

# **COVID-19 Safety Protocols and Preventative Measures School Community Survey Results**

*This document provides the results of Enumclaw School District's COVID-19 Safety Protocols and Preventative Measures Survey conducted in January 2022.*

# Introduction

The Enumclaw School Board administered a survey to gather parent and guardian feedback on COVID-19 Safety Protocols and Preventive Measures. Although **the outcomes of this survey will not change current practices related to the preventative measures mandated by the State of Washington**, the school board will share the results with the larger community and with other decision making organizations.

A total of 773 people responded to the survey. 66 respondents were parents/guardians of preschool age students, 471 were parents/guardians of elementary age students, 288 were parents/guardians of middle school students, and 278 were parents/guardians of high school students. Below you will find a summary of results.

---

## Highlight Summary

- **In-school learning has a positive impact on students' social and emotional well being.**  
The vast majority of parents and guardians feel in-person learning has a significant positive impact on students' social and emotional well-being and that students are safe attending school in-person.
  - **The feedback indicates a split result on the support of wearing masks at school.**  
The community is equally divided on the effectiveness and support of students and staff wearing masks as a preventative measure for COVID 19.
  - **Most respondents do not agree with the requirement of a vaccine mandate for either staff of students.**  
A large majority of respondents do not agree with a vaccine mandate for either staff or students as a mitigation measure for COVID 19.
- 

Summary Analysis:

## In-School Safety Protocols

- **Attending school in-person benefits student well-being.**  
The vast majority of respondents feel attending school in-person benefits their students' well-being with 95.47% responding Strongly Agree (72.96%) or Agree (22.51%).
- **Students feel safe attending in-person.**  
The vast majority of respondents' reported students feel safe attending school in-person with 87.97% responding Strongly Agree (61.32%) or Agree (26.65%).
- **Adequate safety protocols are in place to help keep students safe from COVID-19.**  
The vast majority of respondents feel there are adequate safety protocols in place to help keep students safe from COVID- 19 with 79.56% responding Strongly Agree (43.08%) or Agree (36.48%).
- **Most respondents feel they receive enough information about COVID-19 and reported cases, but some could use more information.**  
The vast majority of respondents feel they receive enough information about COVID-19 and reported cases as 75.55% responded Strongly Agree(38.16%) or Agree(37.39%). However, a minority of 24.45% of respondents Disagree(14.49%) or Strongly Disagree(9.96%).
- **When asked to self-isolate or quarantine, my family receives enough information about COVID-19 testing and a timeline to return to school.**  
The vast majority of respondents feel their family receives enough information about COVID-19 testing and when to return to school with 84.86% responding Strongly Agree (34.54%) or Agree (50.32%).

# Perspectives of Prevention Procedures

- **Respondents were split down the middle about masks as an effective preventative measure.**  
Of the respondents, 49.03% agreed or strongly agreed that staff and students should wear masks. 50.97% disagreed or strongly disagreed that staff and students should wear masks.
- **A large majority of respondents are strongly opposed to staff being required to get a COVID 19 vaccine.**  
Responses indicated that 62.09% disagree or strongly disagree that staff should be required to get a COVID 19 vaccine. 37.91% of respondents agreed or strongly agreed that staff should be required to get a vaccine.
- **A large majority of respondents are strongly against students being required to get a COVID 19 vaccine.**  
Responses indicated 68.04% disagree or strongly disagree that students should be required to get a vaccine. 31.95% of the respondents agree or strongly agree that students should be required to get a vaccine.
- **The majority of respondents disagree or strongly disagree with the WIAA policy that requires athletes, coaches, trainers and supporting personnel being tested 3 times a week.**  
Response indicated 59.25% disagree or strongly disagree with the WIAA policy. 40.75% of respondents agree or strongly agree with the WIAA testing policy.

## Additional Feedback

Respondents were provided with an optional comment box to provide additional feedback to either elaborate on topics addressed in the survey or to comment on items not addressed in the survey.

- Each bullet represents the feedback from a single respondent.
- Respondents were not limited to the length of their response to the comment box so some responses are longer than others.
- Comments containing personal attacks and/or language inappropriate for children under the age of 18 have been stricken from the results or redacted.
- 322 respondents provided an additional comment, 451 skipped this section.

The responses below have not been edited in any way from what respondents entered.

# Q11 Additional Comments or Feedback

Answered: 322 Skipped: 451

#	RESPONSES	DATE
1	I feel like the elementary and middle schools do a pretty good job of following safety protocols. However, the observations my high schooler share makes me worry. I've considered pulling him out of in-person several times because of the lack of adherence to covid safety protocols at the high school.	1/19/2022 10:36 PM
2	Mask mandates should not be as strict and wearing them should be optional for students and staff.	1/19/2022 8:42 PM
3	Masks do not stop the spread of COVID-19	1/19/2022 7:59 PM
4	I am tired of my children being treated like they are bad kids, by being literally being yelled at and given lunch detention, because their mask falls below the nose. There are many teachers that don't abide by the same rules and some that will actually take their mask down to tell the kids to pull up their mask up. My kids are not bad kids, they just want to breathe.	1/19/2022 4:47 PM
5	Parents will pull their kids out from the district if vaccines are required. Just imagine the amount of \$\$\$ the district will face - no kids = no federal funding = job loss. Stand with the parents & behind our kids!	1/19/2022 1:31 PM
6	The district dashboard is woefully inaccurate. My child feels safe at school, only because she is vaccinated and boosted. Unfortunately, masks worn correctly has decreased as the year has progressed.	1/19/2022 11:39 AM
7	Testing for sports should not have to be with a PCR test, the results of which can take days to come back. They should be able to test with rapid, at-home tests. It would be most helpful if those were provided to families by the district. PLEASE HELP with getting the before and after school childcares on board with the preventive measures and quarantine/isolation guidelines that you as a district have been taking! For whatever reason, they (The Country Playhouse in particular) have had to close numerous times when you (Kibler Elementary in particular) have not. Their guidelines supposedly state that close exposure is within 6 feet still, while yours is within 3 feet. To have these be considered as close exposures regardless of whether or not they were wearing a mask and regardless of vaccination status just sends the message that masks and vaccines don't work. If everyone needs to be provided with a hospital-grade procedure mask vs a cloth one, please do so! We as hospital employees are not considered exposed unless we have not had a mask on, and it was for more than 15 cumulative minutes. Whatever the schools have been doing to spread the kids out has worked beautifully and really needs to be done in the childcares as well. This is extremely detrimental, especially to lone parents who have to work full time outside of the home taking care of sick people as an RN. Please point me in the direction of whomever else I need to speak with about this to change it. Thank you SO much for all you have done and continue to do to keep students in actual, physical, in-person attendance! Life must go on! <3	1/19/2022 8:57 AM
8	1. I have 3 kids who may feel differently about safety- so this survey presented issues. 2. As for safety: student one- does not feel safe using the boy bathrooms at the high school. I never see the violence and bullying that has happened addressed by school officials. I would like to know what is being done about that! Student 2 does feels "safe enough" but mentions the kids in cowboy boots who continually don't wear masks and disrespect the teachers. I feel horrible for the staff- hard position. Student 3: middle schooler never feels unsafe. 3. I received different information from the high school and the middle school in regards to quarantine times for my kids. I find that weird. I know that CDC keeps changing their mind- perhaps the district should just adopt their own policy and stick with that. 4. My middle schooler is not doing basketball because of the testing requirement for unvaccinated kids. If Covid vaccine is required for school, my three kids will unenroll and will not return.	1/18/2022 8:16 PM
9	Mask choice. No discrimination regarding vax status.	1/18/2022 6:52 PM
10	I am neutral on a few of these questions, but that wasn't an option.	1/18/2022 6:50 PM

## COVID-19 Safety Protocols and Preventative Measures

11	Let the kids be kids this is ridiculous!!!!	1/18/2022 3:22 PM
12	as this omicrom fizzles out and we wait a few weeks to see what's happening with the virus--- then I think we should not be requiring masks at school. And, not sure if you require masks at recess or outside PE... but I disagree with a mask for that at any time.	1/18/2022 2:16 PM
13	I just want to be done with this pandemic, our family has done literally everything we can to avoid catching and spreading this virus and it's intensely demoralizing to witness the vast majority of my community failing to understand the severity of the situation on a seemingly fundamental level.	1/18/2022 1:44 PM
14	Require vaccines.	1/18/2022 1:34 PM
15	Enforce vaccines as a requirement to attend school for 5 and up just like all other vaccines. You have the power to stop the absences and increase the test scores for our district.	1/18/2022 1:31 PM
16	such a feeling that dawn there are no flu seasons only covid where is the flu season? our children do not get enough fresh air that hurts a lot please remove the mask. thank you.	1/18/2022 12:48 PM
17	I hope the answers to this survey demonstrates our belief in medical and personal autonomy, freedom, and equal rights for all. Students and staff.	1/18/2022 12:40 PM
18	Although masks are required at the HS, often students are not wearing them correctly. Either they are below the nose or not on at all.	1/18/2022 12:38 PM
19	1) My middle schooler does not feel that safety measures are being enforced well at TMMS. 2) The district's messaging around masking should be that we have an ethical responsibility and civic duty to protect everyone in our community; that it's not just about how dangerous covid may or may not be to each individual. Mostly what I hear is more along the lines of "it's not our decision, it's an OSPI decision," which implies that the district does not think masks are necessary. Our kids are absolute heroes for what they have endured these past 2 years. The messaging that masks are unnecessary diminishes their contributions to the health of our community as a whole.	1/18/2022 11:41 AM
20	Medical advice and interventions should not be part of our school system. This should be solely between the parents and their personal doctors. Completely left up to the parents choice. I believe in bodily sovereignty.	1/18/2022 10:34 AM
21	Make sure exemptions are valid. I know many will run to get religious exemption when they are not religious.	1/18/2022 10:04 AM
22	The current policies and COVID practices are negligent and irresponsible. I am very disappointed in the district for not having learning plans for students when they are quarantined, not having a virtual option or considering what can be done should we need to close schools due to high infection rates. I'm also totally shocked that the policies for COVID exposures for one child at school doesn't apply to a sibling who is obviously in direct exposure as well and then spreading it around the other classrooms. Do the people running our childrens educations system not understand how to interpret CDC guidelines, policies or even just science based evidence on the spread of droplet infections? Or are you all so worried about what a bunch of uneducated conspiracy theorists are shouting around about that you can't prioritize the health of the public? As a public institution you have responsibilities. Right now, you are not being responsible.	1/18/2022 9:46 AM
23	We understand that this has been an extremely difficult time for the Enumclaw Staff and the Families in Enumclaw. We are thankful for our Westwood staff who has gone above and beyond in safety measures and caring for our children. We appreciate the Enumclaw school district who has gone through some very difficult times to help keep our schools open and safe. Our family strongly feels it is unfair to mandate vaccination for the Staff and Students. We support both sides, people who choose to get vaccinated and people who choose not to. However, we do not support the state mandating any medical decisions for any of us. The hard part is that this has become so divided when it really shouldn't be. As of right now we all know that vaccinated people are still getting covid. The vaccine is not a cure, it does not guarantee you will not get covid or pass covid to other people. With that being said If you choose to mandate vaccination for the Staff and the Students, we will pull our kids from the district and officially move on from public school. As hard as it will be because we love the school community in Enumclaw, we just cannot get on board with mandating anyone to get a vaccine that is not 100% effective. As far as masks go, we will not send our kids to school if you choose to make those who are unvaccinated wear masks. Somehow, we are back to	1/18/2022 7:50 AM

## COVID-19 Safety Protocols and Preventative Measures

discrimination. My family of 4 have been very cautious these last couple years and have not had covid at this point. We are not vaccinated but have been safe with our decisions on what we do and how we live. It has been very hard to not be able to volunteer at my kids' school. I have volunteered for the last 6 years. It is even harder to hear and see that the volunteers I know are able to volunteer because they are vaccinated. I know 3 of the volunteers just had covid. Where I am not vaccinated and still have not had covid. That is full on discrimination and very disappointing. I am a responsible clean person who washes and sanitizes all day, yet I am not able to be at my child's school any longer. I hope you guys are reconsidering your rules. We are not anti-vaccine; we have just had a lot of medical issues in our house the last 5 years and are very careful on our medical decisions. I'd like to add in that White River allows unvaccinated parents to still volunteer. And to be clear not all unvaccinated people think the same. We very much believe in covid but choose to take our own safety measures. I really hope this survey can help you guys keep your students in this town.

