

Manage Browser Pop-up Blocker

Chrome:

- Click the 3 vertical dots ⋮ in the top right corner below the X.
- Click on **Settings**.
- On the left side menu, click on **Security and Privacy**.
- Click **Site Settings**.
- Scroll down and click on **Pop-ups and redirects**.
- To block pop-ups for a site, add the URL (web address) to the **Not allowed to send pop-ups or redirects** section.
- To allow pop-ups for a site, add the URL to the **Allowed to send pop-ups and use redirects** section.

Firefox:

- Click the 3 dashes ≡ in the top right corner below the X.
- Click on **Settings**.
- On the left side menu, click on **Privacy & Security**.
- Scroll down to the **Permissions** section and click the **Exceptions** button next to **Block pop-up windows**.
- To allow pop-ups for a site, enter the address of website then click the **Allow** button.
- To un-allow pop-ups for a site, select the listed website and click **Remove Website**.
- Click **Save Changes**.

Edge:

- Click the 3 horizontal dots ••• in the top right corner below the X.
- Click on **Settings**.
- If not visible, click the 3 dashes ≡ on the left to open the **Settings** menu.
- Click **Cookies and site permissions**.
- Scroll down and click on **Pop-ups and redirects**.
- Add sites to block or allow. Enter the site address and click **Add**.
