4	Friday 8 April 2022	Tuesday 17 May 2021	Friday 17 June 2022	

Quarter: 1, 2, 3, 4	Unit #	Unit Name/Title	Key Knowledge Area / Concept / Competence / Topic and Notes
	1	Number: discoveries and developments	Identifying and representing rational numbers. Evaluating negative and zero exponents. Simplifying expressions with exponents. Representing numbers in scientific notation. Performing operations with numbers in scientific notation
	2	Triangles: principles, processes and solutions	Solving problems involving right triangles using Pythagoras' theorem. Determining whether or not two triangles are similar. Using the properties of similar triangles to find missing measurements. Using trigonometric ratios to solve problems involving right triangles
	3	Linear relationships: impact of human decision-making	Representing linear relationships in different ways. Determining the characteristics of a linear relationship (gradient, y-intercept). Graphing linear relationships using a variety of methods. Understanding the relationship between parallel and perpendicular lines. Applying mathematical strategies to solve problems using a linear model
	4	3D shapes: products, processes and solutions	Calculating the surface area and volume of 3-dimensional shapes involving cylinders, cones, pyramids and spheres. Applying mathematical strategies to solve problems involving 3D shapes
	5	Bivariate data: what it means to be human	Representing bivariate data using a scatter plot. Representing data using a line of best fit. Calculating Pearson's correlation coefficient. Analyzing data and drawing conclusions

THE INTERNATIONAL SCHOOL IN GENOA  
SINCE 1966

	6	Geometric transformations: expressing beliefs and values	Transforming a shape by rotation, reflection, translation and dilation. Analyzing the defining features necessary to produce different types of tessellations. Applying mathematical strategies to solve problems involving geometric transformations, similarity and congruence. Creating a tessellation
	7	Linear systems: social entrepreneurship	Solving complex multi-step algebraic equations. Representing and classifying systems of linear equations. Solving a system of linear equations using graphing, substitution and elimination. Applying mathematical strategies to solve problems using a system of linear equations to help in decision-making
