

Positive Case: Isolation Flowchart

DEFINITIONS AS OF JANUARY 10 (subject to change)

*1**Immunocompromised**—Your immune system is weakened, and you may be at higher risk for severe COVID-19 disease. *2**Isolation**—separation of sick individuals from healthy to avoid disease spread. *3 **Well-fitting mask**—Fits snugly against your face and is multiple layers. *4 Some individuals may be unable to wear a well-fitting mask. They include anyone under 2 years of age, and those of any age with certain disabilities or health conditions. Certain types of facial hair, such as beards, can make mask fitting difficult. A well-fitting mask better protects the both the wearer and those around them. Masks designed for those with beards are currently being evaluated. In the meantime, double masking is one suggestion from the CDC recommends using two masks. <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/about-face-coverings.html> *5**COVID prevention methods**—These include social distancing, masking, hand-washing or sanitizing, sanitizing frequently touched surfaces, etc.
