of responding to literature using various modes and lengths of writing. All 12th grade Communications students are required to complete an acceptable MLA-based research project. In addition to articulating ideas and feelings in written form, emphasis is placed on listening, speaking, and cooperative learning skills in order to facilitate interpersonal communications skills in a variety of situations.

ACADEMIC ENGLISH 12 No. 0112

Full Year

Credit 1.0

Grade 12

Prerequisites: English 11 course

Academic English 12 is a full-year course designed to introduce students to the chronological study of British Literature, from the epic poem, *Beowulf*, to the science-fiction novel, *Brave New World*. These materials will be supplemented with a sampling of world literature. In addition to literary studies, students will refine composition skills. All 12th grade academic students are required to complete an acceptable MLA-based research project. The students will also continue to build a strong vocabulary.

HONORS ENGLISH 12 No. 0142

Full Year

Credit 1.0

Grade 12

Prerequisite: AP English Language and Composition, Honors English 11, or Academic English 11

Honors English 12 is an accelerated course of study of British and World Literature, its various time periods, and related criticism. Students enrolling in this course should be highly motivated and committed to reading and analyzing literature. Through class discussion and written work, students will explore the themes and elements of literature. Additionally, the course includes college-level vocabulary study and incorporation of technology, where appropriate. All 12th grade Honors students are required to complete an acceptable MLA-based research project. Any student enrolled in Honors 12 will be expected to complete the summer reading and writing assignments.

AP ENGLISH LITERATURE & COMPOSITION No. 0152

Full Year

Credit 1.0

Grade 12

Prerequisite: AP English Language and Composition, Honors English 11, or Academic English 11

AP English Literature and Composition is a year-long course appropriate for students who have the motivation and capability to earn college credit while in high school. The course includes the intensive study of literature from various genres and time periods. The College Board guidelines suggest that students become involved in the experience, the interpretation and the evaluation of literature. Writing assignments focus on the critical analysis of literature and include expository, analytical, and argumentative essays. In addition, students are required to write a research paper as well as other out-of-class papers that analyze how meaning is embodied in literary form. Students who take this course are expected to take the AP Exam in May.

ACADEMIC SEMINAR No. 0120

Semester (4 days per week)

Credit .5

Grades 9, 10, 11, 12

Academic Seminar is a required course for all students; however, AP Seminar can fulfill this requirement. The course is designed to build students' competencies in the following areas: public speaking, collaboration, conceptual thinking, research, and critical thinking, all of which are soft skills needed in the 21st century. Students will engage in a variety of individual and collaborative projects resulting in team presentations that may aim to inform, persuade or question their audiences. Projects will ask students to address a variety of occasions and audiences and will be assessed on preparation, teamwork, critical thinking, content, and delivery. Through the course, students work to become more critical, articulate, open-minded and curious—skills that will pay off in all academic areas.

AP SEMINAR No. 0160

Full Year (4 days per week)

Credit 1.0

Grades 10, 11, 12

AP Seminar is a research, writing, and speaking course that engages students in cross-curricular exploration of academic and real-world topics. **Students interested in this course should have strong foundational skills in critical reading, writing, and research and be confident self-advocates.** Using an inquiry framework, students analyze articles, research studies, literary and philosophical texts, and a variety of multimedia. Students learn to synthesize information from multiple sources, develop their own perspectives in written essays, and design and deliver oral and visual presentations, both individually and as part of a team. Ultimately, the course aims to equip students with skills in analyzing and evaluating information with accuracy and precision in order to craft and communicate evidence-based arguments. Although this course only meets four days per week, students will be expected to conduct research and collaborate with peers outside of the school day. Students should be aware that the AP fee for this course is \$139 and that individual and group papers, filmed presentations, and an AP exam will all factor into the final AP score assigned by the College Board. Students who take this course are expected to participate in the AP Exam.

AP RESEARCH No. 0161

Full Year (4 days per week)

Credit 1.0

Grades 11, 12

Prerequisite: Successful completion of AP Seminar

AP Research, the second course in the AP Capstone experience, allows students to deeply explore an academic topic, problem, issue, or idea of individual interest. Students design, plan, and implement a yearlong investigation to address a research question. Through this inquiry, they further the skills they acquired in the AP Seminar course by learning research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information. Students reflect on their skill development, document their processes, and curate the artifacts of their scholarly work through a process and reflection portfolio. The course culminates in an academic paper of approximately 4,000–5,000 words (accompanied by a performance, exhibit, or product where applicable) and a presentation with an oral defense. Students who take this course are expected to submit the paper and presentation for AP credit.

PHOTOJOURNALISM No. 0119

Semester

Credit .5

Grades 9, 10, 11, 12

This is an introductory course in photojournalism presented in a multimedia context where news stories are presented visually through the medium of photography rather than just through the written word. The primary goal of this course is to develop the student's skills at telling stories with photographs, utilizing the photojournalism process, which incorporates photographs, as well as written stories, which will be integrated into the *Talbot Yearbook*. The course will be taught as a hands-on workshop. Digital photography and picture editing will be explored. In addition, instruction will progress from basic camera operation, to "one shot" storytelling, and later to more comprehensive visual storytelling of the news that may incorporate audio, video or other multimedia components. The semester will be divided into several components including: single image stories, camera and technique, photo essay production, video editing, and presentation. Students will be responsible for weekly assignments as well as several long-term projects. Students will also work on the overall completion of the *Talbot Yearbook*. All equipment will be provided.

MASS MEDIA JOURNALISM No. 0122

Semester

Credit .5

Grades 10, 11, 12

In this semester-length course, students will learn the essentials of journalism including lead generation and writing, newsworthiness, fact-finding, interviewing, copywriting, copyediting, layout, and graphic design. Emphasis will be placed on journalistic style including accuracy, brevity, clarity, and objectivity. Students will be taught the ethics of journalism

including topics such as press freedom, libel, sensationalism, and copyright laws, including provisions governing fair use. Students will be expected to work individually and in groups to produce articles covering a variety of genres including hard news, investigative news, human interest, arts and entertainment, and sports. Students will have the opportunity to share their work with the high school community by contributing to our student newspaper, *The Hamptonian*. The course will also teach students about the 21st century's multi-media landscape, which includes print, digital, video, and social media. Students enrolled in the course are expected to be inquisitive and to adhere to the highest standards of media ethics and professionalism.

MASS MEDIA JOURNALISM II No. 0123

Semester

Credit .5

Grades 9, 10, 11, 12

This semester-length course builds on the skills learned in Mass Media Journalism I. Students will continue to refine their writing skills in the areas of source attribution, active voice, objectivity, precision, and coherence. Students will be taught and will be expected to write in Associated Press Style. Specifically, students will develop their own journalistic styles and build a portfolio that could be used in obtaining internships or admission into post-secondary journalism programs. Students will explore aspects of investigative reporting including freedom of information laws, press leaks, public information, and source-journalist relationships. The course will also teach students how to abide by copyright laws and how to benefit from "fair use" provisions in those laws. Students will take a leadership role in running *The Hamptonian* including writing Op-Ed columns, copy editing, and digital publishing. Students enrolled in the course are expected to be inquisitive and to adhere to the highest standards of media ethics and professionalism.

SAT PREP: ENGLISH No. 0181

Semester

Credit 0.5

Grades 10, 11, 12

Applied English Strategies is designed for the student who wants to develop his or her skills in test-taking and studying. This is not a remedial course even though it will review the basics, which will aid students in taking the SAT and certain college admission and placement tests. Vocabulary development is an area of emphasis as is critical reading. Standard English usage is reviewed in order to improve both spoken and written communication.

CREATIVE WRITING No. 0182

Semester

Credit 0.5

Grades 9, 10, 11, 12

Creative Writing is a one-semester intensive writing course for the student who enjoys writing on a daily basis, and wants to explore various genres and modes of writing. Students experiment with forms of poetry, song lyrics, narratives, short stories, screenplays, and one-act plays. Published works, in most of these forms, will also be read and discussed throughout the semester. Emphasis is placed on developing a writing community where students explore personal style and voice, and interact with peer and published writers in the class for feedback and ideas. Students are evaluated on class participation in response groups, in-class exercises, and sharing circles as well as drafts and polished pieces of writing.

FILM STUDIES No. 0183

Semester

Credit .5

Grades 11 and 12

This elective course offers students a study of films, film-making techniques, and film analysis. Students will develop skills in analyzing film techniques such as cinematography, art and visual effects, sound and music, and screenwriting, while viewing both classic and contemporary films. In addition, students will explore how these techniques illuminate, enhance, or dilute the meaning of the film. The course will introduce students to the following film topics: foundations of horror, suspense and narration, anime, documentary, German Expressionism/Film Noir, and Hitchcock. Students will be evaluated on class discussion, projects, and written work.

ACADEMIC WORLD GEOGRAPHY (Blocked with Academic English 9) No. 209B
Full Year (Blocked with English 9) No. 209
 Credit 1.0
 Grade 9

Prerequisite: Students taking Academic English 9 blocked with World Geography must take the two courses concurrently

World Geography promotes both cultural and global awareness in an increasingly interdependent world. The course is the “connecting link” between social and physical sciences. It balances traditional physical geography with equally important cultural geography, emphasizing human-environment interaction. Frequent current event activities ensure that students remain informed of world and national news. Students who opt to take the Academic English 9 blocked with World Geography will have an opportunity to make connections between their English and social studies courses. For each thematic unit of study, students will complete one project-based assessment to demonstrate their mastery of both Academic English 9 and World Geography. The course will culminate in a project that allows students to apply these skills to address a real-world problem.

HONORS WORLD GEOGRAPHY No. 0249

Full Year

Credit 1.0

Grade 9

Prerequisite: Students taking Honors English 9 blocked with Honors World Geography must take the two courses concurrently

Criteria for Recommendation: A final grade of B or higher in an 8th Grade History Course.

The World Geography-Honors course is designed to offer an advanced Social Studies course for ninth graders. This course promotes global awareness and is presented thematically. Students will be asked to make connections through the use of current and historical events by applying vital geographic topics (i.e. world population growth) to specific groups of people living in specific regions of the world. Students will conduct research, analyze, and offer possible solutions and/or alternatives to these pressing issues.

WORLD HISTORY No. 0210

Full Year

Credit 1.0

Grade 10

The focus of the course is on major people and events of the world from the 17th through the 20th centuries, with an emphasis placed on the economic and political development of the world. The main areas of study will be the Enlightenment, the development of democracies, the Age of Napoleon, the Industrial Revolution, the rise of socialism and nationalism, the unifications of Germany and Italy, the emergence of Japan, Imperialism, World War I, Russian Revolution, Totalitarianism, World War II, and the changes throughout the world since 1945. Students will be asked to utilize a variety of skills to analyze events and make connections between topics and time periods.

HONORS WORLD HISTORY No. 0240

Full Year

Credit 1.0

Grade 10

Criteria for Recommendation:

1. A final grade of C or higher in Honors World Geography
2. A final grade of B or higher in World Geography

Students in World History – Honors will study the development of major issues in our world. The course will begin with introductory units on exploration, religious and philosophical developments, and scientific discoveries. The study of the 18th and 19th centuries will focus on revolution and world economic changes, while the study of the 20th century will trace the developments of political and diplomatic power around the world. The ongoing tension between tradition and modernity as shaped by wars, revolutions, and economic transformations will be the central theme of the course, as students will be asked to make connections between topics and time periods to understand and appreciate how these events and ideologies have impacted our current world.

AP WORLD HISTORY: MODERN No. 0255

Full Year

Credit 1.0

Grade 10

Criteria for Recommendation: Final grade of B or higher in Honors World Geography or Final grade of A in World Geography

In AP World History: Modern, students investigate significant events, individuals, developments, and processes from 1200 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. The course provides six themes that students explore throughout the course in order to make connections among historical developments in different times and places: humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation.

UNITED STATES HISTORY No. 0211

Full Year
Credit 1.0
Grade 11

This is a survey course of American history with an emphasis placed on the 19th and 20th centuries. Students will explore the major economic, social, political, diplomatic, and cultural events that have shaped modern America through topics such as Reconstruction, the Gilded Age, WWI, the Great Depression and New Deal, WWII, the Cold War, the Civil Rights Movement, the Vietnam War, etc. Students will utilize critical thinking skills through the use of both primary and secondary historical records and relate historical events to modern ones.

AP UNITED STATES HISTORY No. 0251

Full Year
Credit 1.0
Grade 11

Criteria for Recommendation: A final grade of B or better in Honors World History or final grade of A in World History

AP United States History focuses on developing students' abilities to think conceptually about U.S. history from approximately 1492 to the present and apply historical thinking skills as they learn about the past. Seven themes of equal importance — identity; peopling; politics and power; work, exchange, and technology; America in the world; environment and geography; and ideas, beliefs, and culture — provide areas of historical inquiry for investigation throughout the course. These require students to reason historically about continuity and change over time and make comparisons among various historical developments in different times and places. Students who take this course are expected to take the AP exam in May.

CHS UNITED STATES 1865-PRESENT No. 0215

Full Year
Credit 1.0
Grade 11

Criteria for Recommendation: A final grade of B or better in Honors World History or final grade of A in World History

This course traces and analyzes the central developments in U.S. History from Reconstruction to the present. Students will probe themes such as the definition of citizenship and the expanding role of government in citizens' lives, development of an industrial economy, global interventions such as the U.S. role as a Cold War superpower, response to economic collapse and war, migration and immigration, ethnic identity, race relations, gender roles, and labor rights. They will also examine how various groups of Americans have challenged the status quo in a determined expectation that the United States should live up to the promise of its founding ideals of equality and freedom. Finally, this course will familiarize students with how to interpret primary and secondary sources, learn to read and construct historiographical arguments, and hone analytical and evidenced based writing skills.

Students may elect, for a fee, to enroll in the University of Pittsburgh College in High School Program to earn three college credits.

AMERICAN GOVERNMENT No. 0212

Semester
Credit.5
Grade 11, 12

American Government is a one semester required course designed to give students an understanding of the United States Constitution and American government in action. The students begin the course with an examination of the history and philosophies that played parts in developing our form of government at the Constitutional Convention. The theories of popular sovereignty, limited government, separation of powers, checks and balances, and federalism are examined. The functions of the branches of government, the role of political parties, elections, interest groups, and the media will also be studied. Finally, civil liberties and civil rights will be reviewed through an extensive analysis of the Bill of Rights. There is a special emphasis on making government relevant and applicable to students' lives through group projects in which students must present solutions to real world political problems.

FUNDAMENTALS OF ECONOMICS No. 0222

Semester
Credit .5
Grades 11, 12

Fundamentals of Economics is a semester course that provides students with a foundational understanding of economic concepts. Students will utilize reading, writing, analytical, and cooperative learning skills to understand and use the economic way of thinking to approach real-world problems and decisions. The goal of this course is to help students to develop the economic skills they will need to become more informed, effective, and independent consumers, workers, and citizens participating in our United States democracy and capitalist economic system.

ECONOMICS No. 0232
No. 0232C (Asynchronous Online Course)

Semester
Credit .5
Grade 11, 12

Economics is an upper grade level course that studies how scarce resources are allocated to satisfy the wants of the people. The course compares different economic systems, examines the influence of supply and demand on prices and the quantity of goods produced. It also addresses how firms compete in our market economy, how the supply and demand of resources determine their price and quantity, and the role of government in our economy, including the actions of the Federal Reserve and the provision of public goods. Students will analyze how global economics has developed as they study international trade and global economic challenges. Additionally, students will learn how economics impact personal finance, and ways to navigate financial decisions. Students may choose to take the traditional classroom course or an online version. Similar to a college course, the instructor will have autonomy in planning when students are required to be in class as compared to when they will be required to be online based on progress in the online course.

PSYCHOLOGY No. 0281

Semester
Credit .5
Grades 10, 11, 12

In this introductory psychology course, students will focus on the origins of man's thoughts and behaviors by studying the development of the individual. Throughout the semester, students will study the various approaches to psychology, as well as sensation and perception, learning and memory, theories of development, social cognition and interaction, and psychological disorders. By the end of this course students will have a better understanding of their own thoughts and behaviors, and how they affect interactions with others.