24	I don't agree or disagree with the masks required in school, or the testing of athletes and staff. If it is what is required to keep our children in school and able to fully participate in classrooms and sports, then I support it.	1/18/2022 5:24 AM
25	This was a fairly poorly written survey, with some questions pigeonholing us into expressing support for safety measures whether we agree with them or not (see question 4 for example). There needs to be a neither agree/nor disagree option on many of these questions with the way they are presented. Thank you for at least getting our feedback even though it's more than a year too late.... On a side note: Time to move on!! It's been two years!! Not one kid has died or been seriously hospitalized here. However, many are suffering mental and emotional devastation. Those risks outweigh any Covid risks at this point . It's time to admit that and let families choose for themselves. The science shows at this point that there is no reason to continue to disrupt all our lives for those who choose to not get vaccinations or wear masks. Let's get back to focusing on EDUCATION!!!!!!!	1/17/2022 10:57 PM
26	If Forced vax on kids. we're pulling them out of public school.	1/17/2022 9:28 PM
27	I believe masks and the vaccine should be optional, also athletes needing 3 tests should be taken to 1 test if absolutely necessary.	1/17/2022 6:46 PM
28	I trust in the science, and the science shows children do not have the strong affects of illness from COVID. I'm not a anti-vaccination individual. I believe, vaccinations should be a personal decision and not something forced upon us - especially children. All the decisions our government has made towards our children and their education, have done nothing but one thing and that is, it has hurt their ability to receive a good education. I say, shame on Gov. Inslee for what he has willingly done to our youth and our economy.	1/17/2022 6:44 PM
29	Myself, my husband, and our two daughters are vaccinated. However, we do not and will not support any form of COVID-19 vaccine mandate. These vaccines do not prevent symptomatic illness and they are still only available under the EUA, which means they are illegal to mandate per the CDC, FDA, and federal government. The only vaccine close to FDA approval is Comirnaty, which is under a contingent approval agreement. These contingencies have not been met. Furthermore, Comirnaty is not available in the United States and is not slated to be so until at least 2023. The standard vaccinations required to attend school were researched for a minimum for 12 years and it is much easier to garner a medical, religious, or philosophical exemption for the historically required vaccinations. I disagree with asymptomatic testing of any person, because the WHO, FDA, and CDC all claim that testing of asymptomatic people is unreliable and unwarranted and they do not support such testing. Furthermore, current research shows that a positive test result of an asymptomatic person has a 90-97% false positive rate. I disagree with the current mask mandates, because they are ineffective in stopping the spread of Omicron. States with mask mandates do NOT, on average, have lower COVID-19 rates than states without mask mandates. Masks also impede social interaction, which has contributed to higher suicide rates. I strongly disagree with the school district, county, and state being involved in and/or mandating any personal health decisions. Furthermore, I disagree with the district, county, and state having knowledge of anyone's personal health history. In summary, it is NOT the responsibility of the school district, county, or state to protect its employees, volunteers, nor students from medical illness. Instead, it is the parents' and individual's responsibility to do a familial/personal risk assessment and to then take the precautions they decide are important.	1/17/2022 5:34 PM
30	I wish the mask policy was better enforced, because my student's daily complaint is that kids are not wearing their masks or wearing them improperly. Also, seeing as how the Enumclaw school district ranks near the bottom of list in terms of employee vaccination rates, with	1/17/2022 3:00 PM

## COVID-19 Safety Protocols and Preventative Measures

almost a quarter of its employees given exemptions (insane!). It would be incredibly helpful to know if my student's teachers, bus drivers, etc are not vaccinated so I can make a better decision as to whether I feel comfortable with my student attending any specific class.

31	When they mandate the vaccine for students I will be un-enrolling mine from the Enumclaw School District. It is too dangerous of a vaccine to give to kids.	1/17/2022 2:41 PM
32	My children will never get the vaccine.	1/17/2022 1:46 PM
33	My children get verbally abused by teachers almost every day regarding masks. [REDACTED] is absolutely horrendous and has no business being around children. [REDACTED] have both made my daughter cry regularly from their verbal abuse and we have had just about enough. If these people are too scared to be around others, then they should retire and stay home. Your schools constantly denounce "bullying", but the teachers are the ones who are most guilty of it and your "Be the I in Kind" campaign is an absolute joke. We are really close to pulling our kids out of these government schools. Stand up for our children. Unmask them, and stop abusing them. Please do the right thing. Covid is going to be with us forever. Everyone who has had the "vaccines" and boosters are still getting covid and spreading it because the vaccines don't work. Enough with all the nonsense!!!	1/17/2022 1:26 PM
34	Number 8 should be two questions! I strongly agree that staff should have the choice to be vaccinated or not, therefore the exemption would not even apply! Same as for question 9!!! No one should be forced to receive a vaccine that DOES NOT work!	1/17/2022 12:51 PM
35	I do NOT think the vaccine should be required for ANYONE- students or staff. I do not think anyone should be treated differently or given opportunities based on vaccine status. I also do not think students should be required to wear masks any longer.	1/17/2022 12:16 PM
36	Kids are at low risk. Let staff wear masks optional. Let kids learn freely without masks. If vaccines for kids become required, we will be pulling our kids out of ESD. This has gone on long enough and Washington state is extreme in their control.	1/17/2022 12:10 PM
37	The virus is changing, our policies need to be changing. Masks are no longer effective, and the vaccine only protects a little bit from certain variants. Workers and children should NOT be required to get the vaccine. However, I do think test should be required before events.	1/17/2022 12:07 PM
38	Masks need to be more strictly enforced at the High School. My child reports properly worn mask usage has decreased, teachers aren't calling it out anymore, and there are no consequences.	1/17/2022 11:05 AM
39	It's time to stand up to DOH and Inslee. All mitigation's have failed. Remote learning was a failure, mental illness is up, relationships with the District are broken.	1/17/2022 9:52 AM
40	We love this district and know that the staff do their best for our children. Thank you for that! I'm saddened that the future of my children learning with these amazing teachers is in jeopardy because of differences in medical choices. We have complied with masks because children NEED their peers. Also, at the end of the day, masks can be taken off. Forcing the injection of something into the body is not acceptable for anyone. So, even though my kids do better academically and socially being in school, we'd have to take a different route. The divisions in families, schools, and communities due to this virus and vaccine are devastating. My hope is that our schools and community can band together so our children can thrive.	1/17/2022 9:49 AM
41	Covid is all we hear about from the school. I would like to hear more about how our students are performing, what we are doing to get them academically caught up, and making sure they feel accepted and supported. We understand that it's a difficult time with Covid but we still know that the other issues from focusing solely on "covid safety" are becoming bigger problems. The protocols are over the top in Washington to protect the children - we are forgetting there are risks in every day life that we all take every hour. The children are at such a low risk still but they are mentally unstable and their happiness has been put on the back-burner. I understand some students are higher risk but I hope the proper protection for them has been taken. Now, the real data shows N95s are the only working masks and this seems over the top and really hard to make happen. Making a vaccine mandatory that is more of a shot that can make something already low risk possibly better will not help with the situation here in the school district. It will make things worse. Most parents aren't on board for that yet... maybe after we know more about it from time and testing. Please fight against making it mandatory. We need to have our freedom of choice.	1/17/2022 9:20 AM
42	These are just kids... please let them be kids and attend in-person school. This pandemic has	1/17/2022 9:08 AM

## COVID-19 Safety Protocols and Preventative Measures

taken enough years of their childhood. And we should not be forced to make a medical choice for them in order for them to attend school.

43	The wording of this survey is tricky. For example question 4 asks is adequate safety protocols are in place to keep kids safe from covid 19. I disagree that wearing masks is keeping the kids safe but if I say disagree then it could appear that I don't think my children are safe. I think my children are safe without masks. Also questions 8 and 9 talk about kids and staff should be required to get the vaccine or an exemption. What other options are you giving us with the wording of that question? I completely disagree that anyone should be required to get the covid 19 vaccine. It should be everyone's choice with it being so new and it's proving that people are continuing to get covid, vaccinated or not. As well as children, thankfully, aren't effected by covid 19 to the degree that adults are and have been fine if they get covid with an extremely small exception. As well as, what's the difference between those that are vaccinated that don't need to quarantine with an exposure or if you've already had covid? It's spreading like crazy and thankfully much less severe, so we need to see the data and get back to normal. No masks, no social distancing and let our children live normal lives.	1/17/2022 8:46 AM
44	These are unprecedented measures for a virus we are going to live with the rest of our lives. COVID 19 has similar impact on children as the flu and we never reached this level before. The vaccines are there for those who want it, its a personnel choice. Just as is unhealthy choices such as smoking, drinking and many others. The fact that my child needs a vaccine to prevent spreading a virus to another vaccinated person and that transfer might in some how incapacitate that person would tell you the vaccine isn't doing its job. We implement the Flu shot in a separate fashion yet it can kill up to 60,000+ people a year, and it attacks child yet we have never demanded masks or a shot. never demanded quarantine or testing to return. We always trusted people to do what was right for the child, their family and community and keep them home until they were better. COVID 19 should be treated as such. Its time to end the 2 years of insanity and learn to live with it and stop fighting it. Its time to teach healthy habits, build your immune system and allow our children the same freedoms we did when we were in school.	1/17/2022 5:48 AM
45	Lets stop this charade of acting like we can do anything about the virus , it's here to stay ,let natural immunity do its thing.	1/16/2022 10:47 PM
46	Unmask our children. Quit taking away people's rights.	1/16/2022 10:46 PM
47	The vaccine does not prevent someone from catching or spreading covid. Masks do not prevent anyone from catching or spreading Covid. Our children deserve freedom. Our children deserve to see their friends smiling faces. The mandates cause more harm than Covid ever could and it will be years before they recover.	1/16/2022 10:37 PM
48	Thank you for putting out this survey and thank you for working hard to keep our students in class. You guys are appreciated. Please consider freedom first in your policies, especially as all persons who wish to be vaccinated have been able to do so.	1/16/2022 9:30 PM
49	I am extremely disappointed in the failure of the school district to keep the COVID dashboard up to date since the return from Winter break.	1/16/2022 8:55 PM
50	While I understand why the current Covid protocols are in place, I do NOT agree that staff and students should be forced to where a mask at school. Furthermore, if vaccines will be required for students to attend in-person learning, we would be forced to withdraw our children from BDE. I strongly believe that mask wearing and vaccines should be a personal choice and not mandated. By mandating child vaccines in order for them to get a basic public school education in AMERICA, would further push our state and local communities deeper into its current modern-day segregation. I acknowledge that this is a strong statement, and one I do not make lightly, but when certain groups of people are allowed to attend events or eat at restaurants when others can not, it is undoubtedly segregation. This would be the very culture you are promoting if you mandate vaccines for our children. I thank you for your time and allowing me to provide this feedback.	1/16/2022 8:32 PM
51	We're very happy that our son is attending school in person, this is very important to us. We're also happy with the COVID precautions that are in place.	1/16/2022 8:26 PM
52	I believe it is very important for each family to make their own decision about vaccines and masks. I absolutely love ESD but if it becomes a requirement for students to get the this vaccine, we will be withdrawing our kids.	1/16/2022 7:11 PM
53	My kids will NOT be attending school if required to get the vaccine	1/16/2022 7:07 PM

