

Good evening Finalsite Clients,

Our team has restored admin access to all sites. We are still working to restore some assets from File Manager and Media Manager, which may affect the display of pages that rely on items like photos or videos loaded from these locations.

We are still working to restore eNotify and will provide an update as soon as we are finished. Our Messages module, the replacement for eNotify, is active and available to anyone who currently uses eNotify. Please see the following article for more information on enabling Messages: <https://fnlst.com/bdvsWD>

We have identified a segment of data integrations that require the restoration of mapping files, which we will restore and provide an update upon completion.

Please [contact our Support Team](#) if you experience any issues outside of the items mentioned above.

As part of our efforts to keep you informed, we invite you to join our executive team for a live update tomorrow. We have two more webinars scheduled:

- [Click Here to Register for Monday, January 10 at 11:30 AM EST](#)
- [Click Here to Register for Monday, January 10 at 8:00 PM EST](#)

We will include a webinar recap in tomorrow evening's update for those who are unable to attend.

Sincerely,

Tim McDonough
Chief Client Officer

Finalsite, 655 Winding Brook Drive, Glastonbury, CT 06033, USA