SOCIOLOGY No. 0283

Semester
Credit .5
Grade 11, 12

Sociology remains relevant as a topic because it explains how societies change. The course takes a scientific look at people as social beings and explores their behavior in groups and their relationships to social institutions. Topics studied include: culture, values and norms, roles and relationships, family, education, poverty, crime, and discrimination. The course allows students to research topics and express opinions about things that affect them.

CIVIL WAR No. 0285

Semester

Credit .5

Grade 9, 10, 11, 12

The United States Civil War was a test upon our Constitution and the unification of our nation. Americans were divided over the issues of slavery, states' rights, culture, and economic structures. This course is intended to analyze the issues pertaining to this era of history and to respect the sacrifices of millions who preserved this union.

WORLD WAR II HISTORY No. 0286

Semester

Credit .5

Grade 11, 12

The World War II course will teach students about the political, military, and social issues surrounding WWII from an American perspective. Students will examine the battles in both theaters, as well as the impact of the war on America's Home Front. Students will complete a book report, diorama, and an oral history report. Through these assessments, students will learn of the contributions and sacrifices made by the "greatest generation" during the turbulent war years. The oral history component will require students to interview, record, compile, and present the oral history of one participant from any of America's wars (not necessarily a WWII participant). The students will record their interviews, and these accounts will be kept as a record of the contributions made by these brave individuals.

CONTEMPORARY WORLD ISSUES No. 0287

Semester

Credit .5

Grade 11, 12

This course will explore political, economic, and social events/issues that impact our daily lives on both the state and local, as well as national and international level. Students will conduct research, engage in discussions, and explore projects based on independent and collaborative learning in order to cultivate their reading, writing, research, critical evaluation and communication skills. Additionally, they gain a greater knowledge of the world around them by considering issues from multiple perspectives to develop well-informed and evidence-based opinions/arguments. Ultimately, students will acquire the habits of informed and engaged citizens in order to actively and responsibly participate in a democratic society.

AP PSYCHOLOGY No. 0254

Full Year

Credit 1.0

Grade 10, 11, 12

Criteria for recommendation: A final grade of B or higher in Academic Biology or Biology I- Honors

AP Psychology is intended for students who wish to explore the study of psychology through a college-level course. This is a year-long course designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, theories, and phenomena associated with each of the major subfields within psychology. Students will also learn about the ethics and methods psychologists apply to their science and practice. Students who take this course are expected to take the AP exam in May.

AP ECONOMICS No. 0252

Full Year

Credit 1.0

Grade 11, 12

Prerequisite: Algebra II-Honors or Algebra II

AP Economics is a college-level course designed to give the students a greater understanding of economics vis-à-vis a traditional high school course. The course is modeled after introductory college courses and covers the fundamentals of both Micro- and Macro-Economics. Students who take this course are expected to sit for the AP exams in both Micro- and Macro-Economics in May. AP Economics is unlike other history/social studies courses that students may have taken. There

is a considerable amount of Algebra I mathematics and graphing. Completion of daily assignments is critical to success. Students who take this course are expected to take the AP exam in May.

Students electing to take this course during their junior year will concurrently be enrolled in an American history course.

AP UNITED STATES GOVERNMENT AND POLITICS No. 0253

Full Year

Credit 1.0

Grade 11, 12

AP United States Government and Politics is a senior course designed for students with strong reading and writing skills interested in political philosophy, law, politics, and the background of our government system. The first part of the course covers the Constitution: the philosophy and underpinnings behind it, the ratification debates, its implementation, and then the actual content and meaning of the Constitution and Bill of Rights. The second half of the course covers the required Advanced Placement curriculum outside of the Constitution. There is an in-depth study of the three branches of the government, their powers, and how they function. Students will also study the political process—campaigns, elections, special interest groups, political parties, public opinion, and the media’s influence on politics. Overlaying the entire course is an attention to current political issues and how they reconcile with the political theory taught in the course. An emphasis is placed on being able to take positions on controversial issues and being able to support those positions with factual information. Students who take this course are expected to take the AP exam in May.

Students electing to take this course during their junior year will be concurrently enrolled in an American history course.

MATH No. 1730

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Teacher recommendation

This is a full-year comprehensive developmental mathematics program designed to teach students to compute, solve problems, and think mathematically. Aligned with the PA Alternate Academic Standards for Mathematics, instruction is differentiated based on student needs. Basic math skills and concepts that are used in and out of the school environment are covered.

ALGEBRA ESSENTIALS No. 0301

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Teacher recommendation

Students who take the Algebra Essentials Course will be provided with review, practice, application and extensions of the mathematical skills necessary for success in Algebra I. The content of the course will focus on: proportional reasoning, geometry, linear equations, the number system and statistical analysis. Students will move quickly from the basic skills to the application and extension to ensure better preparation for a full year of Algebra I.

ALGEBRA I No. 0308

Full Year

Credit 1.0

Grades 9, 10, 11, 12

The Algebra I student will be able to graph and solve linear equations, simplify and factor polynomials, including polynomial fractions, as well as set up and solve real world application problems. Also, students will acquire a working understanding of functions, inequalities, and systems of linear equations. They will be introduced to probability, statistics, and data analysis. A scientific calculator is strongly recommended. This is a Pennsylvania State Keystone test course.

ALGEBRA II No. 0306

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra I course

Algebra II students will study the real number system, linear and piecewise functions, systems of linear equations and inequalities, and polynomial functions. They will also be introduced to rational and radical expressions and functions. At the end of the course, the student will understand basic concepts needed for the PSAT and SAT exams and the various introductory college mathematics courses. Students will be exposed to many applications to the real world and accessible technology. A graphing calculator or a scientific calculator is strongly recommended.

GEOMETRY No. 0321

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra I course **or concurrent enrollment in an Algebra I course**

Geometry provides an introduction to the fundamentals of Euclidean Geometry by helping students develop basic geometric skills and by teaching the many applications of geometric principles. Content will include the following topics: perimeter, area, volume, surface area, angles, triangles, parallel and perpendicular lines, similarity, congruence, quadrilaterals, circles, and right triangle trigonometry. This course will also help to strengthen the students' algebra skills. Instructional activities will include lecture, discussion, problem solving, logical reasoning through proofs and construction. A scientific calculator is required.

HONORS GEOMETRY No. 0322

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra I—~~Honors~~ **or concurrent enrollment in an Algebra I course**

Criteria for Recommendation: Algebra I – Honors – final grade of 80% or higher or Algebra I final grade of 90% or higher

The content of Geometry – Honors will help the student to perceive the role of inductive and deductive reasoning in both mathematical and non-mathematical situations. Furthermore, the student will learn to appreciate the need for clarity and precision of language. The course includes discussion on the subject of deductive proofs, angles, perpendicular lines, parallel lines, congruent triangles, circles, areas and volumes of solid and plane figures, and an introduction into coordinate geometry. A scientific calculator is required.

HONORS ALGEBRA II No. 0309

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra I—~~Honors~~Criteria for Recommendation: Algebra I-Honors final Grade of 80% or higher **or Algebra I final grade of 90% or higher**

Algebra II – Honors students will study the real and complex number systems; polynomial equations and inequalities and their graphs; rational expressions, functions and equations; radicals, radical functions; rational exponents; and the conic sections. They will acquire ease in applying algebraic concepts and skills, and appreciate the need for precision of language. This will be obtained through many applications to the real world and accessible technology. A graphing calculator is required.

APPLIED MATHEMATICS No. 0315

Semester

Credit 0.5

Grades 11, 12

Prerequisite: ~~Algebra II and Geometry~~

Applied Mathematics is designed to include Algebra and Geometry concepts with an emphasis on their applications to the real-world. Other covered topics are elementary statistics; personal finance; renting/purchasing a home, including utilities; purchasing/leasing a car; obtaining insurance (life, auto, homeowner/rental), paying taxes (sales, property, and income); and various career options. Problem solving skills will be heightened.

INTRODUCTION TO PRE-CALCULUS No. 0311

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Algebra II and Geometry

Introduction to Pre-Calculus begins with a comprehensive review of Algebra II and then progresses through a study of higher order polynomial functions, continuous and discontinuous functions, relations, inverses, periodic functions, and trigonometric relationships and their applications. A graphing calculator is required.

PRE-CALCULUS No. 0312

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Algebra II and Geometry

Criteria for Recommendation: Algebra II-Honors final grade of 75% or higher or Algebra II final grade of 95% or higher

Pre-calculus is designed to prepare students for college level mathematics and provide them with a basis for trigonometric applications. Students in this course begin with a brief review of Algebra II and progress through Algebra III with a study of functions and their graphs, and solving exponential and logarithmic equations. The course spends a significant amount of time developing the trigonometric identities and laws of trigonometric functions, including circular trigonometry and its applications. A graphing calculator is required.

HONORS PRE-CALCULUS No. 0310

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra II – Honors

Criteria for Recommendation: Algebra II – Honors– final grade of 80% or higher

Pre-Calculus - Honors is an essential course for college bound students who plan to major in mathematics, science, engineering, medicine or any other field that requires a strong mathematical background. Students in this course will progress through a study of functions and their graphs as well as techniques of equation solving. Students will learn circular trigonometry, with applications then made to the solutions of triangles. Logarithms, complex numbers, and limits are also a part of the course. A graphing calculator is required.

CHS DISCRETE MATHEMATICS No. 0355

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Pre-Calculus course

Criteria for Recommendation: Pre-Calculus – Honors – final grade of 70% or higher, or Pre-Calculus – final grade of 90% or higher

Discrete Mathematics - Honors is a full-year computational math course for students interested in studying mathematics, computer science, and/or engineering after high school. **At the post-secondary level, most computer science and math majors are required to take this course.** This course will cover mathematical reasoning, combinatorial analysis, discrete structures, algorithmic thinking, applications, and modeling. Topics may include logic, proofs, sets, and functions; algorithms, integers, and matrices; counting techniques, permutations and combinations, probability theory; relations; graphs; trees; Boolean Algebra; and Modeling Computation.

Students may elect, for a fee, to enroll in the Duquesne University College in High School Program to earn three college credits.

CHS BASIC APPLIED STATISTICS No. 0341

Full Year Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra II or Algebra II-Honors

Criteria for Recommendation: Algebra II – final grade of 80% or higher

This mathematics course is for students preparing for a college major or career in the social sciences. This course teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression, the analysis of variance, and contingency tables (chi square). Students will learn how to use a statistical computer package, MINITAB.

Students may elect, for a fee, to enroll in the University of Pittsburgh College in High School Program to earn four (4) college credits.

AP STATISTICS No. 0354

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Algebra II or Algebra II-Honors

Criteria for Recommendation: Algebra II – final grade of 80% or higher

An understanding of basic probability and statistics is vital for nearly all careers, as well as for most standardized testing. This course will focus on calculating, interpreting, and applying descriptive and inferential statistics; probabilities; experimental design, bias, simulation, implementation and evaluation of samples and surveys; regression analysis; construction and interpretation of confidence intervals; and tests of hypotheses with an overall emphasis on their applications in our world. A graphing calculator is required. Students who take this course are expected to take the AP Statistics exam in May.

CHS CALCULUS (BUSINESS) No. 0342

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Pre-Calculus – Honors, or Pre-Calculus following Algebra II – Honors

Criteria for Recommendation: Pre-Calculus-Honors– final grade of 70% or higher, or Pre-Calculus final grade of 90% or higher

Calculus - Honors (Business) includes the content presented in a college-level calculus course. The course includes discussion on limits and continuity, differentiation, integration, applications of differentiation and integration, and an introduction to multivariable calculus with a focus on business applications. This course is designed for students who plan to major in business or a non-science field in college, and for those who desire to build a foundation in preparation for Scientific Calculus I in college. This course is NOT designed for students who desire deep preparation for university majors in mathematics, engineering, or science, or those who plan to take the AP Calculus exam. A graphing calculator is required.

The students may elect, for a fee, to enroll in The University of Pittsburgh's Business Calculus I (Math 120) course and earn 4 college credits. Students must take the ALEKS assessment at their own expense during the summer prior to the start of the school year. Based on the test results, students may be required to take on-line tutorials through ALEKS to qualify for CHS credit.

AP CALCULUS AB No. 0352

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Pre-Calculus – Honors or Pre-Calculus
Criteria for Recommendation: Pre-Calculus – Honors– final grade of 80% or higher or Pre-Calculus final grade of 90% or higher

AP Calculus AB is a full year college-level course. It is designed for advanced high school students planning to major in mathematics, engineering, physical or biological sciences, economics, medicine, or law. The course includes the study of both differential and integral calculus concepts. Assessment is primarily based on test and quiz scores as well as a cumulative final exam. A graphing calculator is required. Students who take this course are expected to take the AP Calculus AB exam in May.

AP CALCULUS BC No. 0353

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: AP Calculus AB

Criteria for Recommendation: AP Calculus AB – final grade of 80% or higher

AP Calculus BC is a full year college-level course. It is designed for advanced high school students. The course includes a brief review of AP Calculus AB material, and detailed discussion of Calculus II concepts. These include limits, continuity, advanced differentiation, Newton’s Method, advanced integration, applications of differentiation and integration, Euler’s Method, Integration by Parts, Tabular Integration, vector functions and their applications, L’Hopital’s Rule, polynomial approximations, parametric functions, polar functions, sequences and series, Taylor and Maclaurin series, convergence tests, and error estimation. A graphing calculator is required. Students who take this course are expected to take the AP Calculus BC exam in May.

CHS INTRODUCTION TO MATRICES AND LINEAR ALGEBRA No. 0356

Full Year

Credit 1.0

Grade 11-12

Prerequisite: AP Calculus AB with an AP exam score of 4 or 5

The principal topics of the course include vectors, matrices, determinants, linear transformation, eigenvalues, and eigenvectors, and selected applications. This course is a rigorous math course that prepares students for engineering and mathematics majors. It satisfies a requirement for most Engineering majors and the Physics major at Pitt. The student’s final grade in the course cannot exceed the final exam grade by more than one letter.

Students may elect, for a fee, to enroll in the University of Pittsburgh College in High School Program to earn four college credits.

PROBLEM SOLVING No. 0381

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Algebra I

Problem Solving will help students to develop the vital skills and techniques of reasoning and problem solving. Those with strong problem solving skills are desired by all employers. These skills and techniques are applied in other math courses and other disciplines. Students are encouraged to solve and explain problems using a technique of their choice. The assessment of this course is predominantly from work on sets of up to three problems submitted weekly and from problems solved, individually or in groups, and explained to the class. Students are encouraged to work together to solve all problems. Students learn to intuitively apply problem-solving strategies to real-world situations. A primary focus of this class is for students to have the opportunity to choose an approach to solve questions based on their preferences.

SAT PREP: MATH No. 0314

Semester

Credit .5

Grades 10, 11, 12

Prerequisite: Algebra I and Algebra II

This course is designed for students who want to further develop those skills that are tested in the math portion of the SAT. Students will also learn strategies to improve their test-taking skills. The math portion of the SAT spans a variety of math content including algebra, advanced mathematics, basic data analysis, probability, graph analysis, geometry, trigonometry, and complex numbers. In this course students will practice mathematical skills that will be tested, will learn test-taking strategies, and will solve and discuss practice SAT math test questions and varied solution approaches. A graphing calculator is strongly recommended. **Students will be required to purchase the textbook for this course. The book will serve as a study aide and guide for future endeavors.**

BIOLOGY I No. 0400

Full Year

Credit 1.0

Grades 9, 10, 11, 12

~~Prerequisite: Applied Chemistry~~

Students enrolled in this course will continue to build upon the fundamental chemistry and life science concepts studied in previous science courses. This course will explore cells and cell processes that include basic biological principles, the chemical basis of life, bioenergetics, homeostasis, and transport. The course will also examine the continuity and unity of life, which includes cell growth, cell reproduction, genetics, evolution, and ecology. This course is a Pennsylvania State Keystone test course.

ACADEMIC BIOLOGY I No. 0410

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Criteria for Recommendation:

1. B or higher final grade in 8th grade science class
2. B or higher final grade in 8th grade English

This rigorous course will build upon fundamental chemistry and life science concepts in previous science courses. This course includes units on biochemistry, cells and cell processes, genetics, evolution, ecology, animal phyla, and plants. Students are expected to integrate information from multiple sources and apply it to new situations. Lab experiences include model manipulation, computer simulations, and microscope use. This is a Pennsylvania State Keystone test course.