## COVID-19 Safety Protocols and Preventative Measures

54	I strongly believe the kids should not be required to wear masks. I think it should be a personal choice and decision by each family.	1/16/2022 5:23 PM
55	Thank you for all you're doing!!	1/16/2022 3:35 PM
56	Among all the vaccines I have known in my life (diphtheria, tetanus, measles, rubella, chickenpox, hepatitis, meningitis and tuberculosis), I want to also add flu and pneumonia. I have never seen a vaccine that forced me to wear a mask and maintain my social distance, even when you are fully vaccinated. I had never heard of a vaccine that spreads the virus even after vaccination. I had never heard of rewards, discounts, incentives to get vaccinated. I never saw discrimination for those who didn't. If you haven't been vaccinated no one has tried to make you feel like a bad person. I have never seen a vaccine that threatens the relationship between family, colleagues and friends. I have never seen a vaccine used to threaten livelihoods, work or school. I have never seen a vaccine that would allow a 12-year-old to override parental consent. After all the vaccines I listed above, I have never seen a vaccine like this one, which discriminates, divides and judges society as it is. And as the social fabric tightens... It's a powerful vaccine! She does all these things except IMMUNIZATION. If we still need a booster dose after we are fully vaccinated, and we still need to get a negative test after we are fully vaccinated, and we still need to wear a mask after we are fully vaccinated, and still be hospitalized after we have been fully vaccinated, it will likely come to "It's time for us to admit that we've been completely deceived." No Vaccine Mandates No Mask Mandates	1/16/2022 3:00 PM
57	The covid measures are overboard and tyrannical!! Freedom to choose!!	1/16/2022 2:20 PM
58	No masks and no vaccinations	1/16/2022 1:50 PM
59	I believe that masking our children has far more negative consequences than any theorized benefit to all involved.	1/16/2022 1:48 PM
60	Thank you all!	1/16/2022 1:23 PM
61	We all know that it's children and teens are the least at risk. If you want to follow science follow that. Other states have optional masks and vax and the kids are thriving. Personally know 15 families that have left this state for their kids mental well being. They are 99% able to get over it. Time to start treating this like we would any flu. Stay home of sick and immune sensitive can mask and vax. It should all be a choice not mandatory	1/16/2022 1:15 PM
62	Office staff seem to provide differing protocols when students either have Covid or a close family member gets covid. Most students are not wearing masks correctly and this concerns my children. Teachers and administration do not seem to have a handle on enforcement of mask-wearing throughout the student body.	1/16/2022 12:39 PM
63	Vaccination and masking should be a CHOICE individuals and parents make for their and their children's health standards. Masking in school is creating social barriers during crucial developmental years and the CDC has suggested cloth face coverings are no more than a facial decoration. Please unmask our children!	1/16/2022 12:19 PM
64	I hope that there is a plan in place for the district to virtual classes IF needed. Obviously staying in person is best practice, and what we all want, but there should be some metric of positive cases in classes/schools that would unfortunately dictate online learning. Please continue to put our children's safety first because that is who we all care about most.	1/16/2022 12:04 PM
65	i don't believe students or staff should be required to test or get vaccinated to attend anything associated with public school. my son is in preschool, not connected to the enumclaw school district. i am highly considering homeschooling my 4 children if vaccination status and mask wearing does not change. the masks are preventing a big part of social skills. my children will not be made to feel that normal is mask wearing.	1/16/2022 11:20 AM
66	Makes no sense when an unvaccinated student has to quarantine 5 days when come in contact but a vaccinated person doesn't!! I know more people that have been fully vaccinated that have gotten Covid than unvaccinated. Vaccinated should also quarantine, as they can easily spread it too.	1/16/2022 11:19 AM
67	I feel the dashboard does not provide accurate or truthful reporting on in school spread. My child and 4 of her friends contracted Covid from another friend they only see in school. The contact tracer never asked where we believe my student contracted Covid and the dashboard didn't reflect in school spread. I feel the information needs to be as accurate as possible so	1/16/2022 10:42 AM

## COVID-19 Safety Protocols and Preventative Measures

parents can trust good information and make good decisions that are in the best interest of their children and the community at large.

68	Strongly disagree with the vaccine mandate and the mandatory testing for athletes. Vaccines are great for people who choose to have them. Our student has a severe allergy to the vaccine and we strongly disagree with her being treated differently since she cannot have the vaccine and has natural immunity through recovering from covid.	1/16/2022 10:26 AM
69	Masks obviously don't work or we wouldn't have the spread of sicknesses that we do have currently going. Germs are not going anywhere so we need to let our students breathe freely. The testing options for athletes is very discriminatory and should not be in place. There should absolutely be no mandates for vaccines for teachers or students even with exemptions available. I feel the Covid protocol is out of hand and overboard.	1/16/2022 9:07 AM
70	You are doing a good job. The kids are at no serious risk from covid. The vax doesn't work anyways. Let the kids be kids.	1/16/2022 7:48 AM
71	We love our teachers. They are heroes.	1/16/2022 6:48 AM
72	People want to go on with their lives. People are not wanting the state to tell them what to do. If people do not feel comfortable, THEY can wear a mask and be vaccinated. I will not allow my children to get vaccinated. They just got covid over Winter Break , and it was so mild that a cold or flu was much harsher than it. I will pull out my children and homeschool or go to private school. I know many parents who will do the same. Enumclaw will have to decrease their staff dramatically. I am also a school employee and would have to consider leaving my position as well.	1/16/2022 6:26 AM
73	All families should be allowed to make their own, personal, health decisions. This is not the responsibility of the school. Masks should be a choice. Please get back to focusing on TEACHING the children. PS - it's clear the vaccine does not work.	1/15/2022 11:41 PM
74	No mask or vaccine mandate, both measures have proven detrimental to certain student groups. The small gain in adding protection from these measures in not worth the psychological and physical toll it is taking on children. Testing vaccinated student athletes 3x per week is BEYOND excessive.	1/15/2022 10:40 PM
75	I am frustrated with the lack of mask enforcement. I see kids and staff members with their masks worn incorrectly more often than not.	1/15/2022 10:26 PM
76	Don't even think about trying to mandate vaccines for the kids.. you have no data to back it up	1/15/2022 8:01 PM
77	For questions 8 And 9: I strongly disagree that all eligible Staff and students should not be forced to get a vaccine and I strongly agree that all eligible staff and students should be granted an exemption, should one be requested. To be given the choice to be vaccinated or not should be solely based on their own choice and decision, no requirement. Also why wasn't there a question regarding my students educational success being at school, learning remotely did not facilitate a good learning experience for my elementary students.	1/15/2022 6:33 PM
78	Our son said he sees kids getting pulled out of class right and left because they are testing positive. He likes the social aspect of inperson but is uneasy about getting sick and feels like he doesnt know what's going on. He finds out teacher is sick with covid and comes home and asks us if we want him tested, yet we as parents have received zero updates to know what to do.	1/15/2022 5:49 PM
79	My daughter reports that there are students in her class that pretend to wear masks but they do not cover their nose, and they intimidate the teacher if she asks them to over their nose and mouth, to the point that they refuse. She says that they bully the teacher and challenge her when she tries to enforce the COVID rules.	1/15/2022 5:10 PM
80	Mask mandate is not being properly enforced at the high school. Additional communication about confirmed case levels (especially if increasing) would be very appreciated. Do not feel adequately informed about how prevalent the spread may be, especially during this omicron outbreak.	1/15/2022 4:20 PM
81	I put "Agree" on #3 because I feel like the protocols have gone too far. The masks need to be optional. My child has had a sty on his eye for over a month now and I was told by a doctor that because of the masks, they are causing extra oils around the eyes which then lead to styes. Not to mention that I think it is extremely important that my kindergartener and first	1/15/2022 3:40 PM

## COVID-19 Safety Protocols and Preventative Measures

grader are able to see facial expressions from their classmates and teachers for proper development. We have to move on now.

82	I think the elementary school requirements are a bit ridiculous for requirement for testing if you have any symptom before returning. Especially in this current climate when you can't get a test and the free sites are scheduled out a week to get tested. This is cold season too and kids are getting sick with other stuff. I also strongly think that vaccines should NOT be forced on kids or staff. And I think it is irresponsible for someone who is vaccinated to keep working or going to school if they are positive with Covid without symptoms just because they are vaccinated when data shows they still spread the virus but if your unvaccinated you have to quarantine for 10 days even if you don't have any symptoms unless you test negative after 5 days of required quarantine.	1/15/2022 2:31 PM
83	Make vaccines required for staff and all students. Born again Christian religious exemptions are a joke. The Catholic pope endorses the vaccine.	1/15/2022 12:39 PM
84	At this point we know that it doesn't matter if you are vaccinated or not you can still spread and get Covid. Obviously masks aren't working. We should go back to how things were before Covid and start repairing the divide in vax/unvax and start normalizing see each other's faces again!! This madness needs to stop!!	1/15/2022 12:27 PM
85	The timeline for getting test results is ridiculous. There should be quicker ways to get results back.	1/15/2022 12:26 PM
86	Right now, it isn't required for children to get a covid vaccine for school. I want to state that I strongly disagree with making this a requirement. It should be every parents decision on whether their child gets it, and if they choose not to, the child should still be able to attend public school. Our children need to be in school with their friends and trying to lead a normal life.	1/15/2022 12:06 PM
87	Staff and students need to stay home if they have any signs of illness. Staff and students that live with someone who has signs of illness need to stay home regardless of vaccination status.	1/15/2022 12:05 PM
88	Masks and vaccines should NOT be required. Optional, but not required.	1/15/2022 11:57 AM
89	I support hand washing and just good hygiene. I do not support the use of masks and distancing. Covid is still happening regardless. Kids just need to be kept home if sick.	1/15/2022 11:53 AM
90	As a parent as well as an employee of the district I have seen countless vaccinated fellow co workers as well as students contracted and spread covid. Therefore, I believe the safety protocols for covid should be the same for everyone regardless of vaccination status. It is overly obvious that being vaccinated is not preventing people from catching it or spreading it. Therefore we should all be treated equally when it comes to exposure, sickness etc. The choice to be vaccinated for students or staff should be left as a personal choice. I have appreciated as an employee that I was allowed an exemption, but still think it's unfair I'm required to test weekly when many of my vaccinated Co workers do not and they are also contracting and spreading covid. In my eyes, we either all do it, or make it optional for everyone. I support that safety protocols need to be in place, but I do feel that with the information we currently have about the vaccine it's only fair to treat everyone the same with protocol and allow the choice to get vaccinated be up to the individual. I've invested a lot into our community and school and am extremely dedicated to the success of our public school system. This is where I want my kids to be and this is where I want to continue working as an educator. If they mandate vaccines for staff or children (without exemption) I will be faced with a very difficult decision to pull my children and leave my career. This is not what I want to do. Please continue to fight for our community to leave these choices up to their families. Thank for your conducting the survey I hope you find the results helpful.	1/15/2022 11:45 AM
91	I appreciate the dedication and care of our teachers, school staff and administrators. I believe they are being fair, appropriately careful with our community's health, and doing their absolute best to continue to offer positive learning environment. Thank you!	1/15/2022 11:44 AM
92	I do not support any mandates to force masking, vaccines or testing. They should be optional but not required. Discrimination and poor treatment of anyone who does not want to do those things should not be allowed.	1/15/2022 11:43 AM
93	I know that students are testing positive with covid, but I am not receiving any notices from the school about it. Are they contact tracing at school when someone is a close contact?	1/15/2022 11:42 AM

