

TECHNOLOGY AVAILABILITY PLAN

Signature Preparatory has prepared plans to furnish all teachers and staff with the necessary equipment and material for distance learning in the case that circumstances arise necessitating remote-only learning.

Signature Preparatory's plan builds on already integrated and established methods of remote learning instruction, and will provide all students and teachers with Chromebooks, internet access via Hotspots if students do not already have access to a sufficient internet connection, and Zoom subscriptions for teachers to facilitate remote instruction.

The below table shows estimated costs for implementation of Signature Preparatory's technology availability plan. This estimate includes providing Chromebooks to all teachers and students, many who already have Chromebooks, providing Wifi Hotspots to one third of students and teachers who have the need, and providing all teachers with an annual Zoom subscription. The total figures displayed below are intentionally broad, actual implementation will likely cost substantially less than this estimated figure.

	Teachers	Students
Chromebook	\$500 x 70 teachers	\$350 x 900 students
Wifi Hotspot	\$100 each @ \$30/mo x 20	\$100 each @ \$30/mo x 300
Zoom Subscription	\$90 (annual) x 70 teachers	-
Total:	\$50,500	\$355,800
Overall Total:	\$406,300