HONORS BIOLOGY I No. 0440

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Criteria for Recommendation:

1. B or higher final grade in 8th grade science class
2. B or higher final grade in 8th grade English

Biology I Honors is designed for the student who is intrigued by the sciences and is considering going on to college as a science major. The core topics of the course will be similar to Biology I, yet the activities used to supplement the content will vary. This course will build upon the fundamental chemistry and life science concepts that should have been mastered in previous science courses. The course topics include: evolution, classification, ecology, biochemistry, cellular structure/function, cellular transport, photosynthesis, cellular respiration, DNA replication/protein synthesis, and cell reproduction, and genetics. Ecology and Plants will be integrated into other topic areas. Also, structure and function of multi-cellular organisms will be covered, which include plants, invertebrates, and vertebrates. Lab options will include model manipulation, computer simulations, microscope use, possible dissection, and more. The level of rigor in this course will aid in preparing students for future honors and AP level science courses. This is a Pennsylvania State Keystone test course.

HONORS BIOLOGY II No. 0441

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisites:

1. Academic Biology I or Honors Biology I
2. Completion or concurrent enrollment in Chemistry I or Honors Chemistry I

Criteria for Recommendation: Final grade of B or higher in Biology I or Honors Biology I

Biology II - Honors is designed for students who plan to major in the biological sciences. The course aims to build on the concepts taught in Biology I and Biology I – Honors. The overall focus will be experimental design, ecology, evolution/phylogeny with plants and animals integrated in where appropriate. This course is taught from a college-level

textbook and will be supplemented with in-class activities, lecture, and lab work. The Biology II - Honors course covers a portion of the AP curriculum and is considered a prerequisite to the Advanced Placement Biology course. Summer work is assigned for this course.

ECOLOGICAL EXPLORATION No. 0478 (grades 10-12)

Semester **No. 0478F (grade 9)**

Credit .5

Grades ~~9~~, 10, 11, 12

Ecological exploration is designed to further develop ecology concepts covered in prior courses. This class is a great elective for students who want to learn more about geology and the natural world. Units will focus on ecosystem function and the role of plants and animals, populations and how evolution shapes them, the relationship between organisms, matter and energy, species biodiversity in land and aquatic biomes, and species interaction patterns like parasitism, predation and mutualism. The concepts covered in this course allow the student to make the connection between the cellular level of life science and the population level of environmental science. It is designed to augment the knowledge base of several sciences and is appropriate for students who just want to know more about life on earth and students pursuing higher level science courses in the future. Class activities will include note-taking/discussions, indoor activities and simulations, outdoor labs and a few projects. Curiosity regarding the life found on our planet is the only course requirement.

HUMANS AND THE ENVIRONMENT No. 0479

Semester

Credit .5

Grades 10, 11, 12

Prerequisite: Biology and Chemistry courses (can be taken concurrently)

Humans and the Environment is designed to highlight the positive and negative role of human actions and their effect on our world. This course is a great elective for students who want to understand our place in the changing life on our planet. Units covered include population growth and resource management, food production and distribution, species endangerment and extinction, air and water pollution, climate systems and climate change, and nonrenewable vs. renewable energy sources. Students who have excelled in the academic as well as social sciences will get an opportunity to integrate concepts from those disciplines and appreciate how they apply to the real world. Class activities will include note-taking/discussions, indoor activities and simulations, outdoor labs and a few projects. This course provides many opportunities to appreciate the natural world and to understand how the decisions humans make shape the life on our planet. This course is not a prerequisite for AP Environmental Science but it does provide substantial background material for the course.

AP BIOLOGY No. 0451

Full Year

Credit 1.0

Grades 11, 12

Prerequisites: Honors Biology II

Criteria for Recommendation: Honors Biology II– final grade of B or higher; Chemistry I or Honors Chemistry I– final grade of B or higher

AP Biology is an introductory college level biology course that is designed to be the equivalent of the general biology course taken during the first college year. Students will further build upon scientific skills learned in Biology II Honors; therefore, students are expected to know that information. The overall focus will be biochemistry, cellular processes, and molecular genetics. This course will be taught from a college-level textbook and will be supplemented with in-class activities, lecture, and lab work. Students who take this course are expected to take the AP exam in May. Summer work is required for this course.

APPLIED CHEMISTRY No. 0415

Semester

Credit .5

Grades 9, 10, 11, 12

Applied Chemistry is an introductory course in Chemistry with emphasis placed on concept development and scientific inquiry. Concepts are developed and reinforced through discussions, demonstrations, and laboratory exercises. The laboratory experiments enable the student to gain direct hands-on experience to reinforce the principles obtained in the classroom. Content includes matter, chemical reactions, energy, atomic theory, and chemical bonding.

CHEMISTRY I No. 0411Full year **and a Lab Period**

Credit 1.0

Grades 10, 11, 12

Prerequisites: Academic Biology or Applied Chemistry
Criteria for Recommendation: Final grades of B or higher in Honors Algebra I and Academic Biology or Final grade of A in both Algebra I and Applied Chemistry

Chemistry I is an introductory course in inorganic chemistry designed to acquaint the student with fundamental physical and chemical properties of elements, compounds, and mixtures. This course places emphasis on student laboratory experiments where chemical reactions and chemical processes are observed and explained at the atomic and molecular level using the scientific method. Laboratory experiments and instructor demonstrations reinforce the theory and principles of chemical reactions and chemical processes learned in the classroom. This course requires one additional scheduled period per week for laboratory experience.

HONORS CHEMISTRY I No. 0444Full Year **and a Lab Period**

Credit 1.0

Grades 10, 11, 12

Prerequisites:

1. Academic Biology I or Honors Biology I
2. Honors Algebra I

Criteria for Recommendation:

1. Final grade of B or higher in Honors Algebra I
2. Final grade of B or higher in Honors Biology I or Final grade of A in Academic Biology I

Honors Chemistry I is a rigorous introductory chemistry course designed for students who are particularly interested in the sciences and who have a strong background in mathematics. It is based on a college introductory chemistry course. Students planning to enter college in a science or mathematics-related field, such as medicine, pharmacy, or engineering, are encouraged to take this course. Topics include the classification and behavior of matter, chemical expressions and calculations, and reaction mechanics. These topics will be taught at an accelerated pace and with more of an emphasis on calculations than in Chemistry I. The laboratory experiments provide the student with direct experience to reinforce concepts learned in the classroom. This course requires one additional scheduled period per week for laboratory experience.

HONORS CHEMISTRY II No. 0442

Full Year

Credit 1.0

Grades 11, 12

Prerequisites:

1. Chemistry I or Honors Chemistry I
2. Algebra II or Honors Algebra II

Criteria for Recommendation:

1. Final grade of B or higher in Chemistry or C or higher in Honors Chemistry I
2. Final grade of B or higher in Algebra II or C or higher in Honors Algebra II

Honors Chemistry II is designed for students who are planning to apply to college in a science-related major (chemistry, physics, biology, biochemistry, chemical engineering, pre-medicine, etc.). The course aims to build on the concepts taught in Chemistry I and Chemistry I - Honors. The overall focus will be atomic structure, chemical bonding, periodicity, stoichiometry, phases of matter, solutions, organic nomenclature, and nuclear chemistry along with understanding

fundamental chemistry concepts. This course will be taught from a college-level textbook and will be supplemented with in-class activities, demonstrations, lectures, and lab work. The Chemistry II - Honors course also covers a portion of the AP curriculum and is considered a prerequisite to the Advanced Placement Chemistry course.

ADVANCED PLACEMENT CHEMISTRY No. 0452

Full Year

Credit 1.0

Grade 12

Prerequisites: 1. Honors Chemistry II
2. Honors Pre-Calculus or Pre-Calculus

Criteria for Recommendation:

1. Final grade of B or higher in Honors Chemistry II
2. Final grade of B or higher in Honors Pre-Calculus or final grade of A in Pre-Calculus

AP Chemistry is designed to be the equivalent of the general chemistry course usually taken during the first year of college. The focus will be on reaction kinetics, acids-bases, equilibrium chemistry, thermochemistry, and electrochemistry. This course is instructed out of a college-level textbook and will be supplemented with in-class activities, group projects, demonstrations, lecture, and lab work. It is understood that a portion of the AP Chemistry curriculum will have been covered in the Chemistry II – Honors prerequisite; therefore, the students are expected to know the material. The AP Chemistry course is geared for students who are planning to apply to college in a science-related major (chemistry, physics, biology, biochemistry, chemical engineering, pre-medicine, etc.). Students who take this course are expected to take the AP Exam in May.

CONCEPTUAL PHYSICS No. 0416

Semester

Credit .5

Grades 10, 11, 12

Practical applications and problem solving strategies are stressed in this physics course. The curriculum will focus on six major units: Motion, Newton's Laws, Momentum, Energy, Electricity, and Waves. Students will gain practical insight into how and why things work. Demonstrations, lab experiments, classroom activities, design projects, presentations, and computer technologies will be a few of the instructional strategies used.

PHYSICS I No. 0412

Full Year

Credit 1.0

Grades 11, 12

Prerequisites: Completion of Algebra II

Criteria for Recommendation: Final grade of C or higher in Honors Algebra II or Final grade of B or higher in Algebra II

Physics I is an introductory course in Physics with emphasis placed on concept development and problem solving. Concepts are developed and reinforced through laboratory exercises, experiments, and demonstrations. Problem solving involves application of skills from prior algebra and geometry courses to concepts learned in Physics. Content includes one-dimensional and two-dimensional motion, forces and Newton's Laws, work and energy, momentum, waves and sound, optics, and electricity.

AP PHYSICS 1 No. 0443

Full Year **and a Lab Period**

Credit 1.0

Grades 11, 12

Prerequisite: Successful completion of Pre-Calculus or concurrent enrollment in Honors Pre-Calculus or Pre-Calculus

Criteria for Recommendation: Final grade of A in Algebra II or final grade of B or higher in Honors Algebra II

AP Physics 1 is equivalent to a first-semester college course in algebra-based physics. This course is recommended for students planning to enter any type of engineering, medical, math or science-related field. The course covers Newtonian

mechanics (including rotational dynamics and angular momentum); work, energy, and power; and mechanical waves and sound. It also introduces electric circuits. This course utilizes a college-level textbook and is supplemented with in-class activities, projects, demonstrations, lectures, and laboratory investigations. No prior course work in physics is necessary for students to enroll in AP Physics 1. Students should have completed Geometry and Algebra II or an equivalent course. Although the AP Physics 1 course includes basic use of trigonometric functions, this understanding can be gained either in the concurrent math course or in the AP Physics 1 course itself. One additional scheduled period is required per week. Students who take this course are expected to take the AP exam in May.

AP PHYSICS II No. 0453

Full Year **and a Lab Period**

Credit 1.0

Grade 12

Prerequisites: AP Physics 1

Criteria for Recommendation: Final grade of B or higher in AP Physics I

AP Physics 2 is equivalent to a second-semester college course in algebra-based physics. The course covers fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic and nuclear physics. This course utilizes a college-level textbook and is supplemented with in-class activities, projects, demonstrations, lectures, and laboratory investigations. Students should have had AP Physics 1 or a comparable introductory course in physics. Students should have taken or be concurrently taking Pre-Calculus or an equivalent course. This course requires one additional scheduled period per week. Students who take this course are expected to take the AP exam in May.

HONORS HUMAN ANATOMY & PHYSIOLOGY No. 0445

Full Year

Credit 1.0

Grade 12

Prerequisites: Academic Biology or Honors Biology I and Chemistry I or Honors Chemistry I

Criteria for Recommendation:

1. Final grade of B or higher in Biology I or Honors Biology I
2. Final grade of B or higher in Chemistry I or Honors Chemistry I

This course is designed to reflect a college level anatomy and physiology course. The material presented will be very helpful for students considering a career in medicine or any of the healthcare profession. It is assumed that students entering this course have a foundation in Biology, but a limited amount of prior knowledge of anatomy and physiology. The processes of ossification, nerve impulse & conduction, homeostasis and feedback will be a portion of what is studied. Understanding the organization of the human body, and the origin and application of medical terminology are accentuated throughout the year. The anatomy & physiology of the skeletal, muscular, and cardiovascular systems will be explored in great detail. The topic of Cancer and mechanisms behind its formation, growth, and metastasis will also be highlighted. Pathophysiology will be related to each of the subject areas throughout the year. Lab periods will involve the incorporation of the software A.D.A.M. – (Anatomical Dissection of Anatomy for Medicine), the use of iPad applications, and the manipulation of anatomical models as well as natural bones.

HORTICULTURE No. 0481

Full Year

Credit 1.0

Grades 11, 12

Horticulture is designed for juniors and seniors who are interested in exploring the science, technology, and art of working with plants. No prior plant knowledge is required. The course is primarily a project based class, and activities include, but are not limited to, vermicomposting, starting and maintaining gardens, identifying trees, and using trees as natural resources. Plant processes, soil health, and landscape design are also studied. Many of the activities involve working with and in soil. When weather is nice, students go outside to apply concepts learned in class.

PHYSICAL ANTHROPOLOGY No. 0482

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Successful completion of a biology course

Anthropology, study of humans, is for students in grades 10-12. This class is designed to provide students with a greater understanding of primates, evolution, anatomy, human origins and what it truly means to be human. Physical Anthropology has a strong focus on the biological principles of becoming and being human. Students will understand the genetic and molecular basis for being human as well as the application of this understanding to the tracking of human lineages. Comparative anatomy and dentition will be examined as well as skeletal reconstruction. Students will learn several aspects of forensic anthropology and osteology (what we can learn from/about bones). This class includes various required supplemental readings. Activities include the following topics: fossil/skeletal profiling, skeletal reconstruction, rope and atlatl making, print ID, and dentition.

AP ENVIRONMENTAL SCIENCE No. 0454

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: Academic Biology I or Honors Biology I and Chemistry I or Honors Chemistry I

Criteria for Recommendation: Final grade of B or higher in Biology and Chemistry courses

~~AP Environmental Science is designed to be the equivalent of an introductory environmental science course taken during the first year of college. The focus will be on experimental design, ecology and evolution, geology and energy, resource use and problems, and human actions and sustainability. Students will be required to complete a summer work assignment. This course will involve a combination of Socratic seminars, lecture/discussions, outdoor fieldwork, indoor labs/simulations, and projects. More of an emphasis will be placed on problem solving and long term labs. Grades are based on labs, projects, exams, and take home tests. This course also involves some creative writing, statistics, economics, political science, and sociology. The integration of material from these disciplines will benefit students taking classes in these subjects. This course is taught from a college level text and lab manual and is geared toward students who want to major and/or minor in environmental science, ecology, biology, medicine, chemistry, geology, political science, economics, sociology, or pre-law. This course requires one additional lab period per week. Students who take this course are expected to take the AP exam in May.~~

AP Environmental Science is designed to be the equivalent of an introductory environmental science course taken during the first year of college. The focus will be on ecology and evolution, geology and energy, resource use and problems & human actions and sustainability. Due to the nature of this course, the prerequisite classes will provide background information but not actual content. This course requires students to spend time reading and preparing outside of class time so that class time can focus on labs and inquiry-based activities. Also, a summerwork assignment will be assigned to prepare for the course. The class will involve a combination of discussions/Socratic seminars, outdoor fieldwork, indoor labs/simulations, projects and demonstrations. More of an emphasis will be put on problem solving and longer term data collection and analysis compared to the first year science classes. This course is taught from a college level text and lab manual and is geared towards students who want to major and/or minor in environmental science, ecology, geology, biology, political science, sociology or pre-law. For students with a less well developed science background it will be helpful to take Ecology and/or Humans and the Environment, but this is not required.

Computer Science Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites

COMPUTER PROGRAMMING I No. 0501

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Successful completion of Algebra I or Algebra I-Honors

This one semester course is an introduction to programming with an emphasis on critical thinking, problem solving, and creativity. Specific topics include functions, variables, expressions, conditionals, loops, strings, lists, graphics, and animations, as well as top-down design, testing and debugging. The course’s main goal is for students to learn the fundamentals of programming, to enjoy coding, and to be able to use programming creatively to help solve problems in a variety of domains.