## COVID-19 Safety Protocols and Preventative Measures

94	All the mandates and protocols are very contradictory. We need to live with this and have no more masks and testing!! Kids and adults should NOT be forced to get a vaccination, as we all know that it doesn't work. Vaccinated are still getting Sick. We NEED to go back to normal.	1/15/2022 11:19 AM
95	I believe it is emotionally difficult for the kids to wear masks and would prefer it be optional. Medical decisions are personal. We are VERY happy to have them back in school and value their best education all around being in school. We are eager for the day they don't need to wear masks. And praying it is never mandated they be vaccinated for Covid.	1/15/2022 11:07 AM
96	I will not have my kids get the vaccine, I don't think they need it and they both have had Covid so they have natural antibodies. If vaccines are mandated we will take our kids out of school.	1/15/2022 11:01 AM
97	I appreciate the following: masks for all, distancing whenever possible, encouragement of vaccines for students, mandating vaccines for staff, and the return to school. I want to thank Dr. Carey and our school board for doing what is right for our students and the EHS staff in spite of a small, but vocal opposition. Keep up the good work!	1/15/2022 11:00 AM
98	Please let parents make medical choices for their children. Consider natural immunity if already been positive. Please do not return to remote learning, my children need this social interaction for their well being.	1/15/2022 10:45 AM
99	It is evident omicron is spreading in the schools, despite what the dashboard indicates. Students that are not wearing masks are spreading it. Ask the teachers.	1/15/2022 10:44 AM
100	Thank you for keeping our families safe. We support all of you at ESD!!	1/15/2022 10:26 AM
101	Similar to what was stated preceding the survey " no matter the out come of the survey, no changes will be made to circumvent state guidelines ", very sad. So share to other organizations if you choose. Seems the outcome is preordained.	1/15/2022 10:21 AM
102	I think more testing should be available for all students and not just athletes.	1/15/2022 10:20 AM
103	I would really like to see a testing location for Enumclaw students, teachers and families. Testing is very hard to find. I know other schools in the area have done this. I would also prefer the kids go back two days a week last we did last year. It helped my child with her anxiety about getting Covid. I was just the right about of in-person teaching and we loved the remote option. We currently are VERY concerned about getting covid.	1/15/2022 10:18 AM
104	Masks are not an effective preventative measure against covid, especially omicron and have proven detrimental to our children's development, social interaction, and ability to have meaningful interaction with others. They are not sanitary and have encouraged further illness in our children and should not be worn. Especially during Physical activity when moisture creates a reservoir for bacteria that perpetuates further sickness. Those who want to get the vaccine can, and those who don't have made their decision. It is time to do what is best for all and make masks AND vaccines a personal health choice.	1/15/2022 10:14 AM
105	Thank you to all staff members for keeping our kids in school and having our kids learn in person.	1/15/2022 10:00 AM
106	I strongly feel that students should be attending school in person, no mask requirement nor vaccine requirement. Should a student or staff member feel safer by wearing a mask or being vaccinated, that should be at the sole discretion of the individual. The mental health of our children has been put on hold for too long and being in person with no masks on so students can interact with classmates and staff normally with no barriers is of utmost importance for their social and mental well being. Bring back LUNCH TABLES for our children, there is no reason my child should be eating out of her lap; if they can eat in a restaurant at a table why can't they in schools?	1/15/2022 9:50 AM
107	Required vaccinations are desired for all students.	1/15/2022 9:35 AM
108	The vaccine does not stop the spread of Covid 19, no one should be forced to have it.	1/15/2022 9:21 AM
109	We have no studies showing damage being done regarding reduced oxygen levels. OSHA prohibits this reduction in working environment, yet we mandate hurting our schools population making learning a hazard per OSHA's standards!	1/15/2022 9:14 AM
110	The mask rule is a joke because no one enforces it. I have watched staff and students walk around with no mask on. Why have the rule if no one is following it.	1/15/2022 9:01 AM
111	3 times a week seems excessive. 1 test per week and prior to a meet seems more	1/15/2022 9:00 AM

## COVID-19 Safety Protocols and Preventative Measures

appropriate. I feel the mandates on vaccines are creating a wedge in all communities and don't slow the spread of the virus. Masting and testing are key.

112	I do not agree with the mandates requiring vaccination- it should be a personal choice. I am fine with masks and social distancing because I believe it has helped keep the schools open. I am a parent of 3 in the ESD. They all enjoy sports and extra curriculars as well and this has been so beneficial to their social and emotional well being. I am glad the schools have been able to be in person so far this school year.	1/15/2022 8:41 AM
113	I'm all for everyone testing every day, but that just isn't feasible...	1/15/2022 8:30 AM
114	I have been following the DOH Meeting about adding and mandating the Covid-19 Vaccine for entry into school. I can tell you right now, if or I should say WHEN this passes, I along with many other parents will pull my three children from ESD. It is unethical to demand a vaccine that has not been properly tested. This vaccine has not been vetted by a 5-7 year DOUBLE BLIND testing process. Furthermore, we are aware of the serious side effects of the current vaccine, blood clots, myocarditis, thrombotic strokes, and deaths. It is also apparent that this vaccine DOES NOT work, many people I know that have both shots and the booster are getting and SPREADING Covid to others. I have been very disappointed with MASKING as well. WE have known that mask DO NOT WORK , with the exception of N95 Masks. We have brought this to the boards and districts attention, yet were told we were following the science. Well, clearly you weren't until now, finally the CDC admits that cloth masks don't work. The CDC has lost all credibility. Also, if you know anything about education, it is important for young kids , Preschool and Grades K-2 to SEE their teacher's faces. This is especially important when teaching phonics. Why is not mandated that K-2 Teachers wear a proper face shield? Also, my middle child is struggling emotionally because of the masks. Having a speech issue and wearing a masks makes it very hard for his peers to understand him. We have DAILY melt downs at school. He should have a CHOICE to wear a mask and NOT mandated, especially when he has an IEP. It appears that COVID rules and all other logic has been thrown out the door when it comes to our kids. WE need to live with this VIRUS! End the masks and end the vaccine mandates. Also, take down the requirement for Teachers, Staff, and Volunteers to require the shot. I know many parents that want to volunteer or even Sub but they can't because of the vaccine mandate. If this madness does not end, the district will lose major funding by a mass exodus from public school. In fact, if school shuts down for even 2 weeks, our family will homeschool. I have been an educator for the past 19 years, I know I can do it and know that I can help other families navigate homeschooling. Please stop this madness!	1/15/2022 8:01 AM
115	We need more testing in order to be responsible and reduce exposure risk! Not just for kids playing sports, for all staff and students to feel safe and stay in school. My kids are thriving being back, thank you for working hard to make that possible!	1/15/2022 7:46 AM
116	Covid is not a medical emergency for most children. The vaccinated are still spreading and contracting covid. Requiring a vaccine that doesn't stop the spread is not medically necessary and should not be required. If the goal is to keep people out of hospitals, then those at high risk can certainly get the vaccine but the healthy population is being punished. The old fever policy of 24hrs medicine free can return is sufficient and would reduce the quarantine issues.	1/15/2022 7:01 AM
117	As a parent I support nearly everything to keep my kids safe. Recent data shows that TWICE AS many kids died from vaccine as have died from covid . Injecting a viral gene into a child's body and forcing it to make spike proteins has caused and may continue to cause damage to a child's as well as adult's -Brain and nervous system -Heart and blood vessels -Their reproductive system -and this vaccine can trigger fundamental changes to their immune system Once these damages occur, they can't be undone. Vaccinate people are getting sick and can spread virus as well . We just need to use common sense like with cold and flu . Stay home when you sick . Thank you for hearing my concern	1/15/2022 6:28 AM
118	A lot of student will be pulled from public schools if they try to force the vaccine into children.	1/15/2022 5:48 AM
119	It's been two years. This is never going away and have become the new flu. We need to move forward and learn how to live with this without dividing us further.	1/15/2022 12:28 AM
120	No one should be mandated for a vaccine or any kind but especially one that has such low efficacy.	1/15/2022 12:05 AM
121	Our family greatly appreciates and respects the safety protocols in place. We support masking and vaccinations 100%. Thank you for protecting our students and our community.	1/14/2022 11:59 PM

## COVID-19 Safety Protocols and Preventative Measures

122	Research shows that the said cCOVID-19 vaccine is not adequate at preventing the spread of COVID-19. The vaccine was created for the original COVID-19 and not the Variant that we are seeing currently. No one should be forced to take this COVID-19 vaccine including Children, staff, coaches to participate in a public education setting. In addition there is adequate research to show that masks are not stopping the spread of COVID-19.	1/14/2022 11:33 PM
123	With so many unknowns, we feel the school district has done a good job navigating the situation.	1/14/2022 11:08 PM
124	Unmask the kids!	1/14/2022 11:08 PM
125	Testing three times a week is absurd. The world is operating. You can go to concerts with thousands sports events with thousands etc. i get if that's what it takes but for example they are testing now three times a week to allow kids to be able to stay and participate. Two basketball games got cancelled tonight due to a Covid case. One. The rest of the team tested negative and got to stay at school. The rules make absolutely no sense at all across the board. I am glad that you started making vaccinated start testing to because clearly anyone can get it. These kids need normality. It's detrimental to so so many. I talk to numerous people on the daily being a hairdresser and to hear the struggles that all kids of endured and continue to is beyond Covid. They need or live life and experience what it should be. All of this is affecting so many in so many ways.	1/14/2022 11:03 PM
126	I feel that there should be no requirements for anybody to get vaccines. If there is than exemptions should 100 percent be accepted by the school district without question	1/14/2022 10:58 PM
127	Please do not mandate a COVID vaccine for children. I would sooner pull my children out of school than have them subjected to an experimental vaccine still in Phase 3 trials	1/14/2022 10:34 PM
128	Covid-19 protocols and vaccines have been politicized. They are not based on the science they claim to follow. Masks do not prevent the spread and social distancing rules have been arbitrary. Any debate or second opinions have been censored. We have to start asking why? What are they hiding? Natural immunity has been proven to be much more effective than vaccines, but is not being acknowledged. There are numerous therapeutics such as Ivermectin that are very effective at treating Covid and successfully in other countries since early in 2020 that have been discredited. And the risk of vaccine injury is exponentially higher than with previous vaccines. The Omicron variant, which is now the vast majority of cases, is essentially a cold at this point, showing the virus has mutated to the point where it is losing its potency. The science simply does not support the vaccine. So why do they keep pushing it? The damage from social isolation and economic loss is staggering. Drug overdose is now the leading cause of death in prime-age adults. We have kids who are literally being brain-damaged because they don't see normal facial expressions so they are not developing normally. Not to mention the impact of kids wearing germ-infested masks on their faces 6 hours/day or more, and reduced oxygen to their brains, especially while exercising. The chemicals on the tests are not healthy to insert into your nose on a continual basis. When does this science have merit and the preponderance of evidence that the damaging impact of the restrictions far outweighs any possible benefit? The shutdowns have not been effective. In fact, more open states have experienced a much faster recovery. We ought to be taking notice and following their examples. And healthy individuals are not a risk. Our society is experiencing mass psychosis, developed by propaganda. It's time to wake up. Let's actually follow the science, allow treatments that work and start behaving like an intelligent, rational, free society. We are adults who can make decisions for our own health and that of our families. They are playing politics with people's lives and have killed thousands and thousands with their policies designed for power, control, and financial gain. The insanity needs to stop. The emperor is naked and the truth must come out.	1/14/2022 10:16 PM
129	Encouraging vaccination is great, but should not be mandatory. If not vaccinated, teachers should test once a week. We prefer to keep our children in-person as 2020 put children behind both socially and emotionally.	1/14/2022 9:56 PM
130	The wrong questions are being asked. The students emotional well being related to covid protocols are affecting students more severely than the covid virus is.	1/14/2022 9:44 PM
131	The pandemic is a hijacking of society. STOP THE ABUSE OF POWER	1/14/2022 9:41 PM
132	Covid Protocols would work better if they were being followed by students, and if students are not following them (wearing a mask correctly, always) they were removed from school.	1/14/2022 9:36 PM
133	It would be nice if any student could get tested throughout the week (by choice), not just the	1/14/2022 9:18 PM

