

Strategic Plan

The Strategic Plan for St. Mark's Episcopal School was adopted by the Board of Trustees in May of 2019. After a year of work, where do we stand now? How has the current climate impacted our goals? We're pleased to provide a brief overview of this important work in the life of our school.

We launched the 2019-20 school year by forming four task forces to lead the efforts at addressing each of our four strategic goals. Each task force has two leaders and a team of about 8 faculty and staff members.

GOAL ONE

What Have We Worked On?

Curriculum Mapping has been greatly strengthened to provide a clear view of the learning experience

A comprehensive database was developed of all analog and digital resources

New tools were identified to assess prospective students

Scheduling strategies were identified to allow teachers more time to collaborate

How Does the Current Environment Shape this Goal?

Distance learning has advanced our ability to assess curriculum, resources, and future needs

Distance learning has also influenced professional development focus for the year ahead

Scheduling and creating opportunities for collaboration is even more important in a potential hybrid or distance learning environment

We are committed to continually exploring and implementing teaching resources and strategies that support the development of the whole child through their years at St. Mark's.

GOAL TWO

We are committed to continually exploring and implementing teaching resources and strategies that support the development of the whole child through their years at St. Mark's.