COMPUTER PROGRAMMING II No. 0502

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Computer Programming I

This course is a continuation of Computer Programming I. Problem-solving and algorithm development skills will be used as students design, write code, debug, and document programs using proven programming techniques. Specific topics include math functions, sounds, files, loops, strings, lists, graphics, and animations, as well as top-down design, testing and debugging. At the end of the course, students will have engaged in a substantial learning experience and should be able to computationally solve a wide range of problems. Computer Programming II serves as the prerequisite for Advanced Placement Computer Science A.

ROBOTICS I No. 0504

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Successful completion of Algebra I or Algebra I-Honors

This course is designed to focus on the Computational Thinking Practices that are critical for all students to learn. In this computing course, students will explore controlling basic robot movements, sensors and how they work, intermediate concepts of programming, troubleshooting strategies, and the engineering practices with the VEX Cortex programming curriculum and ROBOTC language. Robots will be tested in a Virtual World environment as well as in a classroom setting. The practices emphasized in this course – precise logical thinking, using data to make decisions, analyzing problems, and building solutions in teams – are critical in all forms of problem solving, not just robotic ones. The robotics activities are concrete, contextualized, and provide immediate feedback.

ROBOTICS II No. 0505

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Robotics I

In Robotics II, students will engineer and program robots using the VEX Cortex programming curriculum and ROBOTC language to demonstrate their understanding of design principles to solve a problem. This course will focus on the physics and math principles needed to develop a more dynamic robot to meet different challenges and problems. This course will allow more student autonomy with researching and designing a robot using the VEX platform.

AP COMPUTER SCIENCE A No. 0553

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisites: 1. Computer Programming I and II or Java and C++
2. Algebra II-Honors

Criteria for Recommendation: Final grade of B or higher in Algebra II-Honors

AP Computer Science A is intended to be comparable to a first-year course offered in colleges and universities. The course will cover topics that would normally comprise six or more semester hours of college-level computer science coursework. It is not expected that all students in the course will major in computer science. The course is intended to serve both as an introductory course for computer science majors and as a substantial service course for people who will major in other disciplines that require significant involvement with computing. Upon completion of the course, the student should be prepared to take the AP exam in Computer Science A. The prospective student should have a strong interest in computing, a good mathematics background, and well-developed skills in written communication. This course will require a significant amount of time outside of class. A summer assignment is also required of this course. Students who take this course are expected to take the AP exam in May.

HONORS APPLIED COMPUTER SCIENCE No. 0554

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: Successful completion of AP Computer Science A

Computer Science Applications Honors is a project-based course epitomizing real-world robust problem solving. Rather than being the end product of a single Computer Science course, students will be asked to create projects that represent the end product of an entire curriculum. Students will demonstrate the independence and critical analysis skills that are intentionally developed through the progressive Computer Science courses. Students will be able to choose their desired programming language (C++, Java, Python, Vex etc.) and coding environment to build their projects. Additionally, students will research and plan the components needed for all aspects of project design. Included in this plan will be predetermined checkpoints and deadlines established between the student and the instructor. In this course, students work individually or in teams to build a significant programming application, and learn useful strategies for software design and engineering. Finally, this course culminates in a "software fare" in which all class participants demonstrate their projects to an audience that includes course staff, other students, and representatives from local technology companies.

AP COMPUTER SCIENCE PRINCIPLES No. 0555

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Algebra I-Honors or Algebra I and Algebra II

The AP Computer Science Principles course is designed to be equivalent to a first- semester introductory college computing course. In this course, students will develop computational thinking skills vital for **success across all disciplines**, such as using computational tools to analyze and study data and working with large data sets to analyze, visualize, and draw conclusions from trends. The course is unique in its focus on fostering student creativity. Students are encouraged to apply

creative processes when developing computational artifacts and to think creatively while using computer software and other technology to explore questions that interest them. They will also develop effective communication and collaboration skills, working individually and collaboratively to solve problems, and discussing and writing about the importance of these problems and the impacts to their community, society, and the world.

HONORS CYBERSECURITY AND THE LAW No. 0556

Full Year

Credit 1.0

Grades 10, 11, 12

Computers, the Internet, and mobile information technologies have become routine elements of our daily lives. The percentage of our social, professional, and political discourse mediated by information systems increases each year. Critical infrastructure likewise follows suit, with financial, healthcare, energy and other utilities leveraging the Internet to increase both capability and efficiency. In the physical world, we publish rules (laws) to govern our interactions with one another. These rules tell us what behaviors are permissible and what responsibilities we have to one another. In cyberspace, where these rules exist – and what they require – are less clear. This course explores questions surrounding how we "govern" cyberspace in the context of cybersecurity and privacy issues. We will examine a series of examples, both real-world and hypothetical, to investigate what policy "tools" are in-place, available, and should be available to address Internet security and privacy issues.

World Language Department Courses

LANGUAGE THROUGH CULTURE No. 0600

Semester

Credit 0.5

Grades 9, 10, 11, 12

Prerequisite: Teacher Recommendation

Culture encompasses the language, customs, arts, social institutions, history, and achievements of a group of people. In this course, students will consider how elements of culture impact their personal identity, view of American society, and understanding of other world cultures. Students will explore French, German, Spanish, and Mandarin through basic conversation, stories, and music to deepen their knowledge of these cultures and recognize their influence on American language and culture. Through engagement in this course, students will apply enhanced cultural understanding to local, national, and global responsibilities as American citizens in a world community. This course is designed for students who wish to experience an overview of the world languages offered at Hampton High School rather than enroll in a full year world language course.

FRENCH I No. 0601

Full Year

Credit 1.0

Grades 9, 10, 11, 12

French I begins a five-year sequence toward proficiency in French. Level I French students have the opportunity to learn the language and culture of France and other French speaking countries. Students develop the ability to communicate about themselves and daily life using simple sentences containing basic language structures with accurate pronunciation. French culture is explored through readings and related projects. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the end of the year.

FRENCH II No. 0602

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: French I

French II students will expand their knowledge of general and specific categories through listening, speaking, reading, and writing. Students participate in simple conversations by combining new and previously learned elements of the language. They are able to satisfy basic survival needs and interact on issues of everyday life in the past, present, and future tenses both inside and outside of the classroom setting. Students continue to develop cultural awareness through the study of specific French cultures. The French culture is further explored through recordings, readings, and related research about the various regions of France and other countries where French is an important language. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

FRENCH III No. 0603

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: French II

French III provides the student with the opportunity to strengthen previously acquired language skills. Level III French students continue to develop and refine their proficiency in French with an emphasis on the ability to interact orally and express themselves in writing. French III students are introduced to works of literature in French. Students continue to develop cultural awareness through the study of specific French cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

CHS FRENCH IV No. 0604

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: French III

CHS French IV students continue their development of French through the use of advanced grammar and literature. Students will communicate using more complex language structures on a variety of topics. Authentic structures, which require higher level thinking and speaking skills, are presented in this course. Students continue to develop cultural awareness through the study of specific French cultures. Level IV will also begin the study of French history through the 17th Century. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, compositions, and projects. All class discussions will be conducted in French. Students will need to have a French-English/English-French dictionary. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral

proficiency exam will be given at the mid-term and at the end of the year. **Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.**

CHS FRENCH V No. 0605

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: CHS French IV

CHS French students will complete and refine advanced grammar structures and conversational abilities. Culture is emphasized through the study of everyday French teenagers and their relationship to the world around them. Daily conversation is emphasized as well as cultural enhancement through speaking and reading activities. Discussion of present and past personal experiences helps the student to “create” with the target language and maintains the goal of authentic conversation. Students will increase proficiency in reading and writing through the completion of French history from the French Revolution through the present. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, compositions, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year. **Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.**

GERMAN I No. 0611

Full Year

Credit 1.0

Grades 9, 10, 11, 12

German I begins a five-year sequence toward proficiency in German. Level I German students have the opportunity to learn the language and culture of Germany and the other German speaking countries. Students develop the ability to communicate about themselves and their immediate environment using simple sentences containing basic language structures with accurate pronunciation. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the end of the year.

GERMAN II No. 0612

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: German I

German II students will expand their knowledge of general and specific categories through listening, speaking, reading, and writing. Students participate in simple conversations by combining new and previously learned elements of the language. They are able to satisfy basic survival needs and interact on issues of everyday life in the present and the past time both inside and outside of the classroom setting. Students continue to develop cultural awareness through the study of specific German cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, and daily class participation. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

GERMAN III No. 0613

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: German II

German III provides the student with the opportunity to strengthen previously acquired language skills. Level III German students continue to develop and refine their proficiency in German with an emphasis on the ability to interact orally and

express themselves in writing. German III students are introduced to works of literature in German. Students continue to develop cultural awareness through the study of specific German cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and compositions. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

CHS GERMAN IV No. 0614

Full Year

Credit 1.0

Grade 11, 12

Prerequisite: German III

CHS German IV students continue their development of German through the study of major cities in Germany. Students will communicate using more complex language structures on a variety of topics. Authentic structures, which require higher-level thinking and speaking skills, are presented in this course. Students continue to develop cultural awareness through the study of specific German cultures and through current readings. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and compositions. Assessments are based on the four basic communication skills or speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.

CHS GERMAN V No. 0615

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: CHS German IV

CHS German V students continue their development of German through the study of major cities in Germany and other German speaking countries. Culture is emphasized through the study of everyday German teenagers and their relationship to the world around them. Students will increase proficiency in reading and writing through current works of literature. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and compositions. Assessments are based on the four basic communication skills or speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.

CHS LATIN IV No. 0624

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: Latin III

The CHS Latin IV course is a 36-week reading/translating course focusing on the works of Caesar and Ovid's poetry. The purpose of this course is to guide the advanced Latin student to an in-depth understanding of Latin literature, through translating large amounts of authentic Latin. It also integrates a study of the major periods of Roman literature. Each of the chosen authors and their works holds an important place in the history of Latin literature. Research activities promote Latin-English translation skills, interpretation of literature, critical analysis of content and style, and the modern value/significance of such works. Grammar is reinforced through review as all forms and constructions are met in the Latin readings. Students are assessed through written, tests and quizzes, as well as written and sight translations, daily recitation, and projects. A full syllabus for this course is available from the teacher if desired.

Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.

CHS LATIN V No. 0625

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: CHS Latin IV

The CHS Latin V course is a 36-week reading/translating course of the epic poem, the *Aeneid*, by the Roman author *Publius Vergilius Maro*. The purpose of this course is to guide the advanced Latin student to an in-depth understanding of the *Aeneid* and in turn, Latin poetry. Emphasis will be placed on Roman and Greek culture and a history and film studies component is integrated into the course. Research activities promote Latin-English translation skills, interpretation of literature, critical analysis of content and style, and the modern value/significance of such works. Grammar is reinforced through review as all forms and constructions are met in the Latin readings. Students are assessed through written, tests and quizzes, as well as written and sight translations, daily recitation, and projects. A full syllabus for this course is available from the teacher if desired. A senior project is required for this course. **Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.**

SPANISH I No. 0631

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Spanish I begins a five-year sequence toward proficiency in Spanish. Level I Spanish students have the opportunity to learn the language and culture of Spain and other Spanish-speaking countries. Students develop the ability to communicate about themselves and their immediate environment using simple sentences containing basic language structures with accurate pronunciation. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. Oral proficiency will be evaluated through multiple opportunities to demonstrate facility in oral language skills indicative of a Level I student.

SPANISH II No. 0632

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Spanish I

Level II Spanish students will expand their knowledge of general and specific vocabulary categories through listening, speaking, reading, and writing. Students participate in simple conversational situations by combining and recombining learned elements of the language. They are able to satisfy basic survival needs and interact on issues of everyday life in the present time and past time inside and outside of the classroom setting. Students continue to develop cultural awareness through the study of specific Hispanic cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. Oral proficiency will be evaluated through multiple opportunities to demonstrate facility in oral language skills indicative of a Level II student.

SPANISH III No. 0633

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Spanish II

Spanish III provides the student with an opportunity to strengthen previously acquired language skills. Level III Spanish students continue to develop and refine their proficiency in all four language skills – listening, speaking, reading and writing with an emphasis on the ability to interact orally and in writing. Students continue to develop cultural awareness through study of specific Hispanic cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily

class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. Oral proficiency will be evaluated through multiple opportunities to demonstrate facility in oral language skills indicative of a Level III student.

CHS SPANISH IV No. 0634

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: Spanish III

CHS Spanish IV provides students the opportunity to further develop, improve and refine their listening, speaking and writing skills. This course is designed to develop communicative proficiency. It combines content-based language instruction with an interactive task-based approach and focuses in all relevant language skills: listening, speaking, reading, and writing. Culture is integrated in all aspects of the program. Each chapter will focus around a topic, and vocabulary, grammar, and culture presentation and practice will be linked to the theme chapter. In this course, classroom time is devoted to developing competence in speaking and hearing Spanish. Therefore, the instructor will speak only in Spanish during the class, and students will be expected to do the same with the instructor and classmates. Strategies for listening comprehension and developing speaking skills will be taught in class.

Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.

CHS SPANISH V No. 0635

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: CHS Spanish IV

CHS Spanish V provides students the opportunity to refine their development of speaking, listening, reading, and writing. It is designed to develop communicative proficiency. This course builds and expands the language skills acquired in the previous courses of Spanish. It combines content-based language instruction with an interactive task-based approach, and focuses in all relevant language skills: listening, speaking, reading, and writing. Culture is integrated in all aspects of the program. Each chapter will focus around a topic, and vocabulary, grammar, and culture presentation and practice will be linked to the theme chapter. In this course, classroom time is devoted to developing competence in speaking and hearing Spanish. Therefore, the instructor will speak only in Spanish during the class, and students will be expected to do the same with the instructor and classmates. Strategies for listening comprehension and developing speaking skills will be taught in class.

Students who enroll in this course have the opportunity to earn three (3) college credits by registering for the college in high school program.

MANDARIN I No. 0641

Full Year

Credit 1.0

Grades 9, 10, 11, 12

In Mandarin I students begin a five-year sequence toward proficiency in Mandarin. Level I Mandarin students will be introduced to the language and culture of China and other Mandarin speaking countries. Students develop the ability to communicate about themselves and their immediate environment using simple sentences containing basic language structures with accurate pronunciation. In addition, students will investigate the meaning of the Mandarin characters and practice calligraphy when creating representations of the characters. Students are assessed through written, oral and aural exercise, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing, with the strongest emphasis being placed on speaking. An oral proficiency exam will be given at the end of the year.

MANDARIN II No. 0642

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Mandarin I

Level II Mandarin students will expand their knowledge of general and specific vocabulary categories through listening, speaking, reading, and writing. Students participate in simple conversational situations by combining and recombining learned elements of the language. They are able to satisfy basic survival needs and interact on issues of everyday life in the present time and past time inside and outside of the classroom setting. Students continue to develop cultural awareness through the study of specific Chinese cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

MANDARIN III No. 0643

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Mandarin II

Mandarin III provides the student with the opportunity to strengthen previously acquired language skills. Level III Mandarin students continue to develop and refine their proficiency in Mandarin with an emphasis on the ability to interact orally and express themselves in writing. Mandarin III students are introduced to works of literature in Mandarin. Students continue to develop culture awareness through the study of specific Chinese cultures. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, compositions and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An oral proficiency exam will be given at the mid-term and at the end of the year.

CHS MANDARIN IV No. 644

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: Mandarin III

CHS Mandarin IV students continue their development of Mandarin through the use of advanced grammar and literature. Students will communicate using more complex language structures on a variety of topics. Authentic structures, which require higher-level thinking and speaking skills, are presented in this course. Students continue to develop cultural awareness through the study of specific Chinese cultures and through current works of literature. Students are assessed through written, oral and aural exercises, tests and quizzes, daily class participation, compositions and projects. Assessments are based on the four basic communication skills of speaking, listening, reading, and writing. An Oral proficiency exam will be given at the mid-term and at the end of the year.

