

Loomis Chaffee

What do I do if I'm the close contact* of someone who tests positive?

Exposure (close contact) is defined as a contact within 6 feet for 15 minutes or more, accrued over 24 hours (1 day), regardless of facial coverings. If the school determines you are a very close contact, such as a roommate, follow the process for not fully vaccinated individuals.

Are you fully vaccinated?

NO

I am not fully vaccinated

- Quarantine/stay at home for 5 days (the day of your last exposure is day 0). This will require leaving campus for boarders.
- Test on or after day 5 or 6 with a rapid antigen.

If your test results are:

NEGATIVE

- Come out of quarantine after negative test as long as you are symptom free.
- Continue to mask at all times indoors. Mask outdoors when social distancing is not possible.
- Students may continue to play sports as long as they can mask. Swimmers will need to wait until day 11 after their last exposure to return to swimming.

POSITIVE

- Isolate for 7 days (day 0 is the day you test positive) and follow the Positive Test Flow Chart.

YES

I am fully vaccinated

Do you have symptoms?

YES

- Quarantine/stay home, wear a mask, and contact Health Center or HR to discuss next steps

NO

- You may continue to go to class (or work) and other activities but must be sure to mask around others for 10 days, including outdoors when social distancing is not possible.
- Students may continue to play sports as long as they can mask. Swimmers will need to wait until day 11 after their last exposure to return to swimming.
- Test on or after 5 or 6 days after last exposure with a rapid antigen test.
- If you develop symptoms or test positive, contact the Health Center or HR immediately and follow guidelines for those situations.

- For a complete explanation of all COVID exposure protocols please visit the COVID Protocols webpage at www.loomischaffee.org/covid-19-protocols
- All policies are subject to change as the COVID situation evolves or based on individual circumstances. If you have any questions or concerns not addressed by this chart, please contact the Health Center or Mary Liscinsky.
