# Capstone Courses

---

Capstone courses are the culmination of student exploration, learning, and experience within a career pathway. Specifically, students acquire, apply, and demonstrate learning in personalized ways that authentically reflect how professionals think and act within the career field. Capstones center each student's interest, identities, and strengths to provide experiences that will prepare them for specific college, career, or civic opportunities post-graduation.

Each Capstone course is designed to provide **authentic learning** experiences for students, **collaboration** with professionals in the field, **application** of previous and current learning, and student **choice** in demonstration of learning. On the road to taking a Capstone course, students will take specialized course prerequisites that prepare them for the Capstone experience. College credit opportunities are available within each pathway. Completion of a Capstone course will be noted on a student's transcript.
