

Social Studies Framework: Grade 1

The Elementary Framework provides the foundational knowledge and skills necessary for young students to become empowered, informed, and socially responsible citizens. Through the study of history, geography, economics, and civics, students learn to interact with, and contribute to the world in which they live. Learning how to evaluate sources of information, craft arguments based on evidence, and take informed action helps students develop their civic identity and voice. Additionally, elementary social studies prepares students to meet the challenge of secondary social studies content and supports literacy development across subject areas. The elementary framework is designed to highlight opportunities in which the English language arts reading, writing, and speaking and listening standards can be integrated into the social studies class. In grades PreK - 3, content is organized within units of study that introduce and reinforce knowledge of the six Maryland State Social Studies Standards. In grades 4 -5, the state social studies standards are integrated into an overview of the history of the United States, using Maryland's key figures and events as a lens into the national story. The framework broadens the historical narrative by including marginalized groups and encourages students to learn more about all members of their communities through the inquiry process.

To assist students in acquiring these understandings, the content of the framework is structured by the following six state social studies standards:

Standard	Description of Standard
Standard 1.0 Civics	Students will understand the historical development and current status of the fundamental concepts and processes of authority, power, and influence, with particular emphasis on the democratic skills and attitudes necessary to become responsible citizens.
Standard 2.0 Peoples of the Nations and World	Students will understand the diversity and commonality, human interdependence, and global cooperation of the people of Maryland, the United States, and the World through both a multicultural and historic perspective.
Standard 3.0 Geography	Students will use geographic concepts and processes to examine the role of culture, technology, and the environment in the location and distribution of human activities and spatial connections throughout time.
Standard 4.0 Economic	Students will develop economic reasoning to understand the historical development and current status of economic principles, institutions, and processes needed to be effective citizens, consumers, and workers participating in local communities, the nation, and the world.
Standard 5.0 History	Students will examine specific ideas, beliefs, and themes; organize patterns and events; and analyze how individuals and societies have changed over time in Maryland, the United States, and around the world.
Standard 6.0 Skills and Processes	Students shall use reading, writing, and thinking processes and skills to gain knowledge and understanding of political, historical, and current events using disciplinary and inquiry literacies.

Social Studies Framework: Grade 1

Standard 6.0

The four dimensions of The Inquiry Arc are reflected in Maryland’s Standard 6.0:

1. **Developing Questions & Planning Inquiries** – constructing compelling and supporting questions, planning inquiries, and determining helpful sources.
2. **Applying Disciplinary Concepts & Tools** - applying the disciplinary concepts and tools of civics, geography, economics, and history.
3. **Evaluating Sources & Using Evidence** – evaluating sources, identifying credible, relevant information contained in sources, using evidence to support and develop claims.
4. **Communicating and Critiquing Conclusions & Taking Informed Action** – communicating and presenting claims, critiquing claims, and identifying ways to address problems in their communities.

Throughout the elementary social studies course, students should employ the social studies skills and processes delineated in the 6.0 Skills and Processes standard. Organizing these skills is the Inquiry Arc, which provides a structure to facilitate effective instruction in social studies.

Effective integration of English language arts standards into social studies curriculum affords students the opportunity to enrich their understanding of essential social studies content, develop civic reasoning, geographic and economic analysis, and historical thinking skills while simultaneously improving literacy development. When designing social studies units of study, teachers are encouraged to address ELA standards as they design instruction and assessment for the social studies standards. Additional detail regarding the indicators and objectives associated with Standard 6.0 can be found at [MSDE Social Studies homepage](#). Connections between Standard 6.0, media literacy, and English language arts standards in reading, writing, and speaking and listening can be found at the [MSDE English Language Arts homepage](#).

Unit Enduring Understanding: An **enduring understanding** is the overarching, conceptual guideline for the unit. Enduring understandings explain why this unit is important and connect important concepts and processes to history and the world today.

Unit Question: A **unit question** connects the big ideas in the enduring understandings and essential questions to the period of study. Everything in the unit contributes to answering this question.
