

DECEMBER 2021

OSHKOSH AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

WHAT'S NEW?

In the past month, the Oshkosh Area School District has confirmed that the New Middle School will be named "Vel Phillips Middle School" in honor of the former Secretary of State for Wisconsin. Two specific areas of the new school will honor the other two finalists for naming the new middle school; these areas are Jessie Jack Hooper Media Center and Paul H. Poberezny STEM Classroom area. The School Board then directed the District Administration and associated principals to come up with the mascot for the building. Also, in mid-December, the District received bids on the Vel Phillips Middle School project. The OASD and Bray Architects will be working with the apparent low contractor to do a thorough review in preparation for work to begin this February.

PLANNING & DESIGN UPDATE

The Vel Phillips Middle School project reached a major milestone by receiving Oshkosh City Council approval for rezoning the properties on the proposed site. This step also included the approval for the Planned Development process which the City of Oshkosh requires for a project of this magnitude. The final step before construction can start is obtaining Site Plan approval from the City Planning and Engineering departments.

Regarding the Secure Entry Projects at Read Elementary School, Oakwood Elementary School, North High School, and West High School, these projects went out to bid in mid-December to four different pre-selected General Contractors. Contractors will begin to review the drawings and there is a pre-bid meeting and walkthroughs of the existing buildings in early January.

PLANNING & DESIGN UPDATE - continued

These projects will receive bids at the end of January, with a scope review to follow. The goal is that these projects will begin construction in late February and be completed by early August of 2022.

WHAT'S NEXT?

- » In January, the OASD and Bray Architects will start design work on the New Elementary School to be located at the current Webster-Stanley site. The goal is to complete the design of this project by November of 2022. The process will begin with tours of newly constructed elementary schools. In addition, design meetings focusing on the overall site and building layout will occur.