Students who enroll in this course have the opportunity to earn four (4) college credits by registering for the college in high school program.

CHS MANDARIN V No. 645

Full Year

Credit 1.0

Grades 11, 12

Prerequisite: CHS Mandarin IV

CHS Mandarin V is designed for students who have successfully completed level IV to further develop the proficiencies across the three communicative modes: interpersonal (speaking, listening, reading, and writing skills), interpretive (listening and reading skills), and presentational (speaking and writing skills). It is a theme-based course that focuses on structured and student-centered instructions and activities. The course provides students with maximum exposure to authentic culture and language. Students apply their growing cultural knowledge to communicative tasks in real life contexts and develop the ability to write and speak in a variety of discourse styles. Students are assessed through written, oral and aural exercises, tests

and quizzes, daily class participation, compositions and projects. Additionally, an oral proficiency exam will be given at the mid-term and at the end of the year.

Students who enroll in this course have the opportunity to earn four (4) college credits by registering for the college in high school program.

Business Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
0733	Introduction to Financial Accounting	1.0	9-12	
0734	Honors Introduction to Managerial Accounting	1.0	10-12	Introduction to Financial Accounting
0716	Law and Justice	0.5	10-12	
0719	Entrepreneurship	0.5	10-12	Business Management

0720	Introduction to Advertising	0.5	9-12	

INTRODUCTION TO FINANCIAL ACCOUNTING No. 0733

Full Year

Credit 1.0

Grades 9, 10, 11, 12

This course is an introduction to the basic concepts and standards underlying external financial accounting systems and reporting. Several important concepts will be studied in detail including: recognizing avenues of revenue, identifying and distinguishing between different inventory methods, calculating cost and value of long-lived assets, and the use of long term liabilities and their effect on a business. The course emphasizes the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation for business decision-making. Students will develop a basic understanding of how to use the financial statements to assess and evaluate the profitability, liquidity, and solvency of business entities.

HONORS INTRODUCTION TO MANAGERIAL ACCOUNTING No. 0734

Full Year

Credit 1.0

Grade 10, 11, 12

Prerequisites: Introduction to Financial Accounting

Honors Managerial accounting is a company's internal language and is used for decision-making, production management, product design, and pricing, as well as for motivating and evaluating employees. The purpose of this course is to provide an introduction to cost concepts, product costing systems, budgeting systems, and the development of accounting data for internal managerial decisions. The first part of the course presents alternative methods of preparing managerial accounting information, while the remainder of the course examines how companies use these methods. This course will help students understand the operations of future employers as they will be able to interpret and use accounting data for decision-making.

LAW AND JUSTICE No. 0716

Semester

Credit .5

Grades 10, 11, 12

The Law and Justice course is designed to provide students with a basic understanding of the American justice system. The course focuses on laws and legal issues that regulate the economy, business, and consumers. This course will demonstrate the American legal system by looking at the three major categories of a legal system: criminal law, civil law, and contract law. The personal legal aspect of this course will overview the students' rights, privileges, and duties as defined by federal laws, state statutes, and local ordinances. Course highlights include class discussions on current legal issues, mock trial scenarios, and visits by various guest speakers.

ENTREPRENEURSHIP No. 0719

Semester

Credit .5

Grades 10, 11, 12

Prerequisite: Business Management

In this semester course, students select an idea for a new business and create a plan for its success. Students will develop a business plan focusing on the organization, marketing strategies, financial requirements, and human resources of the new business. Furthermore, this course provides students with an understanding of accounting practices and procedures utilized in different forms of business ownership. Additional course features include creating an advertising campaign, planning a grand opening, keeping financial records, preparing and analyzing financial statements, and developing employee job descriptions and qualifications. The course culminates with the student developing a hypothetical business plan to implement his/her unique venture that conforms to all applicable governmental laws and regulations.

BUSINESS MANAGEMENT No. 0722

Semester

Credit .5

Grades 9, 10, 11, 12

In this Business Management course, students will be provided with an understanding of the business management functions, various management theories, and the basic organization of a business. Students will understand that Business Management is the process of using the resources of a business to efficiently and effectively achieve its goals through planning, organizing, staffing, leading, and controlling. Furthermore, students will be analyzing different forms of business ownership and examining a product through direct or indirect channels of distribution. Students will build a strong knowledge base while developing effective management skills and understanding that successful managers are individuals who recognize the benefits of teamwork and consensus building, and are able to maximize human resources. As leaders, students will recognize the importance of technology and information management in the decision-making process, and the value of ethics and social responsibility in building and maintaining business relationships. In addition, managers realize that the ability to recognize and respond to new business opportunities and changing economic conditions is critical to the overall success of a business both locally as well as in the global marketplace.

INTRODUCTION TO ADVERTISING No. 0720

Semester

Credit .5

Grades 9, 10, 11, 12

This course is an introduction to the principles and practices of contemporary advertising, marketing, and public relations. Students will explore these roles in the marketplace, the elements of a successful advertisement, advertising production, and tasks accomplished by media professionals, while promoting products and service businesses. Special emphasis is given to social, legal, planning, and the creative aspects of advertising as students will create their own advertising plan for a product.

PERSONAL FINANCE No. 0721

Semester

Credit .5

Grades 10, 11, 12

Personal Finance is intended to start each student on his/her path to financial success! Understanding and managing personal finances are important to one's future financial success. Personal Finance focuses on using financial procedures to plan, organize, and allocate resources. Students explore and understand financial opportunities affecting their daily lives, such as setting financial goals, using money management strategies, selecting bank services, protecting credit, filing tax returns, managing investments, renting property, purchasing a home, evaluating risk management, and planning for retirement. Students will engage in career exploration to determine how choices influence occupational options and future earning potential. The course content is designed to help the learner make wise spending, saving, and credit decisions and to make effective use of income to achieve personal financial success. Personal Finance is a blended course presented through a classroom setting mixed with online activities. Many colleges and universities are offering full, online courses making this

experience particularly beneficial. First, students are learning important personal finance concepts, and secondly, they are experiencing taking a class in an online environment.

Career Department

Course #	Course Title	Credit	Grade Level	Prerequisites
0710	Career Exploration	0.5	9-12	
2114	School-Based Vocational Experiences	1.0	9-12	Teacher Recommendation
1401	Senior Internship	0.5	12	Student must be at least 17 years old
1701 & 1702—Learning Support 1801 & 1802—Emotional Support 2101 & 2102—Life Skills	Post-Secondary Transition	1.0	9-12	Student must have an IEP

Job Shadow Graduation Requirement for class of 2022 and class of 2023 and beyond.

Job shadowing is a career exploration activity. Students gain exposure to careers that they are interested in pursuing by working with business volunteers. For a short period of time, up to several days, students spend the work day as a shadow to a competent worker. By visiting a workplace, investigating a career field and industry, and experiencing a typical day on the job, students can determine if the career and industry fits their interests and career aspirations (PA Department of Education: PA Career Standards; Electronic Toolkit).

- Students will participate in a minimum of a 5-hour job shadow experience during each of their 9th, 10th, and 11th grade year (15 hours total). Each year, up to 10 hours of a job shadow is an excused absence from school pending parent permission and proper documentation from the career contact.
- Prior to completing a job shadow, students must secure parent permission for the placement and person the student will shadow utilizing the District Career Exploration Permission Form.
- After the job shadow experience, students must complete a reflection to help them navigate post-secondary education and career goals.
- Students must submit their Career Exploration Permission Form, Career Exploration Verification Form, and Career Exploration Reflection Form by the following end of the last day in the following quarters:
 - Juniors--End of second quarter
 - Sophomores--End of third quarter
 - Freshmen--End of fourth quarter

CAREER EXPLORATION No. 0710

Semester

Credit .5

Grades 9, 10, 11, 12

This semester long course focuses on the development of employment and career exploration skills. Areas of focus will include building self-awareness, responsibility and confidence, soft skills, and resumes and cover letters, interviewing skills, and exploring career possibilities. Students will self-select pathways and complete various tasks and activities to earn competency badges in areas such as: leadership, cooperation, personal finance, independent living, and many more. Course assessments will be artifact and portfolio based and highly individualized depending on student goals. Class experiences will take place within the school, on field trips, with guest speakers, and within the Hampton community.

SCHOOL-BASED VOCATIONAL EXPERIENCES No. 2114

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisite: Teacher Recommendation

This full-year course focuses on the continued development of career readiness and employment skills. Students will be assigned to a variety of jobs around the school, including clerical, custodial, food service, and production tasks. Students will also develop skills related to employment, such as soft skills (work ethic, positive communication, time management, and problem solving), in addition to career development (developing a resume, cover letter, and interviewing).

SENIOR INTERNSHIP No. 1401

Semester

Credit 0.5

Grades 12

Prerequisite: Student must be at least 17 years old and provide their own transportation

The Senior Internship Program is a course designed to provide differentiated opportunities to a select number of senior students to participate in career exploration and build college and career readiness through meaningful experiences and hands on learning in a professional setting. Upon successful completion of the program, students receive 1 credit towards graduation and a grade based in accordance with the Hampton grading scale. Students typically select two areas of interest as potential internship placements. Students are placed with an adult mentor at the internship placement site and expected to work between 5 to 15 hours a week for the semester. Students are required to complete and submit weekly modules and weekly logs of their hours. During the semester, students are expected to attend informational meetings and sessions at the High School with the program supervisor. Students will receive an informal evaluation from their onsite mentors. Students will need to be able to demonstrate an ability to reflect on their experiences, learn from mistakes, challenge themselves, grow through adversity, ask questions, and show an increased awareness of interpersonal and professional skills. Internship placements vary based on student interests and the availability of quality placements that are willing and able to collaborate with the program. Student enrollment in the course is limited. Students must complete an application to be considered.

POST-SECONDARY TRANSITION No. 1701 & 1702 (Learning Support)

Year (at least 4 days per week)

1801 & 1802 (Emotional Support)

Credit up to 1.0

2101 & 2102 (Life Skills Support)

Grades 9-12

Prerequisite: Student must have an IEP.

In this course, students work toward mastering their Individualized Education Program (IEP) goal(s) and focus on secondary transition planning in the areas of post-secondary education, employment and independent living in order to prepare for adult living after high school. Activities are designed to monitor progress and support a student's Individualized Education Program. This credit-bearing course is awarded a Pass/Fail grade and is not factored into a student's GPA.

MIXED MEDIA I No. 0810

Semester

Credit .5

Grades 9, 10, 11, 12

Materials Fee: \$10-\$20

This course is designed for students who like to work in a variety of art media. It is designed to challenge the student to use traditional materials in non-conventional ways. Most of the work produced in this class is intended to be used as functional objects, as well as creating works of art. Some of the projects will include mosaic tiling, mixed media, fiber arts, ceramics, and *papier mâché*.

MIXED MEDIA II No. 0811

Semester

Credits .5

Grades 9, 10, 11, 12

Prerequisite: Introduction to Contemporary Crafts

Materials Fee: \$10-\$20

This semester course is designed as a continuation of the Introduction to Contemporary Crafts course. It encourages students to use their creativity and knowledge of a variety of media and techniques to develop individual crafts. Inspiration from the study of contemporary craft artisans will inform the student's artistic work. Students will analyze art and the environment,

cultural influences, and art and process. Further study of contemporary art and artists encourages students to further explore new and innovative ways of looking at traditional materials.

DRAWING AND PAINTING I No. 0812

Semester

Credit .5

Grades 9, 10, 11, 12

This basic course introduces the student to a wide variety of media and techniques to develop an artistic interest in two-dimensional art. Students will acquire basic skills in drawing, acrylic painting, design principles, color theory, and mixed media. Use and care of art materials and tools will be taught. Completed projects and use of class time are important to success in this course.

DRAWING AND PAINTING II No. 0830

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Drawing & Painting I or Drawing Plus from the Middle School

This semester course is designed to build upon techniques and media introduced in the Drawing & Painting I course. There will be a concentration in areas of more advanced drawing, watercolor, acrylic painting, and design work. Students are expected to complete weekly sketchbook assignments. Students learn how to prepare and present their work for group critiques.

DRAWING AND PAINTING III No. 0831

Full Year

Credit 1.0

Grades 10, 11, 12

Prerequisite: Drawing & Painting I, Drawing & Painting II

Drawing & Painting III is a year - long course designed for the motivated art student. Students will be required to keep an art sketchbook for personal and assigned work. Projects will build upon techniques previously learned to further develop their own style through a guided structure of creative problem - solving. All members of the class will work and think as artists on individual and group work. Students continue to develop their art critiquing skills through the group critique process and the study of works of art on view in art museums and galleries.

CERAMIC SCULPTURE I No. 0813

Semester

Credit .5

Grades 9, 10, 11, 12

This is an introductory course designed to serve as a foundation for the development of artistic interest in clay. Ceramic Sculpture is taught as a fine art. Construction is developed in functional and non-functional work. Hand-building techniques using slab, coil, pinch, and relief construction are emphasized. Students learn clay preparation, design, texture, structure, and form. Classroom management, storage habits, and glazing are taught. Finished work and required class time are important to success in this course.

CERAMIC SCULPTURE II No. 0814

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Ceramic Sculpture I

This course is designed as a sequential study of art from Ceramic Sculpture I. Under guided practice and instruction, the students will build on techniques and skills acquired from Ceramic Sculpture I. Wheel-thrown pottery is a part of this course.

Glazing techniques are explored and developed as the student becomes accustomed to the process of ceramics. Thematic exploration and personal expression are important to success in this course.

CERAMIC SCULPTURE III No. 0815

Semester

Credit .5

Grades 10, 11, 12

Prerequisite: Ceramic Sculpture II

This course is designed as a sequential study of art from Ceramic Sculpture II. Students will have a more personal involvement with their work. Emphasis may be on hand-building techniques or wheel-thrown pottery. Under guided practice and instruction, students will build on skills using clay as their medium of choice.

METALS AND JEWELRY I No. 0816

Semester

Credit .5

Grades 9, 10, 11, 12

Materials Fee: \$10-\$20

Students are introduced to the creative world of contemporary metalworking. They will learn design elements in relation to metals, wood, fabrics, and found objects. Skills and techniques in cutting, piercing, soldering, enameling, and joining materials will be emphasized.

METALS AND JEWELRY II No. 0817

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Metals and Jewelry I

This course is designed as a sequential study of art in metals and skills and techniques introduced from Metals and Jewelry I. In addition, jewelry casting is introduced. There is also an emphasis on the joining of multimedia concepts and designs. If students opt to purchase pieces made in silver, the fee will be determined based on the current market value of silver and project weight.

METALS AND JEWELRY III No. 0818

Semester

Credit .5

Grades 10, 11, 12

Prerequisite: Metals and Jewelry II

As sequential study of art from Metals and Jewelry II, this course encourages students to have a personal investment in the outcome of artwork. Jewelry casting, stone setting, and precious metals appreciation are the main focus. Sculpture through different media is also emphasized. If students opt to purchase pieces made in silver, the fee will be determined based on the current market value of silver and project weight.

AP STUDIO ART No. 0840

Full Year

Credit 1.0

Grade 11, 12

Prerequisite: Completion of at least one level II art course or Instructor Approved Portfolio

AP Studio Art is an in-depth, advanced level course focused on the creation of a portfolio for the College Board AP portfolio examination. Students will determine whether they will concentrate on 2-D or 3-D artwork for their portfolio prior to the start of the course. The course is a full year course focusing on the three sections of the portfolio: breadth, concentration, and quality in the student's chosen area of focus. Students will be expected to maintain a sketchbook and produce a minimum of 25 high quality pieces for the portfolio with the expectation of the completion of 4 finished works completed over summer

break. Additionally, students will develop the following practices and habits of mind: critical analysis, evidence-based decision making, innovative thinking, articulation of design elements and principles, systematic investigation of formal and conceptual aspects of art making, technical competence with materials, demonstration of artistic intention, and the creation of a body of work unified by a visual or conceptual theme. Students will achieve a deep understanding of both criticism and aesthetics and apply it to their work, as well as the work of others, through group and individual critiques. Students who take this course are expected to submit their portfolio to the College Board.

