

Hello Finalsite Clients,

We have restored front end and admin access to nearly all websites, including Messages and Page Pops. We have also restored calendar events, athletics, news/posts, and directory data in Composer. Our team is still working to restore File Manager, eNotify, Integrations, and Media Manager assets, and we will monitor performance through the night.

If you notice any content missing or broken functionality, please [contact our support team](#) with details.

We will provide an update in the morning (EST) on the status of our full restoration effort. Thank you for your immense patience and understanding during this time.

Sincerely,

Tim McDonough  
Chief Client Officer

Finalsite, 655 Winding Brook Drive, Glastonbury, CT 06033, USA
