

THUNDERSTORMS

Prepare and Share

Thunderstorms often create powerful winds, lightning and hail and cause flash flooding and tornadoes. Lightning is a leading cause of injury and death from weather-related hazards.

These storms also bring the risk of downed trees and power lines, which can cause loss of electrical power and cellphone service.

Here are some tips to help you prepare. Please share this information with family and friends.

- When thunder roars, go indoors.
- Move from outdoors into a building or car.
- Pay attention to alerts and warnings.
- Unplug appliances.
- Do not use landline phones
- May include powerful winds.
- Make sure you are signed up for Community Alerts at West Hartford's Community Advisory Notification System on the Town's website: westhartfordct.gov

For more information on how to prepare, please visit the FEMA website at ready.gov