## COVID-19 Safety Protocols and Preventative Measures

	athletes.	
134	* my "disagree" to the last question was in regards to frequency, not to mandatory testing. I would say once a week, not three times weekly, to the above question... there are limited testing resources available, and once weekly seems diligent.	1/14/2022 9:12 PM
135	I feel that exemptions are too freely given in the district. While I understand following the CDC guidelines, the guidelines are laughable and inconsistent. That puts the district in a no-win situation. I think you are doing the best you can with the awful hand dealt. It's difficult not having an updated dashboard, but I understand due to staff being stretched thin. Keep up what you are doing, more people support you than it seems.	1/14/2022 9:10 PM
136	No masks and No mandates!!!	1/14/2022 9:00 PM
137	Vaccinated students should have to follow same guidelines as non vaccinated students	1/14/2022 8:58 PM
138	Please keep them in school. It's going to be a rough month but do not take the kids out of school. Taking them out of school again will do much damage to their mental health. Please don't take them out of school. My daughter will not be able to handle it. Please.	1/14/2022 8:57 PM
139	Please do not go back to remote learning. This will be detrimental to their well being, learning, and overall education	1/14/2022 8:55 PM
140	The quarantine rules for unvaccinated students makes no sense. Why can my student who is unvaccinated test negative and be allowed to be in a classroom and in a school bus but not participate in an outdoor no contact sport? To my student, who cannot be vaccinated for medical reasons, this feels personal and punitive. My child had a full blown panic attack in the school bathroom and couldn't ask for help because the school staff caused it by taking away her positive outlet. The negative impact on our children's mental health being caused from masks and segregation by vaccination status can no longer be ignored!	1/14/2022 8:49 PM
141	I fully believe the schools should remain open regardless of the cases of Covid. Our students overall health is dependent on it. It's time to remain open as MANY other states have done.	1/14/2022 8:45 PM
142	I believe that Students who have been tested for Covid and awaiting results should NOT be allowed to attend school until the results of their test are known. It doesn't make sense for a student to be tested on, for example, a Monday. Go to school on Tuesday and then be called out of class to go home because their test came back positive. That child was breathing all over classmates and teacher all that morning before they left! In the process of testing? then don't come to school until you get results.	1/14/2022 8:43 PM
143	Q6, Not applicable to our family not able to comment we have not tested positive during school to experience school guidance	1/14/2022 8:36 PM
144	Please require vaccines for all staff and students so that they can stop wearing masks. Or if you won't require vaccines then require each staff member and student to test daily.	1/14/2022 8:35 PM
145	Please enforce staff and coach vaccine mandate and require all students 5 and up to be vaccinated.	1/14/2022 8:30 PM
146	What is the consequence for students or staff that routinely disregard to wear a mask incorrectly, because it is happening way too often?	1/14/2022 8:28 PM
147	Please enforce vaccine mandate for all staff and students from 5 years and up.	1/14/2022 8:27 PM
148	Keep the kids in school. Keep athletics going.	1/14/2022 8:27 PM
149	Our whole family is vaccinated and boosted. However, we are NOT in favor of mandates of any kind. While masks are somewhat effective at stopping the spread of COVID and similar viruses (cold and flu) we do not support any mandates requiring them. If students and staff feel more comfortable wearing masks then they should be allowed to, but there should be no requirement and especially no shame in choosing not to wear them.	1/14/2022 8:26 PM
150	The state and nation need to bring us back to normal. We are ruining the whole world over an illness that is so similar to cold and flu. It's a waste of time and resources to continue on like this. Vaccine and masks should not be required.	1/14/2022 8:20 PM
151	I feel that if a student is absent due to a covid related issue(waiting for test results or having to be quarantined), they should have the same amount of time to turn in late work. The classes that are graded based on attendance should be exempt from counting against the student. I	1/14/2022 8:19 PM

## COVID-19 Safety Protocols and Preventative Measures

feel that the current situation these kids are in is promoting them to keep coming to school even if sick. From things I've heard, many teachers that don't believe in Covid promote not wearing a mask in class or give students a hard time if that student decides to wear a mask. Thank you.

152	My Daughter has tested positive for Covid and she was infected at school and we received no heads up on her Spanish Class Teacher having Covid and along with students from the class. We feel this is where our daughter was infected. Also we have worked hard to keep our family safe and we all have now been infected with Covid from Enumclaw High School. We are not happy with how the District has been handling Covid and are considering keeping our daughter at home for on-line schooling, Needs to be much better communication and updated on Covid cases and people who have contacted the Virus	1/14/2022 7:47 PM
153	If my children are required to get a covid vaccination we will be pulling them out of public schools.	1/14/2022 7:27 PM
154	Remote learning was the worst. Did more harm than good. Enumclaw sd remote learning did not teach my fifth grader anything. White river school district did a fantastic job w remote learning. Although we are in enumclaw as, I waived my 4th grader into white river. Remote learning consisted of 4 hours of zoom meetings w teacher. Enumclaw was 30 minutes twice week.	1/14/2022 7:27 PM
155	I feel that some of these questions can be interpreted differently. Like question #4. Do I think it's adequate, I think mandating is wrong, and it's all overboard. I also think contact tracing is a joke. I have had to pick up one of my sons on a Friday for a close contact that was on the previous Tuesday. The protocols are all overboard and flawed. I think the school should go back to teaching common core and leave politics out of the schools. I believe that the parents of the student should decide weather they wear a mask or get a Covid shot.	1/14/2022 7:26 PM
156	Take The face mask off our children and let them go back to school 100 percent NORMAL!!!!	1/14/2022 7:25 PM
157	Protocols are in placed but not enforced. Testing weekly doesn't make sense when the person in charge isn't making sure students are swabbing correctly. Just went to a basketball and wrestling match and many spectators walked in with no mask and no one ever asked them to put one on.	1/14/2022 7:25 PM
158	The vaccine is a personal choice for students and staff. We all know it's available. Masks don't work. Let them be optional. Kids need to see smiles again... I appreciate you conducting the survey!	1/14/2022 7:24 PM
159	Vaccinations can be life saving. We need to get past mandating and start teaching correct principles and trust that citizens are smart enough to make wise decisions.	1/14/2022 7:23 PM
160	I think the district is doing a great job putting and keeping safety measures in place. I think our community as a whole is struggling to adhere to them, and the constant complaining is not helping anyone. I'm tired of the negativity. I'm tired of people being selfish and refusing to make even the smallest effort to keep others safe not knowing their vulnerability or who they're trying to protect. I'm tired of the name calling for those that agree with safety measures. If we can all agree to be grown-ups and work together, we can get past this and back to normal, but divided we will be facing these counter measures for much longer. I do appreciate all of the work district leadership is doing and the tough calls they are having to make, and I'm very sorry for the flak they are getting in the process. Just know that this work is recognized and appreciated by so many of us, even if our voices are being drowned out.	1/14/2022 7:09 PM
161	Thank you for seeking feedback. I know these are not easy times for anyone.	1/14/2022 7:08 PM
162	Testing athletes is a waste of tests. They are in high demand and people in need should be using those tests. Just make parents sign a waiver for indoor sports acknowledging the risk. I also think the district should get rid of the dashboard, hasn't been accurate since it's inception. No data is better than in accurate data.	1/14/2022 7:07 PM
163	Masks are a joke. If they work, the kids would not need to quarantine and no one would be sick. We all know even the vaccinated get this and spread it just as much as the unvaxxed. Mandatory vaccines is bot realistic. You can't get parents to be current on other vaccines. What makes you think mandating this would work? Also, teachers are not allowing kids to drink water in class.bstoo with the fear and telling kids to get vaccinated.	1/14/2022 7:02 PM
164	On the mask for the teacher. It should be there choice.	1/14/2022 7:01 PM

## COVID-19 Safety Protocols and Preventative Measures

165	Stop the mandates, stop the mask wearing	1/14/2022 6:56 PM
166	Clearly the vaccine does not protect people. Two years of wearing mask and social distancing doesn't protect you. And all of these protocols have had negative impacts on our childrens learning and mental health. They have created division and segregation in our schools, communities and families. I think our kids need to get back to participating in life and learning. I think our kids need to be able to socialize with their peers.	1/14/2022 6:55 PM
167	The COVID tyranny needs to stop and everyone needs to respect what people choose for themselves and their family.	1/14/2022 6:49 PM
168	Masks and COVID-19 vaccines should be personal choice not required.	1/14/2022 6:47 PM
169	Wish my son could go to school without a mask	1/14/2022 6:36 PM
170	This is disgusting...unmask our kids now! If anyone even thinks they are going to force vaccinate our kids you won't have a school district left.....history repeats itself, we are not nazzi Germany!	1/14/2022 6:32 PM
171	Students education is being drastically affected in a negative way by these mandates. Teachers passion to educate our children is being drastically affected by these policies in place. Our children have taken the biggest sacrifice by these mandates. Bring the education back into our school and get the politics out. When our government accepts this as endemic, and like that the mandates are gone, there is going to be a lot of damage control to correct the damage that has been done for both students and staff.	1/14/2022 6:32 PM
172	Unmask our kids and resume normal school day! Enough is enough.	1/14/2022 6:29 PM
173	The more we keep testing the more then numbers go up, it's time to unmask our children and let them live normal lives. They need to see facial expressions they need to be able to see a teachers face . This has gotten so far out of hand it's insane. If parents still want their kids to wear a mask then by all means have them wear it. My son has had more health issues with wearing a mask this last year and a half then he has had his first 12 years of life. Countless visits to the doctor trying to figure out why he can't breathe and why he has all of a sudden developed asthma. He has played sports since he was in 2nd grade with no issue but this last year he usually ends up sitting out most games because he can't breathe. I could go on and on but it's probably falling on deaf ears anyways.	1/14/2022 6:21 PM
174	I don't think there should be religious exemptions for the Covid vaccine but immunocompromised/medical reasons I support.	1/14/2022 6:18 PM
175	Its extremely difficult for my high school senior to stay on top of work when isolating. Teachers and the work load plus communication is subpar. An example is woodshop, the assignments are in person and the stress and lack of self esteem that comes from teachers not being mire understanding of the student's inability to do the work from home in some cases is mind blowing and unfortunate. I wish there was a way the students didn't feel punished when they isolate out of precaution. Playing catch up is hard and not every teacher is flexible or understanding. Its extremely frustrating.	1/14/2022 6:14 PM
176	I will pull my student from the Enumclaw school district if the vaccine is mandated.	1/14/2022 6:13 PM
177	Appreciate the continued efforts to navigate challenging times. Thankful for ESD staff.	1/14/2022 6:13 PM
178	Get the muzzles off our kids, quit the insane testing and stop talking about the experimental gene therapy that is injuring and killing people!	1/14/2022 6:11 PM
179	I am totally against forced covid shots. This is unethical. Children are much more likely to be harmed from that than the virus. There have been many serious side effects (myocarditis, blood clots, thrombotic strokes, & deaths. There are unknown long term effects such as possible sterilization. Masking and shots should be a choice. I will never allow my children to get these shots. I will find them another form of education.	1/14/2022 6:10 PM
180	You are doing a great job keeping us safe. Keep up the good work!	1/14/2022 6:09 PM
181	The kids need to be in school. It is ridiculous kids can see what got football stars look like and have never seen their teachers face. My daughters mask comes home filthy daily. I feel more safe for her not to wear a mask then her touching the mask all the time and having it on her face. Other states like Montana the kids have normal lifestyle. If someone wants their child to wear a mask allow then their choice. The vaccine should be a personal choice.	1/14/2022 6:07 PM

## COVID-19 Safety Protocols and Preventative Measures

182	If athletic practices and events demand close contact that requires three tests a week for each participant during a pandemic wherein we are seeing sick people have limited access to testing supplies, it seems that perhaps a pause on those types of events might be warranted for the good of all. Indeed, there is worth and merit in these activities, but there is a toll, as well. I neither agree nor disagree with mandating vaccines for eligible children, as that is a much more complex decision for a weary world. And that is coming from a parent of children who are vaccinated. My children feel unsafe in settings on campus, and especially on buses, where staff do not enforce masking. I understand most staff attempt heartily while others less so; it's uneven like many aspects of many systems in the public sector. My child tested positive this week after being stuck on a bus seat beside an unmasked teen. It's pretty discouraging to kids and staff doing the best they can to keep themselves and others safe. Your positions in this battle are unenviable, at best, and we appreciate all you have done to keep our kids as safe as you are able. Bless you!	1/14/2022 6:03 PM
183	My main concern is requiring the Covid shot for my children to attend school. I do not feel comfortable with the Covid shot at this point in time, we do not have studies showing the long term effects. I am pro vaccine, my children have all necessary vaccines that actually prevent disease. The Covid shot does not prevent my child from getting Covid and does not prevent them from spreading Covid. Thank you for listening.	1/14/2022 6:03 PM
184	Drop the masks, and drop the requirement forcing staff students and anyone else to "have" to get the vaccine, if it's not dropped a lot of kids will be homeschooled next year! A mandate is not a law. And everyone should have there OWN say in there body and there childrens. The schools are going to loose good people if they force a vaccine it's a CHOICE not a have to. Same with masks kids and adults should be able to choose if they can wear a mask or not, otherwise split up the school so the people who don't agree can have there side and the people who wanna wear it can have there side!!	1/14/2022 6:01 PM
185	We miss the hybrid option. It worked so well for our family and we felt safe.	1/14/2022 5:57 PM
186	You are doing a great job for our kids! So thankful for everything the staff is doing! You are the best! Thank you♥	1/14/2022 5:56 PM
187	It would be really helpful if the school would have rapid tests available for kids to test when symptomatic. Getting a PCR is a nightmare. And waiting for results take the kids out of school unnecessarily when they are negative. General comment: Thank you to the teachers/staff!	1/14/2022 5:56 PM
188	Thank you for keeping our kids safe and in-person! We appreciate all that ESD has done!	1/14/2022 5:55 PM
189	Testing for school sports is unnecessary and baseless. The same kids are together at school and in PE. Masks are hindering quality and focused education. Masks are encouraging "mask police" among staff and students. Masks are continuing the fear of this flu and keeping anxiety high, distracting from learning. Masks purpose are for the safety only of the wearer, and that is nil to none. Masks should be a personal and parental choice only. The mask policy is the only policy being enforced, why is this the only policy that matters?	1/14/2022 5:54 PM
190	If masking, vaccination and cleaning over kill with harmful chemicals really worked as it's claimed, why are the over load cleaners/masked/vaccination getters still getting & spreading covid? My kid wears a mask and stays home cause the fear of being or getting someone sick. She didn't go anywhere all xmas break and yet days 2 back from break she was out sick for 5 days. She said she wore it all day there too. I definitely worry about grades and academic success though and feel like the WA school Superintendent needs to be advocating for smaller classes more 1:1 help for those struggling in topics and more teachers & AIDs to get kids spaced out more and back to the proper lectures and teaching that these kids want.	1/14/2022 5:52 PM
191	Masks are not healthy for children to wear for extended periods.	1/14/2022 5:51 PM
192	A families medical decisions should be made by the parents/guardian ONLY. What works for some does not work for everyone. Any kind of mandate has no place in a free country. If vaccine mandates for kids in school are implemented, I will be pulling my children from the school system.	1/14/2022 5:51 PM
193	During surges like this, having a temporary remote option would help keep kids from falling behind and protect from spread. As it is now, they miss a lot of school without any suooort in their education while at home. Finding and getting a test and delays in getting results add to more time out of school. So kids either go back and infect others or they fall behind at home. Add a remote layer for kids at home. Also, Protect our kids from Enumclaw's crazy political	1/14/2022 5:49 PM

