

MAY 2021

OSHKOSH AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

WHAT'S NEW?

Related to the Secure Entry scope of the referendum the District has selected Miron Construction as the General Contractor on this summer's Secure Entry projects as they were the qualified low bidder. As contracts and meetings are set up on this summer's work, the District has kicked off design meetings with Bray Architects on the second round of Secure Entry projects that would occur in 2022.

PLANNING & DESIGN UPDATE

On the new middle school, Bray Architects and members from OASD that formed a Core Planning Team have continued to refine the exterior and interior design/layout of this new building. Please see preliminary renderings of the building below.

As Bray Architects and Oshkosh Area School District kick off conversations regarding the next round of schools that will receive secure entrance projects, the first thing we are doing is taking a fresh look at the design intent and potential floor plan revisions. There will be exciting updates to come on this in the coming months!

WHAT'S NEXT?

- » A traffic study will be conducted over the next few weeks as it relates to the new middle school site, information gathered, and a report generated for engineering review.
- » Ongoing dialogues continue with City officials on making this site enjoyable and feasible for all parties.
- » Continued user group meetings with staff and community members.