AP ART HISTORY No. 0841

Full Year
Credit 1.0
Grade 11, 12

The AP Art History course is equivalent to a year-long college art survey course exploring the nature of art, art making, and response to art. By investigating specific course content of 250 works of art characterized by diverse artistic traditions from prehistory to the present, students develop in-depth, holistic understanding of the history of art from a global perspective. Students become active participants in the global art world, engaging with its forms and content. The experience will include research, discussion, reading, and writing. Students who take this course are expected to take the AP exam in May.

STUDIO INTENSIVE No. 0832

Full Year
Credit 1.0
Grades 11, 12

Prerequisite: Completion of three courses in one medium (ceramics, metals/jewelry, or drawing and painting)

Studio Intensive is a year-long course geared towards to the student that is looking to pursue a post high school career in the visual arts. Centered on the individual student's strengths in a specific and chosen medium, each quarter will have individually tailored goals and objectives that have been predesigned through collaboration between the student and teacher in May of the previous school year. These goals will focus on further development of technique and processes, aesthetic decision making, and risk taking during the artistic processes that are more advanced than what is covered in entry level courses that focus on the same medium. The fourth quarter will center on research, field study, and career preparation. The course will culminate in an exhibition of the student's work, accompanied by a senior thesis identifying their role in the art world.

STAGE TECHNOLOGY AND PRODUCTION I No. 0820

Semester
Credit .5
Grades 9, 10, 11, 12

This semester course is designed for students interested in learning about the creative field of theater. Students will learn skills in the areas involved in designing and producing technical elements in relation to the stage. Experiences will range from designing sets, set construction and painting, programming the light board, sound production, make-up effects, and the basic procedures of running a production from start to finish. Given time, we will also focus on scale-set model building and the history of the stage, in its many forms. Students will also help to work on and set up events of concentrated theater work, such as the spring musical and fall play. As a final dimension, students will perform all of the technical aspects in conjunction with the acting class for a production for the public at the end of the semester.

STAGE TECHNOLOGY AND PRODUCTION II No. 0821

Semester
Credit .5
Grades 9, 10, 11, 12
Prerequisites: Stage Technology and Production I

This course is developed to assist the students interested in further advancing their technical skills in the various fields of theater. The learner will specifically focus on two fields per quarter, chosen from a pool of over fifteen areas. This will equip the learner with more detailed, specific knowledge of elements required to produce a full-length theatrical production. In addition to the four fields in which the students will gain mastery, they will also be responsible for leadership and helping

the integrated Stage Tech I students by leading various group projects, such as lighting design or set construction. Evaluation will be determined by the successful mastery of knowledge of, and execution of, each field, as well as student leadership and initiative in peer group projects.

ACTING AND DRAMATIC STRATEGIES I No. 0822

Semester

Credit .5

Grades 9, 10, 11, 12

This course is developed for the student interested in learning about practicing the craft of acting in a theater setting. This acting course focuses on behavior, movement, reaction, and believability. Time will be spent on becoming comfortable with the stage and learning the parts of the theater. Students will perform pantomime, emphasizing the importance of body language and facial expression to tell the story. We will lay the groundwork for the remainder of the course by taking a look at speaking for the stage, focusing on volume, diction, and annunciation. Through studying blocking, students will be able to integrate acting driven dialogue and stage movement. Script and character analysis are integral to the course to show students how to interpret a script and find a character's motivation and behavior. Method acting, drawing from real life experience, is examined as well. Students will examine and perform specific monologue types, including the Shakespearean, comedic, and dramatic monologues. Towards the end, students will focus on the preparation of a series of monologues, which will be performed for the public.

ACTING AND DRAMATIC STRATEGIES II No. 0823

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Acting and Dramatic Strategies I

This course is designed for the student interested in expanding and sharpening the craft of acting which was initiated in Acting and Dramatic Strategies I. Where the introductory acting course left off, Acting and Dramatic Strategies II picks up with dialogues and one act plays, turning the students focus from monologues and singular acting skill sets to cooperative, collective group-oriented skills, giving students the chance to improve their interaction skills for the stage, as well as learning to rely on fellow actors to propel the play along. In addition, the acting course focuses on heightened characterization exercises, building on the foundations of characterization taught in Acting and Dramatic Strategies I. Time will be spent on script adaptation and analysis as well as increasingly comprehensive character studies. Students will apply their previous skills when translating peer scripts and published works into statement pieces. Also, students will be provided with the opportunity to take a more in-depth and detailed look at the art of direction; students will have the opportunity to lead peer groups in addition to collaborative co-directing. The course will culminate with a cooperative project with the Stage Technology II students to write, direct, and produce a series of one-act productions, to be performed for the public.

Communications Technology Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
0901	Graphic Design I	0.5	9-12	
0902	Graphic Design II	0.5	9-12	Communication Technology I or Graphic Design I
0903	Video Production	0.5	9-12	
0905	Advanced Video	0.5	9-12	Video Production

GRAPHIC DESIGN I No. 0901

Semester

Credit .5

Grades 9, 10, 11, 12

This class focuses on the four major areas of communication – photography, graphics, video, and multimedia. Students will learn how to create and communicate messages effectively by manipulation and/or creation of basic images using the latest technology. Students will gain real-world experiences in the planning and execution of their projects. Students will learn traditional and digital photographic principles and techniques. They will have the opportunity to learn Photoshop to enhance and manipulate photographs. They will also investigate graphic production, design systems, and multimedia production. Audio and video systems, students learn to use digital video software and create their own music, and create powerful presentations. This is a hands-on course and grades will be based on projects and class participation. There may be a nominal materials fee for this course depending on the projects chosen by the student.

GRAPHIC DESIGN II No. 0902

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Communications Technology I

This course allows students to further their study in the field of visual communication. Included are advanced operations in digital photographic principles and techniques. Students also are able to develop advanced techniques in graphics design, and audio, and music production. Students will have the opportunity to be introduced to studio and portraiture and product photography, while special emphasis will be placed on advanced recording and editing techniques using the most modern digital editing equipment. All required video projects will be a combination of individual and group projects, which could include air tagging, QR codes, and interactive based video links, making a professional sounding music video, or creating an interactive multimedia project. This is a hands-on course and grades are based on projects and class participation. There may be a nominal fee for materials for this course.

VIDEO PRODUCTION No. 0903

Semester

Credit .5

Grades 9, 10, 11, 12

In this course students will enhance or acquire skills in all facets of video production (including broadcasting, creating storyboard, filming, assessing music and audio production, and capturing raw footage). Additionally, students will learn how to develop audio and video editing using the latest professional editing packages such as Final Cut X, Motion, I-Movie, and Garage Band. Students will have the opportunity to learn certain aspects of the television studio and control room if desired. Through their varied efforts working with video production, students will further develop important life and career skills, such as responsibility, organization, problem solving, and teamwork. This is a hands-on course and grades are based on the projects and class participation. Nominal lab fees may be required and outside class time may be necessary.

ADVANCED VIDEO PRODUCTION No. 0905

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Video Production

Advanced Video Production is a semester-long course. Students will learn to face real-life situations that they may encounter in the studio or out in the field. Students will have the opportunity to bring to life the reality of video production. Students will learn the latest techniques and discuss the newest equipment in the field of video communications. Students may also write and produce several projects for real clients. Video production assignments may include public service announcements, how-to videos, and/or feature videos. Some group work is required for the video assignments. Minimal lab fees may be required and outside of class time is mandatory.

Engineering Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
0904	Design Studio	0.5	9-12	
0910	Introduction to Materials Processing	0.5	9-12	
0914	Metal Fabrication	0.5	9-12	Introduction to Materials Processing
0921	Construction Technology	0.5	9-12	
0922	Wood Fabrication	0.5	9-12	Introduction to Materials Processing
0931	Architectural Design I	0.5	9-12

0906	Engineering Design I	0.5	9-12	
0907	Engineering Design II	0.5	9-12	Engineering Design I
0934	CAD for Mechanical Engineers	0.5	9-12	
0935	Engineering with Friends	0.5	10-12	

DESIGN STUDIO No. 0904

Semester

Credit .5

Grades 9, 10, 11, 12

This course blends art, design, and innovation. It is for the student who has an eye for design and passion for creative problem solving. This course introduces students to tools and techniques outside of the realm of the traditional art studio, including the Adobe Creative Suite, the laser engraver, 3D printers, and woodworking tools. Students will create innovative art both individually and in collaboration with fellow designers. Design Studio is a place where students design to develop their own creative potential.

INTRODUCTION TO MATERIALS PROCESSING No. 0910

Semester

Credit .5

Grades 9, 10, 11, 12

Lab Fee: Approximately \$25

This course provides the prerequisite foundation for advanced work with metals and wood.

The emphasis of this course is to learn the safe operation of tools as well as the opportunities and limitations of working with various materials. In this course, the student will become familiar with equipment and manufacturing techniques associated with wood, metal, and plastic fabrication. Students will be introduced to the safe operation of a variety of machining and manufacturing tools, such as bench top tools, simple hand tools, advanced hand tools, the laser cutter, and 3D printers. Topics include how various materials are processed, cut, formed, and joined together. Students are required to measure and read design plans, and then design, construct and analyze products using various materials.

METAL FABRICATION No. 0914

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Introduction to Materials Processing

Lab Fee: Approximately \$25

Metal Fabrication is designed for students who want to expand their knowledge from Introduction to Materials Processing (or Metal Fabrication I) with an emphasis on metal working. Students will use the engineering process of research and design to develop products. They will operate tools such as a plasma cutter, an oxy-propane torch, metal forming tools, various metal cutting tools, and a metal inert gas welder (MIG). They will be required to read design plans, use measuring instruments such as micrometers, and complete the fabrication process. This course is recommended for all students interested in material fabrication and engineering.

CONSTRUCTION TECHNOLOGY — No. 0921

Semester

Credit .5

Grades 9, 10, 11, 12

Lab Fee: Approximately \$25

~~In this course, students will learn to design and build residential structures. They will learn about current construction methods and incorporate them into their own design planning. Additionally, while working on design teams, students will build a structure that will be delivered to a customer. Students will develop skills in the following areas: blue print reading, sketching, CAD designing, modeling, correct tooling usage, construction scheduling, and building.~~

WOOD FABRICATION No. 0922

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Introduction to Materials Processing

Lab Fee: Approximately \$30

Wood Fabrication is designed for students who want to expand their knowledge from Introduction to Materials Processing with an emphasis on woodworking. Students will use the engineering process of research and design to develop products. They will operate tools such as a lathe, various saws, planer, joiner, and a variety of tabletop and hand tools. They will be required to read design plans, use measuring instruments such as micrometers, and complete the fabrication process. This course is recommended for all students interested in material fabrication and engineering.

ARCHITECTURAL DESIGN I No. 0931

Semester

Credit .5

Grades 9, 10, 11, 12

This course begins with a brief history of architecture from around the world and the influences that are evident in American architecture. Students will create a technical sketch of a space and re-design it to be more functional. Additionally, students will use technology applications to design a residence based on a client's specifications. This course will also include the opportunity for students to design a complete home using a tutorial on AutoDesk Revit (from creating a wall to publishing professional blueprints). The course will conclude with architectural design challenge using Revit.

ARCHITECTURAL DESIGN II No. 0932

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Architectural Design I

This course builds on the skills from Architectural Design I. Students will participate in a design challenge to renovate an existing structure following a set criteria and constraints. The challenge will require students to develop draft blueprints using the research and design process. Students will build a scale model of the finished product and publish the final set of blueprints.

CAD FOR MECHANICAL ENGINEERS No. 0934

Semester

Credit .5

Grades 9, 10, 11, 12

This course is designed to familiarize students with the creation and manipulation of mechanical engineering drawings, which include multi-view projections, dimensioning, sectioning, and elementary machining operations. All drawings will be completed using computers and AutoDesk's "AutoCAD" and "Inventor" software packages. This course is highly recommended for students who plan to enter the field of engineering or the industrial workforce as a future draftsman or designer.

TRANSPORTATION AND ENGINEERING No. 0951

Semester

Credit .5

Grades 9, 10, 11, 12

Lab Fees: Approximately \$25

This introductory course is designed to provide students with problem-solving activities related to scientific and engineering principles. Students will construct projects dealing with transportation systems such as planes, rockets, wheeled vehicles, and boat-hull design. They will be presented with a variety of experiments enabling them to test their designs against their classmates. Students will also launch rockets calculating height and speed. This fast-paced, fun course provides opportunity to put math and science skills to practical use.

ENGINEERING DESIGN I No. 0906

Semester

Credit 0.5

Grades 9, 10, 11, 12

This is a project-based, hands-on course, which prepares students for a world of emerging technologies. This course will focus on the three dimensions of technological literacy: knowledge, ways of thinking and acting, and capabilities. This is a STEM (Science, Technology, Engineering and Mathematics) course, which is intended for any student who is thinking about engineering or a technology field. Students will develop ideas, and then create innovative, practical solutions. Assessment will be based on participation and the implementation of the design process to solve engineering problems. Students will end the semester with reviewing mechanical components and their interrelationships involved in reverse engineering.

ENGINEERING DESIGN II No. 0907

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Engineering Design I

Engineering Design II further explores engineering topics and themes originally presented in Engineering Design I. The semester will involve hands-on, project-based activities that will further develop the design process; from brainstorming to prototyping to modeling to production. Students will collaborate on designs and present their prototypes to a panel of educators and professionals.

ENGINEERING WITH FRIENDS No. ADD

Semester

Credit 0.5

Grades 10, 11, 12

This one semester course is designed as a collaborative introduction to engineering with an emphasis on cooperative educational experiences in the materials processing workshops. Students of all abilities will work together to learn how to make basic home repairs, use table tools, and design individual home projects. An emphasis is placed on safety with equipment, measuring, and independence with home maintenance.

Family and Consumer Science Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
1002	Child Development I	0.5	10-12	
1003	Child Development II	0.5	11-12	Child Development I
1004	Sewing and Design I	0.5	9-12	
1005	Sewing and Design II	0.5	9-12	Sewing and Design I

1014	Food with Friends	0.5	11-12	One prior cooking class at the high school level or teacher recommendation

CHILD DEVELOPMENT I No. 1002

Semester

Credit .5

Grades 10, 11, 12

The primary purpose of Child Development I is to familiarize students with the unique traits and characteristics of children from conception to age six. This psychology-based course provides students with insights about the physical, social, emotional, and intellectual development in early childhood.

By the end of the course, students will plan lessons and supervise at least nine preschool sessions. They will present stories and activities that fall into the fine motor and gross motor domains. Those activities may include circle time, arts and crafts, story time, and other age-appropriate activities. The experiences in the course help to prepare students for potential careers involving children.

CHILD DEVELOPMENT II (The Preschool Class) No. 1003

Semester

Credit .5

Grades 11, 12

Prerequisites: Child Development I

Child Development II provides students with a 15-week laboratory experience with young children. The preschool program is for children from three to five years of age, and is organized and supervised by the high school students. Physical, intellectual, social, and emotional development will be reviewed and discussed throughout this course. The daily routine includes application of information from the following subject areas: circle time, story, arts and crafts, gross motor, fine motor, and free play. The students as teachers are responsible for planning and preparing lesson plans for each of these activities. The practical experience will be valuable to anyone going into the education field or other fields of work that involve children.

SEWING AND DESIGN I No. 1004

Semester

Credit .5

Grades 9, 10, 11, 12

Sewing and Design I is designed to teach basic sewing skills on the machine as well as by hand. Students will complete up to three clothing items; one project of the teacher's choice and one to two of their choice. They will consider personal design techniques and color choices in both project work and in hand-drawn ~~dress~~ clothing designs. They will also complete one project using hand skills. The student supplies materials.

SEWING AND DESIGN II No. 1005

Semester

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Sewing and Design I

Students improve their sewing skills by learning techniques that produce professional-looking garments. Personalized fashion design is encouraged. Garment selection and construction become more difficult with each project. In addition, students will complete research on a fashion era which will include a paper and an oral presentation

SEWING AND DESIGN III No. 1006

Semester

Credit .5

Grades 10, 11, 12

Prerequisites: Sewing and Design II

Advanced garment construction, pattern study, and pattern design are presented in this class. Students work at their own level, moving toward projects that are more difficult and present a unique sense of style. In addition, students will complete research on a designer which will include a paper and an oral presentation.

