STEAM @ STIPE
IMAGINE, INNOVATE, INSPIRE

STEAM@Stipe is a K-6 school providing the earliest access to Science, Technology, Engineering, Arts, and Mathematics (STEAM) within project based learning and SEAL educational designs. We inspire and engage all students with a transformational approach where students learn by doing. Through our partnerships with Silicon Valley companies, our purpose is to develop our diverse population into engineers, innovators, and entrepreneurs of the future.

Rooted in Cultural Identity
We value the diverse cultural backgrounds of our students, teachers, families, and community.

Earliest Access
Starting in Kindergarten, students engage in opportunities that explore real-world problems and learn to identify as STEAM scholars who collaborate and share their unique ideas.

Development of Mindsets
Through design challenges and project-based learning (PBL), students practice problem solving skills, guide their own learning, and see challenges as opportunities to grow.

Integrated Approach
Culturally responsive instruction guides students to make connections across the content areas while developing strong academic language and literacy skills.

Community Engagement
We work closely with all stakeholders and leverage our Silicon Valley high-tech partners to provide access to real world applications of STEAM and facilitate authentic experiences.