## COVID-19 Safety Protocols and Preventative Measures

driven false information drive about Covid/not wearing masks and not getting vaccines. Follow the scientific proof not political cult pressure.

194	I DO NOT believe staff or students should be required to vaccinate, however if the state requires it, everyone who wants it should be granted an exemption. Exempted employees should not have to test weekly unless you start making vaccinated staff do the same.	1/14/2022 5:47 PM
195	Mandate vaccines for all students so we can end masks and keep our students safe!	1/14/2022 5:46 PM
196	Thank you for doing this.	1/14/2022 5:43 PM
197	#6 is difficult to answer as I have not had a child asked to isolate or quarantine. The drop-off/pick-up procedure at Westwood is so disappointing. I feel no connection to the community and it sometimes makes me wonder what the day is like for the kids. There is no reason kids cannot walk outside to their parents in the fashion that it was done prior to this change. The emotional connections made during that last minute of saying goodbye to friends, teachers, and other adults is missing--and it does not reflect well on a school that used to appear to fully embrace all that were part of the community. First and last impressions go a long ways--and the impression given right now is not positive. I don't like "being a number" and that is actually what my child has become to those running drop off and pick up line.	1/14/2022 5:41 PM
198	All of this Covid is nonsense and you are teaching our children to be sheep.	1/14/2022 5:34 PM
199	Thank you for working so hard to keep our kids safe.	1/14/2022 5:32 PM
200	Leave the choice(s) up to the parent(s) of the children. The district shouldn't be able to require masks, or vaccines. Leave those things to the individual. If a person feels safe getting vaccinated and or wearing a mask, let them.	1/14/2022 5:31 PM
201	Speech issues are made worse with masking	1/14/2022 5:27 PM
202	It's time to take the masks off our kids. There is no scientific bases for cloth masks. They do nothing. If you believe they do, can you help me install a chain-link fence to help me with keeping mosquitoes out of my yard this summer? Masks are foolishness and political theatre.	1/14/2022 5:24 PM
203	I marked "Strongly Disagree" to the last 3 questions as I don't think staff or students should be required to be vaccinated exempted or test at all!!	1/14/2022 5:23 PM
204	My kids grades tanked over remote learning. They are doing so much better in person. Take the masks off the kids and if a child wants to wear a mask then so be it. They should not be mandatory. If a mandate comes that they have to get the shot we will be removing them from the public education system. Thank you.	1/14/2022 5:21 PM
205	As a family who had covid before the vaccine was available and came through with mild to no symptoms, we don't fear covid. I think everyone's individual risk management for covid should be considered and a one size fits all approach is extremely damaging. As well as it being way to difficult to manage for long term practice. Especially when you consider how quickly the vaccines wane in efficacy over just a short time. As a parent I am not on board for giving my kids a vaccine every couple of months to protect them from a virus their bodies fought with out a hitch. The argument that we just don't know the long term effect covid will have is basically the same argument for vaccines. They are so new, we don't know what the long term repercussions the 1, 2 ,3 now possibly 4 vaccines will have on the human body. The unknowns are vast and the notion to mandate them for all is just not a good argument. I am an educator and I come from a long list of educators, two of which are principals in Washington State high schools. So you can say I am in the loop of how certain districts are responding to covid in school. The distinction from kids with the vaccine and those who have not gotten the vaccine is not changing the spread, not even a little bit. Testing repeatedly is also not realistic. If a child has a cold/ symptoms test to stay. I am okay with this if it gives educators peace of mind. I am thankful that the Enumclaw School District is giving this survey. The topic of requiring vaccines for the next school year is an issue I feel strongly about. My husband and other members of our family are prepared to pull our kids from the public school system if this becomes a mandate to attend school. It's not something we want to do but it's something we will feel forced to do.	1/14/2022 5:19 PM
206	I do not agree with the no quarantine rule for vax'd people. I received my vax and still got Covid. The shot does not prevent you from getting Covid nor does it protect you from passing it along. It has the potential for reducing your symptoms. Same rules should apply for those who are vax'd and non vax'd regarding close contact. I get that Covid contagious, but I believe	1/14/2022 5:19 PM

## COVID-19 Safety Protocols and Preventative Measures

masks should be free choice. Also, kids should be able to eat at tables during lunch. The friends they sit with are already friends they are hanging out with without their masks. Kids play sports without masks, with friends, they attend school with the same friends. Masking healthy people is harmful to their health. Look at the studies of increased harm from constant masking. Our kids are our number one priority yet they have experienced the worst treatment since the pandemic started. It all makes my mother's heart break. We ARE Enumclaw. We lead by example. We took the first step in hybrid learning. Let's show others that we will be ok by setting the example of optional masking our kids, reducing testing protocols and getting back to a normal school year.

207	It's ridiculous to see otherwise-rational people in this community argue and protest against vaccines, when vaccine mandates have been in effect in these schools for generations. No one got their panties in a bunch over this until it became part of a dumb political culture war. Fed on a steady diet of manufactured outrage and pop-pseudo-science emotional junk-food, people are blanketing social media with ignorance and misinformation. How can our institutions of education grind to a halt because of the uneducated opinions of the very dumbest among us? The irony alone is staggering. No one freaked out that their kids needed vaccinations to attend schools back on the 60s, or the 70s, or the 80s, or the 90s, or the 00s, or the 10s. But now we are beholden to whatever looney rationalizations are floating around our particular social- media echo chambers. It is unjustified. It is indefensible. It is short-sighted. And it is a shameful legacy that enumclaw is better off without.	1/14/2022 5:19 PM
208	We will be pulling our children out of the district and will most likely move out of state if vaccines are mandated for children. Masks should be optional, as they really serve no purpose the way they are used by younger children, it is completely ineffective and causing more harm than good.	1/14/2022 5:19 PM
209	Masks and vaccinations need to be a personal choice. No more mandates. The kids need normalcy this has gone on far too long.	1/14/2022 5:17 PM
210	Masks and testing have failed to contain Covid 19 on any meaningful level because they don't work in practice. They only stigmatize and divide us. Additionally, the currently available vaccines do not stop contraction or spread of the virus, and there have been no studies that prove they provide any protection at all, only opinion. They bring needless risk to our youth on a level much higher than the disease itself. Mandating vaccines will guarantee that more kids are pulled from school and either homeschooled or sent to private school. Covid 19 should be considered endemic and we should treat it the same as the flu. There are treatments available even though 99.9% of people that catch Covid 19 would never require them. Vaccines are a personal choice that should only be made with informed consent and consultation with ones own medical doctor. Vaccines are not a one size fits all solution, clearly as they have failed to stop the spread of the virus. In fact, new studies show that after 2 months, vaccines increase the likelihood of contracting Covid 19. Our children are not wards of the state to run experiments on. Our kids need normalcy and nurturing, not to be treated like they are walking disease spreaders. If teachers want to be vaccinated, no problem, that's their choice. If they don't want the vaccine, great too. As free people, we accept that there is risk in life. We reject the notion that we need a school district, or employer, or State to make decisions for us, especially when it comes to the things I put into my own body or that of my kids. Put another way, if we can't get back to normal and learn to live with the risk of everyday life, I think we'll find new leadership that will embrace freedom, and restore normalcy. If that can't be done, we'll find an exodus from the schools, districts and states that impose heavy handed mandates and a migration to schools and states that recognize individual rights and freedoms. It's time to reject mandates of all kinds, get the politics of Covid out of our schools, and start treating kids like humans again. As for teachers that are just too fearful of Covid. Tough. Have a 3rd, 4th or 5th vaccine, wear a mask and goggles if it makes you feel better and hide behind an ineffective plexiglass partition. But, they will not be allowed to treat these kids any different. If the employees of our district can't find a way to get to work and stay out of my kids medical records, perhaps they shouldn't be working with kids.	1/14/2022 5:16 PM
211	We are not anti vaxxers...in fact we support the work to minimize the spread of covid. At the same time we do not support forced vaccination of children. Adults with exposure to our kids should be vaxxed in an effort to protect themselves and our kids. Science is showing that masks aren't effective. Wearing an N95 all day isn't an option and fitting each kid and ensure proper care and use isn't a teacher's job. Thanks for the open communication.	1/14/2022 5:14 PM
212	I think that vaccination and mask mandates are the most important pieces to keeping school safe for students. As a parent of two children (and an educator myself) - one child who is	1/14/2022 5:11 PM

## COVID-19 Safety Protocols and Preventative Measures

vaccinated and one who cannot be yet due to age, it makes me EXTREMELY uncomfortable to know there are unvaccinated individuals and worse, people that do not follow masking policies. Additionally, there needs to be stricter supervision of whether students are following the rules, and stricter reprimanding when they don't. The rules are simple - wear a mask (PROPERLY fitting, PROPERLY designed, and COVERING nose and mouth) or don't. If you don't follow the rules in place, you should not be allowed to be at school. Plain and simple. There is no grey area. Additionally the CDC is now encouraging the FACTUAL information that N95 and KN95 masks are FAR superior to cloth. I would advise the school to follow suit and suggest or require that students follow these guidelines as well. People often claim that their "freedoms" are being infringed upon, but if you cannot follow the rules that are in place, you have the FREEDOM to attend a different school or online learning. The science, however, is factual. In my personal opinion it would also be wise to REQUIRE vaccination (or exemption where LEGALLY it is allowed). This does not meet exemption for anyone who wants, but exemption for anyone who, again, follows the rules set in place. Hire more staffing to assist, provide medical (not cloth) masks to students, and publicly support the SCIENCE of the pandemic. Anyone who disagrees with the rules and laws can find an alternative. The "Hornet Values" and the "Panther Values" include words like SAFE, RESPECTFUL, RESPONSIBLE, KIND etc. How is it not clear to people that following small, simple, guidelines apply to these values that the district claims to profess?

