

# Rising 12<sup>th</sup> Grade Enrollment Form

## Step 1 – Commitment to LEAD

The instructional model at LEAD is very different than that used at Park Hill and Park Hill South High School. Because students have more flexibility with how they work through their coursework, and because student schedules are very different than a traditional high school, it is impossible to create a schedule mid-year at the home high school to match a schedule at LEAD. In addition, the Park Hill School District assigns staff to LEAD based upon student enrollment numbers and the needs of those students. This process keeps staff to student ratios consistent among both high schools and LEAD. Therefore, it is expected that students enrolling in the LEAD Innovation Studio program are making a binding year-long commitment. Once students turn in their enrollment paperwork, they are committing to LEAD for the entire upcoming school year. No students will be allowed to transfer back to their home school until the following school year. Additionally, students who do not enroll in LEAD by the enrollment deadline will not be allowed to transfer from their home school to LEAD during the school year. Should a student leave the district and return in the same school year, they will return to LEAD.

## Step 2 – Course Selection

Below are the courses you have selected 2022-2023 school year. Please look over these courses in case you want to make any changes. **A student may have more than 8 if they included summer school courses on their ICAP. If you don't have 8 total, write in your requests and your counselor will meet with you to review.** Once the master schedule is created, changing courses can only occur for the following reasons: computer error, prerequisite courses not met, duplicate credit, or increased rigor in schedule (if space is available).
