

Calculator Recommendations

Middle School Math Courses, CC Algebra 1 & CC Geometry:

Our recommended calculator is the [TI-30X IIS](#). The TI-30X IIS typically retails for about \$15 and comes in a variety of different colors.

Features of the TI-30X IIS:

- **Two Line Display:** Shows entries on the top line and results on the bottom line.
- **Scrolling:** Entry line (top) shows up to 11 characters and can scroll left and right up to 88. Result line (bottom) shows up to a 10-digit answer and 2-digit exponent.
- **Fraction features:** Allows operations with fractions and mixed numbers.
- **Affordable & Durable**

CC Algebra 2 and above:

A graphing calculator is required in all courses for Algebra 2 and higher.

Our recommended calculator is the [TI-Nspire with Touchpad*](#) (if you want color the [TI-Nspire CX*](#) works as well, but it doesn't have a removable face plate). The calculator retails for approximately \$150.

**Do not buy CAS models; students can't use them on tests or on the SAT due to the solver function.*

Another option is to use a school calculator while in class and for homework purchase just the [TI-Nspire Student Software 365 Day License for your home computer](#) (\$27.50 per year).

Features of the TI Nspire with Touchpad:

- [Transforms into a TI-84 Plus with a free TI-84 Plus face plate](#)
- Integrates with Teacher Navigator Software and instruction