213	School administrators are faced with making difficult decisions in the interest of the community with imperfect information. Stay the course. Two years into this pandemic and we understand the virus and we have tools to mitigate its impact. We are past the point where we can "beat" the virus through lockdowns. Hopefully, the latest variants will continue to be less virulent, and, with continued application of the tools we have (vaccines, masking, cohorts, and other common sense mitigations), we can keep our students in school without giving in to the pressure to pretend the pandemic is over and just "hope for the best."	1/14/2022 5:10 PM
214	The masks are effecting my child in an extremely negative way. And no one ever ever ever should be "mandated" to get the covid shot. Its wrong. Kids are not dying of covid. We need to let them get back to pre covid normal. Please support the parents in this and fight back with us! Please don't force students or staff to get the shot. People have rights regarding their own medical treatment decisions. Its not right to force that.	1/14/2022 5:09 PM
215	I love in person learning and believe the safety protocols in place are good enough to continue in person learning. My kids have their vaccination appointment next week.	1/14/2022 5:06 PM
216	Kids don't die from this let their natural immunity take over and let them live a normal life	1/14/2022 5:06 PM
217	I think esd should close for 30 days until covid is under control. Offer online learning to those who are uncomfortable w in persin at this time	1/14/2022 5:05 PM
218	Bring back a remote learning option please.	1/14/2022 5:04 PM
219	Changing the quarantine time from 10 days to 5 is not in the best interest of staff or students. The contagious period is from 2 days before symptoms or positive test for 10-12 days. The quarantine period should've stayed at 10-14 days with a negative Covid test result.	1/14/2022 5:03 PM
220	Thank you for what you are doing to keep the peace. We need it!	1/14/2022 5:00 PM
221	I think 3 times a week is to much for vaxxed students especially, i think it's a lot for the staff/coaches and i know everyone is getting Covid regardless of status but i still think it's a lot!	1/14/2022 5:00 PM
222	Vaccine mandates for teachers was overreach. I will absolutely draw the line and withdraw all 3 of my kids if vaccines are pushed on students. The children were never at risk. Masks should also be personal choice.	1/14/2022 4:58 PM
223	The school is doing a good job with safety measures.	1/14/2022 4:56 PM
224	I am disheartened that the mask mandate is not enforced in schools and all school sponsored events such as athletics, activities and board meetings. It was disappointing that there was not a vaccine clinic offered to Enumclaw students.	1/14/2022 4:56 PM
225	I appreciate the work the district has done to help keep our teachers and children safe. I feel like more measures could help like changing staff meetings to Zoom and better enforcement for masks. Too many teachers don't want to be a "bad guy" and allow kids to wear their masks improperly.	1/14/2022 4:56 PM

## COVID-19 Safety Protocols and Preventative Measures

226	Please remove the mask policy- masks do not work. Vaccines are not preventing the spread. Staff and students should not be required to get the vaccine. Enumclaw school district will lose amazing staff and students if the vaccine is mandated without exception. Please Enumclaw, stand up for what is right. Dare to be remembered for being different and doing the right thing when others were not.	1/14/2022 4:55 PM
227	Stop masking my child	1/14/2022 4:54 PM
228	The middle school seems to be real about contact tracing but the elementary schools state no contact although students are sitting next to each other. The numbers are increasing so I feel we need to be realistic about why.	1/14/2022 4:52 PM
229	I am also a teacher, and my elementary daughter does not feel safe when she is at the high school with me before school starts. Proper masking safety protocols are not being enforced because of understaffing especially in common areas or while students are finished eating where there are the largest amount of students in the morning & lunch. Please hire more support in this, everyone is spread too thin	1/14/2022 4:50 PM
230	Please let the children and their parents decide if the student should have to wear a mask to school.	1/14/2022 4:48 PM
231	Most children have had covid at this point. The vaccines and masks do not work at prevention. It should be a choice for each individual whether they wear a mask and to get vaccinated.	1/14/2022 4:46 PM
232	I'm a little confused as to what the purpose of the vaccination is if you can still catch the virus. That would defeat the purpose of the requirement of the inoculation. Then you're dealing with a flu symptoms or flu that we deal with on a regular basis. I don't quite understand.	1/14/2022 4:46 PM
233	I do not hear about cases at my children's schools. Teachers are wearing mesh masks. I'm upset about the way things are handled.	1/14/2022 4:45 PM
234	I am just really grateful for our school district and leadership. I know these are tough times but you guys have done an outstanding job!	1/14/2022 4:44 PM
235	During these uncertain times thank you for also considering everyone's mental health. For our family online learning was not a healthy option.	1/14/2022 4:43 PM
236	My child feels like there are good safety protocols in place but they are being ignored by some students..	1/14/2022 4:43 PM
237	I have continually been grateful for ESD. They have done a fantastic. Job of being on the cutting edge of science & allowing our children to safely have as normal of a school year as possible. In the Fall I became certified as an emergency substitute for my children's school. I believe the kids need to be in person as much as possible, and allowing that to happen as seamlessly as possible, with as little interruption as possible is my top priority. Having been in the classrooms I can attest that the social-emotional interactions that are so important to kids development is still happening. I'm grateful to live in a community that recognizes the importance of that development, and has found a way to do so while keeping our children physically safe from Covid-19.	1/14/2022 4:41 PM
238	Masking doesn't work. Neither does the vaccine as you can still contract and transmit the virus. Worry about keeping people who are symptomatic isolated and allow everyone else to live without interference. That means masking, forced vaccination, and forced testing.	1/14/2022 4:40 PM
239	I believe that we are doing more harm by having the restriction for covid in place then good.	1/14/2022 4:39 PM
240	No vaccine mandates for kids. If they are put in place, we will unenroll and do homeschool.	1/14/2022 4:39 PM
241	I Cannot express how strongly we would be opposed to mandatory vaccinations, especially for the students. All 3 of our kids ARE vaccinated but that was by our choice. Thank you for all you do to keep our kids safe and in person!	1/14/2022 4:39 PM
242	Thank you for your continued work on our community's behalf. Please keep, at minimum, the requirement for masking for everyone. Thank you	1/14/2022 4:38 PM
243	The requirements are only as good as the follow-through. If no consequences, for example, not wearing a mask as needed or properly, then the requirement is useless. Please enforce the rules better.	1/14/2022 4:38 PM
244	We can not stress enough how strongly we believe that kids should NOT be required to relieve	1/14/2022 4:38 PM

## COVID-19 Safety Protocols and Preventative Measures

the Covid vaccine.

245	I can't strongly agree enough with the question regarding being in school helping my student with emotional well being. Not only that, grades and interest in school is a HUGE plus to being in person. Going remote should not be on the table. If people are scared about their kids going to school in person, they can keep them home and homeschool. We did what we needed to do and got vaccinated. Those of us feeling safe and knowing the importance of in person learning shouldn't have to suffer for those not wanting to get vaccinated or are too scared to go. Thank you.	1/14/2022 4:37 PM
246	I think the district is doing a good job of providing a safe place for students to learn in spite of differing opinions in our community. My children have no problem wearing masks and don't feel inhibited by them at all. Thank you for all you do, ESD.	1/14/2022 4:37 PM
247	I work in healthcare and the increasing Covid admissions have put a lot of stress on the system, I would plead with everyone to follow the both CDC and the State guidelines so we all can go back to life as normal. Again I plead on behalf of all health workers dealing with the never ending pandemic right now, thank you. Rita	1/14/2022 4:36 PM
248	Please do not make them wear masks! Our kids need fresh air! If you require vaccines. We will be unenrolling. Please don't! Our kids are thriving! We love Enumclaw school district!	1/14/2022 4:34 PM
249	I do not disagree with people voluntarily masking. However, mandatory masking from here to eternity (as I'm aware of no 'unmasking' criteria, aside from COVID completely vanishing) seems ill-considered. I also do not disagree with testing athletes and coaches, but three times a week seems extreme. A test before the day of an event seems sufficient. Visiting testing sites three times a week seems like it might invite more infections than it prevents. Buying three self testing kits a week could be financially prohibitive for some families. I appreciate the opportunity to voice my opinions on the matter, thank you.	1/14/2022 4:34 PM
250	If our students are required to take the shot you will lose two students from Enumclaw School district either moved out of state (yes we are actively seeking to relocate out of state right now as soon as employment is firmed up it's see you later, Inslee that's WY....LoL. Or by other means home schooling. We do not need so called "safety" measures, kids, adults are having emotional break downs from not seeing faces. Please get a clue!!!! By the way this is not a vaccine do not treat it as a safety measure. I've had multiple people I know get covid especially after the booster shots. Something is not right!!! An actual vaccine shot needs to be formulated. Not seasonal type flu shots. By the the time you process all this paperwork we'll be past the OMG variant and on to the next one. Booster 4 and 5 are on the way, maybe more if we are lucky to keep taking a failed shot that's miss labelled as a vaccine. I think that's called insanity.	1/14/2022 4:33 PM
251	While masking, testing, and reporting protocols are in place, compliance and enforcement are sorely lacking. Proper mask use (over mouth AND mouth) is largely ignored with no consequences. Student absences are not always reported as covid related when they should be. Nearly 5% of EHS and EMS students tested positive within the last 2 weeks which is right in line with the rate of infection in Enumclaw. This accounts for only some of the absences that makes learning challenging at best. OSPI and DOH have both said that the decision remain open or to close for in-person learning is one that's to be made by local school boards, while the board seems to say that it is up to DOH to make the call.	1/14/2022 4:32 PM
252	With the covid virus spreading mso quickly right now, I would like Enumclaw school district to switch to remote learning. I also would like to see a testing location for students and family members to get tested.	1/14/2022 4:31 PM
253	Please enhance online learning for students that are out of school because of sickness. Thanks for your work	1/14/2022 4:30 PM
254	I feel strongly that staff and students should get vaccinated BUT I strongly disagree with it being required because ultimately everyone should be free to make their own medical decisions. I very much appreciate the mask requirements and distancing which are proving to very effective in preventing the spread of covid in our schools.	1/14/2022 4:29 PM
255	So thankful for all ESD does to keep our kids safe and in school!	1/14/2022 4:29 PM
256	Test at school should be administered properly. Tests are'nt timed 15min like they should. I was told it was only being checked after 10 minutes then thrown away. Need to look for a very	1/14/2022 4:28 PM

## COVID-19 Safety Protocols and Preventative Measures

faint line also, as that's a positive test. Had a student be negative Friday and Monday, and went home right after Monday test and tested positive with at home kit.

257	I believe that staff and families of students should be able to make their own decision on masking and vaccines. It should not be a requirement for the kids to mask or vaccinate.	1/14/2022 4:27 PM
258	I don't think anyone should have to get any vaccine to keep their job or stay in school. It should be a personal choice	1/14/2022 4:27 PM
259	I will pull my 5 year old out if required to get vaccinated (although we are). Experimental gene therapy is not something we are comfortable subjecting our child too.	1/14/2022 4:27 PM
260	Masks should be removed from students and staff. Forcing educators to get vaccinated is against their human rights and should NOT be forced upon or they loose their job. Discussions about having the Covid-19 vaccine a requirement for students should NOT be discussed as there are not enough studies.	1/14/2022 4:27 PM
261	Vaccines are a personal decision, should never be required	1/14/2022 4:25 PM
262	It's time to remove these ineffective and unnecessary restrictions placed on staff and students. Let our students breathe and get back to normal. These restrictions are the most ridiculous and unscientific measures and do nothing to prevent the spread of COVID yet do everything to prevent learning and development. COVID Omicron has been shown to be no worse than a common cold yet we allow it to prevent our students from quality education. Please be leaders that lead, stand up for our students and get back to enriched learning. Thank you.	1/14/2022 4:25 PM
263	I believe to continue in school learning all students should be required to use the N95 mask approved by the CDC. If these masks can be distributed by the state/schools to the student. I think we very well may see a down tick in exposure cases.	1/14/2022 4:24 PM
264	I absolutely do not think that vaccine requirements should be placed on students for something that will need a ongoing vaccine similar to the flu as the flu shot is not a required vaccine for school.	1/14/2022 4:24 PM
265	I think weekly testing for students and staff is the most important step we could take to protect health, even if vaccinated. Mask wearing is not effective enough to keep safe. My children were asymptomatic and we would have never known they had Covid. It was only myself, who doesn't go anywhere, that showed symptoms to prompt testing. Kids mostly had it for days before we knew. Weekly testing should be the most important step for all! Set up the a rotation by class for testing cycles.	1/14/2022 4:24 PM
266	Masking & Vaccines should be personal/family choice. No judgement or discrimination either way. If you are sick with ANY type of transmutable illness you should stay home until all symptoms pass. That's just common sense. The way you phrased your questions, are very misleading. Requiring "mandatory vaccination" is a totally different question than "receiving an exemption". They can not be put into the same question. You have skued the questions to get your desired response.	1/14/2022 4:22 PM
267	Unless they get tested onsite, 3 times weekly is excessive. I. Regards to finding a place to test.	1/14/2022 4:22 PM
268	I don't want to go back to distance learning I feel it hurt my kids in the long run. We need to learn to adapt to this new norm of having the virus seljnd	1/14/2022 4:22 PM
269	There is sufficient data to prove the layers of mandates (especially in 2022 with current trends) are unnecessary. I am not one of those parents screaming to take masks off and the vaccine is killing people, but with the current actual data (not the STORIES in the media), I 100% support making masks and vaccinations optional. For those that feel safer with them, that is great for them and I support them 100%. For those that wish not, there is enough data to support their wishes to not which I also support 100%. This is more critical for kids that may have autism, etc. that are struggling with the mandates and masks stripping them of critical years for mental and social growth in their lives (that actually applies to all kids). If we want to ensure the safety in a practical way, temperature checks prior to entering school would be a much more cost-friendly, and honestly safer way to ensure extra safety. Parents should have a pulse on how their kids are and not send them to school sick, but an extra temperature check at school would offer more protection than masks do. As a Guillain Barre patient (total paralysis due to flu vaccination), and a family history on my wife's side for heart disease (long	1/14/2022 4:20 PM

## COVID-19 Safety Protocols and Preventative Measures

QT), required vaccinations would force us to remove our kids from public schools because they are never going to get one. That would be a massive blow.. Both of my kids have mild autism and so very much need the structure, and the social interaction. Removing them now would change their lives forever which would be heart breaking. But is exactly what we would have to do in that scenario. The teachers are doing an awesome job with what they are facing, I appreciate them and the rest of the faculty very much, I know it is not easy and we very much appreciate you all!