FOOD FUNDAMENTALS No. 1007

Semester

Credit .5

Grade 9

Food Fundamentals is designed for the novice cook. Major emphasis is placed on learning basic cooking techniques and how to operate specific kitchen equipment and appliances. Through teacher demonstrations, and practical, hands-on experiences, students cook and bake a variety of items. The goals are for students to develop skills essential for successful cooking practices and to gain confidence in the kitchen. The major units of study are: kitchen safety and sanitation, kitchen basics and nutrition, breakfast, lunch, and dinner.

ADVENTURES IN FOOD No. 1009

Semester

Credit .5

Grades 9, 10, 11, 12

Students examine their diets in relation to current information on the diet/disease relationship. They will examine cooking techniques for healthful eating. Units will compare and contrast recipes containing ingredients that prevent chronic illness. Students will learn to cook recipes the healthiest way. Discussion will focus on how to convert recipes while maintaining flavor. Additionally, the students will learn how to adjust and substitute ingredients to meet individual dietary needs.

GOURMET ON THE RUN No. 1010

Semester

Credit .5

Grades 10, 11, 12

Gourmet on the Run is designed for the student who is interested in the preparation and serving of foods that can be prepared quickly. Many of the dishes include convenience food products. Shortcut cooking methods and skills are emphasized, as well as time and energy-saving techniques. Throughout the course, the microwave, blender, griddle, food processor, stovetop, as well as other appliances are used to emphasize quick cooking. All students will do a demonstration of a recipe from the course. This course is great for any student who does not have the time to do more-involved cooking.

CREATIVE COOKING No. 1008

Semester

Credit .5

Grades 10, 11, 12

In this course, students identify and apply basic principles of cookery in the preparation of self-chosen recipes and group-created recipes. Students have the opportunity for unique expression through lab work and cooking competitions. Ingredient functionality will be emphasized in this course. Major projects include researching foods from a different country/culture and altering/creating recipes.

BEYOND HIGH SCHOOL No. 1011

Semester

Credit .5

Grades 11, 12

Beyond High School is a semester course open to juniors and seniors. This course will prepare every student for experiences after high school such as school-to-work or college living. Life management skills, such as budgeting and banking, are taught and practiced. Additional topics of importance may include communication skills, consumerism and preparing for careers. Class activities and experiences make this a hands-on, relevant course. Home survival skills won't be forgotten such as laundry, ironing, and how to tie a tie.

INTERIOR DESIGN No. 1012

Semester

Credit .5

Grades 9, 10, 11, 12

Where and how we live has a profound impact on individuals in society. Understanding the principles of housing helps in making good decisions on what kind of living space is appropriate for individuals and families throughout the life cycle. This course will help students identify and demonstrate how to create a space that best reflects needs, taste, and positive aesthetics that incorporate both the elements and principles of design with an architectural foundation. Students will analyze factors (social, psychological, economic, cultural) affecting housing decisions of individuals and families and determine how those decisions impact society.

ULTIMATE COOKING No. 1013

Semester

Credit .5

Grades 11, 12

Prerequisites: One prior cooking class at the high school level

The Ultimate Cooking class is designed to build on skills and information learned in previous Family and Consumer Science cooking courses. This course will focus on elements of meal planning, cutting skills and food science. Additionally, students will practice their culinary skills through the preparation of appetizers, side dishes, main dishes, beverages and desserts. The course will culminate with students presenting a themed event .

FOOD WITH FRIENDS NO. 1014

Semester

Credit .5

Grades 11, 12

Prerequisites: One prior cooking class at the high school level or teacher recommendation

This one semester course is designed as a collaborative introduction to foods and nutrition information with an emphasis on cooperative educational experiences in the food laboratory. Students of all abilities work together to understand independent living skills to prepare them for life after high school. An emphasis is placed on recipe preparation, kitchen safety and sanitation, meal planning, nutrition, and independence within the kitchen. ~~The culminating activity for this course will be for students to plan and prepare a meal in an unfamiliar kitchen within the community.~~

Physical Education and Wellness Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
1109	Wellness I	1.0	9	
1111	Wellness II	0.5	11	
1121	Lifetime Activities	0.5	9-12	
1120	Yoga	0.5	9-12	
1125	Advanced Yoga	0.5	9-12	Yoga
1122	Fitness: Dance and More	0.5	9-12	
1123	Personal Fitness and Weight Training I	0.5	9-12	
1133	Personal Fitness and Weight Training II	0.5	9-12	Completion of Personal Fitness and Weight Training I
1124	Team Sports	0.5	9-12	

WELLNESS I No. 1109

Full Year (five days per week)

Credit 1.0

Grade 9

Requirement for 9th grade.

The Wellness I curriculum is structured so that students will be introduced to and given the opportunity to explore current health issues that impact members of their age group. The health portion of this class will include the following topics: decision making, social pressure, stress management, suicide awareness and prevention, nutrition and weight management, lifestyle diseases, substance abuse, and sexually transmitted diseases. The physical education portion of this course will focus on cardiovascular endurance, a variety of muscular strength activities, and the five basic swimming strokes aligned to the American Red Cross Learn-to-Swim program.

WELLNESS II No. 1111

Semester (four days per week)

Credit .5

Grade 11

CPR Certification Fee: Approximately \$28

Earning a CPR Certification is a state graduation requirement for 11th grade. Students who take this course online will need to also take a CPR certification course and share a copy of their certificate with the counseling department.

The Wellness II curriculum is structured so that students will be introduced to and given the opportunity to explore current health issues that impact members of their age group. The focus of this class will cover body systems, first aid, CPR, the use of an AED and rescue breathing. During this course, students will earn their CPR certification. This course will also focus on muscular strength and endurance, cardiovascular and flexibility activities.

LIFETIME ACTIVITIES No. 1121

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

This elective is designed to give an introduction to various activities that can be played or performed throughout their lifetime. Activities include racket sports, such as tennis, pickle ball, table tennis, and badminton. Also, mountain-biking, fly fishing, and archery following NASPE guidelines are introduced.

YOGA No. 1120

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

Yoga is a course intended to encourage lifelong physical activity and fitness. In this course, students will learn yoga postures, breathing techniques, and relaxation methods that can be utilized to improve health. Students will develop body awareness and correct alignment in a variety of yoga poses including standing, balance, hip-opening, inversions, arm balances, twists, back bending, seated, core strengthening, and partner poses. Each class will have a specific focus: pose break-down, yoga flows, strength-building routines, or relaxation.

ADVANCED YOGA No. 1125

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

Prerequisite: Yoga

Advanced Yoga builds upon the skills and knowledge acquired in the first yoga course. After reviewing basic sequences, students will have the opportunity to create sequences of their own to add variety. There will be an emphasis on identifying weakness in muscular strength and endurance and then developing strategies to improve. In addition to group practice, students will be personalizing their practice by locating and utilizing resources for skills they personally want to improve. Students will have the opportunity to practice more advanced skills like floating, binding, arm balances, inversions, and Chaturanga variations. Various breath techniques, different asana-based styles of yoga, mindfulness practices, and self-reflection will be incorporated.

~~FITNESS: DANCE AND MORE~~ No. 1122~~Semester (four days per week)~~~~Credit .5~~~~Grades 9, 10, 11, 12~~

~~Fitness: Dance and More will introduce students to a variety of “group exercise” formats to encourage lifelong physical activity and fitness. Group fitness formats will include cardio kickboxing, interval and circuit workouts, plyometrics, aerobic dance, strength training, and core workouts. After being introduced to these formats, students will create original movement sequences or routines with the skills they have gained. Students will be assessed on class participation, effort, and attitude, along with class projects and assignments.~~

PERSONAL FITNESS AND WEIGHT TRAINING I No. 1123

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

This elective combines classroom, weight training, and cardiovascular fitness activities. Improving students’ health-related components of fitness through introduction to fitness concepts and their application are primary goals of the course. Students will participate in activities to enhance cardiovascular fitness, muscular strength and endurance, flexibility and body composition. The benefits of exercise and its effect on the systems of the body will be introduced.

PERSONAL FITNESS AND WEIGHT TRAINING II No. 1133

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

Prerequisites: Completion of Fitness and Weight Training I

This advanced course expands upon the information and techniques learned in Fitness and Weight Training I. Students with a desire to improve and/or maintain their personal fitness level will have a particular interest in this course. Teaching the necessary skills to attain and maintain fitness throughout life is a primary goal. Students will design and implement a fitness program to meet individual needs by using a format that affords flexibility in choosing activities.

TEAM SPORTS No. 1124

Semester (four days per week)

Credit .5

Grades 9, 10, 11, 12

The Team Sports elective is a high energy, game playing class designed to develop the basic skills, knowledge of game and rules, and strategies necessary to participate in various team sports. The team sports offered in this class are Wiffle ball flag football, soccer, volleyball, team handball, ultimate Frisbee, kickball, and basketball. The course will encourage lifelong participation in sports for fitness and enjoyment.

Music Department Courses

Course #	Course Title	Credit	Grade Level	Prerequisites
1269	Concert Band/Marching Band	1.0	9-12	Proficient score on the playing test
1270	Concert Band/Marching Band—PERCUSSION ONLY	1.0	9-12	Proficient score on the playing test
1260	Symphonic Band/Marching Band	1.0	9-12	Accomplished score on the playing test
1261	Symphonic Band/Marching Band—PERCUSSION ONLY	1.0	9-12	Accomplished score on the playing test
1264	Honors Wind Ensemble/Marching Band	1.0	9-12	Students must earn a position by passing a competitive audition Instructor Recommendation
1271	Symphony Orchestra	1.0	9-12	Students in Grade 9 – participation in the Middle School Orchestra and teacher recommendation Students in 9-12 new to the district –and audition is required
1272	Honors Orchestra	1.0	9-12	Recommendation of orchestra director and successful audition
1203	Concert Choir	1.0	9-12	
1204	Honors Concert Choir	1.0	9-12	Recommendation of choir director and successful audition
1202	Music Theory	1.0	9-12	

CONCERT BAND/MARCHING BAND No. 1269

PERCUSSION ONLY No. 1270

Full Year

Credit 1.0

Grade 9, 10, 11, 12

Prerequisites: At least a proficient score on the playing test or instructor recommendation.

Concert Band/Marching Band is a co-curricular course that includes marching band and concert band opportunities. Students in this class play at the proficient level. An emphasis will be placed on technical training, musicianship, music theory, and rehearsal etiquette. Repertoire selected for this ensemble will reside in the medium level of difficulty. Students will be exposed to musical genres that include pieces from the classical, romantic, 20th century, and contemporary periods of the band repertoire. Students will also be exposed to marches, rock, jazz, Broadway, and/or movie repertoire. Students are expected to practice daily. This class meets on a daily basis. 9th Grade students must attend Freshman Mini-Camp at the end of the school year. All students must attend Band Camp in August, two night rehearsals per week for half of the football season and one night rehearsal per week for half of the football season. Attendance at all public performances is required, including concerts, adjudications, band festivals, parades, and football games. Marching Band performances will be graded for attendance. Students participating in another HTSD fall activity which forces the student to miss 33% or more of the marching band performances will be exempt from the marching component of this co-curricular course. Students will be selected for this group based on a performance assessment performed by all 8th – 12th grade students in early February.

SYMPHONIC BAND/MARCHING BAND No. 1260**PERCUSSION ONLY No. 1261**

Full Year

Credit 1.0

Prerequisites: At least an accomplished score on the playing test or instructor recommendation.

Symphonic/Marching Band is a co-curricular course that includes marching band and concert band opportunities. Students in this class play at an accomplished level. An emphasis will be placed on technical training, musicianship, and rehearsal etiquette. Repertoire selected for this ensemble will reside in the medium-advanced level of difficulty. Students will be exposed to musical genres that include pieces from the classical, romantic, 20th century, and contemporary periods of the band repertoire. Students will also be exposed to marches, rock, jazz, Broadway, and/or movie repertoire. Students are expected to practice daily. This course meets on a daily basis with the opportunity for students to apply and audition for PMEA and AV Honors Bands. 9th Grade students must attend Freshman Mini-Camp at the end of the school year. All students must attend Band Camp in August, two night rehearsals per week for half of the football season and one night rehearsal per week for half of the football season. Attendance at all public performances is required, including concerts, adjudications, band festivals, parades, and football games. Marching Band performances will be graded for attendance. Students participating in another HTSD fall activity which forces the student to miss 33% or more of the marching band performances will be exempt from the marching component of this co-curricular course. Students will be selected for this group based on a performance assessment performed by all 8th – 12th grade students in early February.

HONORS WIND ENSEMBLE/MARCHING BAND No. 1264

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisites: Students must earn a position by passing a competitive audition and the instructor recommendation

Honors Wind Ensemble/Marching Band is a co-curricular course intended for the advanced and serious musician that includes marching band and concert band opportunities. This course provides the students with an intense, serious, and competitive ensemble experience. Students must possess advanced technical and musical abilities. An emphasis will be placed on technical training, musicianship, music theory, and rehearsal etiquette. Repertoire selected for this ensemble will be at the advanced – very advanced level of difficulty (college level). Students will be exposed to major works from the band repertoire, including selections from the classical, romantic, 20th century, and contemporary periods. Students will also be exposed to marches, rock, jazz, Broadway, and/or movie repertoire during the marching component of this course. Students must practice daily. This course meets on a daily basis with the opportunity for students to audition and apply for PMEA and AV Honor Bands. Students will be required to participate in morning sectional rehearsals prior to school during the 2nd, 3rd, and 4th grading periods. 9th Grade students must attend Freshman Mini-Camp at the end of the school year. All students must attend Band Camp in August, two night rehearsals per week for half of the football season and one night rehearsal per week for half of the football season. Attendance at all public performances is required, including concerts, adjudications, band festivals, parades, and football games. Marching Band performances will be graded for attendance. Students participating in another HTSD fall activity which forces the student to miss 33% or more of the marching band performances will be exempt from the marching component of this co-curricular course. Percussion ensemble is pulled out of the regular rehearsal one or two days per week for added instruction.

SYMPHONY ORCHESTRA No. 1271

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisites:

1. Students in Grade 9—participation in Middle School Orchestra and teacher recommendations
2. Students in Grade 9-12 new to the district—an audition is required

The Symphony Orchestra is a performance-oriented course that aims to develop a varied repertoire of classical and popular orchestral works for performance both in and outside of the district, with emphasis on advanced individual and ensemble playing techniques. Repertoire will include pieces suitable for full symphony orchestra, as well as strings-only selections. The course will also develop student understanding of basic music theory and music history as it relates to the repertoire. This course meets on a daily basis with opportunities for individuals to audition for various honors ensembles throughout the

area. Attendance at all public performances is required. Students will be assessed on daily performance in the classroom, individual development of technique, and written and aural analysis of music.

HONORS ORCHESTRA No. 1272

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisites: Recommendation of orchestra director and successful audition

Honors Orchestra is a course that runs concurrently with Symphony Orchestra. It is a performance-oriented course that aims to develop a varied repertoire of classical and popular orchestral works for performance both in and outside of the district, with emphasis on advanced individual and ensemble playing techniques. Repertoire will include pieces suitable for full symphony orchestra, as well as strings-only selections, and opportunities to develop chamber music skills in small groups. The course will also develop student understanding of basic music theory and music history as it relates to the repertoire. In addition, Honors Orchestra students are required to submit four projects per semester. These projects emphasize public performance in both large and chamber groups, as well as develop a more in depth understanding of the history behind the orchestra's repertoire. This course meets on a daily basis with opportunities for individuals to audition for various honors ensembles throughout the area. Students will be assessed on daily performance in the classroom, individual development of technique, and written and aural analysis of music, as well as completion of the four projects using a rubric for criteria.

Honors students are required to audition for PMEA District 1 Honors String Orchestra and apply for the District 1 Orchestra Festival, from which they may proceed to Region and All-State Festivals through audition.

