

Preschool News

January 2022

The cold and snow this month shortened the amount of time we were in school, but provided a fitting background for many of our classroom lessons.

The three year olds focused on winter and the seasonal changes that come with it. They learned how people and animals adapt to cold temperatures. They also talked about transportation, and used cars and trucks as painting tools. They worked with the letters L, M and N this month.

The four year olds also explored winter and winter weather. They talked about animals in winter, and how some animals hibernate, some migrate, and others adapt. They also focused on Arctic animals and penguins. The four year olds enjoyed a number of different literacy activities based on the story "The Mitten." They enjoyed retelling the story using the large mitten and stuffed animals.

Our Religion topics this month included the Holy Family and Baptism. The children visited the church to see the Baptismal font and the Paschal Candle.