270	We appreciate the survey. Teachers need to not reprimand students for incorrect masking. We need to deescalate the drama and covid theatric eg teachers on social media complaining about students who come to school with allergies (██████████ did this) ██████████ giving excessive referrals Inappropriate pushing of vaccines by staff Staff using covid to push political ideologies	1/14/2022 4:20 PM
271	I do not feel there is consistency in the following of the rules between schools and programs. I do not feel there is a strong enough administrative presence at indoor athletic events at our schools specifically the high school in terms of Covid protocols. I also do not feel the Covid dashboard represents a true picture of the district Covid cases, close contacts and quarantine status.	1/14/2022 4:20 PM
272	I think the safety protocols taken by ESD have done and continue to do nothing to actually mitigate the spread of the virus and are nothing but theater to make people feel better because they are taking action. The virus has never been lessened because of masking. More people are vaccinated now than last year at this time and yet our cases are up. The virus has followed typical viral mutation patterns and become less deadly over time. It is time to remember that people get sick, cold and flu season happens every winter, and return to living.	1/14/2022 4:19 PM
273	We strongly believe that any business or institution that forces people, especially our precious children, to take an emergency approved vaccination in order to receive things like public education is extremely wrong. We will choose to pull our children from the public school system if that decision is made.	1/14/2022 4:18 PM
274	If someone tests positive, doesn't the current CDC guideline recommend a mask for 5 days after the 5 day isolation period? What about when students are eating lunch? Don't they remove their masks?	1/14/2022 4:18 PM
275	You're doing great!! We appreciate you.	1/14/2022 4:17 PM
276	Many kids at TMMS are wearing "fake" masks made of mesh or are wearing masks below their nose. There seems to be no consequences.	1/14/2022 4:17 PM
277	Maybe consider bringing back screening and temp check during drop offs..	1/14/2022 4:16 PM
278	This is all non sense! Covid is the new flu! We are going to be moving out of state if Enumclaw doesn't wake up! Done! This is completely ridiculous! Adults, children, staff should never be told they must inject themselves with a substance that we will not know the ingredients of for 55 years! Wake up Enumclaw! Masks hinder learning masks hinder expression masks are hands-down awful! We are done as a family and will be removing our children from the public school system after this year!	1/14/2022 4:16 PM
279	People should be able to choose what goes into their body. This vaccine in my opinion is not helping to slow the spread and is pointless. If it becomes mandatory for my kids to take this vaccine or get an exemption they will be taken out of the school district and we will be home schooling if it comes to that. I will not give my children this vaccine.	1/14/2022 4:15 PM
280	I'd love to see the school promote and provide more widespread testing opportunities and access to vaccines.	1/14/2022 4:15 PM
281	I agree with masking as long as the school district actually enforces it, otherwise it is an unnecessary burden on staff and students. Requiring vaccination violates peoples personal rights to make their own medical decisions. I would rather remove my child from public school.	1/14/2022 4:15 PM
282	Unmask our kids! I won't be continuing to use public schools next year if we can't figure out a way to keep masks off our children. It's doing more harm for our young ones development then the virus at this point. I appreciate the ability to give feedback, and I don't envy your position.	1/14/2022 4:15 PM
283	My kids cannot do online school again- please keep us in person at all costs!	1/14/2022 4:15 PM
284	Thank you for doing your best to keep our community's children safe and healthy!	1/14/2022 4:14 PM

## COVID-19 Safety Protocols and Preventative Measures

285	Keep our kids in school! Remove the masks! If vaccination is required for my children to attend public school, they will no longer be attending. I appreciate the teachers and staff of the Enumclaw School District tremendously and I hope that my children can continue their education within the district for years to come!	1/14/2022 4:14 PM
286	Let our children breathe! It has been proven that the masks do nothing. As for the vaccine, it too has been proven to do nothing. It does not prevent you from getting "Covid" nor from spreading it. Mandating this "vaccine" will prove to be detrimental to the schools. The number of staff you will lose along with the withdrawal of students will be astronomical.	1/14/2022 4:14 PM
287	We have two years of data that clearly shows masks don't work. We have data that these so-called vaccines don't work as vaccinated people who wear masks are getting infected at the same rate as unvaccinated people. Plus, none of this guidance takes into account natural immunity. The states without mask mandates in schools have the same or fewer Covid cases than oppressive states like Washington. As somebody who is unvaccinated and got Covid, it is ridiculous that we have shut down the world over a simple cold. Since I was infected by a vaccinated mask wearing person, I have first hand knowledge of the futility of these supposed safety measures that are really designed to control people and erode individual freedom.	1/14/2022 4:14 PM
288	I believe masks should be a choice. The masks are incredibly detrimental to my children. My youngest child cries every day and asks to be homeschooled. My older child has become angry because she is so tired of being reprimanded when her masks slides below her nose. Vaccines should be optional. My kids will not be getting the vaccine. If it is mandated they will have to either get an exemption or be homeschooled. Whether staff or coaches get vaccines is none of my business. I have no idea if any of our staff has other vaccines. I have no idea if they have any other contagious disease. Any of them could be HepC, herpes, or hiv positive and we would never know.	1/14/2022 4:14 PM
289	Fear of vaccine mandates for students is the sole reason we are withdrawing from public school. I know my family isn't alone in this thought.	1/14/2022 4:13 PM
290	Mandating Vaccinations and testing is unconstitutional and wearing masks is pointless. COVID is no different than the flu and we are all used to our family friends and children getting sick.	1/14/2022 4:12 PM
291	Response to question 10: If ESD feels it should test ANYone on a regular basis, it should be testing EVERYone. We know that the vaccine does not stop the spread. In fact, my husband has been the only positive in our household and he is also the only vaccinated member. In addition, why would this rule only apply to athletics if it's truly valuable?	1/14/2022 4:12 PM
292	I strongly disagree with making our students get the vaccine. You will see a massive exodus of students if it comes to that. Masks are nothing but a piece of fabric covering our children's faces. It should be a choice whether to wear it or not. Testing three times a week for athletes seems obsessive. I am glad you are not singling out the unvaccinated. Thank you for this survey.	1/14/2022 4:12 PM
293	This is all beyond ridiculous. Let our kids BREATHE mask free! If vaccines are required, I will withdraw both of my children. Medical freedom is our right.	1/14/2022 4:12 PM
294	The Covid dashboard has not been updated daily.	1/14/2022 4:11 PM
295	Thank you for continuing to make choices to keep students safe even when those choices are not approved of by some in the community. Those are loud voices, but they are not everyone's opinions.	1/14/2022 4:11 PM
296	Thank you all for your hard work and dedication through these crazy times.	1/14/2022 4:11 PM
297	I'm surprised schools are in person right now with how many students are getting covid and spreading. Don't think best interest for kids. Understand they need the social aspect but maybe something can be done with that.	1/14/2022 4:11 PM
298	I think they should take the masks and throw them in the garbage. Nobody should be mandated to get the COVID vaccine. We should live life like we did before this all started. Everyone needs to make their own choices during these times and should not be persecuted because of those choices.	1/14/2022 4:11 PM
299	I do not agree with mandatory vaccination this should be a parents choice not the government!	1/14/2022 4:11 PM
300	It's time for the masks to come off. People are getting Covid vaccinated or unvaccinated. Masked or unmasked. It's time our children have a choice. My body my choice right?	1/14/2022 4:11 PM

## COVID-19 Safety Protocols and Preventative Measures

301	I don't feel that any child or staff member should be forced to receive a vaccine to attend school. I wonder how much the masks are actually preventing the spread of COVID? I don't see it necessary for kids to wear unless it's their choice although my kids don't seem to mind wearing them	1/14/2022 4:10 PM
302	Covid in one or more variants is here to stay. As the flu/colds and other viruses are. People are educated on their own health best and should be allowed to make their own choices to keep themselves and their families safe. No mandates. No required testing. NO MASKS.	1/14/2022 4:10 PM
303	I feel my elementary school is doing a great job handling Covid regulations and communicating with parents. However i feel the middle school is doing an awful job communicating and restrictions for Covid.	1/14/2022 4:10 PM
304	This debate is over. COVID is not a threat to any child, and teachers and students should always have the right to choose which vaccines they want to take.	1/14/2022 4:10 PM
305	Masking and vaccines should be a personal choice. Our preschool and young elementary students need to see facial expressions for their development.	1/14/2022 4:10 PM
306	I believe my child immensely from remote learning. We are still catching up and not even close to where we should be. Remote learning, especially how to was handled by the district the first time, would be devastating to his education.	1/14/2022 4:09 PM
307	It's ridiculous that the proven herd immunity is not being allowed to populate. Those at risk only are the ones that should have to take precautions, not blanket mandated regulations.	1/14/2022 4:09 PM
308	No vaccine for Covid Parents choice on vaccines No masks If a parent wants their child to wear a mask that is their choice .	1/14/2022 4:09 PM
309	My 12 grader says you don't make the kids wear masks & there is not much to stop the spread of covid.	1/14/2022 4:09 PM
310	Kids should not have to deal with this virus when it does not even affect them. It's pathetic.	1/14/2022 4:09 PM
311	The vaccines are far more harmful to kids than helpful. There are many side effects among kids that get the covid vaccine. On top of that kids barely show symptoms, and definitely do not die from covid. Vaccine should never be mandated anywhere especially for children.	1/14/2022 4:08 PM
312	Stop with all this insanity. It's time to move on.	1/14/2022 4:07 PM
313	Take notes from Florida. Get a better Governor. Inslee is destroying our state and health.	1/14/2022 4:07 PM
314	School busses need to be dealt with. More hand sanitization and maybe classes on cleanliness and health?	1/14/2022 4:07 PM
315	I dont think anyone should be forced to get a vaccine they don't want. I definitely agree with frequent testing.	1/14/2022 4:07 PM
316	I believe there's to many restrictions. Kids should not be wearing masks all day and the vaccines should be optional. It's only supposed to help the person who has taken it so it shouldn't matter if someone hasn't. More and more information on it harming people, causing heart problems in adults and children, that is not a vaccine. It is an experimental drug and should not be forced on anyone	1/14/2022 4:07 PM
317	I appreciate the effort the school district has made getting our kids back into school full time and there dedication to following safety protocols in order to keep kids and staff healthy.	1/14/2022 4:07 PM
318	Having Covid and recovering from it should be a factor taken into consideration. Yet no one talks about it or even includes it in the survey.	1/14/2022 4:06 PM
319	Get rid of all restrictions. Strongly favor going back to normal!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!	1/14/2022 4:06 PM
320	Of vaccines are mandated for students we will be pulling our student and home schooling.	1/14/2022 4:06 PM
321	If vaccines are mandated for students, we will pull all 3 of our ESD students from the district. 100%	1/14/2022 4:06 PM
322	Please enforce vaccine mandate.	1/14/2022 4:06 PM