CONCERT CHOIR No. 1203

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Concert Choir provides a choral environment in which the student may develop his/her music comprehension and vocal instrument to fullest capacity. Varied opportunities are available to students of all abilities and experience. Concert Choir is a performing group composed of soprano, alto, tenor, and bass voices that rehearse and perform music written for mixed voices in two to eight parts. Concert Choir is open to both changed voices and unchanged voices from grades 9 through 12. Students will be assessed on development of vocal production, skills in reading music notation, participation in class assignments and public performances. Those who excel may audition for Pennsylvania Music Educators Association District I Honors Choir and District I Choral Festival in which they may proceed to Region and All-State festivals through adjudication. Vocal production, choral diction, ear-training and sight-singing are taught, leading to performance of the best examples of the choral music literature.

HONORS CONCERT CHOIR No. 1204

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Prerequisites: Recommendation of choir director and successful audition

Honors Concert Choir is a course that runs concurrently with Concert Choir. It is a performance-oriented course that aims to develop a varied repertoire of classical and popular choral works for performance both in and outside of the district, with emphasis on advanced individual and ensemble singing techniques. Repertoire will include pieces suitable for chamber choir, and opportunities to develop chamber music skills in small groups. Some repertoire will be in addition to music being studied and rehearsed daily in class with all Concert Choir students. The course will also develop student understanding of basic music theory and music history as it relates to the repertoire. In addition, Honors Concert Choir students are required to submit one written listening journal per quarter (four per year). These journals will feature significant choral works that students will listen to and respond to through writing. This will help students develop a more in depth understanding of the history, cultural significance, variety of styles and genres, etc. of choral repertoire. This course meets on a daily basis with opportunities for individuals to audition for various honors ensembles throughout the area. Students will be assessed on daily performance in the classroom, individual development of vocal technique, preparation of additional and more advanced music, written and aural analysis of music, as well as completion of the four listening journals (using a rubric for criteria).

MUSIC THEORY No. 1202

Full Year

Credit 1.0

Grades 9, 10, 11, 12

Music Theory is the study of the building blocks of music. Harmony is studied from three separate views. They include how it is built, how to play it, and how it sounds. Included in the course are the study of pitch, rhythm, major scales, minor scales, triads, seventh chords, diatonic chords, voice leading, part writing, harmonic progression, inversions, cadences, periods, non-chord tones, secondary chords, modulations, form, and analysis. Students will also develop their ears through melodic and rhythm dictation. A background in music is helpful, but not necessary. Music Theory is an excellent course for students who want to learn the fundamentals of music composition. This course covers most of what a 1st semester college music theory class will cover.

SCHEDULED ACTIVITIES

(NO CREDIT/NO GRADE)

Hampton High School has a nine-period day. All students, except seniors, must register for at least 7 full-credit courses or the equivalent thereof (two semester courses equal one full-credit course). Seniors must schedule at least 6.5 credits. Scheduling an activity does not circumvent the minimum schedule requirements listed above.

YEARBOOK No. 1305

Full Year

No credit

Grades 9, 10, 11, 12

Prerequisites:

1. Students are required to complete an application.
2. Students must have the recommendation of their current English teacher.

Yearbook provides students with the opportunity to practice real world skills including the editorial, design, and business areas of publishing. Students will produce *The Talbot*, which documents the story of the complete school year while maintaining high journalistic standards. Staff members will utilize digital technology to plan, design, and produce the publication. Students will create a business plan and participate in fund-raising activities to stay within a fixed budget. In addition to submitting the completed yearbook for PSPA evaluation, students will have the opportunity to submit individual work to competitions and to attend conferences and workshops.

Grades 10, 11, 12

Advertising Design – The Advertising Design program at A. W. Beattie Career Center focuses on a wide variety of professional art-related fields, including: Digital Graphic Design, Multimedia, Digital Photography, and Web Design. Students will train in a dual-platform (Mac and PC) environment using the latest in professional graphic design software and equipment, such as: Adobe Photoshop CS5.5, Adobe Illustrator CS5.5, Adobe Premier Pro, Adobe Dreamweaver CS5.5, Sketch-Up and many other professional design tools. Students can achieve advanced standing at local colleges or universities by utilizing college credits that can be earned in this course. Students will also work toward their Adobe Certified Associate Certificate in our customized design studio.

Automotive Collision Technology - Auto Collision Technology trains students in all aspects of the industry including MIG welding, computerized paint mixing, and spraying techniques. Using the latest technology in our fully equipped auto shop keeps students up-to-date with current standards. The Auto Body Repair program utilizes the nationally recognized ICAR curriculum. Students earn their SP/2 industry Safety Certification leading to enhanced employment opportunities. Additionally, the opportunity exists for a student to earn their PA Safety Inspection license. Cooperative education experiences in local area dealerships provide authentic educational experiences. The Auto Body Program is certified by NATEF (National Automotive Technicians Education Foundation) ensuring that the Career Center meets strict education and industry standards.

Automotive Technology - The NATEF (National Automotive Technicians Education Foundation) certified **Automotive Technology** program at A. W. Beattie Career Center meets strict standards, providing students with hands-on experience using up-to-date diagnostic equipment in our state-of-the-art auto shop. Students learn all aspects of the trade, and participate in an Automotive Technology program that is an AYES (Automotive Youth Education Systems) training facility. This program provides students, during their senior year, with work experience in local area dealerships, allowing for those important career connections. NATEF and AYES certifications assure students the best training and preparation to complete their ASE (Automotive Service Excellence) certification in time for graduation. Students will have the opportunity to earn their PA Safety and Emissions Inspection credentials; as well as their SP/2 industry recognized Safety Certification.

Carpentry/Building Construction - The use of hand and power tools, blueprint reading, framing, finishing, roofing, drywall, and insulation are taught through hands-on experience in the **Carpentry/Building Construction** program. Students have the opportunity to learn skills in the carpentry, masonry, plumbing, and electrical fields. BAMP activities and competitions, as well as community projects challenge students during the year, preparing them for immediate employment. Students have the opportunity to experience live work by taking part in the ongoing project of building a modular home. Students will gain educational experiences with industrial rigging, scissor lift operations, and forklift training. Students will have the opportunity to earn their OSHA-10 Safety Certification and PA Builder's Certificate.

Computer System, Network Engineering and Cyber Security – In this integrated dual learning pathway students will have the opportunity to explore and develop their interest in two of the most sought after skill sets in the computer field; **Network Engineering and Cyber Security and/or Computer Systems Technology**. Building, maintaining and troubleshooting computers and peripherals is part of the curriculum. Students will learn the basics of networking, build and create virtual servers, and they will also set up and maintain Internet client services. Students participate in the Cisco approved IT Essentials course through the Cisco Networking Academy. The curriculum builds upon itself to create a pathway for students to participate in the next step of the curriculum with Networking and Cyber Security. Students will be able to test for the CISCO Certified Networking Associates Certification.

Cosmetology - In **Cosmetology**, the Beattie Salon provides qualified Cosmetology students with the opportunity to use their energy, skills, and imagination on clients from the community, in a state-of-the-art Cosmetology Salon. Students will study care of hair, nails, and skin. They will learn the proper use of cosmetology tools and equipment, as well as techniques in hair cutting, styling, coloring, permanent waving, and relaxing, manicuring, pedicuring, and skin care. Cosmetology students will earn their industry recognized SP/2 Safety Certification. Students will also focus on professionalism and customer relations, while preparing for the test for their Pennsylvania State Cosmetologist License.

Culinary Arts – The A.W. Beattie Career Center Culinary Arts Department has built a solid reputation as one of the finest culinary programs within the Commonwealth of Pennsylvania. Students will prepare and serve Breakfast and Lunch to more than 150 community members each operating day. Students will learn all aspects of the restaurant business from meal and menu planning, food preparation, baking and carving, to dining room management and banquet service. Students participate in the Pro-Start curriculum program, which is a nationwide culinary program sponsored by the National Restaurant Association Education Foundation. Upon successful program completion students may transfer their credits to one of more than 80 post secondary schools nationwide to continue their education. Students will also have the opportunity to earn their ServSafe Food Safety Certification and their PS/2 Food Safety Certificate.

Dental Careers - In **Dental Careers** students learn the necessary skills for employment in Dental Assisting, Lab Technician, Infections Control Assistant, and many more opportunities within the Dental Industry. Seniors participate in hands-on work experiences in dental offices learning and assisting in four-handed dentistry, chair-side assisting, administrative skills, and other techniques. Students will prepare

to test for their PA Radiological Certification on the Career Centers state of the art Digital X-Ray System. Upon successful program completion and two years of employment, students will be eligible for their Dental Assisting National Board exam.

Early Childhood Education - Students enrolled in **Early Childhood Education** experience the opportunity to apply their child development and teaching skills will engaged in a variety of settings. In addition to a variety of classroom activities, students learn the industry standards for hands-on activities with infants, toddlers, and preschool age children. Students present a series of learning and development activities in a variety of facilities, practicing and refining their creative teaching skills, as well as learning the basics in caring for and managing children. Students will participate in the Childhood Development Association (CDA) Ready Certification. Additionally, students will have the opportunity to be certified in First-Aid and CPR as part of their classroom curriculum. Our ECE students are actively engaged with a number of community based activities through the local libraries and Junior Achievement of Southwest Pennsylvania.

Robotics Engineering Technology (RET) - The Robotics Engineering Technology (RET) program is designed to train students in skills related to the rapidly developing, innovative robotics and manufacturing industries. In RET, students integrate math and science concepts with cutting-edge technology in robotics and/or manufacturing. The RET curriculum has been developed in partnership with the Advanced Robotics for Manufacturing Institute based primarily at Carnegie Mellon University. Students selecting the RET program are typically preparing for a career in robotics, electronics, mechatronics, advanced manufacturing, or engineering. All students in the RET program study the core curriculum of electronics and robotics. Students also choose at least one specialty from among 3D modeling and design (for 3D printing and CNC machining), coding on platforms such as Arduino, Raspberry Pi, and LocoRobo, and Fanuc robotic arm operation. Individual projects assigned by the instructor or chosen by the student are encouraged. The FIRST Robotics Competition is part of the in-class robotics curriculum. Additionally, students interested in attending the competitions work in the evenings and weekends during the robot build season. RET students may earn up to 20 credits for use in post-secondary education in Robotics or Mechatronics Engineering at California University of Pennsylvania. Numerous other articulation agreements provide students with 4-14 credits at local colleges upon successful completion of the RET curriculum. Industry-related certifications are also available for students.

Emergency Response Technology – The ERT program challenges students with exciting hands-on training in a fully equipped on-site lab, as well as field trips to the local Police and Fire Academies, throughout the school year. Students study several technical fields including police science, fire science, rescue operations, hazardous materials, and emergency medical services. Certification as an Emergency Medical Technician (EMT) at A. W. Beattie Career Center will prepare students for immediate employment in the growing Emergency Response Industry.

Health and Nursing Sciences – The **Health and Nursing Sciences** program will prepare students for the medical field that is rapidly growing and changing. There's never been a better time to pursue a career in the Health Industry. The core curriculum will prepare students for entry level positions, such as Medical Assisting, Nurse Assisting and Patient Care Technician. For those students that have an interest in becoming a Nurse, Radiology Technician, or related positions, this program will prepare them for post-secondary education. During the course of study, students may have the opportunity to gain valuable hands-on clinical experience in hospitals, nursing homes, physical therapy clinics, and private offices where they will practice and perfect their skills, preparing them for an exciting and rewarding career in healthcare. Certification as a Patient Care Technician is available to students who successfully complete their clinical rotation and certification exam through A.W. Beattie or nurse aide certification is one post-secondary pathway with an industry partner facility. Students have an opportunity to participate in a dual enrollment opportunity through CCAC as part of this program for college credits.

Heating, Ventilating, and Air-Conditioning – In **HVAC**, students will master the necessary skills to become qualified technicians and mechanics within their field. Students learn heating installation and service, air-conditioning installation and service, plumbing, electrical wiring, refrigeration, and sheet metal fabrication. Students will put these skills into use when they participate in the plumbing, ventilating, and wiring of the Beattie modular home. They also test for their EPA certification and OSHA-10 Safety Certification at A. W. Beattie, helping to ensure immediate employment opportunities along with post-secondary opportunities. In addition, students may gain experience with industrial rigging, scissors lift operation, and forklift training.

Introduction to Pharmacy– Pharmacy Technicians and Pharmacists employment openings are projected to grow at a rate of twenty-five to thirty-two percent over the next ten years. The Introduction to Pharmacy Program will provide twelfth grade students the opportunity to jump start their post-secondary training and work toward a career with increased employment opportunities. Students will learn compounding formulas and ratios, laws and regulations of the industry, participate in module lab work, practice sterilization skills with industry equipment, and demonstrate proficiency as required by industry standards. Student instruction includes the Pass-Assured interactive pharmacy training and test preparation for the Pharmacy Technician certification exam. Students will participate in mock simulations and gain hands-on experience within the community. The program is limited to twelfth grade students.

Pastry Arts/Commercial Baking - This course provides students with an opportunity to learn all functions of a commercial bakery while perfecting their creative pastry skills. Students keep the bakery cases, located in the Beattie Dining Room, stocked full of cakes, cookies, pies, brownies, breakfast pastries, and a variety of specialty breads and rolls. Students receive quality training in our fully equipped Pastry Arts lab, learning everything from baked goods preparation to merchandising, and dining room service. There are classroom demonstrations from industry professionals throughout the school year, as well as field trips to local bakeries and restaurants. Students will prepare special orders for holidays, weddings, and special events throughout the year. Students have the opportunity to earn their ServSafe Food Safety Certification and their SP/2 Food Safety Certificate.

Sports Medicine – Rehab Therapy and Exercise Sciences Technology (SMART-EST) – The SMART-EST program is designed for students that are looking towards the fields of: physical therapy, occupational therapy, physical rehabilitation, exercise physiology, and sports medicine. Students will develop valuable skills in diagnosis, differential diagnosis, assessment and prevention, along with prognosis and the rehabilitation of bodily injuries and related health conditions. Students will learn the therapy and application principles of a patient care plan including: assessment, evaluation, interventions of exercise, manual therapy, modalities and neuro re-education. Students will also develop goal setting and discharge plans for patients. Students will participate in nutrition understanding, as they learn how to develop proper diet plans for healthy individuals and they will learn how to tailor diet plans for special populations. Career Pathways for SMART-EST are listed at www.beattietech.com.

Surgical Sciences – Surgical Sciences will introduce students to the operations of the Surgical Operating Room (OR). Students will experience and master the skills required to prep surgical instruments for patient care procedures. Students will learn medical terminology that will coordinate with post-secondary options and career employment. Students will learn in a simulated operating room environment where central sterile environment procedures will be practiced. Our students will interact with medical professionals that will enhance the daily learning environment. Surgical Science students will develop their communication, math, and medical dexterities to prepare them to become successful adults. Join us for a career pathway that has endless potentials.

Veterinary Sciences Technology – Students enrolled in the VET-TECH program will experience a wide variety of care and management techniques throughout the program. Students will learn to maintain medical records, schedules, offer client education, explore authentic laboratory procedures, and assist with nursing and prepare for surgical duties; along with routine exams. Students will gain a solid foundation in the Vet-Tech program on which to build a post-secondary degree. Students will have the opportunity to earn the following recognized industry certifications: Purina Certified Weight Coach, Pet Tech First Aid and CPR.

Certifications:

Through strategic planning and partnerships with local employers, A.W. Beattie Career Center offers a variety of nationally recognized validated industry skills certifications. Senior students will participate in the annual National Occupational Competency Testing Institute exams (NOCTI).

Training related externships are required for all students wishing to earn a Performance Certificate with honors during their enrollment at A.W. Beattie Career Center. These related externship experiences can be paid or unpaid and fall into one of the following categories: Cooperative Education, Job Shadowing, Clinical Experiences or Internships and Volunteer opportunities.

Learning Center services are open to all students. The Center is designed to facilitate the needs of students to help them reach their full potential. Facilitators provide support services through tutoring, study guides, test assistance, and curriculum modification. Facilitators and Instruction Assistants offer support in the classrooms and labs.

Accreditation:

A.W. Beattie Career Center meets all requirements as established by the PA Department of Education under the guidelines of Chapter 339. A.W. Beattie is the only Career Center in Pennsylvania that has received the Green Ribbon School Award from the United States Department of Education.
