NOTE: All physical changes or initial construction work on fields must be cleared with 1) outdoor facility users through the Community Education office, 2) the school principal, and 3) the Facilities and Construction Department. Preparation of school premises for community activities shall not interfere in any way with the school program at the site.

The first review is to ascertain if the construction will adversely affect the users. The second review is to make sure that the principal and his/her staff have no concerns about the project. The third step (authorization) is the most detailed and must be done by contact with the appropriate facilities personnel with plans, specifications and work schedule. The fourth step will notify you of approval to proceed.
