

Isolation and Quarantine Guidance

Guidance for Those Younger than 18 Years Old

If your child was a close contact to someone who tested positive for COVID-19, they may need to quarantine, depending on their vaccination status:

Up-To-Date

They have been vaccinated with 2 doses of the Pfizer vaccine.

They had a confirmed COVID-19 infection within the last 90 days.

- It is not necessary to quarantine.
- Monitor them for symptoms.
- If symptoms develop, seek testing and keep them home.
- Have them wear a mask around others for 10 days.
- If possible, have them tested 5 days after their exposure.

Not Up-To-Date

They have not been vaccinated for COVID-19.

They have only received 1 dose of the Pfizer vaccine.

They have not had a confirmed COVID-19 infection in the last 90 days.

- Keep them home for 5 days.
- Monitor them for symptoms.
- If symptoms develop, seek testing and keep them home.
- If possible, have them tested 5 days after their exposure.
- After staying home for 5 days, have them wear a mask around others for 5 more days.

If unable to quarantine, wear a mask when around others, including while at school, for 10 days.
